

Waste Reduction Awards Program (WRAP)

WRAP Winners Listing for 2006

The Waste Reduction Awards Program (WRAP) was administered by CalRecycle (formerly the California Integrated Waste Management Board) from 1993-2011. WRAP provided an opportunity for California businesses and nonprofit organizations to gain public recognition for their outstanding waste reduction efforts and lets the community know the business takes waste reduction seriously. WRAP evaluated the waste reduction, procurement, and education activities in the internal business practices of the applicant, not its services or products.

WRAP Winners Statewide during 2006

3 Day Blinds

The 3 day Blinds, Inc. is a medium sized company soon to become one of the largest manufactures of window coverings for the home and the work place. In 2006, 3 Day Blinds, Inc. decreased its recycled materials by eight percent over the previous year and intercepted 537 tons of waste destined to the landfill. By selling materials such as plastic, metals, cardboard, pallets and paper, along with reusing scrapped materials, 3 day Blinds, Inc. achieved a cost savings of \$241,650.

Years Awarded: 2006, 2005, 2004

3M Optical Systems - Petaluma, CA

3M Optical Systems, a 3M facility in Petaluma, employs approximately 100 people and manufactures a variety of products including Vikuiti™ Extended Resolution video and rear projection display screens, 3M™ privacy filters for desktop and laptop computers, VanGard™ lenses for improved wide angle side and rear viewing, and Press On® Optic lenses which provide a simple, therapeutic, and inexpensive way to correct several visual disorders. In 2000, 3M implemented aggressive goals requiring each facility to achieve Environmental Targets 2005 (ET'05). ET'05 goals were to reduce waste by 25 percent and energy consumption by 20 percent. 3M Petaluma achieved these goals ahead of schedule. From 2005 through second quarter of 2006, 3M Petaluma recycled 500 tons of materials that could have otherwise been land filled or incinerated. In 2006, 3M raised the bar and implemented more aggressive goals requiring each facility to achieve Environmental Targets 2010 (ET'10) by the end of 2010. ET'10, similar ET'05, contains a set of five-year environmental targets. The major difference between ET'05 and ET'10 is the definition of "waste". "Waste", in ET'10, now includes recycled materials in its definition. This is a major shift in thinking from the ET'05 definition of waste, which excluded recycled materials. In other words, "waste" includes trash, chemical waste, various types of by-products, waste to energy, and recycled materials. The new ET'10 definition moves 3M's focus up the waste treatment practices, prevention and internal reuse. 3M is a charter member of the National Environmental Performance Track (Performance Track) - a U.S. Environmental Protection Agency program. The Performance Track program is a public/private partnership that encourages environmental excellence, involves communities in environmental protection, and focuses on measurable results. 3M Petaluma joined the Performance Track program in 2001. The Petaluma facility has completed a three-year commitment meeting the goals established. 3M Petaluma has also renewed another three-year commitment to further reduce waste, energy, and volatile organic compounds through 2006.

3M Unitek

3M Unitek is a subsidiary of the 3M Company. 3M Unitek is dedicated to the discovery, development, manufacture and service of premier orthodontic products. 3M Unitek's orthodontic products and services are used throughout the world. 3M Unitek minimizes its waste by evaluating all operations within the facility. Our philosophy is to eliminate, reduce, and recycle. In 2005, the site diverted over \$40,000 in anticipated waste disposal costs. The selling of scrap recyclable materials provided over \$85,000 to the company's bottom line.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001

Monrovia, CA 91016-5097

AB&I Foundry

AB&I Foundry, a third generation family-owned business since 1906, is the largest manufacturer of cast iron soil pipe fittings in the Western United States. Last year AB&I recycled over 40,000 tons of scrap iron to produce soil pipe, fittings, and custom castings (stove pan carriers, automotive castings, etc.) Even though AB&I recycle most of the waste produced, efforts to recycle 100 percent

of all waste produced is high priority. AB&I diverted 2800 tons of landfill waste sand and garbage for recycling and saved \$40,500 in disposal fees and transportation costs. AB&I future projects include recycling waste heat from our melting process to decrease the demand for natural gas, and installing a \$6 million new emission control system to increase the collection efficiency of our process. Years Awarded: 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1995, 1994

Adobe Systems Incorporated

Adobe Systems Incorporated is the sole owner and user of the Adobe Towers. Adobe helped launch the desktop publishing revolution in 1982 and today is one of the largest PC software companies in the world. Adobe Towers in San Jose, California is the company's headquarters and currently houses approximately 2,300 employees. Over the past six years, Adobe has embarked on a program to reduce energy and related resource use, create a healthier, more attractive work environment for its employees, and increase the sustainability of its operations. During this period of time, Adobe has spent approximately \$1.2 million on a total of 43 energy and related conservation projects, received rebates from PG&E, the state of California, and the City of San Jose totaling \$353k, and is estimating \$1 million per year in savings. Adobe has effectively reduced electricity use by 35 percent, natural gas use by 43 percent, domestic water use by 22 percent, and irrigation water absolute use by 76 percent. (Effective, meaning per occupant per square foot, as the property has added a third tower during this period, the population has grown by 35 percent, and the demand from the three data centers has doubled.) Adobe is currently diverting an average of 81 percent of its solid waste from the landfill through composting and recycling, approximately 1,100 tons of solid waste per year. It has reduced its total pollution from all sources by 26 percent and CO2 emissions by 16 percent. Adobe currently has another seven projects in progress and is constantly searching for more possibilities.

Agilent Technologies

Agilent Technologies, Inc. is a leading manufacturer of high performance test and measurement equipment for the fast growing worldwide telecommunications industry. The company has obtained registration for all of its manufacturing sites under the global ISO-14001 Environmental Management System Standard. The company is a leader in the management of solid wastes and has implemented a highly successful reuse and recycling program for solid waste materials that otherwise would go to the landfill. The company has established recycling centers that are staffed by clients of Becoming Independent which is a 1st Time to Work Program for developmentally challenged adults. The recycling program makes it very easy for employees to recycle materials. During 2005, Agilent operations in Sonoma County diverted over 909 tons or 79 percent of the solid waste generated from the local landfill. At least \$126,305 in landfill fees were saved due to the waste diversion activities. The company also donates surplus materials including office equipment, etc. to qualified local non-profit organizations. Agilent is proud of the success achieved thus far in its waste reduction and recycling efforts and intends to continually improve upon its performance and be an industry leader in this area.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000

Agilent Technologies Inc

The Agilent Technologies, Inc., Santa Clara Site has three separate manufacturing operations: DNA Microarrays for the Biotechnology Industry, Atomic Clocks and Precision Motion Control devices. The company is a leader in the management of solid wastes and has implemented a highly successful reuse and recycling program for solid waste materials that otherwise would go to a landfill. The company has established on-site recycling centers that are staffed by a recycling coordinator, OneSource. During 2005, Agilent operations at the Santa Clara Site diverted over 369 tons of solid waste generated from the local landfill. At least \$75,000 in landfill disposal expense was saved due to the waste diversion activities. The company also donates surplus materials including office equipment, etc. to qualified local non-profit organizations.

Allergan, Inc.

Allergan, with headquarters in Irvine, California, is a global specialty pharmaceutical company that develops and commercializes innovative products to the eye care, neuromodulator, skin care and other specialty markets. In addition to its discovery-to-development research programs, Allergan has global marketing and sales capabilities in over 100 countries that deliver value to our customers, satisfy unmet medical needs and improve people's lives. For the last 12 years, Allergan has successfully recycled materials from offices, laboratories, and manufacturing sites worldwide. In 2005, Allergan recycled approximately 1,654 tons of material and had a recycling rate of approximately 54% worldwide. This represents average annual savings of approximately \$361,480 by diverting recyclable materials away from the landfill. There is also a savings associated with the decrease in hauling

expenses to transport the waste materials to a landfill. Allergan Corporate Headquarters in Irvine, California recycled approximately 157 tons of waste materials in 2005.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

American Honda Motor Co Inc

American Honda Motor Co. Inc., is the U.S. sales, marketing, and distribution arm for Honda and Acura automobiles, Honda motorcycles and all-terrain vehicles, marine engines, and power equipment. American Honda's comprehensive waste reduction/recycling program include the regular donation of surplus and used equipment to non-profit organizations. American Honda has also been successful with a recycling program that collects all recyclables office wastepaper from each associate's desk throughout the organization each day. Through the dedicated efforts of its associates and the company's long-standing commitment to the environment, American Honda recycled 866 tons of paper and cardboard, 254 tons of wood pallets, 322 tons of metal, 7 tons of aluminum cans/plastic/ glass, and 210 tons of green waste at its headquarters facility for a total of 1,659 tons at the Torrance, CA facility in 2005. Between January 2005 and December 2005, American Honda Motor co. Inc., saved an estimated \$69,000 through eliminated disposal charges. American Honda saved approximately \$30,000 through the reuse of wood pallets. The total recycling poundage and the environmental friendly changes that have been made within the company has saved our company approximately \$1,000,000.00.

American Licorice Company

The American Licorice Company is a medium sized candy manufacturing company, producing the best-selling confectionery brands Red Vines, Sour Punch, Super Ropes and Snaps. The American Licorice Company - Union City is the only facility that manufactures Red Vines and Super ropes brand candy. In 2005, American Licorice reduced waste destined to be land filled by 1,038.1 tons - saving \$26,000 in hauling fees from the candy that is picked up and used as animal feed, earning about \$8,685 from the sale of candy for cattle feed and over \$14,000 on all recycling (plastic, cardboard, metal). American Licorice achieved these results by educating employees in waste reduction, modifying the manufacturing process to use fewer materials, reusing surplus supplies and equipment, and selling recyclable materials. American licorice Company also donates surplus materials to non profit organizations, churches and schools. In addition, we received a \$75,000 rebate from pacific Gas & Electric Company for energy savings generated with new more energy-efficient equipment, for a total savings of over \$123,000 in 2005.

Anderson Valley Brewing Company

Anderson Valley Brewing Company is a regional brewery dedicated to the art of brewing and protecting our environment. The brewery reuses or recycles much of its waste products and provides spent grain to local farmers for feed and fertilizer. Anderson Valley Brewing Company has installed its own wastewater treatment facility and uses the reclaimed water to irrigate their thirty-acre property. The brewery utilizes solar energy, by way of a 768 panel solar array, to provide a third of its power requirements. In the last year, the brewery has diverted 2,000 tons of spent grain and over 30 tons of recyclable glass, cardboard, and plastics. The savings from wastewater treatment facility and the solar array are figured to be at least \$80,000 annually.

Anheuser-Busch InBev - Los Angeles Brewery

The Anheuser-Bush, Inc, Los Angeles Brewery located in Van Nuys, California is the world's third largest brewery, manufacturing and packaging 12 million barrels of various malt beverages annually. The Brewery's operations are and continue to be designed to integrate pollution prevention methodology into every process. As a result, the Los Angeles Brewery was able to recycle over 99.5 percent, approximately 250,000 tons, of its solid waste and by-product in the year 2005. The brewery also utilizes a Bioenergy Recovery System which has reduced the facility's wastewater BOD by over 75 percent and fossil fuel dependency by 20 percent. The Los Angeles brewery saves over 6 million dollars each year due to its extensive environmental program.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2002, 1998, 1995, 1994, 1993

Anheuser-Busch, Inc., Fairfield Brewery

Anheuser-Busch, Inc. - Fairfield Brewery brews, packages, and ships over 4 million barrels of malt beverages each year. Located in Fairfield, California, the brewery was built and continues to evolve with pollution prevention in mind. In 2005, the Fairfield Brewery not only recycled 98.6 percent of the brewery's waste and by-products, but was able to reduce the total amount of these products

generated by over 19 tons compared to 2004. As a result of the brewery's continued environmental efforts, the facility was able to divert or eliminate over 101,000 tons of waste and by-products from landfill in 2005. These achievements are made possible by the use of an extensive Environmental Management System that mirrors the principles of the ISO 14001 standards.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

Apple, Inc.

Apple Computer, Inc. is an industry leader in innovation with its award-winning desktop and notebook computers, OS X operating system, and iLife and professional applications. Apple is also spearheading the digital music revolution with its iPod portable music players and iTunes online store. Apple's Elk Grove, California operations facility has consistently maintained an efficient and effective recycle/reuse program since the start-up in 1995. Apple winning the WRAP award continuously from 1995 to 2005 represents this success. They have consistently diverted materials from the landfills with respectable numbers including this past year by diverting 87.84 percent of materials generated by their operations process. Apple would have incurred several hundred thousand dollars in additional costs from trash handling, but in return they saved in excess of \$155,000 dollars. This can only be accomplished with an outstanding recycle program and the group efforts from third party recycling teams, the management and volunteer teams, and everyone's dedication and hard work.

Years Awarded: 2011, 2010, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995

Arroyo Grande Community Hospital, CHW

Arroyo Grande Community Hospital (AGCH) is a 65-bed acute healthcare facility that serves the medical needs of residents and visitors of southern San Luis Obispo County. As a member of Catholic Healthcare West (CHW), AGCH understands the interrelationship with earth and the gift of healing it brings. In 2005, AGCH continued to make significant progress in the environmental responsibility including diverting 141.94 tons of solid waste from the landfills, reducing the toxicity of its waste by ridding the facility of mercury, reducing PVC from the facility and developed programs to responsibly deal with e-waste. AGCH also changed to 3M cleaning materials that consume fewer cleaning chemicals, reducing the volume of water used, and minimize employee exposure to chemicals and injury due to weight lifting. With these environmental changes, AGCH has seen cost savings of \$3,175.00 in 2005.

AT&T Real Yellow Pages

AT&T Yellow Pages is one of the nation's leading publishers of telephone directories, supplying one of the most recognizable and utilized references in 15 million California homes and businesses. AT&T Yellow Pages environmental efforts start with manufacturing directories that are completely recyclable and contain a high percentage of postconsumer waste (40 percent minimum); ending with an annual coordination of hundreds of communities across the state making phone book recycling convenient for residents and businesses. Most outdated AT&T Yellow Pages are recycled into new telephone book paper as well as household insulation, breakfast cereal boxes, cardboard boxes, agricultural packaging, stationary and more.

Baxter Bioscience

Baxter BioScience located in Thousand Oaks is a manufacturer of Recombinate Antihemophilic Factor a genetically engineered factor VIII protein for use in people with hemophilia A. They have approximately 530 employees and manufacture 24 hours per day, 7 days per week. They have active recycling and environmental programs, which aggressively look at ways to reduce waste. The facility has established a cross functional "Green Team" to help coordinate the site environmental and recycling programs. Over the past year, they have improved collection system for recycling in conference rooms and general break areas. They are also working with a local consultant to retrain their employees and custodial group and re-evaluate our recycle streams to further increase recycling at the facility.

Years Awarded: 2011, 2010, 2009, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

Thousand Oaks, CA 91320-1424

Bayer HealthCare Pharmaceuticals, LLC

Bayer HealthCare - Pharmaceuticals is a global bio-pharmaceutical research, development and manufacturing company with a large operation in Berkley, California. One of Bayer's principal products at the site is Kogenate, used for the treatment and control of hemophilia. From an evaluation of their non-hazardous waste streams, Bayer calculates that the Berkley site generated approximately 2,861 tons of waste. Of that amount, approximately 2,317 tons of waste was recycled or composted rather than disposed, for a recycling rate of 81 percent, which is up 4 percent more than the previous year. Bayer has saved approximately \$820,000 annually due to waste reduction practices. Cardboard used by Bayer's suppliers presents the greatest portion of the material that Bayer diverts from disposal, but plastic (in the form of empty chemical drums) provides one of their more unique successes in reducing waste; Bayer reuses the empty drums in managing byproduct materials from the manufacturing process.

Years Awarded: 2011, 2010, 2009, 2008, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

Multiple locations for this applicant

Benny's Oil Filter Recycling, Inc.

Benny's Oil Filter Recycling is a hazardous waste transporter and is best known for picking up oil filters from hundreds of auto shops, garages and retail businesses. The material is transported back to our facility where the filters undergo a unique and simple process, which squeezes the filter to remove the residual oil, and then crushes small amounts of filters into cubes that weigh approximately 35 pounds. These cubes are then transported to Tamco where they are recycled into re-bar. On the other hand, the hazardous waste is transported to our designated disposal site. The facility takes charge of the waste and properly disposes of it. Benny's Oil Recycling program is a success because an enormous amount of waste has been diverted from our landfills. Between April 2005 and April 2006, Benny's diverted 735.25 tons of used motor oil filters and scrap metal from our landfills. In addition,

106,580 gallons of oil were extracted from these filters that would have otherwise been dumped into the trash, gutter, water, and our landfills. Benny's is responsible for both diverting waste and reducing the amount of hazardous waste from our landfills.

CAN-GRO, Inc. dba J & W Auto Wreckers

J & W Auto Wreckers is the boutique of Jeep dismantling. The vehicle's final "ouch" is recycled to become reusable parts for happy Jeep owners. Parts are wrapped and shipped nationally and worldwide. J & W Auto Wreckers offers their customers an average savings of 40 to 60 percent on quality OEM parts. Every year the company recycles in excess of 420 tons of car bodies and metals. Next year the metal returns as a sleek new vehicle! The auto dismantling industry rethinks reuses and recycles on a daily basis. J & W Auto Wreckers is pleased to be a leader, as an original environmentalist.

Cardinal Health

Cardinal Health is a worldwide wholesale distributor and manufacture of various healthcare products. In 2005, an approximately \$789,000 in surplus inventory and slightly damaged inventory was donated by the Cardinal Health Ontario CA Distribution Facility,

to various non-profit charitable organizations. In addition, the Ontario facility earned \$63,037 in recycling revenue and saved \$83,154 in disposal fees. This figure represents 1,580,000 pounds of material that was diverted from the landfill. This does not include approximately 205,000 pounds of various medical supplies and equipment donated to charity and the 50,000 pounds of green waste that was diverted from the landfill to a recycle facility. Total savings of the waste reduction efforts were \$146,551 for 2005.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

CH2M Hill, Redding

CH2M HILL is a global leader in full-service engineering, construction, and operations. We are the top-ranked environmental engineering firm in the United States, according to Engineering News Record (an industry monitoring journal). CH2M HILL's Redding office, like the firm itself, is committed to reducing waste and implementing sustainable solutions. They have diverted more than 1,000 tons of waste from disposal this year through prevention, reuse, and recycling. CH2M HILL increased their use of recycled products, donated serviceable equipment and furniture to local schools and charities, reduced the amount of food they order for meetings to eliminate food waste, and use technology to deliver their documents electronically to reduce paper consumption.

Cisco Systems, Inc.

Cisco Systems, Inc. is the worldwide leader in networking for the internet. Cisco hardware, software, and service offerings are used to create internet solutions that allow individuals, companies, and countries to increase productivity, improve customer satisfaction and strengthen competitive advantage. Cisco applies these same solutions to create efficient processes that help maintain corporate recycling and waste reduction programs. During 2005, Cisco's San Jose Waste Reduction and Recycling program recycled 69% of its waste stream. This achievement kept over 3,400 tons of material out of the landfill; saving \$529,000 in disposal fees. Cisco's Electronic Waste program has been equally successful in diverting 5,116 tons of material from the landfill last year by placing equipment back into reuse and eliminating the purchasing, storing and disposal costs.

Clark Construction Group - California, LP

Clark Construction Group, California - LP, one of the largest general contractors in California and in the county, has made waste management a priority on its projects. As an example, it is estimated that by incorporating creative paperless management systems in their offices results in the divisions of over 125 tons of waste from landfills in California. By minimizing the generation of paper, they also estimate a related overall savings in excess of \$100,000 in processing costs. In addition creative design ideas have allowed Clark Construction to utilize products with high recycled content during the construction of their projects, select energy efficient building practices, and sustainability. Clark Construction is proud to be a leader in their industry in waste management initiatives.

ConocoPhillips Company Los Angeles Refinery, Wilmington Plant

Since 1919, ConocoPhillips Company's Los Angeles Refinery has been transforming crude oil into valuable energy resources vital to California's economy. Operating 24 hours a day, 7 days a week, 365 days a year, ConocoPhillips Los Angeles Refinery supplies more than 140,000 barrels a day (each barrel equals 42 gallons) of clean burning transportation fuels and other energy products for jets, trucks and automobiles. ConocoPhillips Los Angeles Refinery consists of two refinery facilities, the facility in Wilmington and another in Carson. The ConocoPhillips Wilmington facility sits on 424 acres while our Carson facility covers 235 acres.

ConocoPhillips currently employs about 600 people between the two sites. The employees of ConocoPhillips Los Angeles Refinery are more than engineers, operators, and finance and maintenance personnel. They are also parents, community leaders and residents of Southern California. In fact, one third of their employees live in the local community. They care about the environment and demonstrate our concern in a number of ways. Whenever possible, the Los Angeles Refinery donates surplus equipment and materials to nonprofit organizations and schools. In 2005, the Wilmington refinery helped reduce waste sent to landfills by recycling or reusing over 4,100 tons of materials, such as scrap paper, bottles, cans, catalyst fines, and oily sludge's and spent activated alumina catalyst.

Conservation Corps North Bay

The Marin Conservation Corps (MCC) is the nation's first non-profit Local Conservation Corps, founded in 1982. MCC is dedicated to preserving Marin County's natural resources while providing hundreds of young adults with educational, community service and employment opportunities each year. MCC provides recycling and reuse education to thousands of students and volunteers each year and assists with numerous restoration and conservation programs throughout the county. MCC provides recycling collection services to Marin's public land agencies and maintains over 300 recycling collection points. Since 1997, MCC has recycled over 2 million pounds of materials for Marin County. MCC corps-members and junior corps-members have constructed over 110 recycling bins from recycled plastic lumber in the past 4 years for use with MCC's park recycling collection program. Recycling services and education are provided free of charge to the community of Marin through a grant from the CA Department of Conservation/Division of Recycling.

Crown Poly, Inc

Crown Poly Inc. is the inventor of the Pull-N-Pak bagging system. Based in California, Crown Poly Inc. has taken a proactive approach to being environmentally responsible in their business practices by supporting source reduction, the Environmental Protection Agency's #1 method of waste management. The inventor of the Pull-N-Pak bagging system has elected to use high-

density polyethylene for our product content, specifically to reduce raw materials usage and energy consumption. Crown Poly Inc. captures the scrap from the production of its bags and recycles the refuse in order to produce cylindrical cores on which it presents the bags to the consumer. This ensures maximum, efficient use of raw materials, and eliminates any unused refuse. In 2005, Crown Poly Inc. reused 1,755,290 lbs. of its scrap material, diverting it from disposal and saving \$215,000 through waste reduction efforts. In addition, Crown Poly Inc. introduced the Hippo Sak Front End/ T-Shirt bag which can replace 2 to 3 standard grocery bags. This is a reduction of 50-75 percent of current bag usage by grocery stores; while not inconveniencing customers but giving them a better bag. Further, in 2006, Crown Poly Inc. plans to place a source reduction message on their packaging and products to give visibility to this important, yet often ignored, environmental initiative. The company will also be using their website as a vehicle to educate the general public on how they too can make a difference by integrating source reduction in their daily lives.
Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1998

F. Korbel & Bros. Inc.

Established in 1882, Korbel Champagne Cellars has been producing California méthode champenoise champagne and fine brandy for more than 120 years. Today, Korbel, known for its best-selling premium champagne in America, also owns three additional Sonoma County wineries - Kenwood Vineyards, Valley of the Moon Winery and Lake Sonoma Winery. As a company, Korbel has several recycling opportunities and every employee plays a role. Everything from waste oils, solvents, paint and laboratory processing chemicals to all metals of various types, including aerosol cans are recycled. Plant process water is reclaimed for vineyard frost protection and irrigation. Grape pumice is laid to drain and is returned to a soils composition company each spring, for the previous year's crush. Cardboard, in excess of 1,500 tons per year, is bailed and recycled. All glass, stretch film and shipping plastics are also recycled. And although they already had a program for recycling office paper, in 1998 they completed the integration of an in-house emails system at all of their facilities throughout California, reducing the amount of paper used throughout the company. Also in 1998, they purchased equipment, which allows them to separate the crown caps and plastic bidules used in the production of méthode champenoise champagne. The crown caps are then recycled totaling about 42.5 tons and the plastic bidules are reused totaling around 15 tons annually. With all their efforts over a ten-year period, they have been able to reduce their large container refuse to landfill costs by 50 percent.

Frito-Lay

Frito-Lay's Kern County Manufacturing facility provides a wide variety of salty snack products for both Central and Southern California. By following their Environmental Policy, and by aggressively pursuing internally and externally generated recycling opportunities, the Bakersfield manufacturing facility has significantly minimized its impact on local landfills. Methods include the recycling of cardboard shipping cases, recycling finished food waste into animal feed, and the recycling of starch as glue and paper ingredients. Kern's waste reduction and recycling programs have allowed them to prevent the addition of approximately 1,000 tons annually to local landfills, generating annual savings of almost \$300,000.

Genentech

Genentech is a global leader in the biotechnology field. With its success comes a recognized responsibility to encourage and foster programs, which better the environment. The company has embarked on an aggressive program that will reduce the impact its operations have on the environment. This program, "Green Genes," is a play on words with a serious mission - reduce the amount of materials sent to landfill, set up aggressive policies for purchasing recycled products, and most importantly, train and educate its workforce in "best practices" to reduce, reuse and recycle materials. Through Green Genes' aggressive recycling efforts, Genentech has increased their landfill diversion rate by over 9 percent in the last year and saved approximately \$24,000 in landfill fees.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 1999

Vacaville, CA 95688

Genentech, Inc. South San Francisco

Considered the founder of the biotechnology industry, Genentech has been delivering on the promise of biotechnology for almost 30 years, using human genetic information to discover, develop, commercialize and manufacture biotherapeutics that address significant unmet medical needs. Genentech currently has a variety of recycling programs, the most successful being the Waste Prevention Program that in 2005 diverted and recycled 2,798,000 pounds of materials from the South San Francisco campus. Genentech, through recycling and the consequential reduction of waste disposal services, saved the company \$173,659 in 2005. Genentech also supports an employee run grass-roots environmental program entitled "Green Genes": the group spearheads various greening projects around campus.

Golden Acorn Casino

Golden Acorn Casino and Travel Center, located in Eastern San Diego County, recycled 613 tons of food-contaminated water, cardboard, plastic containers, tin, color and clear glass, grass, and newspaper between April 2005 and April 2006. Golden Acorn Casino donates surplus equipment and materials to nonprofit organizations and schools. Food and Beverage have utilized a local pig farmer in utilizing food and cooking oil waste to haul for processing at his farm. Because of our recycling efforts we have saved over \$21,000. The Golden Acorn Casino and Travel Center is a vital link to increased economic prosperity for the tribe, providing jobs, revenue and financial security for many programs and initiatives. With the Casino as a critical element of economic development, the Campo people will move ahead toward a brighter future for themselves and their children.

Golden Rain Foundation

Laguna Woods Village®, a retirement community of approximately 18,000 residents, is located in Orange County, California. Since 1987, Laguna Woods Village® has been an innovator in waste reduction and recycling efforts in California through its successful green waste composting operation; newspaper, glass, aluminum, construction debris, metals recycling programs, and the initiation of new landscaping techniques that source reduce the amount of green yard waste produced. As a result, in 2005 Laguna Woods Village® has achieved a solid waste diversion rate of 70 percent or 19,848 tons. In county landfill tipping fees alone, approximately \$211,624 was saved in 2005 through these recycling efforts; and revenues of over \$184,928 were received and an approximate \$65,078 avoided through green waste reuse.

Years Awarded: 2010, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1998, 1997, 1996, 1995, 1994

San Diego, CA 92110

Granola Babies, LLC

Granola Babies is a small, home-based retailer of cloth diapers and children's natural products. While known for its "green" products, such as New Cloth Diapers, Granola Babies is also heavily focused on reducing waste within its company. Waste reduction practices such as purchasing packaging materials that are partially recycled ensure that every package that customers receive is "green" from packaging to product. The 100 pounds per year that are diverted from landfills may not seem significant, but it adds up, when coupled with the two tons that each Granola Babies customer diverts through purchase and use of cloth diapers. In addition, while each consumer saves approximately \$1000 per child, Granola Babies has saved an additional \$100-300 per year.

Grass Valley USA , LLC

Grass Valley is a business within Thomson and is a global organization and market leader. They offer a rich portfolio of award-winning solutions to the world's media and entertainment companies (including broadcaster, video professionals, film studios, and post-production professionals). They also emerge content creators, distributors, and technology users; which include those in broadband, telecommunications, and transmission services. Whether you're watching the evening news or sporting-event highlights on television or your mobile phone; you're watching their technologies at work. Between January 2005 and December 2005, Grass Valley diverted 189.54 tons of waste from the landfill. These numbers are derived from measurements of materials sold, donated to charities and/or employees, and given to local businesses for reuse. Total estimated savings from the waste diversion program is projected at \$51,884 dollars. In the year 2005 Grass Valley instituted a world wide return program. This applies to all Grass Valley branded products, anywhere in the world. Looking ahead in 2006, the Grass Valley Nevada City site has been selected by Thomson, its present company, for the Zero Waste program. This pilot program is expected to begin in August 2006.

Kraft Foods Capri Sun

Kraft Foods - Fresno Capri Sun is the manufacturer of ready-to-drink soft drinks. The plant manufacturers; Capri Sun All Natural Juice drinks, Tang, Kool-Aid Jammers and Fruit Waves soft drinks in pouches, Kool-Aid Bursts drinks in plastic bottles, and Fruit 20 drinks in plastic bottles. There are 353 Kraft employees and 70-100 employees from a temporary service working at the plant. The plant has an active Recycling Team and is proud of its accomplishments in reducing landfill and liquid waste. The facility currently

recycles all material from which it has found an outlet, which includes corrugated and paper, plastic, waste juice, drums, all scrap metal, computer equipment, and hazardous waste such as fluorescent light bulbs and batteries. Recycled waste as a percent to total waste increased by 19 percent from 2004-2005. This represented 263 tons of waste diverted from landfill, saving \$4,256 and generated \$38,000 from recycled material. The plant regularly sends wholesome but unsaleable product to a food bank so that the product will not be wasted. Kraft is continually looking for more opportunities to increase the tons recycled and reduce its landfill and liquid waste.

A leader in luxury houseboats vacation rentals, Forever Resorts is committed to the standard of their corporate environmental policy; which is to monitor and improve the performance of business operations and endeavors to conduct all activities in a manner that protects both human health and the environment. Forever Resorts has operated properties in national parks, recreation areas, national forests, and other vacation destinations since 1981 and encompasses 63 properties worldwide. The company has significant experience in lodging, food service, retail operations, marinas, houseboat manufacturing and rentals. Forever Resorts was the first multi-site marina, hospitality, and lodging operator in the United States to have their environmental management system. Forever Earth, certified to the International Organization for Standards ISO 14001:2004 for all its domestic operations. By 2006 twenty three Forever Resorts properties, including its corporation headquarters, were accepted into the EPA National Environmental Performance Track program by demonstrating their environmental excellence. Lake Oroville Marina has reduced their waste to landfill by roughly 12 percent in 2005. They have set goals to further reduce waste to landfill by 10 percent. These reductions have saved Trinity Lake resorts & Marina roughly \$18,000 in tipping fees alone.

LifeScan, Inc.

LifeScan, a wholly owned subsidiary of Johnson & Johnson, is the leading maker of blood glucose monitoring system for home and hospital use. Between May 1, 2005 and April 30, 2006, LifeScan diverted a total 536.9 tons of material from disposal and saved more than \$50, 471.15. They aggressively promote recycling, and in April 2004, were named by the City of Milpitas as having one of the most "enthusiastic recycling" programs. Moving beyond recycling, LifeScan recognizes the importance of designing its products while considering their lifecycle impacts-both in terms of material inputs, and ultimately, disposal. LifeScan recently redesigned their soft meter cases for their entire product portfolio. Hazardous material inputs (PVC, latex, and DEHP) were eliminated, and the cases can now be incinerated to generate energy, instead of being disposed of in a landfill. LifeScan is ISO 14001 Certified, and is a member of EPA's Performance Track program (Charter Member), Sustainable Silicon Valley, and Santa Clara County's Adopt-A-

Creek program. They also annually provide a financial donation to The Nature Conservancy.

Lockheed Martin Aeronautics Company

Lockheed Martin Aeronautics Company is a leader in the design, development, systems, integration, production and support of advanced military aircraft and related technologies. Its customers include the military services of the United States and allied countries throughout the world. Products include the F-16, F/A-22, F-35 JSF, F-117, T-50, C-5, C-130J, P-3, S-3, and U-2. Numerous organizations within the company, (including Environmental Resources, Conservation Sales, Custodial Services, Document Control, Transportation, Production, Engineering, Site Representatives, and Procurement) work together to promote the diversion of waste. The facility minimizes waste disposed through recycling, donations, reuse, and employee sales. Waste reduction programs at Lockheed Martin Aeronautics-Palmdale are always improving and developing. In the last year, they have reduced landfill-destined waste by 2,200 tons and saved more than \$220,000 in disposal costs. Lockheed Martin Aeronautics-Palmdale won WRAP award in 2003 and 2005, and WRAP of the Year Award in 2004.

Mad River Brewing Co., Inc.

Mad River Brewing Company is a true microbrewery that produces handcrafted ales in the heart of the California redwood county. Now in their fifteenth year, they were founded on the environmentally responsible principles of reduce, reuse, and recycle. Their aggressive waste reduction program has brought them international recognition, as well as 10 consecutive WRAP awards. They estimate that they divert 600 tons from the waste stream annually at a cost savings of \$50,000. The brewery is pushing the envelope by attempting to reach a point of negative waste generation. They take materials like bubblewrap from a local outdoor store and reuse it for packaging material. They constructed their own on site wastewater treatment plant and are using grey water to grow a variety of plants in an evaporative greenhouse. They are hoping to produce organic vegetables with the system in the near future. The small town of Blue Lake in Humboldt County is home to Mad River Brewing Co., which produces ales under the Steelhead and Jamaica brands. They currently distribute in fourteen states in kegs and bottles.

Memory Experts International, Inc.

Memory Experts International, Inc. (MXI) designs and manufactures high-quality memory expansion modules, data storage systems, cable assemblies, connectivity products and portable security devices. MXI has been instrumental in recycling waste for several years in the areas of cardboard, paper, printed circuit board rails & scrap, obsolete monitors and electronic components, hazardous waste, and IC trays. A significant contribution to the recycling program was developed this year when we removed packaging foam and bubble wrap from our packaging departments. The foam had previously been used to package our Hard Drive upgrade kits which made the packaging size cumbersome, and more importantly used a material that was non recyclable. We worked with out packaging material specialists to develop a combination of plastic wrap and cardboard that is not only recyclable but has also reduced shipping costs by 50 percent. The bubble wrap has been replaced with recycled packaging paper.

Mercedes Benz USA, LLC

Mercedes Benz is an automotive Parts Distribution Center with 128 employees and receives approximately 1500 parts or more a day. Parts range from nuts and bolts to engines and body panels, which require a variety of packing materials. In an effort to reduce waste that goes to landfill they use reusable containers for packing as much as possible and these reusable containers are provided to our customers. The three most successful recycling methods are corrugated products, wood pallets and plastics. They are sold to a recycling company which generates income and reduces the cost of pick-up and delivery to a landfill. Between April 2005 and April 2006 they saved \$18,720 in diverted cost. This savings was achieved due to the fact that last year they had the compactor pickup three times a week at a cost of \$520. Now they only have the compactor picked up once a month at a cost of \$520. Year to date Mercedes Benz USA, LLC has reduced their waste to landfill by 58 percent over 2005.

North Coast Cooperative, Inc.

By recycling paper, plastic, glass, metals, oils, and meat scraps, by donating excess food, as well as boxes, styrofoam, and animal feed, by reusing pallets and shipping crates, and by composting any other materials (wood, wax cardboard, etc.) accepted by the local compost facility, in the year from June 2005 to July 2006, North Coast Cooperative saved an estimated \$63,000 at the Arcata Co-op and \$12,000 at the Eureka Co-op. Based on weekly observation, records provided by garbage haulers, and calculations provided by the Arcata Community Recycling Center, North Coast Cooperative has diverted 214 tons (from Arcata Co-op) and 68 tons (from Eureka Co-op) from the landfill during any 12 month period over the past two years. The North Coast Co-op presently incorporates a waste reduction program that diverts most of the waste produced at both the Arcata and Eureka site. The Co-op is

also an avid supporter of local recycling centers and efforts. Since 1973, North Coast Co-op has been a member-owned, consumer food-cooperative. North Coast Co-op operates two full service grocery stores in Arcata and Eureka, with a production bakery and deli serving good food without artificial ingredients and using organic or natural ingredients whenever possible. Throughout the year, North Coast Cooperative sponsors and conducts educational events and benefit fundraisers. At each public event the Co-op emphasizes the importance of creating as little waste as possible, working with manufacturers to obtain bulk goods and minimal packaging, employing reusable containers whenever possible, composting nearly all food scraps and some paper goods, and recycling aluminum, glass, paper, and plastic. By recycling, composting, and reusing nearly all materials during events, the Co-op becomes a good example to the community. The goal is always zero waste.

Northrop Grumman Aerospace Systems (NGAS)

Northrop Grumman is a defense contractor specializing in advanced integrated systems, aircraft manufacturing and drone development techniques. For 65 years Northrop Grumman has used innovation and technology to find solutions to environmental changes. Through its forward thinking and proactive environmental approaches, the company operates as a responsible company and a good neighbor to the surrounding community. Integrated Systems recycles approximately 2,697 tons of waste annually. The cost savings for both recycling and diversion is near \$190,000 a year. Their most successful recycling programs have been white paper and metal recycling. Their white paper is collected throughout the facility and stored in large bins prior to shipment for recycling. Metal is also collected segregated and sold to a recycler.

Northrop Grumman Space Technology

Northrop Grumman Space Technology is headquartered to Redondo Beach, California, where more than 8,000 employees are located at its Space Park campus that covers nearly 50 buildings on some 160 acres. The company develops a broad range of civil and military satellites, high-energy lasers and leading edge significantly to the nation's security and leadership in science and technology. Northrop Grumman Space Technology has been very successful in reducing disposal of glass and plastic non-hazardous chemical containers. For the last several years, Northrop Grumman Space Technology has focused on handling empty chemical containers from their production areas that could be sent to a "curbside recycler" rather than become hazardous waste. Their bulk chemical distribution systems have outright eliminated more than 40,000 individual one and five gallon containers (on an

annual basis). Northrop Grumman Space Technology diverted more than 260,000 pounds of waste from its operations in Redondo Beach and Manhattan Beach during 2005. Savings from the company's waste reduction program have a very large value for the environment. Northrop Grumman Space Technology feels that reduction, reuse, and recycling, is only one of their many obligations as a good corporate citizen. Cost savings is not the objective of their waste reduction program - maintaining the quality of the environment for their employees and community is the prime objective.

Numi Organic Tea

Numi is a trend setting, organic specialty tea company offering full-leaf quality tea in tea bags, fresh pure herbs, and real fruits - all without the addition of oils or "natural" flavorings - in hand-crafted packaging. From its beginnings, Numi made a conscious choice to eliminate the use of cello-wrap in its packaging and use bamboo for its merchandising. In 2004, Numi converted its tea boxes to 100 percent post-consumer waste. This material has also been used for the packaging of several new items launched in the last 12 months, annually conserving over 2,800 trees and reducing landfill by 184,000 pounds. Numi's re-designed tea boxes include a table bottom of the box that identifies its waste reduction. The current annual savings was realized from their continued commitment to post-consumer waste reduction and sustainability through their packaging, marketing collateral and website.

Ocean View Farms, Inc.

Ocean View Farms, Inc. (OVF) is a community urban garden established in 1977 through the efforts of then Mayor Tom Bradley, as one of sixteen Los Angeles Metropolitan Farms. As the largest community garden in Los Angeles, OVF strives to be a leader in effective and responsible environmental management. OVF's mission is to provide the surrounding urban community with a place to garden, promote and practice organic gardening techniques, maintain a green space in the community, provide education and guidance in the growing of plants and the recycling of waste through composting, and encourage the members' participation in gardening activities that benefit the community. OVR strongly promotes activities that minimize waste generation, reuse, reclaim or recycle all possible materials and have a minimal impact on the environment. This effort is best exemplified in a cooperative effort with the City of Los Angeles to reclaim and reuse city-collected stable waste in conjunction with a vigorous internal composting program. Today OVF's composting program entails mixing reclaimed stable waste with green organic waste produced in the garden. In 2004, more than 180 tons of shredded soft green virtually unlimited supply of compost for the 300 members tending to the 500 garden plots at OVF. In addition, almost 300 additional tons of stable waste was processed without green material to produce "gourmet compost." The Ocean View Farms composting program has saved the garden approximately \$10,000 per year in disposal fees for each of the last seven years. Furthermore, OVF has helped the City of Los Angeles save over \$11,000 per year in transportation and disposal fees by reclaiming collected stable waste.

Orthodyne Electronics

Orthodyne Electronics is the leading manufacturer of ultrasonic wire bonders, with an established tradition of developing revolutionary products for the semiconductor and microelectronics industries. The company has a comprehensive program recycling 63 tons of paper, cardboard, aluminum, scrap metals, plastic, glass, and universal waste. As part of its ISO 14001 certification, Orthodyne has saved an estimated \$25,000 through its reduce, reuse, and recycling program.

Pacific Builders

Pacific Builders is a Humboldt County business that takes the extra steps to divert materials from the local landfill and work towards zero waste. As a small general contracting company in Arcata, California for commercial construction, the main goal of the company is to divert construction waste materials generated on projects as well as convert those materials to be reused on site. Out of a total of 842.36 tons of construction waste debris generated between May 2005 and July 2006, Pacific Builders was able to divert 546 tons from the landfill. This gives Pacific Builders an overall diversion rate of 65 percent. By using focused resource management plans, a total savings of \$156,089.00 was accomplished in the overall efforts to recycle and reuse. All wood, concrete, asphalt, brick, cardboard, asphalt shingles, plastic sheeting, green waste, metal scrap and reusable fixtures are directed to C&D debris licensed recycling facility, local recycling center, salvage operations or a local non profit. Pacific Builders office uses a recycling program and focuses on material procurement to help reduce their footprint before the end waste is created on their projects. Pacific Builders continues to work within their community to educate and encourage waste reduction efforts as well as continue to develop their resource management programs to keep construction and demolition debris out of the landfill.

Philips Lumileds Lighting Company

Philips Lumileds has pro-actively implemented waste reduction and recycling programs since the company's inception in 1999. In this last year, 2005, the company diverted more than 400 tons of material that would have otherwise gone to landfills. The recycling of waste containing hazardous substances such as florescent lamps, computers, monitors, batteries, toner cartridges and semiconductor products in addition to the paper, plastic, wood and metal waste that is generated helps reduce the impact on our environment and resources. In addition, the company realized a cost savings of about \$31,000 for its waste management efforts. The recycling of 138 tons of metal products represents the single largest stream diverted for the last year.

PIER 39

PIER 39 LP is owner of PIER 39 - a retail shopping center/family entertainment center/tourist attraction in San Francisco. In the past twelve months, PIER 39's wide-range recycling program has saved an estimated \$92,000 in waste disposal costs and 1,226.5 tons of waste has been diverted from the landfill. Landscape waste from PEIR 39's extensive gardens is 100 percent recycled, is removed from their site in green compost bins and returned as fully composted material incorporated back into the soil. In 2005, with the help of Golden Gate Recycling and San Francisco's Department of the Environment, an organic/wet garbage composting program was introduced to PIER 39's large restaurants in order to divert even more recyclable material form the landfill.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2002, 2000, 1999, 1998

Plastic Loose Fill Council

The Plastic Loose Fill Council (PLFC) promotes reuse of plastic packing peanuts through its national collection program, the Peanut Hotline, and loose-fill packaging.com. The Peanut Hotline network of collection centers provides California mail order consumers with local reuse outlets for their clean, reusable leftover packing peanuts. Through the Hotline, member businesses have saved over 50 percent on the purchase of new void fill material. The PLFC is a non profit organization that keeps costs low by utilizing free media coverage, municipal recycling listings, an internet database management system, and an automated 800# and internet directory service for providing collection locations and other information to the public. There are over 150 official Peanut Hotline drop off locations for reusable loose fill throughout California. Call 800-828-2214 or go to loose-fill packaging.com to find them. Many more neighborhood shipping businesses have followed the lead of the Peanut Hotline and accept packing peanut donations. Look in your yellow pages for a local packaging store that may not be a Hotline member but would be happy to take your leftover loose fill. Portola Hotel and Spa

The Portola Plaza Hotel at Monterey Bay is a 379-room, full service hotel. The hotel, adjacent to the Monterey Conference Center, recycles, reuses, or donates nearly every type of waste item that is generated. From bottles and cans to cooking oil and wire hangers, they believe almost everything has a second life. Established in 2000, the "Green Mile" is an area in the hotel where virtually any type of item can be found and had by the hotel staff for free. The hotel estimates that their waste reduction efforts divert 150 tons of waste from the landfill on an annual basis, saving over \$20,000 in disposal costs every year. Printer's Ink

Printer's Ink Printing Services, Inc. is a graphics and printing company that several years ago set out to aggressively improve waste disposal from a 5 ton weekly bin to a ½ ton container. Their waste reduction and recycling efforts have made an impact on lowering their recycling by "finding use" for more waste that just recycling alone. In the 2005 calendar year Printer's Ink sent over 13,165 pounds of paper materials, 1,157 pounds of cardboard to recycling plants, and average 6 cases of scratch pads per month for our customers free use of paper diverted from disposal. Although waste papers are recycled, and the majority of our paper purchasing is recycled content, this reduction is due primarily to a committed effort to find and maximize "usage" for the papers that otherwise would be recycled only. Their estimated savings in the past year from reduced paper waste, increased use of wasted papers,

flexible orders and quantities with our customers, and recycling is \$3,900 and believe that staying focused on waste reduction not only saves their company money, but also communicates, educates, and encourages their customers and community to be more aware of waste reduction, recycling, and the preservation of our environment.

Quady Winery

Quady Winery is a small, family-run business that makes internationally renowned dessert wines. Through on-site activities such as composting, the winery has been able to reuse about 130 tons of organic waste. In the past year, by continuing a recycling program for production operations and office materials, the winery was able to cut its total waste and divert an additional 15.7 tons from landfill. In total, 99.8 percent of waste generated by the winery is composted, reused or recycled. Recent modifications in packaging, investment in modern processing equipment, and redesign of the vineyard irrigation system have been highly effective in reducing waste, energy, and water costs. Nearly \$20,000 was saved last year. Quady Winery views waste reduction and "green business" practices as part of its overall responsibility to their environment and their community.

Rainforest Preservation Foundation

The Rainforest Preservation Foundation uses CalMAX to find used construction materials for a home and office building to showcase the use of reclaimed resources. This year, through CalMAX and other support, RPF have been able to get more than half a ton of material, including pavers, bricks, rock, wood, doors and more. The project began in 1994 with a 660-square-foot house and environmental office on a 5,400-square-foot lot in the Westside Area of Los Angeles. The project, now 85 percent complete, includes dual, 2-story structures, and spans nearly 3,000 square feet. Almost 95 percent of the interior, and 40 percent of the exterior will be constructed from reclaimed building materials. Hill, who also works for EcoTelesis International as a Recycling Waste Reduction Specialist, lives and works on the site. Since he started listing with Calmax in 1996, Hill has obtained wood, plumbing materials, heating systems, solar water panels, rock, marble, electrical supplies, windows, plants, and many other items. By using reclaimed components, they are able to reduce what goes to the landfill, and receive high quality materials, like beautiful hardwoods. Reusing resources such as wood, marble, and metals also helps to reduce deforestation, and environmentally damaging strip mining. Reclamation materials come from a variety of sources, including remodeling, demolition, construction sites, business overages, and waste

Red and White Fleet

Red and White Fleet, the premier cruise operator on San Francisco Bay since 1892, is the first bay cruise company in San Francisco to reduce, reuse and recycle all products generated by its vessels, offices, and employees. As a previous 1999, 2000, 2001, 2002, 2003, 2004, and 2005 WRAP winner, the Red and White Fleet has been and remains committed to managing its waste in the most environmentally responsible manner possible. The family of Red and White Fleet employees has, for years, been

conscientiously working to hone the efficiency of their operations with an eye on both the environmental and economic benefits. One area of enormous conservation success has been in the reduction of emission from its vessels. Most recently, Red and White Fleet has been awarded grant funds to re-power one of its vessels with the cleanest marine diesel available, completing installation of modern diesel technology on its entire fleet. Further, the Red and White Fleet has begun running its fleet on B20 (a blend of #2 diesel with 20 bio-diesel produced from soy). Bio-diesel offers significant health benefits and emissions reductions while reducing our dependence on foreign oil.

Santa Clara Convention Center

The Santa Clara Convention Center is a 262,000 square foot facility, which will host approximately 350 events this fiscal year. These events consist of Conventions, Trade Shows, Public Shows, Meeting, Weddings, Cultural Events and Banquets. All combined, the Center will have serviced an overall attendance of over 292,745.00 this fiscal year. The Center implemented our recycling program in April of 2002, which reduced waste destined to become landfill by 48.6 tons, which resulted in a cost saving of \$10, 856.88 for our fiscal year 2002/03. For this fiscal year 2005/06, we have diverted 56.8 tons destined for landfill. Our recycling program consist of the following materials; paper, cardboard, glass, plastic and aluminum. In addition to our recycle program the Center has contributed to other recycle or re-use practices; our full-service caterer has been with us from day one and during the 2003/04 fiscal year, they have donated approximately 5,640 lbs of food to Second Harvest Food Bank. The Center and our partner's auction or sell equipment we can no longer use. Other recycle measures include: purchase of recycled paper products; buy in bulk when possible; recycle toner cartridges; use refill soap dispensers and landscaping materials. The Center is committed to our programs and will continue to implement new policies and procedures to ensure we contribute to a cleaner environment.

Save Mart Supermarkets

Save Mart Supermarkets operates 124 retail grocery stores in Northern California under the banners "Save Mart", "S-Mart Foods", and "Food Maxx". With an aggressive approach toward being responsible partners in the communities where they operate, Save Mart has instituted environmental policies, practices, and programs that have reduced their landfill input by nearly 82 percent and 45,000 tons annually. This has also generated over 2.3 million dollars per year in cost savings, making a win-win situation. The hallmark of environmental success for Save Mart is an organic diversion program that epitomizes the "closed-loop" goal of recycling by turning Organic waste (primarily produce trim and cull) into a premium compost soil amendment. This soil amendment is then sold in the Save Mart, S-Mart, and Food Maxx stores as a high-quality, low-priced consumer product.

Scapa Converted Products

Scapa Converted Products, division of Scapa North America, is a contract adhesive products converter for the medical device industry. The company's waste reduction program includes recycling paper, cardboard, pallets, HDPE, packaging materials, and toner cartridges, as well as reusing packaging materials, pallets and some production waste. Surplus materials are donated to local nonprofit organizations in the Southern California area. Reuse, recycling and donations diverted over 86 tons of waste from landfill (49.5 percent) in the last year, translating to approximately \$21,000 in cost savings and elimination of \$22,000 in disposal costs.

Years Awarded: 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999

540 N Oak St
Inglewood, CA 90302-2942

Scoma's Restaurant

Scoma's Restaurant is one of the nation's highest grossing restaurants. It has maintained a 95 percent diversion rate through sustainable practices. Their primary waste is food, which is processed into compost, sold to farmers and wine makers, and their products are then served in our restaurant; closing the loop from the sea to the earth. We work to divert some 300 tons from the landfill, saving approximately \$24,000 annually.

Years Awarded: 2010, 2009, 2008, 2007, 2006, 2005, 2004

SCPMG Regional Reference Laboratories

Southern California Permanente Medical Group Regional Reference Laboratories performs clinical diagnostic laboratory testing for each of the 11 Kaiser Permanente hospitals and over 95 associated medical clinics throughout Southern California serving over 3.2 million members. Kaiser Permanente Regional Reference Laboratories process over 11 million specimens each year, which results in the generation of significant amount of bio-hazardous, chemical, medical and solid wastes. Maximum waste reduction strategy includes solvent re-distillation and recycling, plastic recycling, glass recycling, paper and newspaper recycling, cardboard recycling, packing material recycling and multiple process oriented reuse methodologies. These programs have resulted in over \$32,500 in savings in the year 2005/06 and significantly reduced the amount of waste produced annually. The SCPMG Regional Reference Laboratories is committed to environmental protection and conservation of natural resources that includes the elimination of all types of wastes and, therefore, places a strong emphasis on pursuing technologies and processes that will achieve this goal.

Years Awarded: 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

Seismic Computer Management

Seismic Computer Management provides complete computer support to small and medium businesses, focusing on preventative solutions and remote management. Seismic has created a computer donation department where they invite businesses to give obsolete computers and parts to be refurbished into new machines for nonprofit organizations such as Saint John's Retirement Village of Woodland, Save Ourselves Breast Cancer organization, the West Sacramento Computers for Kids program, and Love Little Children, Inc. Seismic staff takes efforts to reduce overall waste and recycle everything they can. An estimated 100 pounds of

paper waste a year is saved by their small office by reusing printer paper. The estimated savings a year is \$565 dollars, this savings is by using washable kitchenware rather than disposable cups and plates. Meanwhile, Seismic estimates they have saved about 1,500 pounds of e-waste from early disposal with their donation programs. Their techs have refurbished 75 outdated computers and monitors into 40 working systems. Since this time last year, seven organizations have received a collective \$16,000 worth of computer equipment from Seismic Computer Management.

Seton Medical Center

Seton Medical Center's mission inspires its commitment to clinical excellence and to the delivery of compassionate patient care. Being a values-driven organization, it is the spirit of optimism, dedication, and belief that caring is powerful medicine that distinguishes Seton. After 150 years of caring, one thing remains the same...quality care provided to the whole person, body, mind and spirit. Seton Medical Center has diverted to recycling over 284 tons of various recyclable materials from disposal. At the current cost of \$.31 per pound for solid waste disposal, Seton Medical Center has saved over \$170,080 in 2005. By implementing a Green Clean chemical purchasing program, Seton continues to reduce hazardous waste into the environment. Seton Medical Center continues to seek new and innovative measures to provide a clean and safe environment for the community it serves.

1900 Sullivan Ave
Daly City, CA 94015-2229

Seton Medical Center Coastsides

Seton Medical Center Coastsides is a rural hospital located in Moss Beach, California. The facility holds a 116 bed Skilled Nursing Facility, a 5 bed Acute Care unit and the only Emergency Department on the coast, between Santa Cruz and Daly City. In FY06, Seton Medical Center Coastsides saved in estimated \$8,000 to \$10,000 through waste reduction efforts and diverted more than 25 tons of materials from disposal. The majority of the facility's waste reduction efforts are in the form of donation and recycling or reuse. While not saving much by way of dollars, the benefit is felt to be in the saving of natural resources and the environment. Exact measurement of all material diverted through reuse and donation is difficult due to the variety of items (medical equipment, electronic equipment, pallets, binders, clothes, linen, etc.), but reuse activities have become more and more creative as the staff's environmental awareness has grown. The use of a document and data destruction service has ensured the facility's compliance with federal regulations while still allowing for an almost 50 percent increase in paper recycling from FY03 to FY06. The 2001 implementation of "flat mop" system, has resulted in annual cost savings of over \$2,000, reduced floor chemical use by 75 percent, and enhanced patient safety by eliminating the threat of cross-contamination between rooms. Extensive use of an intranet vastly improved electronic communication capabilities between facilities. The availability of on-line policy and procedure manuals has furthered paper consumption reduction efforts by eliminating the need to distribute hard copy manuals to multiple departments. In addition to the intranet, upgrades and additions to internet services provided associates with access to "e-learning" options designed to assist them in fulfilling ongoing educational requirements. Results of this online training are maintained and reported to managers electronically, further reducing paper consumption.

Shaw Diversified Services, Inc.

Shaw Diversified Services, Inc. has four facilities located in California that manufactures and distributes carpeting for the places where the community lives, works, learns, and gathers. Most importantly, Shaw Diversified Services creates great flooring and rugs for the places we call home. That's a privilege Shaw takes seriously. Shaw Diversified Services, Inc.'s California Tuflex Division is an environmentally conscious part of Shaw that understands and demonstrates the concept of "Zero Waste"! In 2005, Shaw Diversified Services, Inc. diverted over 2,500 tons of recyclables from disposal to landfill at over and estimated \$700,000 in savings through waste reduction, reuse, and reduced landfill costs. Shaw, a subsidiary of Berkshire Hathaway, Inc., is headquartered in Dalton, Georgia. Shaw produces and sells carpet, rugs, ceramic, hardwood, and laminate flooring for residential and commercial applications throughout the world. To be exact, Shaw manufactures more than 600 million square yards of flooring covering every year - enough to wrap a 6-foot wide path around the earth's equator 7 times. Shaw is firmly committed to providing industry leadership in environmental performance and sustainability. Through the implementation of an Environmental Management System (Shaw Environmental System) in conjunction with Shaw's Quality System, they continually improve their operations and set

progressive goals that aim to minimize their impact on the environment. In the communities in which we live and the industry in which we work, Shaw actively strives to contribute to a better environment for everyone!

Shell Oil Products US

Shell Oil Products US Martinez Refinery combines state-of-the art facilities and equipment to convert over 160,000 barrels of crude oil per day into a variety of products including CARB gasoline, jet fuel and the ultra-low sulfur diesel so critical to reducing emissions in California. Shell Refinery is proud to produce some of the leanest burning gasoline in the world in an environmental record earned Shell's prestigious "Presidential Award" in the area of environmental leadership in 2003. The company is committed to sustainable development through energy efficiency, recycling, proper waste and disposal and community outreach and engagement. Over 1,000 tons of material was recycled at the refinery just last year alone. Millions of dollars have been saved through a variety of recycling efforts at the facility. The Shell philosophy is summed up in two words: people and planet. The company knows that if it takes care of people, provides a culture of safety, and protects the environment, success will then follow.

Sierra Nevada Brewing Company

Sierra Nevada Brewing Co. is the tenth largest brewer in the United States and produces ales and lagers of the highest quality. At every stage in the brewing and packaging process, the company attempts to reduce brewing grains, hops, and yeast for cattle feed, reducing water use, and operating its own water products. From January 1, 2005, Sierra Nevada Brewing Co. recycled 96.6 percent of the brewery's waste and by-products. From January 1, 2005 to December 31, 2005, the company diverted approximately 22,000 tons of recyclable materials from the landfill. In this same time period, the brewery has saved approximately \$1.5 million by reducing high-strength water treatment charges, selling recyclable materials, and reusing surplus supplies and equipment. During 2005 Sierra Nevada Brewing Co. installed four 250-kilowatt co-generation fuel cell power units to supply electric power and heat to the brewery. Their one megawatt of power output will produce most of the brewery's electrical demand, and the co-generation boilers will harvest the waste heat and produce steam for boiling the beer and other heating needs. The biogas produced from the wastewater treatment plant will provide approximately 250/400 kilowatts per hour depending on time of day. The brewery's daily load is from about 1 to 1.8 megawatts so it could produce around one fourth of our power needs. The recent purchase of the solar electric system will add 500 kilowatts as well during peak power needs.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001

1075 E 20th St
Chico, CA 95928-6722

Smucker Natural Foods, Inc.

Smucker Quality Beverages, Inc. is a wholly owned subsidiary of the J.M. Smucker Company. The company is a processor, packer and distributor of natural and organic fruit juices and juice blends. Smucker Quality Beverages, Inc. has saved over \$2,000,000 in packaging costs since redesigning its packaging to a tray pack from the old full cardboard case carton reducing cardboard. The company has also seen savings in energy costs of \$100,000 a year by reducing its energy consumption by changing the lighting throughout the facility with more efficient lighting, thus, lowering the watt usage and increasing the lighting, and by changing the work shifts from on peak to off peak hours when needed and they have installed a natural gas engine-driven chiller to reduce electric usage. Smucker Quality Beverages installed two 60-kilowatt Micro turbines; these turbines are fired with natural gas and generate a net of approximately 115 kilowatts of electricity. The net energy savings is generated by effectively utilizing the waste heat of the turbines to assist in our pasteurization process for both of Production Bottling Lines. This is accomplished through a recirculation hot water loop with our Plate and Frame heat exchangers and the turbine exhaust system. This Cogen project generates savings of approximately \$5,000.00 per month through reducing our peak demand and supplying over 10 percent of our energy needs. The company is at a 94.86 percent recycle rate compared to the States regulations to reduce landfill by 50 percent.

At present 94.86 percent rate, landfill and disposal costs were only \$10,261 due to the recycling program the company has enforced since 1995. The company has saved over \$100,000 a year in landfill and disposal costs since 1995. This year the company recycle revenue was \$40, 664.68 or \$30,403.73 after disposal and landfill costs even though some recycle prices fell from last years rates. This was achieved by adding recycle container throughout their plant, which also helped improve our safety and sanitation practices. Smucker Quality Beverage's also added Recycle Bins for their employees that do not have curbside pickup so they could bring their recycle products to work.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000

Southern California Edison

Today's Southern California Edison is the product of more than a century of being there to provide reliable electric service, a necessity to modern life and progress, to some of the most dynamic areas of central and Southern California. SCE is one of the largest electric utilities in the United States, and the largest subsidiary of Edison International. SCE provides electric service to 12 million individuals in 835 cities and communities. SCE serves 4.6 million customer accounts, including 285,000 commercial, industrial, and non-profit customers in thriving areas of central and Southern California. SCE has built a system of 34,000 underground circuit miles and more than 72,000 miles of overhead circuitry, maintained by 423 transmission and distribution crews. Delivering electrical service requires the days and nights of 14,600 dedicated SCE employees. SCE helps its customers get the most for their energy dollars, and even earn rebates through SCE's award winning energy efficiency programs. As a part of SCE's commitment to environmental protection, the electric power SCE provides for customers includes more alternate and renewable energy from a greater variety of resources than nearly any other utility in the world. SCE has been active in efforts to improve Southern California air quality since the 1940's. In 1993 Edison initiated its first recycling pilot. The "Waste-Not" recycling pilot grew into a trademarked company-wide program that focuses on waste prevention, green purchasing, reuse and recycling. Edison recycles paper, cardboard, compost material, glass, plastic, metal and wood. In 2005 SCE generated 55,000 tons of waste materials, over 80 percent of these materials were recycled. SCE saved \$10 million in solid waste hauling fees at 79 California facilities by recycling.

Squaw Valley USA

Site of the VIII Olympic Winter Games, Squaw Valley USA is one of the leading winter sport destinations in North America. The resort is visited by over 750,000 guests each year. Squaw Valley Ski Corp puts forth great efforts toward preserving the environment and implementing in environmentally sustainable practices. Squaw Valley Ski Corp is committed to a multi-million dollar environmental improvement program which has instituted extensive revegetation and erosion control projects to ensure the health and quality of the immediate surroundings. A group of eight employees form Squaw Valley's Revegetation Department, working during the summer months to preserve native and naturalized plant population and preserving and improving wetland areas within the resort. Squaw Valley Ski Corp has also instituted a comprehensive recycling program and revolutionary innovations in energy use to guarantee minimal depletion of our natural resources and to reduce greenhouse gas emissions. Squaw Valley Ski Corp is able to divert over 88 tons of resort waste from landfills through the use of an incinerator and recycling efforts. The incinerator is 99.99 percent efficient and can vaporize 1.2 metric tons of garbage and leave only enough debris to fill a small garbage can. Upgrades to the resort's Cable Car's as well as innovative geothermal heat facilities which have saved the company thousands of dollars while simultaneously offering a safer and cleaner environment for resort guests.

Tartan Star

Tartan Star provides a package of Environmental Educational "Edutainment" materials that are used by communities to develop and encourage recycling and other environmentally sound practices. The materials include the scripts and master copies for a children's play "Roxy the Recycling Robin and the Mystery of the Missing Trees" and a "Color-n-Keep" coloring book and story telling time based on the play. Tartan Star's goal is to have the "Roxy" performed not only as an Earth Day event, but also by children's theatre groups throughout the world to help remind people that every day is Earth Day. For Earth Day 2006, Tartan Star organized activities including an environmental magic show, a watershed demonstration, and a "Roxy" story time at the Carlsbad, CA Dove library that was broadcasted on television. From June 2005 through June 2006, it is estimated that they diverted at least 3,000 pounds from disposal. This was based on recycling so much on site that they had to request larger containers, reusing products whenever possible, buying office furniture from thrift stores, putting green waste in containers, and always being conservative whenever possible. At least \$3,000 has been saved from June 2005 through June 2006 due to conservation of materials and labor. This includes purchasing items with postconsumer packaging or used from thrift shops, reduction in landscaping costs with greenscaping, and using greenwaste containers to reduce trash pickup costs.

TDC Environmental, LLC

TDC Environmental, LLC is a small San Mateo business that provides environmental consulting services to public and non-profit clients. Known as a leader in pollution prevention, TDC Environmental services also include environmental technical studies and training. TDC Environmental practices what it preaches - it has integrated pollution prevention into its own small office operations, substituting simple methods like electronic filing and email for old-fashioned paper-intensive systems. By implementing these simple actions, TDC Environmental avoids wasting both time and money. Between July 2005 and June 2006, TDC Environmental used source reduction (eliminating use of paper) to divert from the waste stream and estimated 250 pounds of paper. Between July 2005 and June 2006, recycled about 5 pounds of paper per week and composted about 0.25 pounds of flowers a week for a total annual diversion of 273 pounds. Between July 2005 and June 2006, TDC Environmental saved an estimated \$11,000 by publishing and distributing reports electronically rather than on paper.

The Coca-Cola Company

Located in American Canyon, CA, TCCC (a.k.a. Pokka USA) is a large, non-carbonated beverage producing facility. Here they supply products such as PowerAde and Minute Maid to the western United States. Environmental consciousness is important to TCCC employees and they work hard to divert over 850 tons of material from disposal every year. Within the last year, they adopted a new program to recycle over 300 tons of cardboard and plastic packaging that would have previously been sent to disposal. In 2005, they initiated and implemented the Coca Cola Environmental Management System. A recent upgrade to the recycling aluminum cans, plastic bottles and glass are redirected from regular disposal. In addition to recycling, TCCC has programs to reuse

pallets, metal, and plastic drums. It is estimated that they save over \$180,000 a year from its recycling and reuse programs. Through an incentive program, they encourage employees to do everything they can to reduce waste in the production process. Over the upcoming years, in anticipation of a new production line that will be built, they plan to reduce its waste by diverting more paper and plastic packaging from disposal. The Coca-Cola Company is and will continue to be committed to waste reduction that will contribute to a cleaner environment for years to come.

The Walt Disney Company

The Walt Disney Company has developed extensive reuse networks to redistribute items, from unwanted office supplies to children's furniture to overstocked videotape and more, to non-profit community organizations. TWDC California business units' waste prevention and reuse activities resulted in an estimated \$296,395 in avoided disposal savings in 2005. A dramatic shift to on-line (non-paper) resources of Company news, financial reports, office supply ordering, clean air commuter reporting, human resources forms and more, significantly reduces Company paper consumption. California operations purchased more than \$999,086 in recycled-content office products, including paper and toner cartridges, and Environmental Policy and Procurement staffs continue to explore other environmentally preferred purchasing initiatives. Disneyland Resort® guests can rest assured that in addition to offering convenient recycling containers throughout theme parks; most recyclable items not placed into recycling containers are still recovered through "back of house" sorting programs "Environmentality™ Is Making a Difference" continues to be an applicable slogan, not only for employees and Cast Members, but for their guests and the broader communities.

The Westin San Francisco Airport

The Westin San Francisco Airport is a 397-room hotel with 315,000 square feet of facility space, including 23,000 square feet of meeting room space. The Westin Hotel has an energy and environmental action plan in place since 1994 and has made numerous improvements in its commitment to improving the environment through recycling, reducing and reusing products and energy. In recent years, the hotel added individual recycling bins to all office spaces; reduced energy consumption through lowering of heating temperatures for the spa and the hot water supply; as well as turning off non-essential light fixtures, putting motion sensors for lights in all small meeting rooms, and light timers in storage rooms. In 2006, the hotel has continued to update our network of recycling bins and the system by which recyclables are collected. The hotel has relabeled our bins at the loading dock area again and has coordinated with our two independent contractors to pick up large recyclable items and cardboard. The hotel has shared its results and networked through active participation in various environmental groups, and by attending environmental seminars and fairs as possible. For the year 2005, the recycling program totaled about 48 tons of recycled products. This included 27.5 tons of paper, 19 tons of glass, and 1.5 tons of plastic, the estimated savings/cost benefit with our refuse company, South San Francisco scavenger, was approximately \$32,500. The Hotel has received the WRAP (Waste Reduction Awards Program) award from the state of California for 11 consecutive years and the San Mateo County Sustainability Award for 2000. In addition, they recently earned an energy star certification from the EPA for 2004, one of the only hotels in Northern California and in the Starwood Hotels and Resorts Worldwide Chain to receive this certification. The program is facilitated by the energy and environmental committee which includes members from the engineering, housekeeping and purchasing departments and has been led and coordinated by Al Buchanan, Engineering supervisor, since it's inception in 1994.

Tofu Shop Specialty Foods, Inc.

Tofu Shop Foods, Inc. makes fine organic soy products for Humboldt County and beyond. The 26 year old company has 23 employees and diverts 99.1 percent of its waste, only putting 1 garbage can on the curb each week. Paper, glass, plastic, cans, and

batteries are recycled. Items such as wood pallets, packaging materials, and buckets are reused or donated to farmers and local nonprofits. All of the Tofu Shop's products are sold in recyclable containers and some items are offered in bulk with reusable packaging. Surplus products are donated to the Arcata Food Endeavor, a local food bank. By giving its main byproduct, soybean pulp, to local ranchers as animal feed the Tofu Shops diverts over 254,646 pounds of waste each year. The Tofu Shop saved nearly \$8133 last year by diverting its waste. The company's employees are continually looking for new ways to reach the Tofu Shop's goal of zero waste.

Toyota Motor Engineering & Manufacturing North America

Toyota Motor Engineering & Manufacturing North America (TEMA) is an automobile R & D and manufacturing corporation headquartered in Erlanger, Kentucky, ultimately reporting Toyota Motor Corporation in Japan. Toyota operates under a global Earth Charter that promotes environmental responsibility, recognizing the need for comprehensive approaches to the effective use of resources and the suppression of pollution and global gases/ TEMA. Toyota's North American engineering & manufacturing organization, has offices and plants throughout the United States, with Research & Development Business Units located in California, Arizona and Michigan. TEMA's location in Gardena, California is responsible for Toyota vehicle power train tuning, calibration and evaluation. TEAM strives to adhere to a "Reduce, Reuse and Recycle" philosophy for its waste stream. When practical, TEMA donates surplus equipment and materials to the 186th Street School in its neighborhood, reuse and recycle packaging materials, office supplies, electronics, used oil, and other materials that would otherwise be destined to be land filled. TEMA-Gardena does not achieve material cost savings by its recycling program, yet remains strong in its commitment to expanding the program.

Toyota Motor Sales

Toyota Motor Sales, USA San Francisco Parts Distribution Center & Regional Sales Office recycled over 785 tons during 2005 and the 1st quarter of 2006. During this period, the facility recycled 90.39 percent of all materials while sending only 9.61 percent of its' waste to the landfill; and is in line to reduce waste to the landfill in 2006 by nearly 15 percent from 2005. Over the past 16 month period the Toyota facility has had 3 months of zero waste to landfill, a remarkable achievement for a facility as large as Toyota, saving the company \$120,000 in 2005. Toyota's efforts with recycling, reuse, and waste reduction has earned the facility the distinguished award of being a Contra Costa Green Business as well as being an officially certified ISO14001 worksite. Toyota has also been recognized by the City Council of the City of San Ramon for their environmental, recycling and waste reduction achievements. Toyota sponsors Earth Day and Public Land events. Associates participate and also donate giveaways to important community events and in addition bring Hybrid vehicles to display and to educate the general public. Toyota has made these recycling achievements by educating, reinforcing and creating a culture that builds on the Toyota concept of Kaizen, the practice of continuous improvement while demonstrating commitment to the environment with another business cornerstone, respect for humanity.

Toyota Motor Sales - Headquarters Campus and Los Angeles Parts Distribution

Toyota Motor Sales, U.S.A., Inc. is the sales, marketing, distribution and customer service arm of Toyota, Lexus and Scion in the United States, marketing products and services through a network of 1,408 Toyota and Lexus dealers in 49 states. Toyota is the second largest global automotive manufacturer and Toyota is the number one selling car brand in the US. Toyota operates under a global Earth Charter that promotes environmental responsibility, recognizing the need for comprehensive approaches to the effective use of resources and the suppression of pollution and global warming. We are committed to producing affordable, energy-efficient, easily recycled vehicles with methods that preserve the environment. In Fiscal Year 2006, Toyota Motor Sales, U.S.A., Inc. Headquarters Campus and Los Angeles Parts Distribution Center diverted over 2,325 tons of material from going to the landfill, saving more than \$180,498 through disposal cost avoidance, and paper and metal recycling revenue. And as part of the larger Toyota North America operations, our Returnable Packaging Program saved over 7 million pounds of wood, 2.7 million pounds of corrugate, and \$5.7 million last fiscal year alone through waste avoidance. At Toyota, working to reduce environmental impact is part of Moving Forward.

Toyota Motor Sales, USA, Inc. North American Parts Center

Toyota's North American Parts Center California (NAPCC) is a 734,000 square foot facility that distributes automobile service parts and accessories throughout North America as well as to overseas destinations. NAPCC is committed to protecting the environment through natural resource conservation, recycling, pollution prevention, and various other initiatives. One of the most effective environmental process improvements at NAPCC has been the transition to returnable shipping units which last year saved approximately 1,629 tons of wood and 604 tons of cardboard. NAPCC was also able to divert an additional 909 tons of waste from local landfills for an 80 percent diversion rate. NAPCC also donated approximately \$132,350.72 in obsolete parts to various schools for technical training. NAPCC's application of Toyota's "Environmental Action for The Next Generation" is also good business - saving approximately \$6,202,994.90 this past year.

Traditional Medicinals

Traditional Medicinals is socially responsible and environmentally friendly conscious company, providing high-quality botanical products with a balance of responsible business practices as its guide. The company strives to create a positive, healthy and supportive working environment. Employees are encouraged to participate in community service and the company actively donates time, products and profits to charitable, environmental and educational non-profit organizations. Traditional Medicinals employees have made this commitment to the environment since 1974. Product research and development coupled with the company mission, ensures that all new products as well as established product lines stay environmentally friendly. This mission is further amplified through company training, policies, and recycling programs. This company wide effort resulted in diverting approximately 17 tons of material away from landfill last year. Increased company savings as a result of this commitment were in excess of \$65,000.

Waldeck's Office Supplies

Waldeck's is a certified green office supply store with a strong commercial presence around the State (www.waldecks.com).

Waldeck's is continually broadening its environmentally friendly product offering. As a 2005 WRAP Award winner, Waldeck's has

expanded its own recycling /reuse program to its business and residential community. Partnering with SF Goodwill Industries and the SF Department of the Environment, in the past three months Waldeck's has collected over five tons of computers and other e-waste. Waldeck's also offers (in two zip codes) free pick up, for toners and batteries to be recycled. Waldeck's continues to conduct all its advertising via the phone, internet, and personal visits. By not having a direct mail outreach program and reusing most of their packaging material, Waldeck's removed close to two tons from the waste stream and saved the company approximately \$20,000 in a new packaging and direct mail costs.

Years Awarded: 2006, 2005

Walser's

Walser's is a family-owned business, which has been in operation for 31 years. Walser's has over 22,000 square feet of combined retail, imaging center, and warehouse space. Walser's encourages reuse by allowing customers to take store displays that are no longer needed by the business. One of Walser's most successful waste recycling activities this year has been the recycling of cardboard and paper waste, along with plastic, glass bottles, and cans. Now that Walser's sells novelty and unusual beverages, Walser's collects an even greater amount of cans and bottles from employees and customers, roughly 5-6 bins a week. From the money earned from recycling these containers, Walser's is able to have a Holiday feast for all of their employees and families. Walser's does this not only to reward their employees for a job well done, but also to recognize their recycling efforts. Walser's added plastic tote bins for recycling paper materials. Their contribution to these bins continues to add up to hundreds of pounds per week. Between April 2005 and April 2006, Walser's diverted an estimated total of 7-9 tons of materials from disposal. Employees have gone to such efforts as voluntarily bringing items from their homes to contribute to the program instead of disposing of them. As of yet, commercial recycling is not yet fully available. The cost savings to Walser's is estimated to be over \$3,000.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999

Walter Claudio Salon Spa

Walter Claudio Salon Spa, Inc. is a multi-faceted beauty company that provides hair, skin and body services, and products to its guests. As an environmentally conscious establishment, Walter Claudio has made two critical business alignments. One by partnering with Aveda Corp. (publicly known as "green" manufacturer) as an exclusive Aveda Lifestyle salon spa; and secondly by adopting the head mapping program by Salon operating systems (S.O.S). The Headmapping program is patent pending, developed by Walter Claudio Zungri as a solution to his concerns and frustration over industry waste and heartfelt drive to standardized the mode of operation, as well as produce a leaner and healthier business practices thus creating opportunities for future growth and creating sustainable business. These strategic alliances have furthered their cause of reducing waste, conserving resources and thus creating a sustainable profitable work place. Walter Claudio has lowered operating costs by 6 percent, saving approximately 300 pounds of product and over \$50,000 by utilizing the aid of such Headmapping tools as the Mixation Guide (precise product measuring for hair color services) as well as successfully managing its waste by effectively applying a stringent recycling program to minimize waste to the landfills. The recycling program has effectively diverted 75 percent waste from landfills to the communities recycling programs. Over 388 pounds of hair color aluminum foil and over 500 pounds of plastic containers have been recycled in a one year period of July 2005 to July 2006. Walter Claudio Salon Spa is a socially and environmentally responsible organization committed to leading the way in making the beauty industry an efficient, sustainable and profitable force in the world of business.

Wild Birds Unlimited

Wild Bird Unlimited is a retail business specializing in the hobbies of attracting and feeding wild birds in the back yard and bird watching. The store is part of a national franchise system (Wild birds Unlimited, Inc.). Bob Shanman, the store owner, has been a birdwatcher since 1977, and has been recycling since about 1981. He is very concerned about the environment, and his efforts have been recognized by Wild Birds Unlimited, Inc. In 2001, he was awarded the franchise's top environmental award as the Wild Birds Unlimited Friend to the environment. In 2003 he was honored with the system's highest award, the Franchise Honor Award. The business is active in many ways in the community. Shortly after opening in 1995, WBU selected South Bay Wildlife Rehab, the local non profit group that takes care of most of the sick and injured wildlife area, as the charitable organization it would support. From 2001 through 2004, about \$18,000 was raised for the group. In 2005, \$7,600 was raised for them. Of this, \$1,000 was from recycling activities. In 2005, just over 10 tons of cardboard, paper, glass, plastics and aluminum were recycled for cash. The store saves and reuses shipping and packaging material from suppliers, or recycles what it cannot use. In 11 years, the store has essentially not purchased packing supplies. Unused packaging peanuts and plastic bubble wrap are given to The Postal mart for reuse in their operations (along with similar materials supplied by Grant Earth Vitamins-an arrangement set up 7 years ago by WBU). The store also takes boxes from Great Earth for reuse as shipping cartons, and recycles Great Earth's waste cardboard. Several other stores contribute to this recycling stream, along with materials brought in by customers. Mr. Shanman seeks out products for the store that have recycled content and also tries to buy recycled content material for office supplies. "Recycling works, and if done right, everyone wins" says Shanman. "I do it at home. The environment wins, there is less demand on landfills, and, our friends at South Bay wildlife Rehab get much needed funds."

Years Awarded: 2008, 2007, 2006, 2005, 2004, 2003

Zoological Society of San Diego

The Zoological Society of San Diego (ZSSD), dedicated to the conservation of endangered species and their habitats, manages the 100-acre San Diego Zoo, the 1,800-acre San Diego Zoo's Wild Animal Park (more than half of which has been set aside as protected native species habitat). Currently the ZSSD exceeds the State-mandated 50 percent waste diversion goal, set by the Integrated Waste Management Act of 1989, with an approximate diversion of 70 percent, The ZSSD diverts 18 tons of animal waste and 60 tons of green materials from landfills every single day and annually diverts nearly 275 tons of glass, plastic, paper and cardboard through recycling programs, resulting in an estimated \$275,000 savings. The Wild Animal Park operates a waste-water treatment plant that annually produces more than 22 million gallons of treated effluent which is then used for landscape irrigation in the large animal enclosures. Many ZSSD employees take part in a vanpool program that last year resulted in an environmental impact reduction of more than 45,000 gallons of fuel. The ZSSD is committed to environmental leadership in order to make a positive difference in conserving nature, both locally and globally.

Years Awarded: 2010, 2009, 2007, 2006, 2005, 2004, 2002, 2000, 1999, 1998, 1996
