				Needs Assessment for the State's Ocean Litter Prevention Strategy and building a cross-border Marine Debris Leadership Coalition in the Tijuana River Watershed, both offering valuable connections in this space across the state.				
Josephine Fleming	<a href="mailto:jofleming@environmentalin.com">jofleming@environmentalin.com</a>	Environmental Innovations, Inc.	307 Laguna St. Santa Cruz, CA 95060	Environmental Innovations, Inc. (EI, a Benefit Corporation, recognized B Corp, certified woman-owned small business, and Certified Green Business) provides zero waste consulting services to businesses, municipalities and institutions. Our passion is to reduce single-use waste and any waste, encourage reuse and circularity in waste in California. We have assisted thousands of food service businesses throughout the State to switch to reusable and/or compostable foodware. We've helped over 50 municipal clients examine and improve upon their zero waste efforts and meet CalRecycle mandates. EI has significant experience in creating environmental solutions that encompass deep collaborations and public/private partnerships to achieve quantifiable results. We are a leading partner for municipalities to do	Yes	No	Yes	Yes

				outreach to small businesses, particularly restaurants and food facilities. We have designed and implemented foodware outreach and stakeholder engagement programs for several municipalities and have a wealth of experience and expertise that could be leveraged. Through our work, we have gained valuable insights into what works and what doesn't, identifying constraints, barriers, and motivators that encourage people and businesses to make changes. We are particularly adept at and focused on offering culturally relevant and language-specific outreach to ensure that our programs are equitable in their reach and serve diverse communities, including traditionally underserved businesses. In addition to our zero waste work, we also serve as staff to the California Green Business Network, a nonprofit providing the technical assistance businesses need to meet and exceed regulatory requirements.				
Sheng Su	<a href="mailto:Susheng2009@gmail.com">Susheng2009@gmail.com</a>	Sustain You	1704 Devonshire Dr. Benicia, CA 94510	Company Capabilities: Organic Waste Conversion for SB 54 Needs Assessment Our company specializes	No	No	No	No

				in advanced organic waste conversion technologies, utilizing innovative fermentation and processing methods to transform food and agricultural waste into high-value products, including: Animal Feed: A nutrient-rich, sustainable alternative to traditional feed, rapidly produced through optimized microbial fermentation. Organic Fertilizer: A high-quality soil amendment derived from fermented organic materials, enhancing soil health and reducing chemical fertilizer dependency. Industrial Materials: Bio-based alternatives for various applications, including biodegradable packaging and sustainable input materials for manufacturing. Our proprietary conversion machines efficiently process organic waste within 24 hours, ensuring minimal emissions, no wastewater discharge, and a fully circular system that aligns with SB 54's source reduction and sustainability goals. We can tailor our technology to fit specific waste streams and operational requirements, supporting CalRecycle's initiative for innovative

				material design and waste reduction strategies. Our company specializes in biotechnology-driven waste conversion, utilizing rice and corn waste to produce modified starch and 100% natural plant fibers without any additives. These sustainable materials serve as the foundation for: Biodegradable & Edible Drinking Straws: Made entirely from plant fibers, our straws offer a plastic-free, chemical-free alternative to traditional plastic and paper straws. They are durable, compost, and safe for consumption. Sustainable Alternatives to Plastic Straws: Designed to replace single-use plastic straws, our biodegradable straws provide retailers with an eco-friendly solution that meets growing consumer demand for sustainable products. Alternative to Paper Straws: Unlike paper straws, which often disintegrate in liquids, our plant-based straws maintain durability without coatings or synthetic binders. Our products align with SB 54's source reduction goals by reducing plastic dependency and promoting circular economy solutions. These biodegradable alternatives are ideal
