

Waste Reduction Awards Program (WRAP)

WRAP Winners Listing for 2003

The Waste Reduction Awards Program (WRAP) was administered by CalRecycle (formerly the California Integrated Waste Management Board) from 1993-2011. WRAP provided an opportunity for California businesses and nonprofit organizations to gain public recognition for their outstanding waste reduction efforts and lets the community know the business takes waste reduction seriously. WRAP evaluated the waste reduction, procurement, and education activities in the internal business practices of the applicant, not its services or products.

WRAP Winners Statewide during 2003

3M Unitek

3M Unitek is a subsidiary of the 3M Corporation. 3M Unitek has been dedicated to the discovery, development and manufacture of the best and most innovative orthodontic products used throughout the world for over 40 years. In 2002, 3M Unitek continued to strive for the goal of 'zero waste.' In 2002, the site recycled more than 60% of the waste that was generated. This translated into over 665 tons of materials that were not sent to a landfill. The site's recycling programs are based on simplicity; they look for someone that may benefit from their waste products and then tackle the challenge of finding that person or company and working out the details. This philosophy has proven to work for 3M Unitek as they continue to strive for their goal of 'zero waste.'

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001

Monrovia, CA 91016-5097

AB&I Foundry

AB&I Foundry, a third-generation family-owned business since 1906, is the largest manufacturer of cast iron soil pipe and fittings in the western United States. Last year, AB&I recycled over 40,000 tons of scrap iron to produce soil pipe, fittings, and custom castings (stove pan carriers, automotive castings, etc.). Even though AB&I recycles most of the waste produced, efforts to recycle 100% of all waste produced are a high priority. AB&I diverted 11,500 cubic yards of landfill waste sand for recycling and saved \$100,000 in disposal fees and transportation costs. AB&I future projects include recycling waste heat from the melting process to use in other areas or to generate electricity.

Years Awarded: 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1995, 1994

7825 San Leandro St
Oakland, CA 94621-2515

Advanced BioTech LLC

Advanced BioTech develops and markets unique product formulations for improving soils, plants and crops. The technology is very complex but the products are simple to use. The firm's biotech products have helped farmers around the world bring higher quality food to consumers. Products are also available for home and garden via the company's Internet site. Reusable tanks and large volume packaging in conjunction with an ongoing in-house recycling program of plastic product containers and other supplies has saved Advanced BioTech approximately 14% annually in new packaging costs.

Years Awarded: 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

8244 W Hillsdale Ct
Visalia, CA 93729-9489

Advanced Micro Devices, Inc.

Advanced Micro Devices, Inc. is a global supplier of integrated circuits for the personal and networked computer and communications markets with manufacturing facilities in the United States, Europe, Japan, and Asia. AMD, a Fortune 500 and Standard & Poor's 500 company, produces microprocessors, flash memory devices, and support circuitry for communications and networking applications. Their values commit them, as individuals and as employees, to taking actions that enhance the quality of life and protect the environment of the communities in which they do business. AMD's Environmental, Health and Safety (EHS) Program reflects their commitment to these values. The company has one set of universal standards that govern their practices worldwide. Waste reduction and recycling is rooted in the AMD culture as evidenced by AMD's practices of donating surplus computer equipment, furniture, and supplies to non-profit organizations, recycling paper, cardboard, plastics, wooden crates and pallets, beverage containers, scrap metal, dry cell batteries and other materials, and sending landscape waste for composting. In 2002, AMD's California site diverted over 902 tons of materials from landfills, which represents a 51.24 percent diversion rate.

Years Awarded: 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995

One AMD Place, MS 5

Sunnyvale, CA 94088-3453

Advanced Sterilization Products

Advanced Sterilization Products (ASP) is a manufacturer of medical equipment for disinfecting and reprocessing of surgical instruments and the global leader in sterilization techniques. As a division of Ethicon Endo Surgery, Inc. and the Johnson & Johnson family of companies, ASP is committed to the environment and promoting pollution prevention programs. ASP's values are consistent with this excerpt from the J & J credo that reads: "We must maintain in good order the property we are privileged to use, protecting the environment and natural resources." Through their environmental efforts, they recycled 97 tons and saved \$13,858 in 2002. These accomplishments are a reflection of every employee's contribution to recycling and the continual improvement of pollution prevention goals.

Years Awarded: 2004, 2003, 2002, 2001, 2000, 1999, 1998

33 Technology Dr
Irvine, CA 92618

Agilent Laboratories

Agilent Laboratories site is a medium-sized facility that conducts the central research and development for Agilent Technologies, Inc. Agilent Technologies products provide solutions and technologies that revolutionize the way people work in test and measurement, semiconductor products, life science and chemical analysis. Agilent Laboratories has implemented a comprehensive solid waste recycling program to divert, reuse, or recycle material destined to be landfilled. This includes a program to donate surplus equipment and materials to nonprofit organizations and schools. In 2002, Agilent Labs reduced solid waste destined to be landfilled by 44.5 metric tons and saved more than \$20,000 through various diversion means. In addition, Agilent Labs is continuing to increase employee awareness by offering Sustainability Awareness training and implementing Sustainability Development discussion groups.

Years Awarded: 2005, 2004, 2003, 2002

3500 Deer Creek Rd
Palo Alto, CA 94304-1317

Agilent Technologies

Agilent Technologies, with campuses in Santa Rosa and Rohnert Park, is a leading manufacturer of high performance test and measurement equipment for the fast growing worldwide telecommunications industry. The company is also a leader in the management of resources and has implemented a highly successful reuse and recycling program for solid waste materials. The company has established recycling centers at each of its two major campuses in the county through the Becoming Independent 1st - Time to Work program for developmentally challenged adults. These recycling centers have provided for a major desk-side and manufacturing by-product recycling program that makes it very easy for employees to recycle materials. Agilent even allows employees to bring items from home that curbside operations often do not accept, such as large cardboard boxes, packaging "peanuts", and miscellaneous metal items. During 2002, the local operations diverted over 790 tons or 64% of the solid waste generated from its manufacturing operations from the Sonoma County landfill. Some of this material was donated to local non-profit organizations. The company would have spent at least an additional \$110,000 in landfill disposal costs during 2002 if they did not have this diversion program in place. Agilent is proud of its waste reduction and recycling efforts, and looks to continue being an industry leader in this area.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000

Albertson's, Inc.

Albertsons, Inc. is one of the largest retail food and drug chains in the world. Based in Boise, Idaho, the company currently operates 2,300 retail stores in 31 states, including 760 in California operating under the Albertsons Food & Drug, Super Saver and Sav-on Drug store banners. Albertsons, Inc. stands behind its environmental commitment by recycling over 50% of its waste stream, including 310,000 tons of cardboard and over 12 million pounds of plastics in 2002. In addition to the resultant conservation of valuable resources, these efforts added millions to the company's bottom line. Albertsons also spearheads innovative pollution prevention strategies, such as recyclable packaging for produce shipments and alternative uses of service deli fryer oil. The company continually encourages not only employees but also customers to explore new ways to reduce/reuse/recycle resources.

Years Awarded: 2005, 2003, 2002, 2001, 2000, 1999, 1998

Allergan, Inc.

Allergan, Inc., with headquarters in Irvine, California, is a global specialty pharmaceutical company that develops and commercializes innovative products for the eye care, neuromodulator, skin care and other specialty markets. In addition to its discovery-to-development research programs, Allergan has global marketing and sales capabilities in over 100 countries that deliver value to their customers, satisfy unmet medical needs and improve people's lives. For the last 10 years, Allergan has successfully recycled materials from offices, laboratories and manufacturing sites worldwide. In 2002, Allergan recycled approximately 2,001 tons of materials and had a recycling rate of approximately 42% worldwide. This represents average annual savings of approximately \$217,000 due to the diversion of recyclable materials away from the landfill. There is also a savings associated with the decrease in hauling expenses to transport the waste materials to a landfill. Allergan Corporate Headquarters in Irvine, California recycled approximately 150 tons of waste materials in 2002.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

Alpine Meadows Ski Resort

Located in the heart of the Sierra Nevada mountain range, Alpine Meadows Ski Resort provides winter recreation (skiing and snowboarding) to its guests. One of the most unique waste reduction and recycling activities at Alpine Meadows is the resort's summertime "Mountain Cleanup Day," where all employees help scour the mountain and parking lots picking up old cans, bottles, trash and other debris that is left behind by guests each season. The most successful program has been the recycling effort. All cardboard, cans and bottles are recycled (with a few exceptions) and all paper products are either reused or recycled. Alpine Meadows has recycled more than 49 tons of steel and in the last year alone, recycled approximately 70 tons of cardboard, paper, aluminum, glass and plastic. Alpine Meadows has realized savings of \$10,000 (-14%) in disposal fees, specifically from a cost of \$.119 per skier to \$.102 per skier.

Years Awarded: 2003

2600 Alpine Meadow Rd
Tahoe City, CA 96145

American Honda Motor Co Inc

American Honda Motor Co., Inc. is the US sales, marketing, and distribution arm for Honda and Acura automobiles, Honda motorcycles and all-terrain vehicles, marine engines, and power equipment. American Honda's comprehensive waste reduction/recycling program includes the regular donation of surplus and used equipment to nonprofit organizations. American Honda has also been successful with a recycling program that collects all recyclable office wastepaper from each associate's desk throughout the organization each day. Through the dedicated efforts of its associates and the company's long-standing commitment to the environment, American Honda recycled 576 tons of paper, plastic, glass, and cardboard and 843 tons of wood pallets and metal at its headquarters facility in Torrance, CA in 2002.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999

Union City, CA 94587

Amici's East Coast Pizzeria

Amici's East Coast Pizzeria restaurants offer traditional East Coast-style pizzas complemented by a casual Italian menu. Their menu is also available for takeout and delivery to local homes and businesses. As part of its comprehensive recycling program, Amici's has successfully encouraged neighboring businesses to share its recycling facilities. Staff are trained in guiding customers not to over-order so as to minimize the amount of food waste generated. Between its six locations, Amici's diverts approximately 1500 cubic yards of potential waste destined for landfills to be recycled instead. Energy-saving measures such as keeping lights turned off during daylight hours and opening windows instead of using air conditioning have helped to cut power bills by a total of

\$12,000 per year across the company.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

Anderson Valley Brewing Company

Anderson Valley Brewing Company is a regional brewery dedicated to the art of brewing and protecting the environment. The brewery reuses and recycles waste products and donates spent grain and spent yeast to local farmers for feed or fertilizer. Anderson Valley Brewing Company has installed its own wastewater treatment plant enabling wastewater to be collected, and after treatment, used to irrigate the thirty-acre property. These steps reduce waste and save the brewery significant amounts of money. These savings are then used to ensure and improve the quality of the product.

Anheuser-Busch, Inc., Fairfield Brewery

The Anheuser-Busch Fairfield Brewery produces over 4 million barrels of beer. Located in Solano County, California, the brewery was designed with pollution prevention in mind, recycling 98.9% of its waste and by-products (nearly 100,000 tons/year) during 2002. The brewery saves over 100 billion BTU's of energy recovered from a closed loop heat recovery system. The Fairfield Brewery utilizes an EMS system that mirrors the principles of the ISO 14000 standards. In the past year, the Brewery produced 245,000 gallons of ethanol from waste/recovered beer, recovered over 102,000 tons of grain for livestock feed, and collected over 159 tons of beechwood chips for off-site composting or energy recovery.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

Apple, Inc - Corporate Headquarters

Apple Computer, Inc. Corporate Headquarters in Cupertino, has a comprehensive integrated recycling and waste management program operated by Apple Recycles. The program oversees the diversion of recyclable commodities from California's landfill spaces and the secure destruction and environmental disposal of materials containing confidential information and proprietary electronic material. Additionally, Apple Recycles manages internal programs that redistribute useable office supplies and computer equipment. The program provides an estimated yearly cost savings to Apple of \$500,000 and diverts an estimated 1,300 tons from the landfills annually. Integrating sound environmental health and safety management practices into all aspects of its business, Apple is committed to offering technologically innovative products and services while conserving and enhancing resources for the future generations.

Years Awarded: 2011, 2010, 2009, 2005, 2004, 2003, 2002, 2001

10300 Bubb Rd
Cupertino, CA 95014

Apple, Inc.

Apple's Elk Grove, California manufacturing facility has a third party recycle team that champions the recycling efforts for the site. Because of its heightened awareness, the team is able to assist in capturing recyclable materials in a more efficient and cost effective manner. With the ever-increasing volume and variety of materials that come from the manufacturing process, the team is constantly looking for ways to improve its overall recycling percentage. Had Apple Elk Grove not recycled material, the site would have incurred several hundred thousand dollars in additional costs for trash handling.

APW Electronic Solutions - Poway Facility

APW Electronic Solutions is a Technically Enabled Manufacturing Service (TEMS) company that designs and manufactures infrastructure products for OEMs in the communications, military, medical and Internet markets. APW has particular skills in the areas of manufacturing enclosures, thermal management, power supplies and backplanes, as well as core competencies in product and system design, integration and supply chain management. Whenever possible, APW donates surplus equipment and materials to nonprofit organizations and schools. In 2003, the company modified their manufacturing process to use fewer materials, reused surplus supplies and equipment, and sold recyclable paper, scrap metal and plastic. APW saved approximately \$76,000 in disposal costs by diverting 12.5 tons of paper, 125,789 pounds of metal and 15,114 pounds of plastic away from the landfill. Additional energy savings were accrued by reducing energy consumption by 2000 kilowatts per hour.

Years Awarded: 2003, 2002, 2001, 2000

14100 Danielson Street

Poway, CA 92064-6898

AT&T Real Yellow Pages

SBC SMART Yellow Pages is one of the nation's leading publishers of telephone directories, supplying one of the most recognizable and utilized references in 15 million California homes and businesses. SBC SMART Yellow Pages' environmental efforts start with manufacturing directories that are completely recyclable and contain a high percentage of post consumer waste (40% minimum), and end with annual coordination with hundreds of communities across the state to make phone book recycling convenient for residents and businesses. Most outdated SBC SMART Yellow Pages are recycled into new telephone book paper as well as household insulation, breakfast cereal boxes, cardboard boxes, agricultural packaging, stationary and more.

Auric Blends

Auric Blends is committed to the manufacture of a superior line of fragrance products that enhance and excite the senses and the company encourages self-expression and individuality. Their goal is to sustain a mutually beneficial partnership with their co-workers, customers, vendors and associates. They are proud to offer the public the opportunity to share in the pleasure and experience of their unique collection of products for the body, spirit and soul. This wholesale manufacturing company currently ships over 250 packages per week around the US and abroad. The company generates a very small amount of garbage and actively uses recycled packaging materials in their shipments. This has been a very successful program -- in just a few years, the company has saved several thousands of dollars. This helps them to keep their products competitively priced as well as keep handling charges nominal.
Years Awarded: 2004, 2003, 2002, 2001, 2000

2900 Bowen St
Graton, CA 95444

B. Braun Medical Inc.

B. Braun Medical Inc. in Irvine is a major manufacturer of intravenous solutions and solution containers. They have been recognized for their use of non-PVC plastic in the IV containers and for demonstrating that a company can be environmentally responsible while at the same time being a profitable enterprise. In the last 12 months B. Braun has reduced waste destined to be land filled by 2,348 tons and saved more than \$89,800 by diverting this waste. In addition, the company has realized \$102,700 for the reuse and recycling of material that did not go to the landfill. In total, they have gained \$192,500 from their efforts to divert waste from the landfill. In addition to its extensive recycling and waste reduction program, B. Braun generates 85% of the electricity it uses and is involved in continuous evaluations of its energy usage.
Years Awarded: 2011, 2009, 2006, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994, 1993

Irvine, CA 92807

Ball Metal Beverage Container, Torrance Can Plant

Ball Metal Beverage Container, Torrance Can Plant, manufactures 12-ounce and 16-ounce aluminum beverage cans for the West Coast beer and soft drink market. Ball Torrance makes every effort to conserve energy and recycle where they can. Since the California energy crisis, they have limited the use of electric lights, added motion detector switches and generally raised everyone's awareness of the need to conserve energy. Making a can from recycled aluminum takes 95 percent less energy than making a new one. One of their largest successes has been redirecting their filter cake from the landfill to a recycler that makes asphalt or fertilizer with their waste. Ball Metal's wastewater treatment process constantly reduces the volume of water required for their can production. Ball Torrance has received many awards and certificates for their efforts in improving the environment.
Years Awarded: 2005, 2003, 2002

500 Crenshaw Blvd
Torrance, CA 90503-1705

Bank of America Environmental Network - Orange County

Bank of America Environmental Network - Orange County believes that the full potential of Bank of America's environmental commitment can only be reached if associates at all levels of the organization and in all locations learn what they personally can do in their daily activities to help the environment. While each act of recycling or turning off a light is small in itself, the cumulative impact of 143,000 associates doing the right thing is very significant. The Environmental Network's mission is to design and implement cost-effective programs that inform and educate associates about Bank of America's commitment to the environment. This commitment will then become an integral part of their values and culture, and inspire associates to become fully engaged and motivated to look for creative ways to apply this environmental ethic in their lives, at work, at home and in their communities.

Baxter Bioscience

Baxter BioScience, located in Thousand Oaks, is a manufacturer of Recombinate Antihemophilic Factor (Recombinant rAHF), a genetically engineered factor VIII protein for use in people with hemophilia A. The company has approximately 600 employees, and operates 24 hours per day/7 days per week. They have active recycling and environmental programs, which aggressively look at ways to reduce waste. The facility has established a cross-functional "Green Team" to help coordinate the site's environmental and recycling programs. Over the past year, the company has improved collection systems, heightened awareness and improved data collection methods. They also set up a formal Valued Improvement Project system to monitor, promote, reward, and share common best practices. Over the past year, Baxter diverted over 60 tons of waste from landfills and saved more than \$60,000 in the process. This result was achieved by reusing materials on-site, donating excess supplies to local schools and universities, setting up return programs with vendors and working with local recycling vendors.

Years Awarded: 2011, 2010, 2009, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

Thousand Oaks, CA 91320-1424

Bayer HealthCare Pharmaceuticals, LLC

Bayer Healthcare in Berkeley, CA, manufactures biologically based pharmaceuticals, such as Recombinant Factor VIII to treat hemophiliacs, and conducts research on life-threatening illnesses. Bayer's most successful recycling activity has been placing recycling bins within reach of all of its employees, inside copy rooms, and next to printers. Large rolling bins for cardboard, paper, and plastic are placed on the outside of most buildings. Various bins for other types of recyclables are also placed around the site, meeting the needs of areas that generate those materials. No type of material that is recyclable gets discarded. In the past year, 2002, Bayer recycled 513.63 tons of its solid waste, representing a landfill diversion rate of approximately 46 percent of its solid waste. Already this year alone, Bayer has recycled 48.6 percent of its solid waste. Through waste reduction efforts in 2002, Bayer realized a cost savings of \$20,000.

Years Awarded: 2011, 2010, 2009, 2008, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

San Diego, CA 92110

Beaulieu Vineyard

Beaulieu Vineyard has been in the premium wine business for over 100 years, producing approximately one million cases annually. Beaulieu Vineyard is very proud to be a 10-time winner of the WRAP award. With tremendous employee support and input into the recycling and environmental programs, Beaulieu Vineyard continues to find ways to reduce, reuse, and recycle waste. Through Beaulieu Vineyard's efforts and attitudes of being "environmentally aware," recognition has been received from local and state agencies, which is welcome and appreciated in a very competitive market. Beaulieu Vineyard recycled 1,808 tons of material, mostly grape pomace, for the period 6/2002 - 6/2003. In addition to this, BV sent 1,250 lbs. of computers, monitors, typewriters, and other highly toxic electronic equipment to Napa Valley College for recycling and reuse.

Years Awarded: 2011, 2010, 2009, 2008, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994, 1993

Beckman Coulter, Inc. - Brea Facilities

Beckman Coulter, Inc. is a leading biomedical manufacturer. At their Brea, CA site, recycling is a point of pride with the facilities operations group and all of the employee participants at the site. In 2002, encouraged by recognition of their efforts via the WRAP award, the site recycling effort sustained its momentum and once again recycled over 230 tons of solid waste that would otherwise have been sent to landfill. This represents a diversion of better than 40% of a very diverse solid waste stream. Since 1995, their waste reduction program has enabled the company to realize more than \$172,000.00 in operating cost savings while diverting over 3.2 million pounds of waste from the landfills.

Years Awarded: 2004, 2003, 2002

Benny's Oil Filter Recycling, Inc.

Benny's Oil Filter Recycling picks up filters from hundreds of auto shops, garages and retail businesses. The material is transported back to their facility where the filters undergo a unique and simple process. The process involves squeezing the filter to remove the residual oil, and crushing small amounts of filters into cubes that weigh approximately 35 pounds. These cubes are then transported to Tamco where they are recycled into re-bar. Benny's Oil Filter Recycling Program is successful because they have diverted an enormous amount of waste from landfills. Between April 2002 and April 2003, Benny's diverted 1,142,040 pounds of used motor oil filters from landfills. In addition, 80,300 gallons of oil were extracted from these filters that would have otherwise been dumped into the trash, the gutter, or into water and landfills. Benny's is responsible for both diverting waste from landfills and reducing hazardous waste.

Bentley Prince Street

Bentley Prince Street is a division of Interface, Inc. whose motto is "Doing Well by Doing Good." Put simply, Bentley Prince Street strives to be a profitable company that leaves a minimal environmental footprint; taking nothing from the Earth and doing no harm. Bentley Prince Street, located in City of Industry, is a commercial manufacturer of high-end carpet whose goal is to manufacture carpet in a way that has little or no impact on the Earth, eventually becoming restorative. Since 1994, Bentley Prince Street has diverted over 80% of trash that would otherwise have been landfilled, reducing their disposal costs by 72% and generating over a million dollars in revenue from the sale of recyclables. Bentley Prince Street achieves these results through the implementation of procedures and programs such as QUEST, which identifies, tracks and measures waste. QUEST stands for Quality Utilizing Employee Suggestions and Teamwork. It is a corporation-wide waste reduction program. This, along with the use of renewable energy sources such as their photovoltaic solar panels, the Reclamation Program, frequent Dumpster Dives and the development of new restorative programs keeps Bentley Prince Street in alignment with Interface, Inc.'s goal to be completely sustainable by the year 2020.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2000, 1999

BioWorld Products Inc.

BioWorld Products provides unique biotechnology formulated for odor control, algae control, soil control and crop enhancements, wastewater treatment, oil spill cleanup and other environmental projects. These products are sold to industrial and governmental facilities, manufacturing plants, food processors, dairies, farms and ranches, golf courses and residential users. BioWorld products are marketed worldwide with clients in 58 countries, and they perform large projects including oil spill clean up from a sunken ship to algae prevention in lakes and ponds to odor control in high-rise office buildings. In 1994, the company initiated a waste reduction program to reuse plastic production containers with a substantial cost savings of 26% and continues to have cost savings through an aggressive reduce, reuse and recycle policy.

Years Awarded: 2011, 2005, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994, 1993

Blue & Gold Fleet LLP

Blue & Gold Fleet is the leading ferry vessel transportation company in California, providing fast, clean, and efficient commuter services from Vallejo, Oakland, Alameda, Tiburon, Fisherman's Wharf, Sausalito, and San Francisco's Financial District. In 2002, Blue & Gold Fleet recycled 100,000 pounds of cardboard, 32,000 pounds of paper, 6,000 gallons of oil, and installed energy efficient lighting to save 82,000-kilowatt hours per year. Through the engine re-power program of Blue & Gold Fleet ferry vessels, the Blue & Gold Fleet has reduced its use of diesel fuels by more than 100,000 gallons annually. The implementation of Blue & Gold Fleet's recycling/reuse/reduce and environmental programs saves approximately \$120,000 per year in operation costs. The Blue & Gold Fleet's goal is to exemplify the best management practices and environmental sustainability and to minimize the impact in all of the Blue & Gold Fleet operations. They continue to seek and adopt innovative strategies to further improve the Blue & Gold Fleet's performance in environmental management.

BriarPatch Co-op

BriarPatch Community Market is a medium-sized natural food cooperative with over 1,700 owner-members. It has implemented a successful waste diversion program that saves the business over \$21,000 a year through avoided waste disposal fees. An estimated 53 tons of materials are diverted through recycling, composting, reuse, and source reduction measures. Over 11 tons of cardboard is recycled and over 20 tons of cardboard is reused. Over three tons of produced waste is donated to local farms and gardeners, and empty egg cartons are collected for reuse. Packing materials are reused by other businesses. The BriarPatch partially attributes its success to networking with its members, community, and distributors. Also, they are sustainable to positively contribute to the health of local community and the environment.

Byers LeafGuard Gutter Systems

Byers' LeafGuard Gutter Systems is a full service, seamless, custom-fit gutter contractor that provides a "No Clog" guarantee to their customers. They cover most of Northern California with low emission, fuel-efficient sales vehicles, saving both kinds of "green." They also work with a firm that picks up the metal gutters they remove from their client's homes and delivers it to a large recycling plant. An impressive 189 tons of metal, scraps and cardboard are diverted from Nevada County's limited and precious landfill. An equally attractive figure of \$12,865.00 in savings is what Byers' LeafGuard Gutter Systems has to show for their efforts in this past year alone!

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001

Cagwin & Dorward, Landscape Contractors

Cagwin & Dorward Landscape Contractors, winner of several water management and environmental awards, provides services throughout Northern California. Recycling is essential to their operations, as they generate and recycle over 25,000 cubic yards of green waste, 900 gallons of used motor oil and 1200 pounds of paper products annually. Cagwin & Dorward provides their customers with water conservation and management programs, including converting irrigation to use reclaimed water where available. Additionally, the company is focused on using and developing electronic media such as website work order forms and e-mail to correspond with customers. They have a form on their website for people who would like free wood chips generated from their tree care services. These efforts save the company over \$25,000 annually, and their customers up to several thousands in water expenses.

Multiple locations for this applicant

Cal Poly Corporation, Campus Dining

Campus Dining provides 10,000 meals each day for students, faculty and staff in over a dozen locations on the Cal Poly campus. Recycling efforts began several years ago with a cardboard recycling program, which has expanded to include glass, metal, plastic and vegetable scraps. This total waste reduction program strives to balance cost savings from waste stream reduction with the costs of purchasing recycled and recyclable products. Trash hauling has been reduced by more than 50%, yielding some costs savings. The primary focus is to employ source reduction, recycling and purchasing recycled products to reduce total waste without increasing overall costs.

Years Awarded: 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995

California Institute of Technology

The California Institute of Technology (Caltech) is a small, independent university that carries on instructions in science and engineering. With an outstanding faculty, including several Nobel Laureates, Caltech has become one of the world's major research centers and is probably best known for the media stampede that occurs after an earthquake. Caltech's comprehensive waste reduction, recycling and procurement efforts add up to a comprehensive and successful integrated management system. Their program offers an in-house recycling program for staff and faculty, a drop-off recycling center open to the Pasadena residents, waste reduction efforts highlighted by reusable dining utensils, cups, and plates in the cafeterias, and an aggressive procurement program to purchase items that can be recycled. In 2000, Caltech's efforts kept 863 tons out of landfill, saved in disposal costs, and brought revenue to the organization from the items recycled.

Cardinal Health

Cardinal Health is a worldwide wholesale distributor and manufacturer of various healthcare products. In 2002, approximately \$1 million dollars in surplus and slightly damaged inventory was donated by the Allegiance Healthcare distribution facility to various non-profit charitable organizations. In addition, the Ontario facility earned \$96,000 dollars in recycling revenue and saved \$148,600 dollars in disposal fees. This figure represents 3,808,000 pounds of material that was diverted from a landfill. This does not include approximately 250,000 pounds of various medical supplies and equipment donated to charity. Total savings from waste reduction efforts in 2002 were \$244,000 dollars.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

CertainTeed Corporation - Fremont

CertainTeed-Fremont is a roofing manufacturing company that makes roofing shingles. As with most companies in today's marketplace, the last couple years have shown them that they need to look at the total manufacturing process and minimize or eliminate product waste to remain profitable. CertainTeed-Fremont has implemented several energy-saving programs including energy-saving lighting and energy efficient electric motors. They have used six sigma efforts to cut approximately \$40,000 in manufacturing material costs and diverted from landfill 34 tons of waste that in the past would have gone into the waste stream. They have just implemented an office paper recycle plan, a pallet return program, and are in the process of setting up a Green Team to further the waste reduction effort.

El Segundo, CA 90245

Cisco Systems, Inc.

Cisco Systems, Inc. is the worldwide leader in networking for the Internet. Cisco Internet Protocol-based (IP) networking solutions are the foundation of the Internet for most corporate, education and government networks around the world. Cisco also provides the broadest life of solutions for transporting data, voice and video within buildings, across campuses or around the world. As an Internet-based company, Cisco's most unique waste reductions are E-commerce and E-learning. Easy-to-use, interactive, web-based E-commerce applications enable more efficient processes for the conduction of transactions online with suppliers, customers, business partners, and employees, thereby reducing costs for sales, customer service and of orders transacted over the web. E-learning is the other unique waste reduction activity. Cisco has achieved a 60% cost savings through increased use of E-learning over instructor-led training while increasing productivity time. E-learning reduces the amount of printed training materials needed and reduces transportation or classroom needs for students. The new E-Waste program implemented at Cisco in the past year is comprised of two key components; Cisco Resource Exchange & Disposal Online (CREDO), an internal web based tool for reuse of equipment and Surplus Product Utilization & Reclamation (SPUR), a global e-waste process. The CREDO program has saved Cisco \$1.8 million by placing equipment back into reuse and eliminating the cost of purchasing, storing or disposing of it. SPUR has recycled 1031 tons of electronic E-Waste along with 726 tons of recyclable and 11 tons of trash sent to the landfill. The E-waste diversion rate is 99%. In the period from August 2001 to July 2002, Cisco San Jose Waste Reduction and Recycling program diverted 63% of the waste stream or 3,871 tons of materials with a cost avoidance of \$600,744. Thus far this fiscal year from August 2002 through April 2003, 2,132 tons of materials were recycled with a cost avoidance of \$376,861. The combined programs led to a diversion rate of 81%.

City of Hope National Medical Center & Beckman Research Institute

City of Hope National Medical Center is one of just 37 Comprehensive Cancer Centers in the United States as designated by the National Cancer Institute and is a founding member of the National Comprehensive Cancer Network. Located in Duarte, California close to 2,500 physicians, researchers, staff and volunteers work to find the causes and cures for cancer and other life-threatening diseases. Located on over 110 beautifully landscaped acres, they have instituted the practice of "grass-cycling" over 70 tons of grass annually over the past three years. Where feasible and practical, flowerbeds have been replaced with xeri-scaping. Additionally, they have recycled more than 450 tons of shredded paper, 90 tons of cardboard and close to 1.5 tons of batteries in the past two years! This represents a cost savings for disposal of over \$27,000 in the past two years. Revenue from cardboard has garnered \$4,600 in the same timeframe, used by the Recycling Task Force to purchase recycling equipment. In 2002, they applied for and received close to \$66,000 in combined grant funds from the City of Duarte and the State Department of Conservation with which they will purchase desk-side paper collection containers and place many recycling kiosks throughout their expansive campus in order to collect mixed beverage containers.

Clark Construction Group - California, LP

The Clark Construction Group, Inc. is a national general contractor that has operations ongoing in California. Clark has instituted waste reduction and reuse programs on many of its projects. Key successes on Clark projects include the diversion of 75% of demolition and construction debris from landfills, the institution of proactive programs to reuse products originally scheduled for disposal, and the development of sustainable designs that have allowed them to exceed Title 24 energy efficiency requirements by up to 30%. Clark estimates that it has diverted in excess of 5,000 tons from landfills over the past year, with cost savings estimated to be close to \$100,000. Clark is proud to be a leader in their industry in the implementation of recycling and reuse programs.

Community Environmental Council

The Community Environmental Council (CEC) is the leading non-profit environmental education organization in Santa Barbara County. With its five centers and ten programs, CEC provides valuable community services, including water quality protection, hazardous waste management, recycling and waste reduction, integrated pest management, promotion of sustainable living, and energy conservation. CEC's headquarters, the Gildea Resource Center, serves as a model for "green" building features, organic gardening, and energy conservation and efficiency. Aside from the environmental benefits of these features, the organization also

enjoys economic advantages by reducing its monthly electricity bill by approximately 30%. CEC is also a leader in its waste minimization and recycling strategies, practicing onsite composting and diverting from the landfill roughly 100 garbage can-sized loads of recyclable material each year.

Computers & Education and Computer Recycling Center

The Computer Recycling Center (CRC) program of Computers & Education is the oldest and largest nonprofit program in the USA, reusing and recycling electronic equipment from individuals and businesses. The Center diverted over six million pounds of computer equipment from landfills in 2002, donating to schools, teachers, and nonprofit community programs. CRC partners with the youth violence prevention programs of United Way to instruct and educate youth in technical areas and promote self-esteem. CRC trains seniors returning to the work force through a partnership with AARP, giving them hands-on technical experience. All of these programs promote the reuse of computer equipment back into the community, creating in-kind donations of over two million dollars of donated items.

Conservation Corps North Bay

The Marin Conservation Corps (MCC) is the nation's first non-profit Conservation Corps, founded in 1982. MCC is dedicated to preserving Marin County's natural resources while providing hundreds of young adults with educational, community service and employment opportunities each year. MCC provides recycling and reuse education to thousands of students and volunteers each year and conducts numerous restoration and conservation programs throughout the county. MCC provides recycling collection services to Marin's public land agencies and maintains over 50 recycling collection points. Since 1997, MCC has recycled over 1.3 million pounds of materials for Marin County. MCC corpsmembers and junior corpsmembers constructed over 50 recycling bins from recycled plastic lumber last year for use in the parks. Recycling services and education are provided free of charge to the community of Marin through a grant from the CA Department of Conservation/Division of Recycling.

Crown Poly, Inc

Crown Poly Inc. takes environmental responsibility for the health of the planet very seriously. This California corporation, the inventor of the Pull-N-Pak® Bagging System, has elected to use high-density polyethylene for product content, specifically to reduce raw materials usage and energy consumption. Further, Crown Poly Inc. captures the scrap from the production of its bags and recycles this refuse in order to produce the cylindrical core on which it presents the bags to the consumer. This ensures maximum, efficient use of raw materials and eliminates any unused refuse. To complete their environmental goals, Crown Poly Inc. utilizes advertising to encourage consumers and the retailing industry to recycle and reuse its finished products. Thus, Crown Poly Inc. products provide jobs for the US economy, improve the quality of life for consumers domestically and internationally with the consumption of its products and protectively ensure that the global environment is respected. Crown Poly Inc., through its actions both internally within the corporation and externally through the public, supports the EPA's three R's: Reduce, Reuse, Recycle.

Domtar Cerritos Converting and Distribution

Weyerhaeuser Communications Paper Division is the largest business forms manufacturer in the United States, manufacturing products, for the home and office. A few times a year, the manufacturing company donates surplus equipment and materials to nonprofit organizations and schools. The company has also instituted a return policy on some items for continued use. In 2002, the manufacturing company diverted approximately 2800 tons of material that would otherwise have ended up in landfills. Weyerhaeuser also saved an estimated \$500,000 by recycling paper and other recyclable materials.

Years Awarded: 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1994

East Shore RV Park

East Shore RV Park is a camping facility open to the general public, encountering hundreds of people at their site each month. There are recycling bins located at the rear of the office for everyone to recycle glass, paper, cardboard, aluminum, etc. Each week, East Shore RV Park mows over 40 acres of lush turf and trims hundreds of trees, using the clippings as mulch for weed and moisture control. These clippings include over 50 tons of turf and 5 tons of tree trimmings annually. East Shore's recycling program and waste control practices have led to the reduction of the company's trash expenses by as much as 30%.

F. Korb & Bros. Inc.

Established in 1882, Korb Champagne Cellars has been producing California méthode champenoise champagne and fine brandy for more than 120 years. Today, Korb, known for its best-selling premium champagne in America, also owns three additional Sonoma County wineries - Kenwood Vineyards, Valley of the Moon Winery and Lake Sonoma Winery. As a company, Korb has several opportunities and every employee plays a role. Everything from waste oils, solvents, paint and laboratory processing chemicals to all metals of various types, including aerosol cans, are recycled. Plant process water is reclaimed for vineyard frost

protection and irrigation. Grape pumace from the previous year's crush is laid to drain and is returned to a soils composition company each spring. Cardboard in excess of 1,500 tons per year is bailed and recycled. All glass, stretch film and shipping plastics are also recycled. In 1998, they completed the integration of an in-house email system at all of their facilities throughout California, reducing the amount of paper used throughout the company. Also in 1998, they purchased equipment, which allowed them to separate the crown caps and plastic bidules used in the production of méthode champenoise champagne. The crown caps are then recycled totaling around 15 tons annually. With all their efforts over a ten-year period, they have been able to reduce their large container refuse to landfill costs by 50 percent.

Golden Gate Disposal & Recycling Company

Golden Gate Disposal & Recycling Company, a subsidiary of Norcal Waste Systems, Inc., is an employee-owned garbage and recycling collection company. Golden Gate is committed to protecting the environment through an application of stringent standards and by innovatively recycling more materials than other hauling companies. They recycle the basics (cans, bottles and paper) as well as all food waste and non-recyclable paper (i.e.: food soiled paper, paper towels from the restroom, etc.). Reusing one-sided used paper for draft fax paper, recycling batteries, and providing ceramic mugs for employees is the company's standard practice. To help close the recycling loop, Golden Gate purchased recycled content carpet tiles for their office. These tiles also promote waste prevention since a single tile can easily be changed when a stain occurs. Participating in these easy-to-follow programs has allowed Golden Gate Disposal & Recycling Company to achieve an amazing 65% diversion rate! By diverting 41 tons of materials by recycling and preventing waste, Golden Gate Disposal & Recycling Company is saving an estimated \$10,000 per year.

HELIX Environmental Planning, Inc.

HELIX Environmental Planning, Inc. was established in 1991 to service the expanding environmental consulting market. Based in San Diego County, HELIX offers a wide range of services including comprehensive impact assessments, regulatory permitting, biological resources studies, landscape architecture and native habitat maintenance/restoration. Work is or has been completed throughout Southern California, Arizona, Texas and Thailand. HELIX's most significant waste reduction efforts are the reuse or recycling of approximately 500 reams of paper and recycling over 200 pounds of aluminum beverage containers annually. Paper reuse alone saves approximately \$1,000 annually. HELIX also is proud to be transitioning to a 100% post-consumer waste paper that has been processed chlorine free. HELIX recycles all accepted materials as a sponsor of the Urban Corps of San Diego, which serves youth and provides environmental and community services throughout San Diego County. Aluminum can recycling alone contributes over \$300 annually to the resources as demonstrated by the reuse and recycling of all possible materials, support of recycled products and socially and environmentally responsible manufacturers, reduced energy consumption and two newly implemented programs: the Sustainable Business Practices Program and the Helix Community Conservancy's land conservation program.

Hewlett Packard: San Diego

HP - San Diego Site in Rancho Bernardo was established in September 1968. HP local operation includes the design, development and marketing of all-in-one office and home products, digital photography products, inkjet pen cartridges and media, large-format printer sales and marketing, specialty inkjet printers and internet imaging services. For more than 35 years, HP's Rancho Bernardo Facility has developed and commercialized innovative printing and imaging technologies for industrial, business and home customers throughout the world. Over 80 acres of campus is home to the Imaging and Printing Systems group, three Consumer Business Organization functions, three divisions, three operations and two marketing centers. HP maintains a landfill diversion of basically 80 tons monthly or 78.5% for fiscal year 2002. The Recycle and Waste Stream Management Program identifies 26 commodities for reuse, reduction and recycling. It is unique and significant that all cardboard, paper, plastic and Styrofoam are compacted, shredded and/or baled on site for shipment to local vendors. The landfill diversion coupled with actual financial rebates generated cost savings of around \$100,000.00. A generous donation program benefits local schools and non-profit organizations and HP-San Diego is a strong advocate of utilizing recycled consumables and by-products.

Holiday Quality Foods

Locally owned and operated, Holiday Quality Foods is on the cutting edge when it comes to recycling. Holiday is the first retail store in the world to successfully recycle wax cardboard into fire logs and sell them in their 24 locations. They will sell approximately 40,000 logs this year, coining the term "cash for trash." Other benefits from these fire logs include a \$150,000 savings on waste pick up and keeping about 70 tons of wax cardboard out of the landfill. Holiday Quality Foods diverts 1,460 tons of waste annually. Holiday also has a Banana Box Waste Paper Recycling Program. Every office desk located at corporate as well as the retail locations has a banana box at its side to put recyclable waste paper into and it is then sent to be recycled. You may be sitting on some recycled shrink-wrap from Holiday if you have any plastic chairs on your patio. Holiday sends all shrink-wrap and used plastic bags to their warehouse where it is bailed and sent to Weyerhaeuser to be recycled. Holiday's cardboard goes directly to Weyerhaeuser in Oregon and comes back to their stores as paper bags. Fifty percent of the content of these bags is recycled fibers. When it comes to recycling, this neighborhood grocer is doing things in a large way. Holiday is working hard to become a paperless company by using electronic invoicing.

HP is a provider of computing, Internet and Intranet solutions, services and communications products. In accordance with its environmental policy, HP is committed to conducting its business in an ethical and socially responsible manner. To HP, that commitment means a major responsibility to protect the ecology, the health and safety of its employees, its customers and the locales in which it operates worldwide. The Bay Area HP maintained a landfill diversion of 73% for fiscal year 2002. The total material diverted from the landfill was 1,924 tons, while the total landfill rate was 709 tons. HP's waste minimization program identifies 20 commodities for reduce, reuse and recycle. It is unique and significant that all cardboard, paper, cans and bottles are collected and transported to local vendors. The landfill diversion coupled with actual financial rebates generated savings of around \$422,000. A generous donation program benefits local schools and non-profit organizations. HP is a strong advocate of utilizing recycled consumables and by-products.

Intel Corporation

Intel Corporation is the world's largest semi-conductor company operating in over 50 countries around the world. The Folsom Campus is a research and development center that designs and tests the latest chips before they go into production. Intel has a strong commitment to protecting the environment and giving back to the communities where they reside. It is one of their long-range strategic goals to be an environmental, health and safety leader in their communities and their industry. Intel achieved worldwide certification to ISO 14001 for all their manufacturing operations. The Folsom site recycled 1,044 tons of their solid waste and diverted over 700 tons away from the landfill.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999

Intel Corporation

Intel, the world's largest chip maker and leading manufacturer of personal computer, networking and communications products, continues to focus on recycling efforts at its Santa Clara site location. During fiscal year 2002, Intel Santa Clara recycled 73.8% of its solid waste, and donated computers and other electronic equipment to K-12 teachers, community centers and local community colleges. Each year, their employees look forward to Earth Day activities and spring cleaning. These activities provide their employees with an opportunity to be involved, as well as meet their vendors and partners in recycling.

Interior Removal Specialist, Inc.

Interior Removal Specialist, Inc. is a premiere tenant improvement demolition contractor in Southern California. Long before winning their first WRAP Award in 2001, the company was a champion of waste diversion and a pioneer in the recycling of many common items found in demolition jobs. Interior Removal Specialist, Inc. has broken new ground in recycling drywall and ceiling tiles, as well as the vast majority of carpeting removed from their demolition jobs. Through the recycling of materials and by donating many reusable items found on jobsites to non-profit organizations, they have diverted nearly 18,000,000 pounds of materials from local landfills. The cost of labor to achieve this goal can at times be greater than the savings. The donations of materials by Interior Removal Specialist, Inc. have gone to organizations ranging from the Elizabeth Glaser Pediatric Aids Foundation to local fire stations and churches throughout the state.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001

International Paper

International Paper Stockton manufactures printed corrugated boxes used for packaging customer products such as wine, toys, electronics equipment and food. Whenever possible, International Paper Stockton recycles corrugated waste produced as a byproduct of their manufacturing process. In 2002, International Paper diverted approximately 2,235 tons of baled waste from landfills. This recycling of baled waste has saved International Paper Stockton approximately \$75,000 in landfill disposal fees.

Santa Rosa, CA 95407

Jet Propulsion Laboratory

The Jet Propulsion Laboratory is a contractor-operated facility operated by the National Aeronautics and Space Administration, NASA. They have developed and implemented a laboratory-wide recycling program, which saves over \$90,000 per year in garbage costs, reduces landfill by 600 tons per year, and is considered the "benchmark" program for all of NASA. This reduction was accomplished through strong environmental polices and practices, as well as the commitment of all employees to protect the environment and reduce waste. JPL has an aggressive Affirmative Procurement Policy to use as much recycled content in supplies as possible. In fiscal year 2002, JPL procured over 73% of all office supplies, paper and toner cartridges with recycled content.

John Muir Health

John Muir Medical Center is the only trauma center for Contra Costa County and portions of Solano County and is recognized as one of the region's premier healthcare providers. Areas of specialty include high- and low-risk obstetrics, orthopedics, neurosciences, cardiac care and cancer care. John Muir Medical Center has won awards for its environmental programs, including the Environmental Protection Agency Region IX 2001 Environmental Achievement Award for Pollution Prevention and also the East Bay Municipal Utility District Water Conservation Excellence Award in 2002. Additionally, the Facilities Director was named the

"Energy Manager of the Year" by the Association of Energy Engineers for his efforts at the medical center. In 2002, John Muir reduced waste that was destined for the landfill by 702,216 pounds. A large portion of reusable equipment has been diverted to third-world countries and other non-profit organizations and although programs for recycling and reuse are often more costly than normal waste programs, John Muir has taken the initiative to invest in specialized waste management in the interest of conservation.

Johns Manville

John Manville, a Berkshire Hathaway company, is a leading manufacturer and marketer of premium-quality building and specialty products. In business since 1858, the Denver-based company has sales in excess of \$2 billion and holds leadership positions in all of the key markets that it serves. Johns Manville employs approximately 9,000 people and operates 46 manufacturing facilities in North America, Europe and China. The Johns Manville fiberglass building insulation facility in Willows has an aggressive recycling program. In 2002, the insulation plant sought to increase its recycling effort by contracting with new paper and plastic recycling vendors. The result has been the ability of the plant to recycle more plastic, paper and cardboard products than ever before. In addition, most of the plant's suppliers accept returned packaging for reuse. As a result, the facility is able to divert over one million pounds of material from the local landfill annually. The fiberglass insulation produced at the plant contains 30% recycled glass. In fact, when comparing recycled material input to waste generated, the facility uses more waste materials in its production of fiberglass than overall waste generated, making the plant a net consumer of waste. The plant is always actively searching for other ways to divert its waste from the landfill and keep the Willows community cleaner.

Kraft Foods Capri Sun

Kraft Foods Ready-to-Drink plant in Fresno is a soft drink manufacturer with 500 Kraft and contract employees. The plant manufactures Capri Sun all natural juice drinks, Tang and Kool Aid Jammers drinks in pouches, and Kool Aid Burst drinks in plastic bottles. Products are shipped to customers throughout 12 western states, as well as to other Kraft plants for inclusion in Oscar Mayer Lunchables. The Fresno facility has an active recycling team that meets regularly and has the goal of reducing waste sent to landfill. The plant currently recycles all material for which they can find an outlet, including corrugated cardboard and paper, plastic, waste juice, drums, pallets, scrap metal, computer equipment and hazardous waste such as fluorescent light bulbs and batteries. Recycled waste as opposed to total waste was increased by approximately 2% from 2001 to 2002, totaling 42 tons that would otherwise have gone to landfill. The plant saved \$225,000 by diverting a total of 1,148 tons of waste from the landfill. Kraft Foods Ready-to-Drink plant is continually looking for more opportunities to increase the amount of material recycled and reduce their landfill waste.

Kraft Foods Global Inc. - Tulare

Kraft Foods, Tulare CA is a natural cheese processing facility. Kraft Tulare also processes the whey from the cheese they make and produces whey powder (Krafen whey powder). As an alternative to "throwing away" raw material packaging, they utilize the cartons to store cardboard and unusable bags. Once full, the whole carton and contents are recycled, diverting 3.5 tons from the landfills and saving more than \$10,000. Some of the packaging sent to Kraft Tulare is sent back to be reused by vendors, which decreases the amount of packaging they send out, and they also reuse cartons sent to them for record storage or their own shipping needs.

Kraft Foods Global, Inc. - Knudsen Dairy Products

Kraft Foods North America, Inc.'s Visalia facility is the largest cottage cheese production facility in the world. It also produces sour cream. These items are sold at a retail level. In addition, it produces butter and powdered milk for commercial use. In the past year, the facility has built a new energy efficient warehouse cold box capable of holding its finished goods for shipment. This reduced the need to utilize refrigerated trucks fueled by diesel to cool the product. Last year 317, 650 pounds of close-to-date product was donated to Food Link of Tulare County, a food bank giving to thousands of families in need. The plant also produced 149,000 pounds of acid whey that is processed into "Whey Protein Concentrate", a nutritious food ingredient. The remaining whey was recycled and used as an ingredient in animal feed. The plant regenerated 459, 847 pounds of cardboard that was utilized through recycling or reuse.

Kyocera America, Inc.

Kyocera America, Inc. is a manufacturing company operating in San Diego, CA that produces electronic packages and packaging solutions for the semiconductor and telecommunications industries. Kyocera America, Inc. received ISO 14001 certification in August 1997. The company has been promoting resource conservation, reuse and recycling efforts throughout their business activities. Last fiscal year, they diverted 285 tons of waste from the landfill for a savings of \$15,675.00. Kyocera America, Inc. received the 1997, 1999, 2000 and 2003 Waste Reduction and Recycling Award and the 1998 and 2002 Recycler of the Year Award from the City of San Diego. They were also recipients of the 1999, 2000, 2001 and 2002 Waste Reduction Awards Program (WRAP) honor from the California Integrated Waste Management Board. Kyocera America, Inc. has increased its overall recycling operations to a 90% recycling ratio.

Kyocera Communications, Inc.

Kyocera Wireless Corp. (KWC) is a wholly owned subsidiary of Kyocera International, Inc. (KII), the North American headquarters and holding company of Kyocera Corporation. KWC incorporates QUALCOMM's CDMA technology in the development and manufacture of wireless phones and accessories for customers worldwide. In line with Kyocera's corporate commitment to environmental protection, KWC continually strives to minimize environmental impacts from business operations by recycling and reducing waste. In 2002, KWC reduced landfilled waste by recycling over 1,058 tons of paper, plastic, electronic and other waste, which generated \$19,548 in revenue and \$2.4 million in cost savings. These results have been achieved through exceptional activities, including refurbishing used batteries, recycling other materials, and setting goals to continually improve their recycling ratio.

LECTRONET, INC.

Lectronet, Inc. is a small-sized company that specializes in the distribution of used, obsolete and surplus networking hardware. The majority of the equipment that Lectronet, Inc. re-introduces into the marketplace would more than likely end up irresponsibly disposed of in the nation's landfills. In 2002, Lectronet, Inc. resold 17.5 tons of equipment globally, while also reducing the amount of waste destined to be landfilled by recycling 471.3 cubic yards and saving more than \$20,000. This was accomplished by reusing packaging material and establishing recycling partnerships with credible recycling partners and vendors. Lectronet, Inc. is also the first company to become ISO 14001 certified in San Benito County, CA. Through this accomplishment, Lectronet has joined an elite group of companies who have achieved world-class quality and environmental standards by meeting the requirements of ISO 14001.

Local Government Commission

The Local Government Commission (LGC) is a nonprofit membership organization based in Sacramento with the mission of making California communities more sustainable. The LGC exists to inspire and promote the leadership of local elected officials and others in addressing community issues through the implementation of innovative policies and programs leading to the efficient use of environmental, economic and civic resources. While LGC has an internally successful waste reduction and energy efficiency program, the organization's real progress has come through assisting local governments and businesses adopt sustainable practices. Over the last decade, the LGC has managed several statewide sustainability programs, such as the Local Energy Assistance Program (LEAP), Second Chance Week, and CalMAX, and as a result, helped hundreds of communities to use their precious resources more efficiently.

Looney Bins, Inc.

Looney Bins, a leader in recycling and rubbish collection, serves the greater Los Angeles area. They provide quality service with integrity and reliability while protecting California's natural resources. Looney Bins, Inc. company's innovations in recycling co-mingled construction and demolition materials have earned the company local and state recognition. Looney Bins, Inc. management and staff are dedicated to the highest standard of excellence, providing a service that is reliable. They have the capacity and flexibility to meet any level of service required. Looney Bins core services include residential and commercial collections, temporary roll-off services, and storage containers. The company is dedicated to treating each customer with the old-fashioned personal

approach. Recent state and local mandates have dramatically increased the need for recycling. Looney Bins has gained award-winning recognition for their environmental efforts in California. Their landfill diversion rates are in excess of 70%. 40,000 tons have been diverted from the landfills, at a savings of \$100,000. Looney Bins hauls unsorted debris from residential and commercial construction sites and process it into reusable products and commodities, and their modern computer tracking and reporting systems document recycling percentages that assist organizations in meeting state and municipal recycling requirements. Looney Bins is committed to helping municipalities and businesses recycle efficiently and economically.

Los Angeles County Music Center

The Music Center is located in downtown Los Angeles and is home to the Dorothy Chandler Pavilion, the Ahmanson Theater, and the Mark Taper Forums. It is also one of the three largest performing arts centers in the nation. The Center's newest venue, Walt Disney Concert Hall, will open in fall 2003. Each year, the Music Center welcomes more than 1.3 million people to performances by its four internationally renowned performing arts companies: The Los Angeles Philharmonic, the Center Theatre Group (CTG), the Los Angeles Opera, and the Los Angeles Master Chorale. The Music Center also provides the finest in arts education to more than 1 million students and teachers in schools and community centers throughout the region through its acclaimed Music Center Education Division. This premiere venue has recycled over 82 tons in the past six months. The recycling program started just six months ago after receiving a grant from the City of Los Angeles. The Center is looking to expand the waste reduction programs with the opening of Walt Disney Concert Hall. The Center has hired a consultant, SCS Engineers, to continue to research and revise the environmental practices of the Music Center. The Music Center has saved over \$13,000 during the past six months due to decreased disposal and increased diversion.

Marian Residence

Marian Residence is a licensed 56-room residential care facility for the elderly that is owned by the Sisters of St. Francis of Penance and Christian Charity. The Residence believes that everyone is responsible for all that God has created. Therefore, this facility makes a concerted effort to protect the environment by reducing waste, reusing and recycling materials and equipment, and conserving energy. Everyone gets involved and can be recognized for their exceptional efforts through "Caught In a Class Act" memos and "Spirit in Essence" awards, monthly and annual awards for staff and residence. It is estimated that approximately 75% of potential waste is diverted due to reuse, recycling and other conservation efforts, saving several thousand dollars each year. The residence's most unique activity is the collection of pop-tops for the Ronald McDonald House. This year, employees and community members collected 65 pounds of pop-tops and delivered them to the local McDonalds to be sent for recycling.

Memorial Medical Center

Memorial Hospitals Association has been recognized for excellence in waste reduction by the State of California's Integrated Waste Management Board for the eighth consecutive year through the Waste Reduction Awards Program (WRAP). Memorial has also been the recipient of the City of Modesto's Recycling Award every year since its inception in 1997 and has been invited to participate in the Environmental Protection Agency's WasteWise Program for award-winning businesses that have been recognized for outstanding recycling programs. Since the WRAP program started, Memorial, along with other WRAP awarded recipients, has helped divert approximately 4.1 million tons of waste from California landfills. This represents an average 48% waste diversion of the 72 million tons of waste generated statewide. Memorial itself has diverted 2,000 tons of waste from landfills, and has had a 10% reduction in waste annually. Memorial's recycling committee, the "Green Team", has successfully implemented a hospital-wide program aimed at education employees in waste reduction, and the program's goals are reflected in Memorial's policies and procedures.

Metreon - A Sony Entertainment Center

Metreon® is a business unit of Sony Corporation of America. The 350,000 square foot center features a 15-screen theatre, North America's largest IMAX Theatre, nine Bay Area-based restaurants, fun attractions, and unique shopping destinations such as Sony Style, PlayStation®, Digital Solutions, Chronicle Books, and DVD Station. In 2003, Metreon became ISO 14001 certified, surpassing global standards in energy conservation, recycling, emergency preparedness and environmental awareness. Working in partnership with Golden Gate Disposal & Recycling, Metreon participates in a recycling and composting program where every month, approximately 40 tons of waste is diverted from Bay Area landfills. Metreon successfully recycled over a quarter of a ton of paper, three quarters of a ton of wooden pallets, 10 tons of bottles & cans, 11 tons of cardboard, and over 17 tons of food. Metreon's projected cost savings due to waste reduction, recycling and composting, for the fiscal year 2003, is approximately \$6,000 a month.

MLB Homes

MLB Homes has been a Sonoma County homebuilder for almost 20 years. MLB originally specialized in custom homes and then transitioned to the development of communities, building over 300 quality homes throughout the county. MLB's operation only uses office supplies and in MLB's corporate office in Sebastopol and on all job sites, they strive to re-use and recycle office supplies such as paper clips, file folders, binders, paper, etc. They use dishes, glasses, mugs, and silverware in their kitchen to eliminate the need for paper and plastic products and they purchase recycled paper goods for the bathroom. MLB encourages all subcontractors to participate by utilizing job site recycle receptacles. Everyone in the office and on the job site is re-use and recycle conscious.

Neutrogena Corporation

Neutrogena Corporation, a worldwide leader in premium skin, hair and cosmetic products, and a member of the Johnson & Johnson family of companies, is headquartered in Los Angeles, California. The primary mission of Neutrogena and its employees is to invest in the betterment of the communities in which they live and work. Neutrogena has contracted Unicor, LLC, an on-site recycling company, to collect all of their recyclable material from production and administrative areas. This program has diverted 2,312,601 pounds of material from landfill and saved approximately \$301,905 in the past year.

New United Motor Manufacturing Inc. (NUMMI)

NUMMI is a 50-50 joint venture between General Motors and Toyota Motor Corporation, located in Fremont, California. NUMMI is the only vehicle assembly plant in California. NUMMI was established in 1984 as an independent California corporation. The United Auto Workers, Local 2244 represent most of NUMMI's 5000 employees. NUMMI builds the Toyota Voltz, the Pontiac Vibe, the Toyota Corolla sedan, and the Toyota Tacoma compact pickup. During 2002 NUMMI increased the recycling of wood, pallets, paper, plastics, cardboard and scrap metals on a "weight per vehicle" basis. These materials have a history of being recycled offsite and generated increased revenue last year. Lineside separation of recyclable materials will improve the collection and sorting of recyclable materials at their mini-MRF solid waste processing area. Excluding scrap metals, an increase of 4.4 pounds per vehicle was recycled in 2002 with net revenue of \$0.93 per vehicle.

Years Awarded: 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994, 1993

New-Tec Circuit Sales, Inc.

New-Tec Circuit Sales, Inc. is a materials management company that provides a variety of redistribution/recycling services including the scrapping, reselling and salvaging of proprietary and non-proprietary components and other related equipment and products. New-Tec has found many homes for the components that make up the electronic equipment that is in use today. These parts are used to service and repair older equipment. What cannot be reused is recycled for precious metals (ie gold or silver) and scrap metals (ie aluminum, steel, or tin). New-Tec has diverted approximately 5 to 10 million pounds of waste from renegade disposal and landfill. New-Tec has averaged a small return over the last year as a result of its recycling activities.

Years Awarded: 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1995

Nissan North America, Inc.

Nissan North America, Inc. (NNA) markets and distributes automobiles and automotive products in the United States, Canada, and Mexico. The company takes great pride in fostering environmental programs that are beneficial to the environment. Through its "Nissan Recycles" program, NNA diverted approximately 695 tons of paper, automotive metals, and wood products from disposal this past year. The company saved more than \$275,000 by implementing an aggressive office paper reduction program, which encourages making double-sided copies. Through all of these recycling efforts, NNA is helping the environment. We are proud multiple recipients of the CIWMB WRAP award.

Years Awarded: 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1994, 1993

Norcal Waste Systems, Inc.

Norcal Waste Systems, Inc. is the largest employee-owned company in the solid waste industry and is an aggressive recycler in the United States. Norcal provides waste management services to residential and commercial customers and recently opened a state-of-the-art recycling facility in San Francisco to accommodate the 52% diversion rate in that city. The company represents a dedicated team of refuse management professionals who deliver the highest quality of customer service and who emphasize recycling of the materials collected through their many operations. The Norcal corporate office is parent to more than two-dozen subsidiaries, providing solid waste services to more than 50 communities. Recycling office paper, reusing surplus supplies and donating office equipment has drastically reduced disposal waste generated by their office.

Northrop Grumman Aerospace Systems (NGAS)

Northrop Grumman, Integrated Systems Sector is a defense contractor specializing in integrated systems, aircraft manufacturing and drone development programs that recycles approximately 1200 tons of waste annually. Their cost savings using recycling and diversion is near \$80,000 dollars a year. Many of the programs are emerging technologies that require elaborate research and development techniques. One of their most successful recycling programs has been the recycling of abrasive blast material. This material is sent to a recycler where it is commingled with a variety of aggregate materials and used in the construction of railroads. Surplus equipment and supplies are donated to schools and nonprofit organizations.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1996

Northrop Grumman Mission Systems

Northrop Grumman Mission Systems donates surplus equipment and materials to local nonprofit organizations and schools. In addition, surplus office supplies are rerouted to other internal departments for use or reuse and recyclable materials such as paper and metals are sold for remanufacturing. Northrop Grumman Mission Systems at the Dominguez Hills site has diverted over 24 tons of paper, cardboard, metal and equipment from landfill. This resulted in disposal savings of approximately \$2,000 over the past year.

Carson, CA 90746

Northrop Grumman Space Technology

Northrop Grumman Space Technology, employing about 8000 employees in South Bay, develops innovative space, defense and electronic products for government, commercial and international customers. They have been very successful in reducing disposal of glass and plastic non-hazardous chemical containers. For the last several years, Northrop Grumman Space Technology has focused on handling empty chemical containers from their production areas so that they could be sent to a "curbside recycler" rather than become hazardous waste. Newly installed bulk chemical distribution systems have eliminated more than 40,000 individual 1- and 5-gallon containers (on an annual basis). They have also diverted more than 451 tons of waste from their operations in Redondo and Manhattan Beaches during 2002. The company's waste reduction program savings have been small in dollars but large in value: Northrop Grumman Space Technology feels that reduction, reuse and recycling is only one of their many obligations as a good corporate citizen. Rather than focusing on maximizing cost savings, maintaining the quality of the environment for their employees and community is their prime objective.

Years Awarded: 2006, 2005, 2004, 2003, 2002, 2000, 1999

Northrop Grumman, Space Systems Division

Northrop Grumman, Space Systems Division is an Azusa, CA facility that has been an acknowledged leader in the design, development, testing and manufacturing of state-of-the-art space-borne electro-optical, microwave and millimeter-wave sensors, including the highly reliable Defense Support Program (DSP) sensor that has been a critical part of the nation's early warning system for the past 25 years. The facility is still recognized as a technical and management innovator and leader in the design and manufacture of defense and weather satellites, satellite data processing and smart weapons. Known as "The Creative Company," their work includes major roles in the High & Low Space Based Infrared System (SBIRS), Defense Support Program (DSP) payload and ground systems, the National Polar-Orbiting Operational Environmental Satellite System (NPOESS), Attack Launch Early Reporting To Theater (ALERT), Joint Tactical Ground Station (JTAGS), and other ground support programs. The company has also, for many years, focused on protecting the environment. Over the years, several tons of potential waste has been diverted from landfills through waste minimization and recycling practices. The Azusa facility is also an active participant in EPA's Waste Wise program, focused on reducing solid waste. The company donates used computer and equipment to local schools.

Northstar-at-Tahoe Resort

Northstar-at-Tahoe is a ski and summer resort located in the Sierra Nevada mountain range near beautiful Lake Tahoe. In an effort to reduce erosion into the local watershed and enhance the appearance of the ski runs in the summer, Northstar composts horse manure from its stables and uses the manure for fertilizer in the revegetation of its ski runs. In addition to using pine needles for erosion control, the compost produces healthy native grasses on the ski runs, which limits runoff. Northstar composts approximately 6200 cubic feet of horse manure annually. The cost of fertilizer is \$0.30/pound, which results in a savings of approximately \$9,300 annually by using composted manure for fertilizer.

Ocean Beach People's Organic Food Co-op

Ocean Beach People's Organic Food Co-op is a natural foods market that strives for quality and excellence in the food that they bring to the community. The market began serving the community in 1971, and has been a member-owned California cooperative since 1985. Being member-owned, the Co-op's business focuses on customer satisfaction and they take great pride in listening to and meeting the needs of each and every customer that comes through their doors. Ocean Beach People's Organic Food Co-op specializes in vegetarian foods, organic produce, organic grocery, frozen, perishable and bulk items, vitamins, herbs, cruelty-free body care and aromatherapy products, and they also offer a sit-down deli offering fresh organic meals including soups, salads, sandwiches and entrees. People's Co-op embraces environmental sustainability practices in their day-to-day operations through the products that they sell, their in-house recycling programs, the reduce/reuse/recycle tips in their monthly newsletter and their local middle and elementary school partnerships.

Ocean View Farms, Inc.

Ocean View Farms, Inc. is a Los Angeles community garden with 300 gardening families cultivating 500 vegetable/flower plots on 7.5 acres of scenic land. Members recycle, help the environment, and organically grow and eat those wonderful vegetables. The OVF member-assisted program of shredding and composting has enabled annual dues to remain constant for the past three years. Still, in year 2001, the garden was able to purchase a new 24-horsepower chipper machine, which now enables OVF to successfully recycle 280 tons of stable waste diverted from the landfill. A greater supply of manure and garden waste is now turned into usable garden material (380 tons), resulting in a savings of more than \$6,000 per year.

Years Awarded: 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995

Pacific Gas and Electric Company

Pacific Gas and Electric Company, one of the largest combination natural gas and electric utilities in the United States, has long been committed to environmental stewardship and waste reduction. Their monthly bills are double-sided, they purchase paper with 20% recycled content, and they have a host of other programs to encourage recycling and waste reduction. Since 1998, the utility has adopted an innovative way to reduce its dependence on wood products by replacing wooden reels used for electric cable

transport with more environmentally friendly steel ones, which saved nearly 2.5 million pounds of wood, or 14,000 trees, over the past three years and is saving over \$78,000 annually. Last year, PG&E won the "Commercial Recycler of the Year" award for its aggressive recycling and waste stream reduction efforts at the company's downtown San Francisco office complex. From June 2001 through May 2002, the company's 5,000 employees at this office complex were able to recycle more than 700,000 pounds of paper products, bottles and cans, and divert 70 percent of its total waste stream, some 1.2 million pounds. This waste reduction effort at their San Francisco headquarters saved PG&E approximately \$55,000 last year.

Panasonic Corporation of North America

Matsushita Electric Corporation of America is the sales and support company for Panasonic, Quasar, and Technics. The Cypress, California location recycled over 296 tons of material destined for landfill with a savings of over \$20,000 in direct landfill costs in 2002, and the company's energy conservation efforts resulted in more than a 17% reduction in energy use per person annually. Panasonic's commitment to environmental protection is unrivaled in the consumer electronics industry. The company was recently recognized as EPA's Electronics Recycling Challenge Partner of the Year under the EPA Wa\$te Wi\$e program. Panasonic designed products for efficient disassembly and recycling and expanded a product evaluation process based on life cycle assessment. Panasonic is the only consumer electronics manufacturer awarded for the fourth consecutive year as Energy Star Partner of the Year by the EPA and the U.S. Department of Energy (DOE).

Years Awarded: 2004, 2003, 2002

Pasadena Waldorf School

The Pasadena Waldorf School is a private school, located on a beautiful and historic site in Altadena, serving children from kindergarten through eighth grade. The school is committed to both reusing and reducing waste generated from their facility. They are proud of the fact that, although their student body has increased in size, the amount of waste generated has not. Through community awareness programs and outreach, a recycling program involving all of their students, faculty and staff, and increased efforts to compost, the school pursues their goal of decreasing the amount of material sent to the landfill. In a Waldorf School, intellectual learning is always combined with artistic, rhythmical and practical work. The practical aspect is where their curriculum and the WRAP program work together.

Pebble Beach Company

Pebble Beach Company, a distinctive resort complex dedicated to the environment, to recycling, and to waste reduction, owns and operates three resorts and four golf courses in the Del Monte Forest and one course in Monterey. Over 5,300 acres of golf courses, landscaped areas, forests, seashore and open space lands are managed on a multiple use basis. Recognizing that resource efficiency and waste reduction are the essential components of wise-use environmental management, the company has developed a number of programs to reduce, reuse, and recycle waste. During 2002, 708,735 lbs. of glass, cardboard and paper were recycled. However, green waste recycling has been the most successful program. Last year, over 2,500 tons of compost was produced from golf course clippings and forest and landscape green waste. The composting process provides an additional benefit by killing pitch canker spores - thus preventing the spread of a very serious forest disease. All of the high quality compost produced is used entirely on Pebble Beach properties in landscaping and restoration projects and on the golf courses. This resulted in a savings of over \$197,000 in landfill costs.

Petaluma Poultry

Petaluma Poultry, the first company in the US to produce a Certified Organic chicken, is a pioneer in California agriculture. As leaders in natural and organic food production, Petaluma Poultry has adopted sustainable practices that benefit their employees, the chickens they raise and their business overall. The company has taken a lead in Sonoma County's new Sustainability Management Systems Program. During the past year, Petaluma Poultry was honored by the US EPA for the successful reduction of the company's impact on the environment. While overall production on the farms increased by 20%, the company was able to decrease its use of natural gas by 4% by using careful management and real time data. The feed mill, which produces Petaluma Poultry's antibiotic free vegetarian feed, increased production while limiting the increase in energy usage.

Portofino Hotel & Yacht Club

The Portofino Hotel and Yacht Club is a beautiful, deluxe hotel. Located in Redondo Beach on a lush, private peninsula on King Harbor, this property is Los Angeles' only oceanfront hotel and offers magnificent, panoramic views of the harbor, Pacific Ocean, Palos Verdes, and Catalina Island. The hotel offers guests a lovely oasis away from the bustle of one of America's largest cities but is still a short drive from many of the exciting attractions that make Los Angeles one of the world's most popular tourist destinations. The Portofino Hotel and Yacht Club has created a recycling program that is similar to that found in Redondo Beach residential areas. The hotel offers co-mingled recycling for its Live Aboard tenants. What used to be thrown away is now being collected at the same location and recycled. The hotel also offers the Marina tenants an oil collection facility to keep any used motor oils or diesel fluids out of the waste stream. The Portofino Hotel and Yacht Club has been able to improve its diversion from 42% of its trash stream in 2002 to 45% in 2003. This has been accomplished by providing marina tenants with a co-mingled recycling program, recycling items from the restaurant, hotel and convention center, and by reducing the green waste. By implementing these programs the Portofino Hotel and Yacht Club has reduced its trash bill significantly. Over the past 2 years they have reduced the amount of containers on-site and have also reduced the frequency of trash collection.

Quadrus

Quadrus is a seven building office complex located in Menlo Park, California, owned by the Henry J. Kaiser Family Foundation and managed by Lo Property Management. All tenants participate in a very active recycling program that consists of mixed paper (picked up twice each week), glass/aluminum and cardboard. All boxes are broken down and removed by their janitors and disposed of in a cardboard-recycling dumpster. They process approximately 25 tons of recyclables per year. They will save approximately \$8,008 in 2003 in refuse disposal costs due to their current recycling program.

Quady Winery

Quady Winery is a small, family-run business that makes internationally renowned dessert wines. Through on-site activities such as composting, the winery has been able to reuse over 50 tons of organic waste. Last year, by starting a recycling program for production and office materials, the winery was able to cut its total waste in half, and divert an additional 21 tons from the landfill. In total, 78% of waste generated by the winery is composted or recycled. Recent modifications in packaging, investment in modern processing equipment, and a redesign of the vineyard irrigation system have been highly effective in reducing waste, energy, and

water costs. At least \$7,000 was saved last year. Quady Winery views waste reduction as part of its overall responsibility to the community and also participates in other green business practices.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003

Raytheon Company

Raytheon Company is a world-class leader in developing defense technologies. Raytheon Company, Sensors and Electronic Systems in El Segundo has taken a very aggressive approach to diverting the amount of solid waste it sends to landfills. Raytheon has increased its solid waste diversion from a baseline 6 percent in 1996 to over 55 percent in 2002 and in the process saved over \$114,600 by selling recyclable materials such as paper, cardboard, scrap metal and surplus electronic equipment and calculating the cost avoidance from disposing these materials in a solid waste landfill.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998

Recology Vallejo

Vallejo Garbage Services, Inc., a subsidiary of Norcal Waste Systems, Inc., is an employee-owned garbage and commercial recycling hauling company. VGS processes Vallejo's commercial recycling and Vacaville's residential curbside and commercial recycling. To reduce waste, VGS recycles their employee's cans, bottles, cardboard, and paper, as well as their maintenance shop's scrap metal. VGS also composts their food waste and food-soiled paper. VGS reuses their one-sided used paper in their copier, printer, and fax machines, and provides reusable ceramic mugs, silverware and flatware for their employees to use. By participating in these waste reductions practices, VGS diverted 64 tons from the landfill this past year, saving \$4,420.

Red and White Fleet

Red and White Fleet, the premier cruise operator on the San Francisco Bay since 1892, is the first bay cruise company in San Francisco to reduce, reuse and recycle all products generated by their vessels, offices and employees. As a previous 1999, 2000, 2001 and 2002 WRAP winner, the Red and White Fleet has been and remains committed to managing its waste in the most environmentally responsible manner possible. The family of the Red and White Fleet employees has, for years, been conscientiously working to hone the efficiency of their operations with an eye on both the environmental and economic benefits.

Most recently, they have developed an outreach program joining with non-profit organizations such as Save the Bay, to offer the Bay Area community a means to learn more about conserving and protecting the shared environmental treasure of San Francisco Bay. As a consequence of their many efforts, the Red and White Fleet reduced their disposal costs by no less than 15% last year and has made considerable gains in emissions reduction through the re-powering of their fleets with low emission diesel engines.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999

Remo, Inc.

Remo Inc., the world's largest manufacturer of percussion instruments, is wholeheartedly involved in a waste reduction and recycling program. To reduce waste, the company uses custom-made small sized cartons and shrink wrap style packing material. They use environmentally friendly recycled paper instead of other cushioning materials and shrink wrap and are always looking for new products to be recycled and new markets for their recyclable materials. The materials recycled by Remo, Inc. in 2002 had a grand total of 356 tons, earning an income of \$29,144, saving \$13,704 on trash disposal costs, and contributing a combined bottom-line benefit (BLB) of \$42,848 to the financial well-being of the company.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998

Robert Bosch LLC.

The Robert Bosch Corporation is a manufacturing and development company that distributes their own products. Bosch has thousands of engineers and scientists devoted to new products and systems everyday. In 2002, Robert Bosch Corporation had 2,600 applications for patents. They strive for continuous improvement as a company. Their three business sectors are automotive technology, industrial technology, and consumer goods and building technology, with more than 50 locations in North America. This forward-thinking company employs roughly 21,750 associates in the United States, Canada and Mexico. Robert Bosch Corporation donates their equipment as much as possible to non-profit organizations and local schools. The equipment not donated is sent to the local scrap vendor for recycling. The waste reduction program at one of their smallest California locations diverted over 200,000 pounds from the local landfill in 2002. This location has a successful recycling program due to enthusiastic support from the employees involved in this process.

Safeway Inc

Safeway is one of the largest retail grocery companies in North America. It operates 582 California stores in its Vons and Northern California Divisions. Since 1995, Vons stores have implemented a composting program for green waste, converting material that was previously a waste into a valuable product, compost. This program has been expanded into Safeway's Northern California Division. The reduction in waste disposal and landfilling costs resulted in substantial cost savings. Last year, the two divisions diverted 71,661 tons from the waste stream through their composting program. In addition, recycling programs throughout Safeway's two California divisions diverted over 141,926 tons of other materials from landfills including corrugated cardboard, plastic, meat waste, metal, paper and glass.

San Bruno Garbage Company

San Bruno Garbage Co., Inc. is a 100 percent employee-owned Norcal Waste Systems Company. They have been providing refuse and recycling services to the community since 1948. Their award winning curbside recycling program has served as a model for other jurisdictions throughout California. They strive to provide their customers with quality services, including refuse, debris box, yard waste, recycling, HHW and e-waste. Last year, their Recycling and Waste Reduction Program, which includes mixed paper, cardboard, plastic, glass, aluminum, and composting, enabled them to divert approximately 4 tons of waste from the landfill. The cost savings, which directly benefits their San Bruno customers, was approximately \$1,388.00. San Bruno Garbage Co., Inc. continues to lead by example, promoting recycling and waste reduction in an effort to preserve the environment.

San Diego Convention Center

The San Diego Convention Center Corporation manages, markets, and operates the San Diego Convention Center, the San Diego Concourse, and the San Diego Civic Theatre. The Civic Theatre annually hosts over 300,000 guests, who experience a wide range of world-class entertainment and activities. Because of the Corporation's high volume of guests and delegates, recycling and waste reduction is important. All employees and clients are briefed regarding recycling procedures and they work together to ensure that materials are properly handled. Along with recycling solid waste such as paper, wood, and cardboard, the San Diego Convention Center Corporation donates surplus equipment and event materials to charitable entities. The facilities within the Corporation also work to conserve energy, thereby reducing pollutants such as carbon dioxide. In 2003, the San Diego Convention Center Corporation diverted a total of 1,917.96 tons in total solid waste. This resulted in a savings of \$12,048. The Corporation closely monitors its current policies and programs, implementing changes as needed to ensure maximum conservation.

San Domenico School

San Domenico is a private nonprofit school serving students in pre-k through 12th grades. San Domenico has earnestly begun the difficult and essential work of transforming its school into a sustainable institution. The school believes that if it is going to teach the principles of stewardship, it must fully embody them in its very operations and buildings. San Domenico works to foster the understanding that all aspects of operation from the dining hall to the equestrian center are embedded in larger social and ecological systems and to teach respect and personal responsibility for one's role in these systems. By reducing, reusing, recycling and composting alone San Domenico has diverted up to 88 tons of materials from the landfill over the past year, saving the school more than \$45,000. Students regularly participate in waste reduction activities by collecting food scraps from the cafeteria to be composted in the garden and collecting and sorting paper/cardboard, bottles and cans. San Domenico also regularly donates surplus or "gently used" items to nonprofit organizations and schools in other countries.

Santa Clara Convention Center

The Santa Clara Convention Center is a 262,000 square foot facility that will host approximately 335 events this fiscal year. These events consist of conventions, trade shows, public shows, meetings and banquets. All combined, the Center will have serviced an overall attendance of 345,470 this fiscal year. The recycling program implemented by the Center in April of 2002 reduced waste destined for the landfill by 59.76 tons and resulted in cost savings of \$8,856.85. Through this program, the Center recycles paper, cardboard, glass and aluminum. In addition to their new recycle program, the Center has undertaken other recycling and reusing

practices. Their full-service caterer has been with them from day one and heavily contributes to Second Harvest Food Bank. The Center and their partners auction or sell equipment that they can no longer use. Other recycling measures include purchasing recycled paper products, buying in bulk when possible, recycling toner cartridges, and using refill soap dispensers and landscaping materials. The Santa Clara Convention Center is committed to their current programs and will continue to implement new policies and procedures to ensure that they contribute to a cleaner environment.

Santa Cruz Seaside Company

Located next to the pristine Monterey Bay National Marine Sanctuary, the Santa Cruz Seaside Company and its major holding, the Santa Cruz Beach Boardwalk amusement park, are constantly aware of the importance of cherishing the environment. The company has received a number of awards and much recognition for its environmental effectiveness and ecotourism efforts. It supports and maintains a variety of waste reduction measures, including a company-wide recycling program that features the recycling or reuse of an estimated 100,000 pounds of cardboard annually. The company's water reclamation program reuses more than one million gallons of water annually for landscaping and other non-potable water applications. Waste reduction awareness and actions have resulted in better use of employee time (such as less trash pickup), savings in a variety of areas (less hauling and less wasteful product purchase) and an improved sense of community (including local involvement such as aluminum can and plastic beverage container recycling and Coastal Cleanup Day).

Save Mart Supermarkets

Save Mart Supermarkets is a Northern California retail chain comprised of 82 conventional supermarkets and 40 warehouse-style markets under the banners "Save Mart," "S-Mart Foods," and "Food Maxx." With an aggressive approach toward being responsible partners in the communities where they operate, Save Mart has instituted environmental policies, practices, and programs that have reduced their landfill input by nearly 80% and 36,000 tons annually. This has also generated over 2 million dollars per year in cost savings, making theirs a win-win situation. Save Mart has two very successful closed-loop recycling operations. Bakery and produce trim are collected from each site and converted to compost that is sold in Save Mart garden shops. In addition, tons of compost has been donated to schools, churches and city parks. In a cooperative program with Enviro-Bag, customers' plastic carry-home bags are collected by schoolchildren for fund-raising. Bags are recycled into Enviro-Bag brand trash and kitchen bags and subsequently sold on retail shelves. In 2001, this recycling teamwork recaptured 310,000 plastic bags -- a 24% increase over the previous year.

SCPMG Regional Reference Laboratories

Southern California Permanente Medical Group Regional Reference Laboratories performs clinical diagnostic laboratory testing for each of the 11 Kaiser Permanente hospitals and over 95 associated medical clinics throughout Southern California serving over three million members. Kaiser Permanente Regional Reference Laboratories process over 14 million specimens each year, generating a significant amount of bio-hazardous, chemical, medical and solid wastes. Maximum waste reduction strategy includes solvent re-distillation and recycling, plastic recycling, glass recycling, paper and newspaper recycling, cardboard recycling, packing material recycling and multiple process-oriented reuse methodologies. These programs have resulted in over \$31,500 in savings in the year 2002 and significantly reduced the amount of waste produced annually. The SCPMG Regional Reference Laboratories is committed to environmental protection and conservation of natural resources. That goal includes the elimination of all types of wastes and places a strong emphasis on pursuing technologies and processes that will achieve this objective.

Years Awarded: 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

Seton Medical Center Coastside

Seton Medical Center Coastside is a rural hospital located in Moss Beach, California. The facility holds a 116-bed Skilled Nursing Facility, a 5-bed Acute Care unit and the only Emergency Department on the coast between Santa Cruz and Daly City. The use of a document and data destruction service has ensured the facility's compliance with new federal regulations while still allowing for a 35% increase in paper recycling during fiscal year 2003. Implementation of a "flat mop" system, late in 2001, resulted in cost savings of over \$2000 per year, a 75% reduction in floor chemical use, and has enhanced patient safety by eliminating the threat of cross-contamination between rooms. Recent development of an intranet has improved electronic communication between facilities. Future enhancements include training, the improvement of reporting and documentation capabilities, and further reducing paper consumption.

Sierra Nevada Brewing Company

The Sierra Nevada Brewing Company is the ninth largest brewer in the United States and produces ales and lagers of the highest quality. At every stage in the brewing and packaging process, the company attempts to reduce waste generation. This includes recycling cardboard, plastics, metals and other materials, utilizing spent brewing grains, hops, and yeast for cattle feed, reducing water use and operating its own water purification plant. In 2002, the company diverted from the landfill 33 million pounds of grain, 450,000 pounds of hops, and 10,460,000 pounds of yeast. From January 1, 2002 to April 30, 2003, they diverted from the landfill 466,000 pounds of cardboard, 414,317 pounds of glass, 15,446 pounds of office pack/mixed paper and a significant amount of various other materials. In this same time period the brewery saved approximately 1.5 million dollars by reducing high strength water treatment charges, selling recyclable materials, and reusing surplus supplies and equipment. Between April 2002 and April 2003, Sierra Nevada Brewing Company saved an estimated \$470,000 dollars through its recycling of grain, hops and yeast.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001

Smucker Natural Foods, Inc.

Smucker Quality Beverages, Inc. is a wholly owned subsidiary of the J.M. Smucker Company. The company is a processor, packer and distributor of natural and organic fruit juices and juice blends. Smucker Quality Beverages, Inc. has saved over 950,000 dollars in packaging costs since redesigning its packaging, now using a tray pack instead of the old full cardboard case carton, reducing cardboard usage significantly. This year, the company saved \$100,000 in energy costs by reducing its energy consumption. They replaced the lighting throughout the facility with more efficient fixtures, thus lowering the watt usage. The company also changed the work shifts from peak to off-peak hours and installed a natural gas engine-driven Chiller to reduce electric usage. The company is at a 91 percent recycle rate, far surpassing the State's mandate of a 50 percent waste reduction. Due to this impressive solid waste reduction, the company saved over \$12,000 in landfill and disposal costs. This year, the company earned \$41,017.56 of revenue from recycling and improved their safety and sanitation practices due to the addition of recycle containers throughout their plant. Smucker Quality Beverage also added recycle bins for their employees that don't have curbside pickup so they could bring their recycle products to work.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000

Southern California Edison

Edison International is an electric power generator, distributor and structured finance provider. Edison's family of closely related companies develops, acquires, finances, owns, operates and maintains reliable and efficient power systems around the world. Edison's three major businesses are Southern California Edison, Mission Energy and Edison Capitol. Southern California Edison is the nation's second-largest investor-owned utility company and has provided reliable electric service for over 110 years. In 2002, 12,000 SCE employees served over 4.3 million homes and businesses in coastal, central and southern California. In 1993 SCE initiated its first recycling pilot. The "Waste-Not" pilot grew into a trademarked company-wide program that focuses on waste prevention, green purchasing, reuse and recycling. Edison recycles paper, cardboard, compostables, glass, plastic, metals and wood. In 2002 SCE generated over 38,000 tons of greenhouse gas emissions -- enough to provide power to 10,000 households in California for one year. SCE saved \$15 million in solid waste hauling fees at 112 California facilities by recycling.

Squaw Valley USA

Squaw Valley USA is one of the most talked about and sought after winter recreation destinations in the US. As the site of the VIII Olympic Winter Games, it is a must-visit destination for anyone that loves winter sports. What winter and summer guests may not realize is that Squaw Valley Ski Corp has shaped resort operations towards minimizing environmental impacts. The Squaw Valley Ski Corporation is currently in the midst of a multi-million dollar environmental improvement program that has instituted extensive

revegetation and erosion control projects to ensure the health and quality of the immediate surroundings. In addition, the resort has instituted a comprehensive recycling program and revolutionary innovations in energy use to guarantee minimal depletion of our natural resources. Squaw Valley Ski Corp is able to divert over 35% of 30 tons of resort waste from landfills through the use of an incinerator. The size of a large office, the incinerator is 99.99% effective and can vaporize 1.2 metric tons of garbage at a time, leaving only enough debris to fill a small garbage can. Recent upgrades to the resort's cable car have allowed the Ski Corp to conserve electricity. Squaw Valley installed a new Silicon Controlled Rectifier or S.C.R. control for the resort's cable car to replace an older generator-driven drive system. Since its installation, the new system has proven to be 96.85% more energy efficient, with a 91.48% reduction of the overall kilowatt hours used and a cost savings of almost 50%.

St. Bernardine Medical Center

St. Bernardine Medical Center, a 443-bed not-for-profit organization founded in 1931 by the Sisters of Charity of the Incarnate Word, has a long tradition of providing needed healthcare services to the residents of San Bernardino and its surrounding communities. SBMC promotes recycling on a daily basis with recycle containers conveniently located in work areas. Staff deposits co-mingled recycled waste in these containers without needing to separate glass, paper, plastic, etc. This is collected into a co-mingled compactor, which is then segregated by SBMC's refuse company. This process makes recycling easy for everyone, and saves man-hours and storage space. SBMC recycled 143 tons of waste from April 2002 - March 2003 compared to 95 tons in the previous year, an increase of almost 66%.

St. Elizabeth Community Hospital

St. Elizabeth Community Hospital is a rural Catholic hospital in Northern California. This last year their recycling efforts really began to pay off -- they were able to divert 25 tons of recyclable material and save an estimated \$5,000.00 in doing so! They are the only hospital in the nation recycling waxed produce boxes, which are processed into fire logs and sold at a local grocery market. Their ink and toner recycling program brought a large part of an estimated \$400.00 to a local school recycling fundraiser for the children. Usable unwanted furniture and medical equipment are donated to a thrift store run by the hospital's Hospice program. Unused medical supplies are donated to third world countries. From the cafeteria, which recycles 95% of their non-food waste, to the surgery department, which recycles the blue sterile wrap the instruments are wrapped in, all hospital departments and staff are involved in recycling efforts. This year, the U.S. EPA awarded them with the 2003 Environmental Achievement Award for Region 9 for their exceptional work and commitment to the environment.

STAPLES Center

STAPLES Center, the 2000, 2001 and 2002 Pollstar Arena of the Year, is a one million square-foot sports and entertainment arena in Los Angeles that is home to the Los Angeles Lakers, Kings, Clippers, Sparks and Avengers as well as a venue for numerous concerts, family shows and other major attractions. Through implementation of their waste management and recycling plan, STAPLES center has been able to divert thousands of tons of materials from landfills and realize significant cost savings during its construction and operation phases. For example, over 98% (more than 16,000 tons) of waste debris from the demolition of the L.A. Convention Center's North Hall, which was formally on the arena site, was diverted from the landfill, resulting in cost savings of approximately \$190,000. Over the past year, STAPLES Center has diverted over 50% of its operation waste from landfills, recycling more than 1,700 tons of material and realizing cost savings of over \$13,000.

State Farm Insurance

State Farm Insurance Companies is the world's largest personal lines insurance company. Through recycling efforts, State Farm has drastically reduced the amount of paper products that are sent to landfills. Recycling efforts target all types of paper products, cardboard, wood pallets, aluminum, glass and plastic. In 2002, an estimated 165 tons of products were sent for recycling. Reduced monthly waste removal costs produced a savings of \$9,579 in 2002 for the facility located in Rohnert Park, California. As a recipient of the WRAP award every year since 1995, State Farm continues to work hard at improving recycling efforts.

Years Awarded: 2010, 2009, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

Stone-Quarre, Medical Claims Management

STONE-QUARRE, Medical Claims Management provides direct assistance to families facing health insurance and medical claims problems. The service consults with families about their health care situation and manages all medical financial information for individuals. All medical claims are processed and problem claims are appealed for the family. The business is very paper intensive. All papers are recycled and all client file binders are reused. The office products purchased contain post-consumer content. The business has virtually no garbage each week although there are at least three large bags of papers to be recycled. In addition, the business helps clients recycle their old claims and medical papers so there is greater organization and less waste. The service allows clients to be better organized so their medical bills are paid promptly. Therefore, the need for follow-up bills is reduced and there is less paper waste.

Sugar Bowl Corporation

Sugar Bowl is primarily a winter ski resort located in the town of Norden, CA, approximately 10 miles west of Truckee, CA and 90 miles east of Sacramento, CA. In its 64th year of operation, the resort has joined the industry in placing an emphasis in environmental stewardship and sustainable development by providing carpooling and shuttle-riding incentives, monitoring water quality, conducting on-hill stabilization projects, donating products to local charities, and recycling paper, cardboard, beverage containers, vehicle fluids, and printer cartridges. To assist with their recycling program, in June 2002 Sugar Bowl was awarded a beverage container recycling grant from the California Department of Conservation for \$68,647 which has made it possible for the resort to overcome much of their recycling challenges of transportation, weather, education/outreach, and internal and external geography. During the 02-03 winter season, Sugar Bowl recycled 708 pounds of aluminum, 3,534 pounds of plastic, 14,061 pounds of glass, 178 pounds of mixed metals, 3,288 pounds of paper, and 35,392 pounds of cardboard resulting in a cost savings of approximately \$15,000.

Sunset Scavenger Company

Sunset Scavenger Company, a subsidiary of Norcal Waste Systems, Inc., is an employee-owned garbage and recycling collection company. Sunset Scavenger is committed to protecting the environment through an application of stringent standards and by innovatively recycling more materials than other hauling companies. They recycle the basics (cans, bottles and paper) as well as all food waste and non-recyclable paper (i.e.: food soiled paper, paper towels from the restroom, etc.). Reusing one-sided paper for draft fax paper, recycling batteries, and providing ceramic mugs for employees is the company's standard practice. Participating in these easy-to-follow programs has allowed Sunset Scavenger Company to achieve an amazing 65% diversion rate! By diverting 21 tons of materials by recycling and preventing waste, Sunset Scavenger Company is saving an estimated \$5,000 per year.

Target

Target Corporation's mission is to be the retailer of choice in the discount, middle market and department store retail segments. By focusing on trend leadership, excellent guest service, exciting team member opportunities, and community outreach, we create long-term shareholder value. Last year Target Corporation was able to recycle over 300,000 tons of materials nationwide. Additional waste was reduced through salvage programs and donations of unsaleable items to charitable organizations and humane societies. An innovative program that was successfully designed and implemented several years ago by the Target Environmental Services Department was to set recycling goals as a comparison to the sales per store. This concept was first developed for Target stores and goals for Mervyn's stores are currently being developed.

TELEFUNKEN Semiconductors Inc.

NEC Electronics America, Inc. is a manufacturer of semiconductor devices. The waste minimization efforts they implemented in 1994 brought the company's landfill diversion rate from 34 percent to 50 percent. In 1999, NEC raised the bar one more time as the diversion rate went to 67 percent for the year. In the year 2001, employee auctions, public auctions, re-use center, donations and other initiatives helped to push the diversion rate to an all time high. NEC diverted a total of 411 tons that resulted in a 69 percent diversion rate for the year. During 2002, NEC Roseville's involvement with WRAP and other programs pushed their diversion rate to 74.77 percent, almost 5 percent above their annual goal. The Roseville facility has estimated that they realized a combined cost savings and revenue of nearly \$200,000 in 2002 as a direct result of their waste minimization efforts.

Years Awarded: 2011, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2000, 1996

Thanksgiving Coffee Company

Thanksgiving Coffee Company, a leader in the specialty coffee industry, focuses on using coffee as an educational tool. The 30-year old company purchases green coffee beans from more than 15 countries around the world, then roasts, packages, and distributes them. About half of these beans are certified organic, certified fair trade, and shade grown, and the company uses these criteria as a means of educating their customers about why these principles are important to the environment. Several new company wide-initiatives have been born, including a reduction of propane usage, decreased electricity consumption, an increase in recycling, and partnership with the non-profit organization, Trees for the Future. Thanksgiving will plant 75,000 trees over the next three years to help offset more than 1,800 tons of carbon. These trees will be planted in conjunction with a local community in Ethiopia, providing them with the benefits of firewood, fruit and nuts, shade, and reduced soil erosion. In the middle of 1999, Thanksgiving Coffee switched to a more energy efficient model of coffee roaster. This resulted in the savings of 5,396 gallons of propane in 1999 and 7,419 gallons in 2000. Thanksgiving Coffee also switched to energy efficient bulbs and ballasts to light their 15,000 square foot plant in 2001, saving over 43,000 kilowatt hours per year. They also began to recycle their sticker tape backing that comes with the coffee label. The changes in recycling alone allowed the company to switch to a smaller dumpster size, which reduced dumpster trash by 66 percent for a savings of \$280 per year.

The City Market of Los Angeles

The City Market of Los Angeles is the oldest terminal produce market in continuous wholesale operation in the city of Los Angeles with 35 wholesale merchants providing the fresh fruit and vegetables to millions of people in the city, state and even internationally each year. Last year, 1,231.67 tons of produce trimmings and unsaleable produce was sent to a local livestock farmer to begin a new life as a livestock feed component since the Market began source-separating and sending this material as feed stock for a composting operation in Ventura County. Recently, the company has been sending organic waste to a local livestock farmer for feed. The Market has achieved a remarkable diversion rate well in excess of legislated goals. Each ton of diverted organic waste saves the Market merchants \$24 of disposal costs. Each ton of recycled cardboard saves approximately \$36 plus whatever revenue it generates. There are costs associated with recycling, as well, but the long-term benefits of the Market's commitment outweigh short-run costs. This commitment continues to strengthen.

The Manila Bicycle Project

The Manila Bicycle Project is a work-readiness and bicycle-recycling program. Youth from the local community center learn general employability and business skills while also learning how to become bicycle mechanics and about the importance of recycling. AmeriCorps members supervise and teach the youth involved how to repair the bicycles. Bicycles that have been discarded at the local waste management authority and are brought to the Manila Community Center where the youth repair the bicycles. The finished bicycles are then sold at St. Vincent DePaul thrift stores. A percentage of the money that is raised through this program goes back to the youth who have fixed the bikes and the rest goes back into the program to purchase tools and supplies. In the past year, the Manila Bicycle Project diverted approximately 130 bicycles, equaling more than 3,900 lbs. of waste. The program raised over \$1,000 that went back into the project or to the youth and donated 15 bicycles to the youth recreation program at the Manila Community Center. In addition to the waste diversion that this project has accomplished, it also promotes bicycle riding as an environmentally friendly form of transportation by making the recycled bicycles available to the public at very inexpensive prices. The Walt Disney Company

The Walt Disney Company is recognized as the world's leading provider of family entertainment with business segments in theme parks, resorts, motion picture/television production and consumer products. The company and its cast members take great pride in their Environmentality, and in receiving recognition for company programs from the California Integrated Waste Management Board's annual Waste Reduction Awards Program (WRAP). This year, the combined efforts of the Studio, Imagineering, Prospect Studios/ABC TV Hollywood, El Capitan Theater and Feature Animation enabled the company to divert more than 12,000 tons from the landfill, achieving a 42% diversion rate and saving more than \$300,000 in avoided disposal costs. In addition, more than 1,000 tons of materials were donated and distributed to schools and other non-profit organizations. Increased on-line (non-paper) availability of company news, financial reports, office supply ordering, clean air commuter reporting and more, significantly reduces company paper consumption. Disney's recycled content purchasing totals more than two million dollars in products, ranging from office paper to toner cartridges, from office supplies to furniture, to promotional products and print materials. In 2002, the Walt Disney Company partnered with state agencies to host a Recycled Content Products Trade Show at the Disneyland Resort, to further demonstrate its commitment to supporting recycling statewide.

Traditional Medicinals

Traditional Medicinals is a socially responsible and environmentally conscious company, providing high-quality botanical products with a balance of responsible business practices as its guide. The company creates a positive, healthy and supportive working environment for all who work with them. They actively donate time, products and profits to charitable, environmental and educational nonprofit organizations. Traditional Medicinals employees have made this commitment to the environment since 1974. This commitment is reflected through their use of recycled materials, company- and product-wide, resulting in minimal (less than 10%) contribution to landfill, and increased company savings in excess of \$50,000 per year.

Years Awarded: 2011, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

Trincher Family Estates

Trincher Family Estates is a family-owned, Napa Valley wine company that owns the Sutter Home, Trincher, and Montevina wineries, as well as the Trinity Oaks and Fre brands. The company has an ambitious water recycling and composting program. Fifty million gallons of wastewater are recycled annually, and 24,000 tons of pomace and two million pounds of diatomaceous earth are composted. While there are cost savings inherent in such environmentally responsible practices, we are unable to quantify them at this time.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000

Trips for Kids and the Re-Cyclery

Trips for Kid's Re-Cyclery is devoted to recycling used bikes and bike parts. Their goal is to keep bikes out of landfills and to return them to the streets as efficient environmentally-friendly modes of transportation. Their used bikes are affordable and useful for both adults and children. They recycle about 35 bikes per week, repairing and reselling approximately 11 of those, while donating the

remainder to other bike repair programs or taking them to a scrap metal recycler. All proceeds from the sale of bikes in their thrift shop goes toward supporting the non-profit's programs taking inner-city kids on mountain bike outings and helping low-income kids learn job skills while earning a bike of their own.

Turtle Bay Exploration Park

Turtle Bay Exploration Park seeks to develop an identity that defines Northern California and imparts a sense of stewardship for the Sacramento River watershed and an appreciation for its history and culture. Through visitor-oriented programming, the Park teaches about interrelationships and interdependencies among all components of a natural community, and explores issues of conservation and sustainability of natural resources and human communities. As part of its continued belief in the principles of sustainability, Turtle Bay pursues a large scale recycling and waste reduction program. Last year, over 700 tons of materials were reused or recycled by the museum. Built out of many recycled materials and with environmental stewardship in mind, Turtle Bay's sustainability ethic is reflected in many parts of the campus. From the 50% recycled glass tiles in the restrooms to the rice straw bale wall in the Visitor Center, the Turtle Bay experience provides visitors and staff with examples of sustainable technologies that demonstrate respect for the environment and the need to be efficient and creative with its natural resources.

U.S. Borax Inc. Boron Operations

U.S. Borax is the leading worldwide provider of borate products, including boric acid. Borates are an important part of many products used every day, including detergents, glass, fiberglass, ceramics, and agricultural products. U.S. Borax is committed to creative and comprehensive waste reduction and recycling activities which include onsite recycling of borates as feedstock, pursuit of multiple reuse opportunities for oversized haul truck tires and recycling of oil-contaminated soils. U.S. Borax diverted approximately 38,000 tons of waste in 2002, resulting in cost savings of \$1.5 million.

UNISYS Corporation

Unisys is an electronic business solutions company whose 36,000 employees help customers in 100 countries apply information technology to seize opportunities and overcome the challenges of the Internet economy. Unisys people integrate and deliver the solutions, services, platforms and network infrastructure required by business and government to transform their organizations for success in this new era. Unisys Rancho Bernardo has achieved significant success in recycling and environmental achievement over the last 20 years. In 2003, Unisys Rancho Bernardo received the City of San Diego Recycler of the Year Award, as they have for the past three years. They recycled 72% of its non-hazardous materials or 446 tons, saving nearly \$62,000 in operating costs. Recycled materials include plastic, aluminum, scrap metal, glass, packaging material, pallets, greenery, copper, surplus electronics, white paper, mixed paper, light bulbs, phonebooks, and batteries.

University of La Verne

The University of La Verne is a private not-for-profit educational institution founded by the Church of the Brethren in 1891. The main campus is situated on 36 acres and has a full-time equivalency enrollment of 2,700 students. The unique characteristic about ULV is that it is spread out over city streets creating logistical challenges for collection and storage of recycled materials. Since September 1, 2002, the University of La Verne has diverted over 70,000 lbs. from its waste collection, resulting in a savings of \$40,000.

VALCORE Recycling

VALCORE Recycling is a grassroots nonprofit recycling center founded in 1981 and is managed by nine local organizations. Member Groups earn funds by operating a donation and CRV Buy Back center, where they routinely salvage office supplies to share with teachers and artists. The community diverted over 340 tons of materials by recycling at VALCORE. VALCORE spends less than \$100 annually for office paper supplies. VALCORE organizes Vallejo's annual Earth Day Event and teaches composting classes at their site as well as the Solano County Fair.

Virco Mfg. Corporation

Virco Mfg. Corporation, with a 52-year history, is the largest manufacturer of educational furniture in the United States. It is also a leading supplier of commercial furniture to offices, auditoriums, places of worship, and related settings. Virco has a highly effective waste recycling and resource conservation program. The major waste streams from its 560,000 square-foot manufacturing facility includes scrap metal, packaging cardboard, paper products, and plastics. Many of these wastes are recycled or reused, rather than being land filled. In 2002, Virco diverted approximately 1,620 tons of solid waste from landfills through resource conservation, waste reduction, and selling recyclable materials.

Walser's

Walser's is a family owned art store, which has been in business for over 27 years. Walser's has over 22,000 sq. ft of combined retail merchandise, imaging center, and warehouse space and has just moved to a new location. The new location will continue to have storage space, which allows reuse of many items such as packaging. One of Walser's most successful waste recycling activities has been the recycling of empty plastic and glass bottles as well as cans. Walser's collects them from employees and customers that want to throw them away. Money earned from recycling products throughout the year allows Walser's to have a huge Christmas feast on Christmas Eve day for all of their employees and their families. Walser's does this to not only reward their employees as good workers but to also recognize their efforts in recycling. Since their local city instigated a larger scale collection of recycle materials for residential areas, they continue to collect many items such as packaging, small boxes, glass bottles, etc... from both the store and employees. Since Walser's brought in some plastic tote bins and asked their employees to put paper materials that are not reusable in them to recycle, the contribution to these bins continues to add up to 100 pounds or more a week towards recycling.

Warner Bros. Entertainment Inc.

Warner Bros. Entertainment Inc.'s 145-acre motion picture and television studio offers an array of manufacturing, construction and production services and resembles a small city. The Studio is committed to conserving resources, reducing waste through reuse, donations, recycling, energy efficiency, and educational programs in order to benefit the economy and assist the local community. One program that fulfills all of these goals simultaneously is the "Second Time Around - A Community Reuse Partnership" project, through which reusable materials such as furniture, computers, and office supplies are donated to non-profit and educational organizations, using a matching database with over 1,000 participants. The Studio also has an environmental purchasing program, a sustainable design & construction policy, and is committed to energy conservation. Since the inception of its recycling programs in 1992, the Studio has increased its waste reduction rate more than seven-fold, from less than 7% to more than 60% today, exceeding the AB929 year 2000 goal of 50%. In 2002, the Studio diverted 2693 tons from the landfill and saved \$135,000. In addition to savings in waste hauling fees, the Studio also generates revenues of approximately \$25,000 annually from the sale of recyclables and has reduced energy use by 4.3 million kilowatt-hours and \$500,000 annually.

Whole Foods Market Sebastopol

Whole Foods Market® is the world's largest natural and organic foods supermarket. Whole Foods Market® donates surplus food and equipment to non-profit organizations, uses recycled materials in its packaging, recycles and reuses extensively, provides environmental education, and gives monetary support to environmental organizations. Whole Foods Market® Sebastopol was recently recognized as one of the top 15 food donors of Food for Thought Food Bank to which it makes daily donations. Whole Foods Market® Sebastopol donates 5 cents to a local, environmental non-profit for each grocery bag which is reused. Since the program's inception, over 40 trees have been saved. Whole Foods Market® also received the first "Green Building" award in 1998 for sustainable renovation of its corporate headquarters that lead to a 42% reduction in waste and the EPA profiling Whole Foods Market® as a construction waste reduction and recycling record-setter.

Wild Birds Unlimited

Wild Birds Unlimited is a small retail business specializing in the hobbies of bird watching and attracting and feeding wild birds in the back yard. The business is active in many ways in the community. Their waste diversion efforts include saving all boxes and packing materials for reuse or recycling. In eight years, the store has never purchased packing supplies. They help support the South Bay Wildlife Rehab, a local non-profit group that takes care of most of the sick and injured wildlife in the area. During 2001 and 2002, Wild Birds Unlimited raised nearly \$6000 for this group. Their recycling efforts diverted seven tons of material from local landfills and saved \$1000 during 2002. "Recycling works and if done right everyone wins," says Bob Shanman, owner of Wild Birds Unlimited. "I do it at home and I do it at the store. The environment wins, there is less demand on landfills, and our friends at South Bay Wildlife Rehab get much-needed funds".
