

**DEPARTMENT OF RESOURCES RECYCLING AND RECOVERY**1001 I STREET, SACRAMENTO, CALIFORNIA 95814 • WWW.CALRECYCLE.CA.GOV • (916) 322-4027

P.O. BOX 4025, SACRAMENTO, CALIFORNIA 95812

January 17, 2019

To: All Prospective Contractors**RE:** "Fire Debris Removal and Recovery Services for the Woolsey & Hill Fires in Los Angeles and Ventura Counties" DRR18092**Addendum 3
To the Invitation for Bids (IFB), DRR18092**

1. A revised IFB has been posted. Changes made in the IFB are shown as: Text additions are displayed in **bold** and underlined and text deletions are displayed as strikethrough text (i.e., ~~strike~~).
2. A draft Debris Removal Operations Plan (DROP) for the Woolsey & Hill Debris Removal Incident has been posted as part of this Addendum at <https://www2.calrecycle.ca.gov/Contracts/Advertisement/1948>. The draft DROP is labeled as "Miscellaneous".
3. Attached is a list of all businesses who have expressed an interest in the contract to date (Attachment 1).
4. The following questions were submitted in response to the IFB and answers to each follow the question.
 - Q1. I have a water truck company. I'm a SB-DVBE and was wondering if CalRecycle is looking for owner operated water trucks for fire cleanup in LA Ventura County. I received the email you sent me and saw the list of contractors, so I was wondering do need to reach out to all 400 contractors for a job? Or can I get hired directly from CalRecycle? I can't be a prime so I need to be a subcontractor.
 - A1. CalRecycle will only be hiring a prime contractor for this project, and will not be directly hiring any subcontractors.
 - Q2. Is there a list of prime contractors interested in this bid? I am a small business interested in working with them.
 - A2. CalRecycle does not have a list of prime contractors. A list of interested parties for this IFB is available as Attachment 1 to this Addendum. You may also look at previously awarded contract notifications available on our website at <https://www.calrecycle.ca.gov/Contracts> to determine who has been awarded and worked on past fire debris removal contracts.

- Q3. Item 51 mentions crew. What size is the crew?
- A3. For Item No 51, Property Owner Assistance, the crew size is intended to be 3 people, 2 laborers, and 1 operator/foreman.
- Q4. Item 53, is stump grinding necessary, if not how low do you want the cut?
- A4. Stump grinding is not necessary. Trees are to be cut as low to the ground as is feasible.
- Q5. How long is the required meeting for the bid and where is the location?
- A5. Please see Addendum 1 for meeting location which took place on January 7th, 2019.
- Q6. Do subcontractors have to be registered with DIR?
- A6. Prime contractors need to be registered with DIR and are responsible for the certified payroll submittals. It is the responsibility of the Contractor to comply with all laws and regulations, including assuring that subcontractors have obtained any registrations required by law.
- Q7. Item 1 for water truck says 5000 gallon truck. 5000 is an non standard and unusual size. Standard water trucks are 4000 gallon trucks. Can you change the requirement from 4000 to 5000 gallon?
- A7. A 4000 gallon water truck is acceptable.
- Q8. Are there any certified payroll requirement submissions by the prime and the subcontractor, if so what are they?
- A8. Certified payroll is required to be prepared by the prime and subcontractors and available to CalRecycle as requested. The Contractor is also responsible for complying with all laws and regulations relating to certified payroll submissions to DIR, and assuring that subcontractors are complying with applicable laws and regulations. CalRecycle, CalOES, and/or FEMA may perform spot check reviews during the project and may request copies at any time during the project or after the project is complete during any project auditing.
- Q9. Does the subcontractor for tree removal have to have a D49 license?
- A9. A D49/D61 license is required for tree removal work.
- Q10. Question 53-53-Tree removal. The SOW says "Most tree materials can be left on the lot, with material being reduced to 16" rounds of wood." Does the 16" refer to the tree trunk only or all wood including branches. If it also includes branches, what is the minimum thickness? At what height should the stump be left at?

- A10. This is determined by the homeowner and Operations in the field. If the homeowner wants the wood, the 16” rounds of wood are left behind and refer to the tree trunk. Branches and trunk not wanted by the homeowner and Operations are disposed of along with the burn ash and debris and paid under that Bid Item.
- Q11. Is hazardous removal certificate and Haz transporter license required, if so by whom?
- A11. Licensing and certificate requirements are described in the IFB in Section III, Bid Submittal Requirements, under the Qualifications/Licensing section. A hazardous waste transporter license is only required when transporting the very limited designated hazardous waste from this project. The burn ash and debris, and contaminated soil material in this project is described as a material coming from a declared disaster, which can be handled as described in the DROP and does not fall under criteria used in a traditional, manifested hazardous waste removal project.
- Q12. Your solicitation mentions per diem but does not show a line item for bidding. Please explain per diem policies for this contract
- A12. Per diem, as well as all other items listed on pages 18 and 19 of the IFB is to be included by the Contractor in the rates submitted for the units of work identified. The only items of work or invoicing that will be paid are those listed in the Bid Schedule, unless through an approved Change Order.
- Q13. Would CalRecycle be interested in one laboratory partner to support all contractors on future wildfire cleanup efforts?”
- A13. This contract solicitation is for debris removal and does not contain lab services. Lab services for the CalRecycle managed fire debris cleanup projects, and CalRecycle may consider separate lab services contracts in the future.
- Q14. Based on the work we have performed for the “Sonoma Fire” have the clean-up goals been established for the Camp Fire and the Woolsey Fire? For example, we used the Tubbs clean-up goals for the Sonoma Fire.
- A14. No they have not and will be developed by CalRecycle’s consultant. The draft DROP is included for reference, but the cleanup goals are a blank Appendix at this time.
- Q15. Could you please provide a list of the contractors and corresponding contracts, with final contract \$\$ values, to provide both Management and Fire Debris Removal Services that CalRecycle has awarded in the past 5 years?
- A15. The excel document has been posted as part of this Addendum at <https://www2.calrecycle.ca.gov/Contracts/Advertisement/1948>. The file is labeled as “Miscellaneous”.

- Q16. The project is split into a number of sequential phases/items. Can these project phases/items be bonded individually in a stepwise approach to enable smaller companies with a high level of experience in disaster management and a slightly lower bonding capability, the opportunity to bid?
- A16. The prime contractor needs to meet the bonding requirements on its own.
- Q17. Can a highly experienced disaster management company without a California GC licensee partner with another experienced disaster management company who has a California GC license in order to provide bonding for the full amount requested where either company alone would not reach the 25% bonding amount specified, enabling smaller and experienced disaster management companies the opportunity to bid?
- A17. The prime Contractor alone will need to meet the project bonding requirements.
- Q18. Can you provide a copy of the Contractor List of attendees to the Pre-Bid Meeting on 1/7/19?
- A18. Please see Addendum 2.
- Q19. When you get a chance can you please send me a copy of the plan holders list for the Woolsey and Hill Fires- DRR18092? Earlier today I submitted my company's information on the Contact Form. My company is interested in bidding as a subcontractor.
- A19. There is no "plan holders list" per se, as per normal public works bid projects, but CalRecycle maintains an interested contractor's list attached herein and Addendum 2 contains a list of attendees from the Pre-Bid Conference.
- Q20. Can I give out pricing for both fire cleanup Camp and Woolsey fires?
- A20. Yes. The State intends to award three separate contracts to separate prime contractors for the Camp Fire cleanup, two roughly evenly divided for the Town of Paradise and one for the areas outside of the Town of Paradise. The work within the Town of Paradise will be awarded to the two lowest responsible and responsive bidders on that Bid Schedule. In the instance that the same contractor is the lowest bidder on all work on the Camp Fire, the Bidder will be allowed to choose the contract they want, with the other awards going to the next lowest bidder(s).

The contract for the Woolsey/Hill Fire cleanup will go to the lowest responsible and responsive bidder for the project. In the instance that this Bidder was also awarded a contract from the Camp Fire project, the Bidder must demonstrate in their proposal the availability of separate resources to meet the staffing, debris

removal crew, and other resources required to successfully complete both contracts.

Q21. I am inquiring on the above project and wanted to know if there was a set of plans associated with it?

A21. There is no plan set per typical public works construction projects, however the project scope is described in the content of the IFB and the draft DROP included with this Addendum.

Q22. Is it possible to get the sign-in sheets for the Pre-Bid meeting as we will be bidding this as a sub and just wanted to be clear on who we can work with? Also was the Pre-Bid meeting a requirement for subs as well as primes?

A22. Please see Addendum 2 for a list of attendees. The Pre-Bid meeting is a requirement for only primes.

Q23. Kanan Rd is a main access road between Hwy 101 and Malibu. It currently has truck weight and axle restrictions. Will these restrictions be waived for this project?

A23. No.

Q24. Does Community Traffic Control bid item need to include the cost of encroachment permits in the bid price?

A24. No. CalRecycle is not aware of any encroachment permits required in response to this declared disaster. If there are any required during the project, they will be addressed through a Change Order.

Q25. Do traffic control crews need to be fit tested and wear respirators and Level C protection?

A25. Rather than answer the specific Health and Safety or PPE requirements for any single class of personnel on this project, CalRecycle offers the following references that apply to the overall project.

IFB, Page 30, Description of Work, paragraph 3 and 4:

“All work will be conducted as determined by both CalRecycle’s Health and Safety professional who will prepare a Community Health and Safety Plan and the Contractor’s Health and Safety professional who will prepare a Health and Safety Plan for the Contractor’s employees and sub-contractors.

All site personnel who are tasked to enter an exclusion zone and Superintendents shall be currently certified for Hazardous Waste Operations and Emergency Response (HAZWOPER) in accordance with Title 29, Code of Federal Regulations (29 CFR), Section 1910.120 and Title 8, California Code of

Regulations (8 CCR), Section 5192. The site superintendents shall have appropriate experience to adequately perform the tasks outlined below. Based upon CalRecycle's experience, the Contractor is advised that all personnel entering and leaving the exclusion zone will be required to wear Level C protective attire or Level D with N95 masks and Tyvek coveralls depending on the work zone and hazard level. The Contractor's Health and Safety professional and the Contractor are ultimately responsible for the Health and Safety of the contractor's employees and subcontractors and the appropriate PPE required for the various work zones and hazard level on this project."

The draft DROP is released with this Addendum and can be found on the solicitation detail page as a "Miscellaneous" document, and is more specific on PPE, specifying the following:

DROP, Page 10:

"All personnel entering and leaving this area will be required to wear Level C protective attire in the exclusion zone or Level D with the option of N95 masks and Tyvek coveralls outside the exclusion zone depending on hazards present."

DROP, Page 31:

"All on-site personnel working in the exclusion (hot) zone during debris removal operations shall be required to wear Level C PPE."

DROP, Page 73:

"Whenever a member of the asbestos assessment team or the asbestos clearance team enters the contaminated fire debris footprint (i.e., exclusion zone), protective equipment will be worn. Based on the anticipated hazard level, personnel completing asbestos assessments and clearance inspections will wear Level C PPE."

- Q26. For bid item 4 should we assume 150 crew days per each of the 2 crews for a total of 300 days on this bid, or should we assume 150 total days between the 2 crews?
- A26. Assume 150 total crew days of traffic control work for the bid and CalRecycle estimates the need for 2 crews to perform the 150 total days.
- Q27. Prevailing Wages Rates - please provide the DIR# to be used for this project.
- A28. The DIR number will be provided by CalRecycle after the contract is awarded.
- Q28. Water Source in the Burn Area - Is it contaminated? and if so, to what extent can it be used (if at all)? If an alternate clean (potable) water source is required, who is to provide it (and who pays for it)?
- A28. CalRecycle has not identified a water sources in the burn area. Although CalRecycle will assist in finding sources, it is the responsibility of the Contractor to identify and secure water sources to serve the project.

- Q29. Retention Held - How much, and for how long? when will it be released? at the completion of each Work Order or at the end of the project?
- A29. Retention will be released within 60 days of the work on a parcel being completed. The Contractor will work with the Finance Chief / Contract Manager on how to release the retention.
- Q30. Bonding: How much, and for how long? when will it be released? at the completion of each Work Order or at the end of the project?
- A30. The Bid Bond is the only bonding required at the time of the bid along with the notarized statement demonstrating the commitment to project bonding during the project. The project bonding will be required with each applicable issued Work Order per the terms of the IFB and contract. CalRecycle will work with the contractor to release the Work Order bonding soon after all activities described in the IFB are completed for each property.
- Q31. Disposal for asbestos waste - What options are available for the disposal of asbestos waste? Are specific landfills designated?
- A31. Disposal facilities for asbestos waste are identified in the draft DROP.
- Q32. Access to sanitary sewer - will there be access to the existing sanitary sewer system for filtered waste water (from asbestos decontamination units/showers? or will waste water need to be collected for disposal/treatment separately? if so, at who's expense?
- A32. CalRecycle does not know the access to sanitary sewer. Disposal to sanitary sewer will need to be secured and paid for by the Contractor.
- Q33. APCD/AQMD - who is the governing agency for this Solicitation?
- A33. The SCAQMD is the governing agency for air quality issue for this project.
- Q34. Electrical Power - Is a source available? or will all work require portable generators? Will refueling be the responsibility the individual sub-contractors or provided by others?
- A34. CalRecycle does not know the availability of electrical power for this project. Generator operation and maintenance would be the responsibility of the Contractor.
- Q35. Listing of subcontractors - Is it required to list all Subcontractors on the bid form? or will they be solicited by the Prime contractors after the award?

- A35. Subcontractors who will perform more than ½ of 1 percent (0.5%) of the work will need to be listed as subcontractors by a prime contractors at the time of award. Smaller subcontractors do not need to be listed at the time of the bid.
- Q36. Prime Contractors - Is there a list of Prime Contractors who are bidding this solicitation available? if so, where can it be found by subcontractors interested in bidding?
- A36. See answer 2.
- Q37. Items 10 & 10A establish a 3-man crew for a 10-hour day to complete the asbestos abatement work at a daily crew rate...however, Item 50 lists a per lot rate and Item 51 lists crew hours rather than a daily rate...What size crew and for what duration are we to base our pricing of Property Owner Assistance (item 51) on?...should we assume it would be the same 3 man crew (only billed per hour)?...same for the mobilization between lots (item 50)? please clarify what crew size should be included for Items 50 & 51.
- A37. Bid Items 10 and 10A are clear as written for asbestos abatement, and do not apply to Item 50 and 51. Item 50 is mobilization for a full debris removal crew between properties. For Item 51, the Contractor should assume one operator and two laborers for the homeowner assistance. In our experience, Item 51 is performed by staff from the debris removal crew for a few hours and then debris removal commenced using the same personnel.
- Q38. There are numerous contractors that would like to submit a proposal but the minimum 3 post-disaster residential debris removal projects of minimum contract amount of \$15,000,000 excludes most contractors even if they have post-disaster residential or commercial experience. It appears that the IFB is written for a specific contractor. Since a major amount of property owners have not signed up, is it possible to stage multiple contractors (3), One contractor for the first 400 properties, and the following two contractors for 300 and 300 properties signed up at later dates? If so, can the minimum contract amounts be \$5,000,000 for the three references and consider commercial properties as well?
- A38. No, the project will not be split up. Commercial properties are not included at this time. If a commercial property is added to the scope, it will be through a negotiated Change Order using the established Bid Schedule units for fire debris removal to the degree possible.
- Q39. On prior Fire Debris Removal contracts, the large number of trucks attempting to dump at the disposal/recycling facilities have been subject to significant delays, sometimes lasting hours. One of the many sources of delays are the Cal Recycle requirements for Tare-in and Tare-out of each load. Given that hundreds of trucks will be required to support an estimated 50 crews, and the limited number of disposal facilities and scales available at each facility, will the contractor's trucks continue to be required to Tare-in and Tare-out every load at the

disposal/recycling facilities? – or can this be done (1) one time for each truck to establish a Tare-out baseline for the period of the performance?

- A39. All trucks will be weighed both entering and leaving a facility.
- Q40. Given that Cal Recycle will be designating both the number of crews deployed by the Contractor as well as which receiving facilities the Contractors will take debris material to, will Cal Recycle be responsible for any hourly delays incurred by the trucks if the designated facilities or the Cal Recycle Consultants are unable to timely process the trucks as they arrive and depart the facilities?
- A40. Trucking delays caused by circumstances beyond the Contractor's control may be compensated through the contract change order process described in the contract documents (CalTrans General Provisions). Trucking inefficiencies for truck staging and dispatch are part of these projects and need to be assumed and compensated for in the contractor's bid unit rates.
- Q41. How will CalRecycle's Consultant adequately staff each disposal site to ensure an adequate number of experienced Task Force Leaders/Monitors to handle the number of trucks at each disposal/recycling facilities to minimize delays?
- A41. Arcadis U.S., Inc., is the State's Consultant for this project and has demonstrated that they can provide adequate resources to receiving facilities.
- Q42. Experienced Task Force Leaders from CalRecycle's Consultant are an important factor in reducing crew and trucking delays. If inexperienced Consultant Task Force Leaders cause delays, will this be compensated under Line Item #8 – Delays?
- A42. Delays caused by circumstances beyond the Contractor's control may be compensated. One mechanism to compensate for those delays may be to use Bid Schedule Item 8, another mechanism is through the contract change order process described in the contract documents (CalTrans General Provisions).
- Q43. Can the contractor combine loads of the same debris from multiple lots in order to maximize tonnage for each truck load going to disposal/recycling facilities? A typical example is the amount of metal that is collected from each property. The tonnage collected on each lot is often very small and allowing combined loads will make the use of trucks more efficient. The same issue occurs with all types of debris where there is frequently only partial loads generated from one lot.
- A43. No.
- Q44. Are there any limitations or restrictions across the multiple water districts for the use of water for dust control?
- A44. CalRecycle is not aware of any.

- Q45. Will all vehicles be DMV adjudicated by law enforcement thereby allowing for vehicle abatement prior to contractor arrival at each ROE site? If not, please confirm that vehicles requiring abatement will require Contractor re-mobilization to the site and that such re-mobilization cost should be included in our abatement price.
- A45. Assume for bid purposes that vehicles will be adjudicated prior to contractor mobilization to a given property and if that is not the case, additional contractor efforts above and beyond the work described in Bid Item 18 will be compensated by Change Order.
- Q46. Will Cal Recycle be responsible for performing truck inspections? If yes, would CalRecycle provide the location of the inspections?
- A46. CalRecycle will provide truck inspection through the State's Consultant, Arcadis U.S., Inc. The location(s) of the truck inspections is not known at this time.
- Q47. How many trucks an hour can the Bidder assume Cal Recycle inspectors will be able to inspect?
- A47. Two per hour per truck inspection crew.
- Q48. Should trucking delay costs associated with crew delays be included in Line Item for Delays (Item 8) and Line Item 51 Property Owner Assistance? The description of bid item mentions equipment but does not specifically mention the associated trucking delay costs for the trucks waiting to be loaded.
- A48. Yes and no. The text for Line Item for Delays is Item 7 on page 21 of the IFB. Line Item 7 has been revised. There should not be trucking delays related to Item 51.
- Q49. Line item 18 – Vehicle Abatement, requires vehicles to be transported to a collection point to adjudicate the vehicle. Please confirm:
- If Cal Recycle will be selecting and managing this collection point.
 - Can Cal Recycle provide a distance to the collection point so that we can price this item accurately?
 - Does the contractor's responsibility end when we drop the vehicle off at the collection point, or if not, where does the contractor's responsibility end.
 - Operation of the collection point will require a number of activities, such as draining and disposing of vehicle fluids, which could result in environmental issues. Please confirm if the contractor will be required to clean up the site after completion, if the cost for this item should be included in our bid, and if yes, on which bid line item this cost should be included.
- A49. This items applies to using a remote vehicle abatement site away from the debris removal property. This is a contingency item and may not be used. The

Contractor will secure this site and will handle the vehicle from the property to this site and then to metal recycling per the description for Item 18 in the Bid Schedule. The Contractor's responsibility ends at the receiving facility and the Contractor will be responsible for cleanup up the staging area, if used, and it should be included in Item 18.

Q50. In the past, the DROP has required a property walk-around with the owner that takes up to an hour and/or the crew is waiting for over an hour for the homeowner to show up. Can this walk-around be billed under Bid Item 51 for Property Owner Assistance or is this effort to be included in another line item? If not where should the contractor include this cost?

A50. Yes.

Q51. On page 3 under Cash Flow, the IFB states that delays between the performance of work and the contractor actually receiving payment can exceed 120 days. Does the 120 day cycle include the review and approval of the invoice by the Cal Recycle Consultant? If yes, what portion of the 120 days consists of the review and approval by the Cal Recycle Consultant?

A51. Yes. Typically the review and approval by the CalRecycle consultant takes 14 days.

Q52. The IFB states that the creation, organization, and backup for invoices for this Agreement will be complex. In the past, this process has consisted of the manual reconciliation by the Cal Recycle Consultant of all Cal Recycle Consultant data, scale tickets, and scale reports prior to a Bidder invoice being submitted to Cal Recycle for approval. The initial process for approval by Cal Recycle Consultant can alone take up to 90 days. Can you confirm the same requirements will be in place for this Agreement?

A52. Yes, but in our experience this invoice reconciliation takes much less time than 90 days if the Contractor, consultant, and CalRecycle have committed adequate staff to the reconcile project quantities.

Q53. In the description of bid items for Transportation it says "All truckloads shall be tarped. The use of auto tarps will not be allowed." Manually tarping is time consuming at both the loading and landfill locations and will add significant labor costs to our bid. Is it the State's intent to have Bidder's manually tarp every truckload?

A53. Yes.

Q54. Please confirm that all ash debris and contaminated soil loads require burrito wrapping.

A54. Yes, they do.

- Q55. Please confirm the requirements of Section 5 under Work to be performed which clearly states “All site personnel who are tasked to enter an exclusion zone and Superintendents shall be currently certified for Hazardous waste operation and emergency Response (HAZWOPER) in accordance with title 29, Code of Federal Regulations(29 CFR).”
- A55. Per the IFB, on page 32, “All site personnel who are tasked to enter an exclusion zone and Superintendents shall be currently certified for Hazardous Waste Operations and Emergency Response (HAZWOPER) in accordance with Title 29, Code of Federal Regulations (29 CFR), Section 1910.120 and Title 8, California Code of Regulations (8 CCR), Section 5192. The site superintendents shall have appropriate experience to adequately perform the tasks outlined below.”
Ultimately, the Contractor is responsible for developing the project site Health and Safety Plan, determining the exclusion zones, and providing adequate training for all personnel on the project. This section only describes the HAZWOPER certification requirement.
- Q56. What information regarding a Bidder’s qualifications and resources will CalRecycle evaluate to determine whether the Bidder has the ability to provide “a potential total of 50 debris removal crews within 21 calendar days” (IFB, page 31)?
- A56. The Contractor’s Bid Submittal package in response to all of the items requested in the Contractor’s Bid Submittal Requirements will be used by CalRecycle to determine the Bidder’s resource abilities, specifically the response to Qualifications and Resources, Item d “Contractor Project Resources and Ability to Perform”.
- Q57. Is a Bidder required to list in its Bid all subcontractors whose portion of the Bid exceeds 0.5% or \$10,000 per the Subletting and Subcontracting Fair Practices Act?
- A57. See answer 35.
- Q58. The discussion of “references” (experience) on page 15 is inconsistent with the references sheet at the end. Does the Bidder need to have any experience at all, or can subcontractors fulfill all of the experience requirement?
- A58. The requirement for at least one wildfire debris removal project of \$15,000,000 or greater must be satisfied by the Bidder. Listed, committed subcontractors may satisfy some or all of the remaining two required post-disaster residential debris removal projects of \$15,000,000 or greater (which may or may not be wildfire-related).
- Q59. The requirement on page 32 is that “A payment bond and performance bond will be required for each Work Order. The performance bond must unconditionally

guarantee the Contractor's and its subcontractor's performance in all respects of the terms, conditions, and provisions of the Contract and the Work Order. In no event shall the Contractor or its subcontractors begin work under a Work Order until the Contractor provides complete and valid bonds to CalRecycle's Contract Manager."

- a. Please confirm that 100% payment and performance bonds for each Work Order are expected to be provided to unconditionally guarantee performance in all such respects.

A59. Yes, 100% payment and performance bonding is required with each Work Order

Q60. Would CalRecycle confirm how many ROEs have been received?

A60. CalRecycle has received over 550 ROEs at this time.

Q61. The contractor request that CalRecycle designate the ROEs that have been received on the GIS map to allow for adequate planning and estimating?

A61. We understand the request, but cannot provide that at this time.

Q62. Please confirm that the debris removal contractor is not responsible for performing the asbestos survey on each parcel.

A62. The State's Consultant, Arcadis U.S. Inc., will perform the asbestos survey, and not the debris removal contractor hired through this solicitation.

Q63. Please confirm that all ash debris and contaminated soil loads require burrito wrapping.

A63. Yes.

Q64. Is the debris removal contractor responsible for supplying Porto-johns at each parcel to include separate facilities for both male and female debris management contractor staff?

A64. The contractor will be responsible for supplying separate male and female facilities as required to comply with the law.

Q65. Will the Calabasas landfill located in LA County be allowed to accept waste from Ventura County properties?

A65. At this time, the Calabasas Landfill cannot accept Ventura County waste. This option may become available during the project, but is not available at the time of the bid and bidders are to assume it will not be available.

Q66. How will CalRecycle guarantee the participation of minority owned businesses?

- A66. California law does not allow preferences for minority or women owned businesses. However, the incentives for Small Business and Disabled Veteran Business Enterprise participation, along with the requirements found in Exhibit D, Clause 28 (page 67) and Exhibit G, Clause L (page 75), should maximize the possibility of a diverse pool of subcontractors.
- Q67. I am respectfully requesting the “Cost Bid Schedules” only for the following awarded contracts:
- DRR18052
 - DRR18062
 - DRR18053
- A67. A compressed file of the Cost Bid Schedules requested is available for download and has been posted as part of this Addendum at <https://www2.calrecycle.ca.gov/Contracts/Advertisement/1948>. The file is labeled as “Miscellaneous”.
- Q68. CalRecycle should clarify and compliance consistency incorporating appropriate provisions of SB 1383, AB 2411 and CIWMP Enforcement Policy Part II into the IFB and DROP requirements.
- A68. The draft DROP for this project is included with this Addendum. At this time, the potential use of compost in erosion control is not included in the DROP. At a future date compost may be included in the project. If it is included after the contract is awarded, CalRecycle will work with its Contractors to include compost at that time.
- Q69. Please provide the final payment breakdown quantities (ex. Tonnage) for the total schedule of values.
- A69. See table below-

CalRecycle - Carr Fire - Daily Report	Total
	Units
COMMUNITY DUST CONTROL, WATER TRUCK	759
MOBILIZATION/DEMOBILIZATION TO JOB	41
STREET SWEEPING	283
TRAFFIC CONTROL	1068
PERSONNEL AIR MONITORING (ASBESTOS, METALS, SILICA)	444
PERSONNEL AIR MONITORING (CHROMIUM +6 AND MERCURY)	67
TRUCK INSPECTION (DOT LEVEL 1)	96
NON-WORKING DAYS	121
DELAYS	32
ASBESTOS ABATEMENT - CREWS	150
ASBESTOS ABATEMENT - MATERIALS REMOVED AND DISPOSED	1022
DEBRIS REMOVAL PER LOT MISC METALS	7124.85
DEBRIS REMOVAL PER LOT BURNED DEBRIS AND ASH	380588.47
DEBRIS REMOVAL PER LOT CONCRETE	86460.75
DEBRIS REMOVAL PER LOT CONTAMINATED SOIL/ASH	40678.8
DEBRIS REMOVAL PER LOT CONTAMINATED SOIL-RESCRAPE	4432.22
DEBRIS REMOVAL PER LOT EROSION CONTROL	836
DEBRIS REMOVAL PER LOT VEHICLE ABATEMENT	128
HAULING OF METALS 0-25 MILES	7124.85
HAULING OF BURNED DEBRIS AND ASH	380588.47
HAULING OF BURNED DEBRIS AND ASH ADDL OUT TO 50 MI	17026.32
HAULING OF CONCRETE 0-25 MILES	86460.75
HAULING OF CONCRETE ADDL OUT TO 50 MI	164.6
HAULING OF CONTAMINATED SOIL 0-25 MILES	45111.02
HAULING OF CONTAMINATED SOIL ADDL OUT TO 50 MI	2248.66
MOBILIZATION/DEMOBILIZATION BETWEEN LOTS	1258
PROPERTY OWNER ASSISTANCE	34
BASE ROCK ROAD APPLICATION	600.26
HAZARDOUS TREE REMOVAL UP TO 18"	42
HAZARDOUS TREE REMOVAL GREATER THAN 18"	10
CHIMNEY/WALL DEMOLITION CREW	171
SAFETY FENCE INSTALLATION	17744
LOT SMOOTHING	15

Q70. The IFB says all personnel must be HAZWOPER certified, but during the mandatory meeting last week, we were told only onsite supervisors and foremen were required. Can you please clarify exactly who is required to be certified?

A70. See Answer 55.

All other terms, conditions, and requirements of this IFB will remain the same. If you have any questions relating to this IFB process, please contact me by e-mail at contracts@calrecycle.ca.gov.

Sincerely,

{Original Signed By}

Shelly Lewis
Contracts Unit
Administrative Services Branch
