P.O. BOX 4025, SACRAMENTO, CALIFORNIA 95812

December 27, 2017

**To:** All Prospective Contractors**RE:** "Debris Management for the Thomas Fire in Ventura County" DRR17089

**Addendum  
To the Request for Proposal (RFP), Primary DRR17089**

1. Attached is a list of all businesses who have expressed an interest in the contract to date (Attachment 1).
2. The following questions were submitted in response to the IFB and answers to each follow the question.
  - Q1. **WATER TRUCK CALCULATION:** The calculation of the Water Truck Cost is a daily rate based on a 10 hour day; however, the calculation for 3 water trucks appears to be for 10 hrs. /day which is confusing. It would make sense to delete the "10 hours" from the equation and leave it at 2 water trucks per day (regardless of the number of hours). What does this imply about a 9 hour day or an 11 hour day? Is this a pro-rated rate and are you implying the rate is variable based on over or under 10 hrs. per day?
    - A1. The calculation will be revised to: \$ per hour in the Rate column, and 1 # truck per day in the Hours/Day column. Please note that although the Cost Proposal quantity is being revised down to 1 truck for the bid calculation total, CalRecycle anticipates using 3 water trucks on the project.
  - Q2. **PROPOSAL DUE DATE:** Please confirm the due date. It shows as 1/02/2018 and 1/03/2018 in different sections.
    - A2. The correct proposal due date is January 3<sup>rd</sup>, 2018.
  - Q3. **LOADED LAB COSTS IN EQUIPMENT RATE:** Please consider removing the laboratory analyses from the Air Monitoring Equipment daily rate so "all subcontractor lab fees" can be paid directly. It is expected that various air sampling methods and turn-around-times will be requested which will require change orders. By removing the laboratory analyses, all lab fees could be billed directly regardless of turn-around-time with no markup. No change orders would be necessary.
    - A3. For the Air Monitoring Equipment daily rate, we will remove the laboratory analysis from the daily rate. The Laboratory Markup on analysis will now apply

to all lab work for the project, including for soil and air samples. CalRecycle will require that soil samples and air samples be itemized separately on lab invoices, with the soil sample costs being allocable down to the individual property address and the air sample costs being tracked as an overall community cost.

- Q4. HOTEL COSTS: Research indicates a substantial variance in cost for hotels in the work area. Loaded rates would need to be higher than previous projects. Would CalRecycle consider hotel costs from the loaded rates? This one cost seems to be driving the loaded rates and the hotel cost could be tracked separately if those costs could be billed directly. If this is supported, would a markup be allowed?
- A4. We will not consider separate billing for lodging costs. Please propose all lodging costs as included in the fully loaded field staff rates.
- Q5. The RFP lists two different due dates (see pages 2 and 7). Please confirm the due date.
- A5. See answer to Question 2 above.

All other terms, conditions, and requirements of this RFP will remain the same. If you have any questions relating to this RFP process, please contact me by e-mail at [contracts@calrecycle.ca.gov](mailto:contracts@calrecycle.ca.gov).

Sincerely,

*{Original Signed By}*
