

Waste Reduction Awards Program (WRAP)

WRAP Winners Listing for 2001

The Waste Reduction Awards Program (WRAP) was administered by CalRecycle (formerly the California Integrated Waste Management Board) from 1993-2011. WRAP provided an opportunity for California businesses and nonprofit organizations to gain public recognition for their outstanding waste reduction efforts and lets the community know the business takes waste reduction seriously. WRAP evaluated the waste reduction, procurement, and education activities in the internal business practices of the applicant, not its services or products.

WRAP Winners Statewide during 2001

10-Minute Oil Change

10-Minute Oil Change replaces old oil with new. They replace oil filters, grease fittings and replace or clean related items to help each vehicle run cleaner thereby reducing the emissions in the air. 10-Minute Oil Change recycles 100% of the oil from customers' vehicles and all oil received from the public at large. All oil filters are drained, crushed, and recycled. All oil bottles are drained and separated, although presently, recycling of this material does not occur at the Nevada County transfer station. 10-Minute Oil Change takes pride in performing nine separating efforts: oil (from customers and from the public), filters, cardboard, oil bottles, newspaper and magazines. Costs outweigh the savings, but the rewards to future generations through a cleaner environment with less waste, cleaner air, and fewer resources needed are worth it.

Grass Valley, CA 95945

20th Century Fox Film Corp

Reduce, reuse, recycle! That's what Fox continues to do everyday. Fox continued its high rate of landfill diversion by accomplishing a 77% diversion rate. This number is the result of numerous recycling programs in addition to an intranet lot-wide announcements page that has allowed the studio to drastically reduce the amount of paper consumed on the lot. The studio will attempt to further reduce the amount of paper consumed by implementing an electronic invoice payment system in the finance area. Keep an eye on Fox as they try for another blockbuster year.

3M Unitek

3M Unitek is a subsidiary of the 3M Corporation. 3M Unitek is a manufacturer of orthodontic products that are used throughout the world. In 2000, 3M Unitek recycled more than 90 tons of waste materials. 3M Unitek credits this to the 3M Corporation's 3P Program (Pollution Prevention Pays). The 3M Corporation has challenged all of its facilities to meet its waste reduction goals. Money made from 3M Unitek's recycling programs has more than offset any costs associated with recycling vendors that separate our solid waste materials.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001

Monrovia, CA 91016-5097

AB&I Foundry

AB&I Foundry, a third generation family-owned business, is the largest manufacturer of cast iron soil pipe and fittings in the Western United States. All products manufactured and sold by AB&I are 90% from recycled material and profits are re-invested to improve processes, products, safety, worker comfort, and the environment. Even though AB&I recycle most of the waste produced, efforts to recycle 100% of all waste produced is a high priority. AB&I also have plans to recycle heat from the melting process to use in other areas or to generate electricity.

Years Awarded: 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1995, 1994

Oakland, CA 94621-2515

ABC Window Company

ABC Window Company is a mid-sized company that manufactures aluminum and vinyl windows. ABC is constantly searching for better ways/methods to reduce, reuse, or recycle waste materials at their site. Employees are continuously reminded of their roles

within the company's waste reduction efforts. To encourage participation, half of the revenue generated through recycling programs are deposited into an employee fund for the employees to spend however they choose. Through their waste reduction efforts, ABC Window Company has saved approximately \$3,500 per month in solid waste disposal fees alone. They hope to set a good example for other companies. Recognition for their recycling efforts is always appreciated.

ACH Food Companies, Inc.

ACH Foods Companies, Inc. is one of the largest manufacturers of food ingredients and retail store brand products in the United States. It produces high value food and nutritional ingredients for food processors, pharmaceutical and industrial manufacturers, and manufacturers and market food products for the foodservice and retail store brand channels. Its employees are residents, consumers and suppliers to the food industry including the organic and non-genetically modified markets and have a vested interest in providing good stewardship of the land, air and water resources in California. In 2000, ACH Food Companies, Inc. diverted over 4 million pounds of waste from landfills through a concerted effort of developing new products from by-products, recycling and modifying packaging materials, and donating surplus food equipment.

Woodland, CA 95776

Adapt Consulting, Inc.

Adapt Consulting, Inc. was founded in 1993 as a products and services company offering customized promotional and advertising specialty products made with recycled materials and assistance with non-hazardous waste disposal. Adapt Consulting, Inc. has had many challenges over the years. Adapt Consulting, Inc. most unique challenge was the recycling of tons of pallets and wood waste for a major aircraft product manufacturer. A five-acre lot was converted from unusable pallets and crates to usable compost. Adapt Consulting, Inc. encourages the manufacturer of products from recycled materials and has sold almost a half-million dollars worth of Ad Specialty products made with recycled content.

Adcock Manufacturing Corporation

Adcock Manufacturing Corporation is a "precision slitting" facility. The company slits substances such as paper, film, foils, plastics, polycarbonates, and other materials. The materials processed are used in a wide variety of manufacturing requirements. Every one of our clients uses plastic made with post-consumer content for their product. Adcock Manufacturing Corporation has been in business for over 46 years and in the past three years, taken strides to recycle the majority of the waste produced from the manufacturing process. Adcock has recently acquired a plastic recycler who is transporting nearly 100% of the plastic scrap generated during processing. Another 70 tons per year in tag and office paper is recycled along with nearly four tons of cardboard and 10 tons of rolled tab end paper. That is a lot of recycling for a company of less than 40 employees!

Visalia, CA 93729-9489

Advanced Marketing Services, Inc.

Advanced Marketing Service, Inc. is a book distribution center in Woodland, Ca. Recycling hundreds of tons of cardboard and paper annually is an impressive example of the programs in place, but more importantly, other waste prevention activities are making a big impact as well. Online reports and other computerized information systems have reduced paper consumption by nearly 60%. Pallets are repaired on-site (nearly 300-500 each week) and several tons of plastic packaging is reused each year. These are examples of resource conservation at its finest.

Advanced Micro Devices, Inc.

AMD is a global supplier of integrated circuits for the personal and networked computer and communications markets with manufacturing facilities in the United States, Europe, Japan and Asia. AMD, a Fortune 500 and Standard & Poor's 500 company, produces microprocessors, flash memory devices, and support circuitry for communications and networking applications. Their values commit them, as individuals and as employees, to actions that enhance the quality of life and protect the environment of the communities in which they do business. AMD's Environmental, Health and Safety (EHS) Program reflects the companies commitment to these values. AMD has one set of universal standards that govern their practices worldwide. Waste reduction and recycling is rooted in the AMD culture as evidence by AMD's practices of donating surplus computer equipment, furniture, and supplies to non-profit organizations, recycling paper, cardboard, plastics, wooden crates and pallets, beverage containers, scrap metal, dry cell batteries and other materials, and sending landscape waste for composting. In 2000, AMD's California site diverted over 1,127 tons of materials from landfills, which represents a 30% increase from the previous year (870 tons of materials were diverted in 1999).

Advanced Sterilization Products

Advanced Sterilization Products (ASP) is the global leader in sterilization techniques and manufacturer of medical equipment for disinfecting and reprocessing of surgical instruments. As a division of Ethicon Inc. and the Johnson & Johnson family of companies, ASP is committed to the environment and promoting waste and packaging reduction. ASP's values are consistent with the J&J Credo that says, "We must maintain in good order the property we are privileged to use, protecting the environment and natural resources". Advanced Sterilization Product's accomplishments and achievements are a reflection of every employee's contribution to recycling and continual improvement of pollution prevention goals. J&J expects the highest standards of professionalism, honesty and integrity by establishing environmental management programs that assign responsibility and demand accountability regarding environmental objectives and targets. Financial, physical, human resources, and training needs are identified to achieve these goals and action items assigned to ensure their completion. By going beyond compliance, Advanced Sterilization Products create a competitive advantage for sustainable growth. Economic growth provides the conditions in which protection of the environment can best be achieved, and environmental protection, in balance with other human goals, is necessary to achieve growth that is sustainable.

Agilent Technologies

Agilent Technologies, with campuses in Santa Rosa and Rohnert Park, is a leading manufacturer of high performance test and measurement equipment for the fast growing worldwide telecommunications industry. The company is also a leader in the management of resources and has implemented highly successful reuse and recycling program for solid waste materials. The company has established recycling centers at each of its two major campuses in the county. The local operations have implemented a successful desk side-recycling program that makes it easy for employees to recycle materials. During 2000, the local operations diverted over 1,574 tons or 62% of the solid waste generated from its manufacturing operations from the Sonoma County landfill. Some of this material was donated to local nonprofit organizations. The company would have spent at least an additional \$218,000 in landfill disposal costs during 2000 if they did not have this diversion program in place.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000

Agilent Technologies California Avenue Site

Agilent Technologies California Avenue Site conducts research, development, and manufacturing of analytical chemical systems and software development for lab network server systems. Agilent Technologies CAS donated 24,500 lbs. of excess and by-product materials to the Resource Area For Teachers (RAFT) program in San Jose in 2000. They also achieved substantial source

reduction and a \$250,000 per year savings by replacing software manuals with CD-ROM's. Agilent Technologies CAS had a diversion landfill rate of 69% by recycling 155 tons of excess material in 2000. This accounts for a \$38,000 savings in waste hauling fees.

Years Awarded: 2001, 2000, 1999, 1998, 1997, 1996, 1995

Palo Alto, CA 94304

Agilent Technologies, Inc. - Newark

The Agilent Technologies facility in Newark has seen drastic changes in the manufacturing operations over the past year. With incredible upswing to the grinding halt of the production, the recycling of solid waste continues on course. Agilent has added desk side recycling to this facility, and segregates construction debris to minimize the use of landfills. This facility was recently awarded an ISO 14001 certification for the performance of its environmental management system.

Years Awarded: 2001

39201 Cherry Street
Newark, CA 94560

Agilent Technologies, Inc. - Santa Clara - Bowers Avenue Site

The Agilent Technologies facility in Santa Clara has gone to lengths to minimize the solid waste generation. With a substantial transition from mostly manufacturing to mostly office environment, the group increased the diversion rate from 47% in 1998 to 74% in 2000. Desk side recycling, equipment recycling, the utilization of MRFs for other waste streams, and the dedication of our employees made this possible. This facility was recently awarded and ISO 14001 certification for the performance of its environmental management system.

AT&T Real Yellow Pages 

Pacific Bell Directory is one of the nation's leading publishers of telephone directories, supplying one of the most recognizable and utilized references in 15 million California homes and businesses, the Pacific Bell SMART Yellow Pages. Pacific Bell Directory's environmental efforts start with manufacturing directories that are completely recyclable and contain a high percentage of postconsumer waste, and end with annual coordination with hundreds of communities across the state to make phone book recycling convenient for residents and businesses. Most outdated Pacific Bell SMART Yellow Pages are recycled into new telephone book paper, as well as remittance envelopes used for Pacific Bell phone bill payments, household insulation, breakfast cereal boxes, cardboard boxes, agricultural packaging, stationery and more.

Auric Blends

Auric Blends is committed to the manufacture of a superior line of fragrance products that enhance and excite the senses and encourage self-expression and individuality. The goal is to sustain a mutually beneficial partnership with their co-workers, customers, vendors and associates. They are proud to offer the public the opportunity to share in the essential pleasure experience of their unique collection of products for the body, spirit, and soul. This wholesale manufacturing company currently ships over 250 packages per week around the U.S. and abroad. Auric Blends generates a very small amount of garbage and actively uses recycled packaging materials in their shipments. This has been a very successful campaign for them and in just one year of time, the company has saved thousands of dollars. This helps them to keep their products competitively priced, as well as keep handling charges nominal.

B. Braun Medical Inc.

B. Braun Medical, Inc. is a major manufacturer of intravenous solutions and solution containers. They have been recognized for their uses of non-PVC plastic in the IV containers and for demonstrating that a company can be environmentally responsible while at the same time being a profitable enterprise. In the last 12 months, B. Braun has reduced waste destined to be landfilled by 2,856 tons and saved more than \$105,600 by diverting this waste. They have realized \$102,000 for the reuse and recycling of material that did not go to the landfill. In addition to their extensive recycling and waste reduction program, B. Braun generates 85% of the electricity it uses and is involved in continuous evaluations of energy usage.

Ball Metal Beverage Container Corp. (Fairfield)

Ball Metal Beverage Container located in Fairfield, manufactures 12-ounce aluminum beverage cans for the west coast beer and soft drink market. Ball Fairfield makes extra efforts to promote and participate in as many different kinds of pollution prevention and

waste minimization activities as possible. Although Ball Fairfield was exempt from the US EPA's Universal Waste Rule, they voluntarily began compliance. They began using non-hazardous Phillips Alto T-8 florescent bulbs and began collecting all types of batteries used in the plant. The "used" batteries were collected and sent for processing by an approved recycling company. This program prevented 750 pounds of potentially hazardous products from being disposed in landfills. During December 2000 and January 2001, Ball employees learned the value of back-up battery electrical supply as the plant complied with the Interruptible Curtailment Load Reduction Program of Pacific Gas and Electric Company. Making a can from recycled aluminum uses 95% less energy than making a new one. Everyone can reduce the demand for electricity by doing their part - RECYCLING.

Bank of Stockton

Bank of Stockton is a large-sized company that provides financial service to the individual and the commercial. In regards to their waste reduction program, Bank of Stockton is the leading financial institution that promotes & implements a highly - intensive usage of paperless/online network system between its branches and its consumers. This includes check - imaging system, e-mailed monthly statements, online transfer of funds, providing information on CD-ROMS, using two-way envelope, and no-fee Direct Deposit. In addition, Bank of Stockton provides drinking-mugs to all of its employees, and donating old computers and furniture to local school and charities. They return all toner cartridges for recycling to reuse, and sell their recyclable materials like white paper, CPO, shredded paper, even junk-mails, and scrap metals. Having a green building design is also another way that Bank of Stockton does for resource conservation. By doing these, in the year 2000 Bank of Stockton diverted 73 tons of waste from going to landfill.

Baxter BioScience, Los Angeles Plant

Baxter BioScience, Los Angeles Plant, is engaged in manufacturing of purified blood derivatives through fractionation of human

plasma. Although highly regulated by the Food and Drug Administration (FDA) which limits the capability of the facility to recycle and reuse most of the raw materials, packaging materials, and recyclable wastes, the facility has successfully managed to operate a recycling center that captures and collects all recyclable material imaginable. This recycling center collects junk mail, phone books, cardboard, tyvek suits, glass, all types of paper, toner cartridges, and scrap metals. The facility also disposes of wooden pallets, fiber drums, metal drums and fluorescent bulbs to recycling companies for reuse. The Los Angeles Plant Recycling program brings in an annual income of \$15,000 per year and cost avoidance of approximately \$60,000 for waste that otherwise could have gone to the landfills. Last year's recycling program collected more than 500 tons of recyclable materials and saved approximately \$100,000 for the company.

Belvedere Vineyards and Winery

Belvedere Vineyards and Winery is a medium-sized winery that produces about 70,000 cases of wine a year consisting of Chardonnay, Pinot Noir, Zinfandel, Cabernet Sauvignon, Merlot, and Syrah. Over the course of the past year, the winery has received the Sonoma County Green Business Certification and is currently making efforts to reduce energy and water usage as it works towards achieving the next level of conservation, the Bay Area Green Business Certification. Over the course of the year 2000, the winery diverted at least 67% of its waste to recycling. In addition, the Administration offices currently recycle 80% of their waste which consists mainly of office paper. The winery has also begun to work with suppliers to reuse the capsule trays from their bottling procedures, consolidate overall purchasing, and offer corks for reuse purposes. Currently, the winery is using treated wastewater for its irrigation and is looking into solar energy for the heating of water.

Benny's Oil Filter Recycling, Inc.

Benny's Oil Filter Recycling picks up oil filters from hundreds of Southland auto shops, garages, and retail businesses. The material is transported back to our facility where the filters undergo a unique and simple process which squeezes the filter to remove the residual oil and then crushes small amounts of filters into cubes that weigh approximately 35 pounds. These cubes are donated weekly to Tamco so they can be put into rebar. This past year, Benny's Oil Filter Recycling diverted 768,000 lbs of used motor oil filters from the landfill. In addition, 84,000 gallons of oil were extracted from these filters that would have otherwise been dumped in the landfill. Benny's Oil is responsible for both diverting waste and reducing the amount of hazardous waste from landfills.

BioWorld Products Inc.

BioWorld Products LLC is a woman-owned business that provides unique biotechnology formulated products for pet care, odor control, wastewater treatment and environmental cleanup. These products are sold to governmental facilities, food processors, dairies, golf courses and residential users. In 1994, the company initiated a waste reduction program to reuse plastic product containers returned to them by customers. Each container costs nearly eight dollars. A substantial cost savings has been realized the past several years and the amount of new containers needed has decreased considerably. The company has a minimum packaging approach when marketing the products for retail customers. BioWorld continues to have cost savings through an aggressive reduce, reuse, and recycle policy.

BriarPatch Co-op

Briar Patch Community Market is a medium-sized natural foods co-operative with 1,700 owner-members. Briar Patch reuses and/or recycles 96% of the materials generated in store operations, saving \$17,000 per year in waste disposal fees. Cardboard boxes account for much of the waste diversion: 24,804 lbs. of wax-coated and 11,440 lbs. of regular cardboard boxes are reused each year and 20,833 lbs. of cardboard are recycled. Each year, they also give 5,460 lbs. of produced waste to farmers and gardeners for compost or chicken feed, and even collect empty egg cartons for reuse. Packing materials such as styrofoam and bubble wrap are reused by customers or a local mailing service. The Briar Patch Community Market will continue to find innovative ways to reduce what it contributes to the waste stream.

Byers LeafGuard Gutter Systems

Byers' LeafGuard Gutter Systems is a full service contractor that installs custom-fit seamless aluminum gutters. An example of their efforts is the network they created with another local business. Their cardboard boxes are reused which simply eliminates the need to throw them away. As they cover all of Northern California, their low emission/fuel efficient sales vehicles are a perfect example of saving both kinds of "green." In addition, they have set up a firm to take the metal gutters removed from their client's homes and deliver them to a large recycling plant. An impressive 140 tons of metal, scraps and cardboard are diverted from Nevada County's environmentally precious landfill. An equally attractive figure of \$15,000 in savings is what Byers' LeafGuard Gutter Systems has to show for their efforts in the past year alone.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001

California Portland Cement Company - Colton Plant

California Portland Cement Company Colton (CPCC) plant is a leading manufacturer of Portland cement in the state. Last year, CPCC used 88,329 tons of waste by-products and discards from industries and the public in its cement manufacturing process. Reuse of these materials not only saved precious landfill space, but also resulted in a significant cost savings to CPCC over buying virgin raw materials. Many of these materials such as used tires not only clog-up our local landfills, but can become an eyesore when improperly disposed. CPCC used some 871,000 waste tires as fuel in 2000 creating a market for this difficult to manage waste. Using tires also saves resources reducing coal use by 10,000 tons last year. Beginning in July 2001, the CPCC will use waste steam to generate electricity for the plant. Any excess plant generated electricity will be added to the local power grid to assist with California's power crisis.

Richmond, CA 94802-0627

Chevron El Segundo Refinery

Since 1911, the Chevron El Segundo Refinery has been producing a variety of petroleum products which today include gasoline, jet fuel and diesel. Initiating a recycling program at the refinery was a unique challenge in that the business operates 24 hours a day, is occupied by around 1,100 employees and is spread out over approximately 1.5 square miles. The Refinery Recycle Team was formed in 1990 to address this challenge. Thanks to the effort of the Team and the enthusiastic participation of the employees, the refinery diversion rate has increased from 3% in 1990 to about 57% in 2000.
Years Awarded: 2011, 2010, 2009, 2008, 2007, 2005, 2004, 2003, 2002, 2001, 2000, 1998, 1997, 1996, 1995, 1994

Childtime

Childtime is a children's center in Moreno Valley with a staff of eighteen employees. As with most centers, there is always a buzz of activities as the children learn, play and eat each day. However, Childtime stands out among other centers as they make the extra effort to recycle (paper, cardboard, glass, tin and plastics), reuse (magazines, phone books, packing materials and containers), and reduce (serving snacks in reusable cups and offering old toys to parents). The children also get involved in recycling often by saving

earnings from the aluminum can drives for pizza parties.

Cisco Systems, Inc.

Cisco Systems is the worldwide leader in networking for the Internet. Cisco's networking solutions connect people, computing devices, and computer networks that allow people to access or transfer information without regard to differences in time, place, or type of computer system. Cisco's vision is to change the way we work, live, play and learn and its most unique forms of waste reduction are E-commerce and E-learning. Easy to use, interactive, Web-based E-commerce applications enable more efficient processes for conducting transactions online with suppliers, customers, business partners, and employees, thereby reducing costs for sales, customer service and resources for support functions. Cisco's use of E-learning is also another unique waste reduction activity. In addition to saving on training and productivity costs, E-learning also reduces the amount of printed training materials that need to be generated in the standard training format. In the period from June 2000 to May 2001, Cisco's San Jose waste reduction program diverted 47% of the waste stream or 4,670 tons of material. Through the restructuring of the waste program and improved diversion rate, the cost savings are \$785,777.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2004, 2003, 2002, 2001, 2000, 1994

Community Environmental Council

The Community Environmental Council (CEC) is the leading non-profit environmental organization in Santa Barbara County. They consist of 10 programs and 5 centers, providing valuable community services such as managing recycling centers and collecting hazardous waste from households and businesses. They are also a bridge builder and visionary, and base their organization's philosophy on finding positive solutions that each of us can apply to our everyday lives. Waste reduction techniques are made a part of every CEC program and activity. They save over 30% each year in utility costs due to the "green design" of their building. Although CEC's Gildea Resource Center serves as their program's headquarters, much of their waste reduction activities happen off-site. A prime example is their soon to be open South Coast Watershed Resource Center. The Center will be a hub for watershed education, providing educational tours for school groups and the general public, state of the art exhibits demonstrating a healthy watershed, a wet lab, and research library.

Conservation Corps North Bay

In 1982, the Marin Conservation Corps (MCC) became the first local non-profit Conservation Corps in the nation. Since then, MCC has been dedicated to preserving Marin's natural resources while providing young adults with educational and employment opportunities. MCC provides recycling and reuse education to thousands of children, performs numerous conservation activities throughout Marin, and provides recycling collection services to public lands through the county, while maintaining an organizational wide waste reduction policy. MCC recycling related programs divert over 5,000 lbs. of waste from landfill each year for reuse, while recycling over 250,000 lbs. of materials throughout Marin County. MCC manufactures recycling bins entirely from recycled and reused materials. The initial cost is more expensive but the reduced time assembling, painting and making repairs saves thousands of dollars in labor costs.

Cottura Ceramic Art Imports

Cottura Ceramic Art Imports is the largest importer in the United States of the finest handmade, hand painted Italian ceramics. Cottura has 3 retail stores, a nationwide catalogue, a web site and a wholesale division that sells to 300 stores nationwide. Cottura reuses and recycles thousands of corrugated boxes that enter their Los Angeles warehouse each year. Cottura recycles as much of the packing supplies that surround these fragile ceramic and glass items as possible. Since not every ceramic item arrives in one piece, Cottura exchanges the broken pottery with artists that make mosaic mirrors, tables, planters and vases. Cottura then buys these items from the artists and sells them in their retail stores in Los Angeles, Newport Beach and in their newest Caesars Palace store in Las Vegas. Each store has one-of-a-kind Cottura sign that is made completely of broken pottery and shards of the very items that Cottura sells all over the United States. In fact, Cottura recently had an offer by an enthusiastic customer to purchase one of these signs for their home! Each of the signs is permanently attached to the walls of each store!

Creative Office Systems, Inc.

Creative Office Systems, Inc. is a full service furniture dealership specializing in recycled /remanufactured office systems furniture. COS promotes the use of hundreds of recycled /remanufactured products for the design and building of 'green' offices, such as environmentally friendly paint, glue, and fabric applications. COS constantly looks for new ways to reduce waste and protect the environment. In fact, COS just added a monitor riser to the product line which is manufactured out of parts that previously were considered as waste material. The company estimates that during the last 4 years they were able to recycle and save approximately 70,000 tons of waste from landfill. Furthermore, COS produces office panel systems that are five times more energy efficient than the manufacturing of new components. This adds up to average energy savings of 74 kWh per remanufactured workstation. This amounts to a monthly conservation of 14,800 kWh, enough to provide baseline power to 1,072 homes for a day. In other conservation efforts, COS has reduced its own power consumption by 32% compared to last year. COS has also shifted its hours of production to end before PG&E's peak power period. Every year COS donates large quantities of used office furniture to local non-profit organizations and schools. A company-wide recycling collection program has almost completely eliminated glass, cardboard, aluminum, office paper, and PET plastics from the company's waste receptacles.

Crown Poly, Inc

Being a California Corporation, CROWN POLY INC. takes environmental responsibility for the health of the planet very seriously. The inventor of the Pull-N-Pak ® Bagging System has elected to use high-density polyethylene for their product content, specifically to reduce raw materials usage and energy consumption. Further, Crown Poly Inc. captures the scrap from the production of its bags and recycles this refuse in order to produce the cylindrical core on which it presents the bags to the consumer. This ensures maximum, efficient use of raw materials and eliminates any unused refuse. To complete their environmental goals Crown Poly Inc. utilizes advertising to encourage consumers and the retailing industry to recycle and reuse its finished products. Thus, Crown Poly Inc. products provide jobs for the U.S. economy, improve the quality of life for consumers domestically and internationally with the consumption of its products and protectively ensure that the global environment is respected. Crown Poly Inc., through its actions both internally within the corporation and externally through the public, supports the EPA's 3 R's: Reduce, Reuse, Recycle.

"Dominican Hospital is a full-service community hospital in Santa Cruz. Since 1994 Dominican has operated ""DominAgain"" a distribution center where materials that are still useful are collected and can have another life again. Everything in the store is free. Its best ""customers"" are employees and those from the community associated with schools and day care centers, as well as those interested in arts and crafts. Dominican also finds uses for larger cast-off items: excess and obsolete medical supplies and equipment goes to clinics in Central America and Africa, while computer equipment and unneeded furniture are given to local schools and government agencies. The hospital operates a full spectrum of recycling programs including glass, aluminum, batteries, plastics, blue sterile wrap and stretch wrap. The sterile and stretch wraps will be used for siding for houses."

Dos Coyotes Border Cafe

Dos Coyotes Border Cafe is a busy restaurant that serves many customers. Even with such a high volume of business, Dos Coyotes still finds time to take part in waste management. The restaurant makes conscious changes to improve environmental practices. For example, pans are now covered by reusable covers and a self-serve salsa bar was installed to eliminate the automatic dispense of containers to customers. In addition, OCC, paper, toner cartridges, grease, cans, and jugs are recycled. Dos Coyotes plans to convert to recyclable plastic containers as well and would like to compost if city health regulations permit.

EcoVantage Reprographics, Inc.

As a previous WRAP winner, Eco Vantage Reprographics, Inc continues to recognize the need for waste management and environmental protection. As one of the main pioneers of the all plain paper reprographics concept in Southern California, they have been providing a low cost, environmentally safe alternative to blueprints for several years. Because the direct bond printing process does not use hazardous chemicals or ammonia, it does not introduce hazardous chemicals to the workplace or to landfills. They specialize in printing on recycled paper, offer a complete recycling program to all of their clients and are encouraging the shift from a paper-based document management environment to a "digital" based form of document management. As a result, paper is used "on demand", not as a rule.

F & F Multiprint

For the sixth consecutive year, F & F Multiprint has been awarded the California Waste Reduction Awards Program "WRAP" Award. Initiated at the company level almost 9 years ago, F & F Multiprint has been recycling their own paper by making scratch pads and giving their customers to opportunity to use the paper twice. In addition, over 7 years ago, they began promoting an exchange program where people in the community could bring their scratch paper for recycling. All single-sided paper can be exchanged for scratch pads, and their paper will, in turn, be made into scratch pads. Customers can also bring in any scratch paper (colored bond, envelopes, telephone books, even junk mail, etc.) and F & F Multiprint will deposit it into their paper recycle bin. When F & F Multiprint began offering UPS and Fed Ex Shipping Services, they also expanded their recycling program by accepting styro peanuts, cardboard cartons, and packaging materials from the community. In the last three years they have salvaged over 575 cu. yds. of packaging materials and kept it from ending up in the local landfill. For their efforts, F & F Multiprint has been acknowledged by the California Integrated Waste Management Board with this WRAP Award. Keep It Up F & F Multiprint!

Gardeners' Guild, Inc.

Gardeners' Guild, Inc. is a medium-sized commercial landscape management company that has built a strong environmental ethic into its operations. The company and its dedicated staff recycle everything possible on and off the job. Though this commitment to an integrated program, sales have grown 86% over the last seven years while the cost of recycling and debris has increased only seventy-four percent. This is especially outstanding when the rising costs of recycling and debris charges are factored in. The company's Sustainable Landscape Management Program or SLM is a pilot effort, which has been embraced by several companies including Birkenstock and Agilent Technologies. Through this program, landscape inputs and outputs are carefully analyzed and planned so that the environment is protected and the waste stream is reduced.

Gold Mine Natural Food Company

Gold Mine Natural Food Company is a mail-order business that specializes in organic foods and environmentally friendly household products. It is recognized for its ongoing recycling network with local businesses, where it picks up their clean, reusable shipping boxes and packing materials to reuse in shipping mail orders. When shipping perishable items, the company reuses plastic juice and sport drink bottles, filled with frozen water to keep items cold. One of its more successful connections this past year was to donate nearly a hundred empty 55-gallon drums to the City of San Diego's Department of Parks and Recreation for reuse as trash cans at city beaches. Through reuse and recycling, the company diverted an estimated 10 tons of materials from landfills and saved approximately \$33,000.

Golden Gate Disposal & Recycling Company

Golden Gate Disposal and Recycling Company, a subsidiary of Norcal Waste Systems, Inc., is an employee owned garbage and recycling collecting company. Golden Gate is committed to protecting the environment through an application of stringent standards and by innovatively recycling more materials than other hauling companies. They recycle the basics (cans, bottles and paper) as well as all food waste and non-recyclable paper (i.e.: food soiled paper, paper towels from the restroom, etc.). Reusing one-sided paper for draft fax paper, recycling batteries, and providing ceramic mugs for employees is the company's standard practice. To help close the recycling loop, Golden Gate purchased recycled content carpet tiles for their office. These tiles also promote waste prevention since a single tile can easily be changed when stain occurs. Participating in these easy to follow programs has allowed Golden Gate Disposal & Recycling Company to achieve an amazing 65% diversion rate!

Hitachi Global Storage Technologies Inc.

IBM San Jose, is the worldwide headquarters for the Storage Technology Division (STD), focusing on development, manufacture and marketing of leading storage technology products and storage solutions for IBM customers and original equipment manufacturers (OEMs). IBM San Jose is committed to tackling all aspects of waste minimization. This sites' Solid Waste Program's recycling efforts extend beyond the traditional materials (e.g., paper, glass, metals and plastics) to include clean polystyrene cafeteria and packaging wastes to ink toner cartridges, clean construction debris, and sodium bicarbonate waste and glass disk rejects from the wafer and disk manufacturing processes, respectively. In 2000, IBM San Jose recycled nearly 81% (4,638 tons) of the solid waste generated at this site. The site also leads the STD Environmentally Conscious Products (ECP) program. With their guidance, STD continues to decrease the use of non-reusable packaging in products. Other improvements include an increase in the number of plastic parts marked for future recycling/reuse, from nine part numbers in 1999 to 40 in 2000, and the mass of recycled plastic used in products (around 462,000 pounds in 2000). Through its ISO 14001-registered environmental management system, IBM San Jose has committed to continual improvement of its waste reduction efforts.

Intel Corporation

Intel Corporation employs approximately 85,000 people in over 120 different locations in 50 different countries spanning the globe. The company's research and development campus at Intel Folsom in Northern California is home to 7,000 employees and four major divisions: Intel's North and South Americas Sales and Marketing Operation, Information Technology, Intel Architecture Group and Flash Products Group. Intel has a strong commitment to protecting the environment and giving back to the communities where they work and live. Intel has been recognized by the U.S. Environmental Protection Agency for developing energy efficient technology. The Folsom Site donated over 2,700 pieces of electronic equipment to local schools and charities, sponsored a "Bike to Work Day" event featuring over 300 participants, and are involved in cross-site environmental programs, which educate and encourage employee involvement in recycling. To conserve energy, all Intel facilities in California voluntarily reduced their office lighting by 50% and adjusted their heating, ventilation, and air conditioning use. In Folsom, the resulting conservation savings is enough to power 500 homes each day in the Sacramento area. The California Technology Trade and Commerce Agency formally recognized Intel for its leadership in voluntarily energy conservation in California and shares its conservation measures with other employers on the Agency's web site. In the year 2000, Intel recycled 79% domestically and 40% internationally for their solid waste material and the Folsom campus recycled 65% of its solid waste. Over 1,000 tons of waste has been diverted which saved the corporation over \$250,000.

Ivy Hill Corporation/A Cinram Company

Ivy Hill Packaging Los Angeles is a Time Warner-owned printing company which produces "Paperboard Packaging." With regard to their recycling program, the company believes that all of their various efforts contribute to the ultimate goal of waste reduction and energy conservation. This year, Ivy Hill has made a sizable investment with the purchase and installation of a second Cyclone and wire-tie baler. This equipment is crucial in the collection and baling of one of their largest recycled waste stream, waste paperboard. In the past year, thousands of tons of paper waste were collected. On an average, \$7000 is saved each month in waste paper alone. This waste is then recycled and reused as paperboard. The Ivy Hill Corporation strives to produce the best packaging products manufactured in all of the paper industry. Equally important is the fact that they have not lost sight of their continuing responsibility for the well-being of the employees and that of their neighboring community. Ivy Hill recognizes the delicate environmental issues associated with manufacturing and promises to conduct their operations as a company with this pledge in mind.

Vernon, CA 90058-2104

Jamestown Veterinary Hospital

Jamestown Veterinary Hospital is a facility dedicated to caring and treating its clients' pets. Recycling is a part of business, from donating Styrofoam shipping boxes to the local meals on wheels organization to using cat litter made from recycled newspaper. The money generated is negligible for their small hospital, but some of the money goes towards the employee break area. Reusing ice packs that are used to ship cold goods eliminates the use of ice cubes in ice chests during field work, and they have been donated to a local food program, used in shipping samples and sent with clients to keep medicine cold on their drive home. Buying recycled paper towels not only helps Jamestown Veterinary Hospital keep clean and sterile without guilt, but also continues to provide a market for materials that are recycled by consumers.

20700 Avalon Blvd Ste 500
Carson, CA 90746

JC Penney Company, Inc.

JCPenney of Woodland, CA is a retailer of soft apparel merchandise. The store is able to recycle significant amounts of cardboard, plastic and plastic hangers, and has developed an energy savings plan for 2001. In 2000, JCPenney of Woodland reduced its waste management charges by 10% through the recycling of cardboard. For the year 2000, the store reduced energy costs by 30%. This savings has been accomplished through a total re-lamping of the store by its corporate office and the implementation of a mandatory lights-off policy when lights are not necessary.

JDSU - Flex Products Group

Flex Products, Inc., a subsidiary of JDS Uniphase, manufactures a color shifting pigment used in security and decorative applications. Flex recycles all of the materials used in the production of their products. Some of these materials are recycled and returned for reuse, while others are recycled to be used for other products. This effort has reduced the amount of waste that used to be landfilled by over 500,000 lbs. per year. The total recycling/reuse program since its inception has reduced disposal costs by over \$400,000 a year.

Years Awarded: 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

Jet Propulsion Laboratory

The Jet Propulsion Laboratory, managed by the California Institute of Technology, is NASA's lead center for robotic exploration of the solar system. Their spacecraft have visited all the planets in our solar system except Pluto. JPL telescopes are observing distant galaxies in the universe to study how our solar system was formed. JPL's main 72-hectare (177 acre) site is at the foot of the San Gabriel Mountains near Pasadena, California, 19 kilometers northeast of Los Angeles. JPL also manages the worldwide Deep Space Network, which communicates with spacecraft and conducts scientific investigations from its complexes in California's Mojave Desert near Goldstone, near Madrid, Spain, and near Canberra, Australia. JPL cameras and sensors are aboard satellites circling Earth to study the ozone, oceans, and other earth sciences. To support our continued exploration, JPL is making advances in technology with new instruments and computer programs to help our spaceships travel further and our telescopes see farther than ever before.

Johns Manville

Johns Manville is a leading manufacturer and marketer of premium-quality building products. The 142-year old Denver-based company had sales of \$2.2 billion in 1999 with approximately 75 percent of its sales in the commercial and industrial segment. JM is number one or number two in every key in which it participates. Johns Manville employs approximately 9,700 people and operates 56 manufacturing facilities in North America, Europe and China. The Johns Manville facility in Willows has an aggressive recycling program. The plant has recently entered into an agreement to dispose of a portion of its waste at a local energy cogeneration plant in Anderson, California. In addition, most of the plant's suppliers accept returned packaging for reuse. As a result, the facility is able to divert over one million pounds of material from the local landfill annually. The fiberglass insulation produced at the plant contains 30% recycled glass. In fact, when comparing recycled material input to waste generated, the facility uses more waste material in its production of fiberglass than overall waste generated, making the plant a net consumer of waste. The plant is always actively searching for other ways to divert its waste from the landfill and keep the Willows community cleaner.

Johnson Controls, Inc.

Johnson Controls Inc. is a large company that manufactures automobile seat products. In regards to waste reduction program, Johnson Controls donates its old computers for charity, including food donation. It has reduced excess amount of resources by not using any packaging materials, replacing paper towels with rags, switching from folded to oversize roll paper towels, and by making a high intensive usage of its intranet and internet online network system to reduce the amount of paper. Also, the company reuses a

large amount of cardboard boxes, plastic totes, and plastic pallets as resource conservation. In addition, the company also sells all of its recyclable materials such as office paper, scrap metals, automobile seat cushion foam, and cardboard boxes. As a result of these practices, Johnson Controls diverted 329 tons of waste from going to the landfill in 2000.

Kaiser Permanente - Roseville Service Area

Kaiser Permanente is the world's largest non-governmental system for delivering health care, serving more than 7.4 million voluntarily enrolled members in eight divisions and market areas nationwide (5.8 million members in California). Kaiser has operated five clinics in Roseville since 1994, opening the 116-bed hospital in 1998 (serving 500,000 members in their area). Due to the efforts of the Roseville Green Team, paper and cardboard recycling alone has diverted over 60 tons from the landfill in 2000. Other waste reduction efforts include: donating obsolete medical supplies and equipment to developing countries, reusing medical supplies when appropriate instead of utilizing disposable supplies, recycling aluminum cans, books, magazines, and batteries, sponsoring "Trash to Treasure" office supply swap, donating construction supplies to Habitat for Humanity, and recycling and donating office equipment. Earth Day 2001 was celebrated with vendors, refreshments, and prizes available to the public as well as staff. In 2001, Kaiser/Roseville will participate with the Department of Health Services in a Pollution Prevention Project that targets the elimination of Mercury at the facilities.

Years Awarded: 2011, 2004, 2003, 2002, 2001, 2000, 1999, 1997, 1996, 1995, 1994, 1993

Kraft Foods

The Kraft Foods plant in San Leandro manufactures and distributes the following consumer food products: Maxwell House Coffee, Yuban, Nabob Coffee (Canadian), dry packaged Jell-O gelatins and puddings, and General Foods International Coffee. The plant has been in operation for over 50 years, and continually achieves recognition for waste reduction efforts. From raw materials, to packaging materials and energy usage, Kraft Foods San Leandro has made significant improvements with the past 12 months. Kraft Foods takes 100% of the coffee process byproduct and uses it for animal feed, whereas in the past, 10-15% of the byproduct waste was being sent to landfill. This resulted in an average monthly reduction in landfill waste of over 17,000 lbs. Also, last year Kraft created 3 lb. coffee cases that were redesigned from a full wrap-around corrugated case to a corrugated tray with over-wrap. This reduced the corrugate usage on the 3 lb. coffee products by approximately 60%, yielding a projected annual savings in packing materials of \$300,000. To adapt to the energy crisis in California, Kraft Foods, San Leandro has redesigned their production schedule to operate during non-peak hours during the summer, saving 200,000 kW and over \$345,000 in energy costs. Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2001, 2000, 1996, 1995, 1994, 1993

Kraft Foods Global Inc. - Tulare

Kraft Foods, Tulare is a medium sized facility that manufactures bulk Parmesan Cheese and Whey Powder. The facility annually sets waste reduction goals against pounds of product produced. Because the facility is a bulk product manufacture, waste reduction is more difficult due to lack of packaging waste reduction opportunities. To accomplish its annual reduction goals, the facility works as a team to explore new recycling avenues, creative waste reduction ideas, and to generate methods of implementation. This hard work paid off through a minimum of a 2% reduction in landfill annually.

10800 Ave 184
Tulare, CA 93274

Kraft Foods Global, Inc. - Knudsen Dairy Products

Knudsen Dairy Products, a division of Kraft Foods North America, Inc., is the largest cottage cheese plant in the world. It produces over 48,000,000 lbs. of cottage cheese, 42,000,000 lbs. of sour cream, producing powdered milk and butter per year. Team members are dedicated to recycling and waste minimization. An Energy Conservation Team composed of hourly and management team members was established this year with a mission to reduce energy consumption. The facilities chemical usage has been reduced by \$50,000 per year, which also reduces the amount of effluents to the city sewer while reducing sewer costs. Knudsen's motto is "The Very Best" and will continue to be a good neighbor in the community in a green, environmentally friendly manner.

Larson Pallet Company

Larson Pallet Company is both a leading manufacturer of new and reclaimed custom wood pallets and also a recycler of reconditioned pallets. In addition to returning repaired pallets to users, Larson Pallet dismantles non-repairable pallets, recovers the usable materials and manufactures reclaimed products. Non-usable boards are reduced to chips through a grinding process and sold to companies that will recycle them into other wood products. All material that will meet customers' quality requirements is used repeatedly, lowering the demand upon forests and benefiting customers with lower-cost products that meet their materials handling needs. In 1999, Larson Pallet Company once again upgraded its Milpitas facility, this time adding more grinding capacity and

allocating more personnel and real estate resources to its recycling operation. Management estimates that their cost savings now exceed \$1,100,000 per year before calculating the beneficial impact upon the environment.

Longs Drugs Store, Grass Valley is a retail store which sells general merchandise and has a pharmacy. This store has implemented substantial resource conservation efforts both through donations to local non-profit organizations, and in-store reduction and recycling. Longs Drugs Store, Grass Valley has created a community network of over ten organizations to which they donate over 11,300 pounds per year of materials. The implementation of utilizing durable reusable plastic totes has source reduced over 26,000 pounds per year of cardboard. The use of a baler for recycling cardboard results in an amazing 364,000 pounds per year in saved resources.

Years Awarded: 2002, 2001

12005 Sutton Way
Grass Valley, CA 95945

Looney Bins, Inc.

Looney Bins, Inc., a California corporation, caters largely to studios and construction companies in the rubbish and recycling industry and stands alone by providing unsurpassed service, competitive pricing and specialized recycling services. Looney Bins collects and separates materials such as metal, wood and cardboard which are recycled, while salvageable materials are recovered and resold. Looney Bins also donates materials to the Special Olympics, schools, non-profit organizations and low budget productions in the community. Looney Bins has a staff recycling coordinator that participates in recycling seminars and is a member of many chambers of commerce, which keeps Looney Bins informed and on the forefront of new industry ideas and challenges. Since 1996, Looney Bins has typically maintained a consistent diversion rate of over 65% company wide. That's over 10,000 tons diverted from California landfills annually.

Years Awarded: 2005, 2004, 2003, 2002, 2001, 2000, 1999

12153 Montague St
Pacoima, CA 91331-2210

Los Altos Garbage Company

Los Altos Garbage Company provides recycling and disposal services to communities in Santa Clara county. They continue to educate communities, motivate employees, and lead by example with the "Practice What You Preach" program. Los Altos Garbage Company also strives to provide top service while controlling costs. Recycling programs are strongly supported and publicized through public outreach efforts to conserve natural resources, extend the lives of landfills, and protect the environment.

Years Awarded: 2006, 2004, 2003, 2002, 2001, 2000, 1999

650 Martin Ave
Santa Clara, CA 95050

Los Angeles Fiber Company Inc.

The goal of Los Angeles Fiber Company Inc. is to be the leading recycler of textile and carpet by products west of the Mississippi. They manufacture fibers that are used in carpet padding, decorative pillows, plush animals, paper and currency, re-spinning of yarn, mattress padding, and plastic products. Ten months ago they added post consumer carpet to their list of recycled products. They are the only company that is collecting, sorting, processing, and manufacturing a finished product from used carpeting. For the last

two years, their processing goal was to reduce their landfill waste by 15%. Their new goal is to find markets for all of their waste: soil manufactures, asphalt manufactures, and roofing manufactures.

Years Awarded: 2001, 1999

5190 S Santa Fe Ave
Vernon, CA 90058

Los Angeles Zoo and Botanical Gardens

The Zoo has participated in a comprehensive diversion program for over seven years and self-hauls waste to the landfill. During 2000, the Zoo disposed 130 tons of waste and recycled 4,230 tons of materials reaching a 76% diversion rate. Target materials for recycling include paper (white and mixed), beverage containers, cardboard, plastics, construction and demolition, food, grease, manure and green waste. Various sustainable development projects have been implemented including a water pressure regulation and reduction system saving an estimated \$180,000 in operation cost per year, a computerized landscape water management system saving 18,000 HCF of water and an estimated \$120,000 annually, and an alternative fuel vehicles program.

Years Awarded: 2004, 2001

5333 Zoo Drive
Los Angeles, CA 90027

LP Red Bluff I-Joist

Louisiana Pacific Corporation, Red Bluff Engineered Wood Products facility manufactures I-Joists. In the year 2000, environmental programs at the plant diverted over 13,000 pounds of waste that could have ended up in landfill. Instead of costing them over \$230,000 to dispose of the material, they sold, recycled, reused, or donated that waste for a net gain of over \$200,000.

Years Awarded: 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998

San Dimas, CA 91773

Lustre-Cal Nameplate

Lustre-Cal Manufactures metallic labels. The facility recycles 34,000 pounds per year of cardboard and mixed paper. 8,000 pounds per year of mixed metals are recycled and electronic systems conserve 5,200 pounds per year of office and computer paper.

Years Awarded: 2004, 2003, 2002, 2001

715 S Guild Ave
Lodi, CA 95240-3453

M & H Realty Partners IV, LP

M & H Realty Partners IV, LP, as managed under the direction of M & H Property Management LLC, is a San Francisco based private investment firm that exclusively focuses on the acquisition and redevelopment of undervalued shopping center properties in California. M & H is currently developing the Esplanade Mall in the City of Oxnard. M & H has institutionalized source reduction and recycling practices in its design and construction of projects by making reuse and recycling part of its design and construction specifications. Existing buildings are deconstructed rather than demolished. M & H recovers, reuses, recycles, and sells materials such as glass, air conditioners, construction wood, asphalt, concrete, rebar, scrap metal, and other recovered useful materials as standard operating practice. During the year 2000 construction of the Esplanade Mall, M & H reused and recycled over 110,000 tons of recovered materials while disposing of only 2,200 tons into local landfills for a diversion rate of over 98%.

Years Awarded: 2001

195 Esplanade Drive
Oxnard, CA 93030

MacCallum House Restaurant, Grey Whale Bar & Cafe

The MacCallum House Restaurant is a fine dining establishment in the remote and beautiful village of Mendocino on the redwood coast of northern California. The consequences of local environmental programs have a big impact in such a small community. Helping provide insulation for a local family, who is building a sustainable home by saving Styrofoam boxes, was an exciting project for 2001. One ingenious local organic farmer reuses egg crates in his crop rows where the earwigs climb into them. The farmer then feeds the plant-eating earwigs to his delighted chickens, providing food and pest management in one. Chef/owner Alan Kantor strives to set an example in recycling and reusing materials. The MacCallum House Restaurant again averaged around 38% of waste being recycled verses disposed waste when you compare the amount of dumpsters of waste per year versus the equivalent

amount of materials being recycled or reused, for an annual savings of around \$2000. Because sustainability is key to the survival of a business that relies on healthy food, there was a thorough waste reduction program in place from the start of ownership, so an increase in percentage is more difficult to attain but this creates a challenge. The WRAP award provides acknowledgement of these efforts and increases to implement new ideas and greater waste reduction each year.

Years Awarded: 2001, 2000

45020 Albion Street
Mendocino, CA 95460

Mad River Brewing Co., Inc.

Mad River Brewing Company makes world-class beer. For the past 11 years, the Mad River Brewing Company has led the way in waste reduction and recycling in California's manufacturing sector. Their 98% waste reduction and recycling program has served as a model for numerous businesses and is proof that any business can save resources and money by eschewing a "throw-it-away" mentality. Mad River Brewing Company avoids buying new equipment when possible. They reuse whenever possible and offer most of their waste for use and reuse by ranchers, farmers, schools and local businesses. The company recycles what little is left, or, as a last resort, an increment is guiltily placed in our lonely trash can. Each year, Mad River Brewing Company diverts over 2000 yards of waste at a net savings of over \$28,000.

Years Awarded: 2006, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995

195 Taylor Way
Blue Lake, CA 95525

Mail Boxes Etc.

Mail Boxes Etc. is a mail service facility with 120 post office boxes. The business reuses 10-15 boxes per week for shipping and paper is duplexed and used for scratch paper. Bubble wrap and peanuts are also reused.

1874 South Pacific Coast Highway
Redondo Beach, CA 90277

Manchester Grand Hyatt San Diego

Hyatt Regency San Diego is a hotel committed to waste reduction and environmental preservation. In addition to an advanced water reuse system, which helps preserve one of the most precious resources, and saves over 3,000 gallons of water a day, the Hyatt Regency San Diego focuses on recycling cardboard, aluminum, paper and glass. The Hyatt Regency San Diego collected 86,300 pounds of cardboard, 530 pounds of aluminum 57,133 pounds of paper, and 70,241 pounds of glass. This program diverted 214,204 pounds of trash in 2000-2001 and resulted in \$7,347.81 revenue for the hotel.

Years Awarded: 2011, 2009, 2008, 2007, 2002, 2001, 2000, 1999, 1998

1 Market Place
San Diego, CA 92101

Marian Medical Center

Marian Medical Center (Marian) is a locally integrated system of health care providing a continuum of quality, compassionate care from the birth of a baby through a lifetime of health care needs. Founded in 1940 by the Sisters of St. Francis, Marian is a member of Catholic Healthcare West, a mission, not-for-profit health system, co-sponsored by many congregations of religious women. Because hospitals account for over 2% of all waste nationally, Marian developed a Partners for the Environment Program which promotes reduction of waste, reuse, recycling, and conservation within Marian's health care facilities. Through the efforts of employees, volunteers, and community members, Marian continues to reduce its waste to the landfill. Additionally, Marian opened a Franciscan store, which offers free items from throughout the organization for reuse before recycling. As a healthcare provider, Marian continues to do all it can to ensure a healthy environment.

Years Awarded: 2002, 2001, 2000

1400 E Church St
Santa Maria, CA 93454

Marian Residence

Marian Residence is a residential care facility for the elderly that is owned by the Sisters of St. Francis of Penance and Christian Charity. It is a licensed facility for fifty-six people and has forty-six employees. Marian Residence believes that it is responsible for all that God has created, therefore, this facility makes a concentrated effort to protect the environment. Our more unique projects toward this end are the collection of eyeglasses to give to the Lion's Club for refurbishing and distributing to third world countries and the collection of pop-tops that are sent to the local McDonald's house for recycling. This program supports the Ronald McDonald House of Los Angeles that houses families of critically ill children. Marian Residence is recycling approximately seventy five percent of its waste.

Years Awarded: 2004, 2003, 2002, 2001, 2000, 1999, 1998

124 S College Dr
Santa Maria, CA 93454

Mazda North American Operations Sacramento PDC

Mazda North America is a parts distribution center located in Woodland. Mazda's commitment to the environment is evident throughout this facility. Cardboard, paper, wood and metal are recycled by the tons. Moreover, hundreds of tons of resources are conserved by Mazda's reuse practices, including totes, pallets, wire cages, packaging, and even transforming old uniforms into rags. Years Awarded: 2001

531 Quality Circle
Woodland, CA 95776

McClintock Metal Fabricators, Inc.

McClintock Metal has been manufacturing quality products since 1966. The company produces Securrr animal-proof trash, food, and recycling containers, Cart-Away ready-mix concrete equipment and a variety of custom projects. The Securrr Recycling product line assists parks and campgrounds by encouraging visitors to recycle and as they enjoy our natural resources. An important part of the manufacturing process of the company is the use of recycle-content steel in many of the products they produce. In addition, McClintock gives back regularly to the community of Woodland. Last year, the unused computers and monitors were donated to local schools and a woman's outreach center. An ongoing scrap metal and paper recycling system reduces waste and encourages employees to be thrifty with their resources. All programs are reviewed regularly to measure efficiency and reduce waste. One of the eleven core values stated in McClintock Metals mission statement best explains the commitment to these programs; "We will leave things far better than we found them, in our workplace, in our community, and in our world". Years Awarded: 2001

455 Harter Ave
Woodland, CA 95776-6105

McDonald's - Whittier Market Place

McDonald's believes it has a special responsibility to protect the environment for future generations. This responsibility is derived from the unique relationship with millions of consumers worldwide whose quality of life tomorrow will be affected by their stewardship of the environment today. They share the belief that the right to exist in an environment of clean air, clean earth, and clean water is fundamental and unwavering. McDonald's realizes that in today's world, a business leader must be an environmental leader as well. U. S. EPA noted several examples of McDonald's environmental leadership. McDonald's conserved 3,200 tons of paper and cardboard by eliminating sandwich containers and replacing them with single-layer, flexible sandwich wraps. By switching to lighter drink cups, McDonald's eliminated 1,100 tons of cardboard materials that would have been used for shipping. McDonald's spent more than \$355 million on recycled-content products. This includes the purchase of nearly 100,000 tons of paper made from recycled office paper waste. McDonald's will lead, both in word and in deed. Years Awarded: 2001

11755 Whittier Blvd.
Whittier, CA 90601

McDonald's of Grass Valley

Is it possible to take a great program and make it better? It is for McDonald's of Grass Valley. McDonald's U. S.A. has taken steps to reduce the weight and/or volume of the packaging used and has incorporated numerous reuse and recycling programs nation-wide. Yet McDonald's of Grass Valley has been able to improve on corporate policy by reducing select packaging even further (by 25%), eliminating hundreds of soda syrup "bag in a box" packaging which takes up significant space in the trash dumpsters, and they have plans to reduce their waste even further. The added bonus of these programs result in labor, time, and cost savings, which are all vital to this very busy restaurant! Years Awarded: 2002, 2001

11954 Nevada City Highway
Grass Valley, CA 95945-9302

Media Lithographics, Inc.

Media Lithographics, listed as one of the "Top 500 Printers" by the national trade publication "Printing Impressions", produces color printed products specializing in educational materials. Media Lithographics recycles 100% of its paper waste and aluminum lithographic printing plates. Over 71 tons of paper are recycled monthly. Paper waste reduction policies instituted over this last fiscal year netted savings of 13.7 tons of paper monthly, valued at approximately \$12,000. Years Awarded: 2001, 2000

6080 Triangle Drive
City of Commerce, CA 90040

Memorial Medical Center

For the past seven years, Memorial Hospitals Association has been recognized and awarded by the State of California's Integrated Waste Management Board for its excellence in waste reduction. Memorial Hospitals Association, a non-profit community hospital and Sutter Health affiliate, has donated medical products to needy areas, including Russian children's clinics in Chernoble, and to Mexican missions. Memorial's recycling committee, the "Green Team", has successfully implemented a hospital-wide reduction

education program, which has been approved by its Administration and reflected in the hospital's policies and procedures. The actions by Memorial through its waste reduction program have resulted in greatly reduced waste and considerable savings of funds and materials. The State of California's Integrated Waste Management Board has awarded Memorial Hospitals Association with the coveted Waste Reduction Awards Program (WRAP) Award for six consecutive years since 1994, and awarded MHA with the "Business Of The Year Award" in 1999. Memorial has also been the recipient of the City of Modesto's Recycling Award every year since 1997 for its outstanding recycling program and contributes to the community of Modesto.
Years Awarded: 2010, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1994

Facilities Management
1700 Coffee Rd
Modesto, CA 95355

Mercedes-Benz USA, LLC

Mercedes-Benz of North America is a vehicle preparation center. The facility recycles 45,000 lbs. per year of cardboard. They also recycle 10,000 lbs. per year of metal and 80,000 lbs. per year of pallets are repaired, reused and recycled.
Years Awarded: 2002, 2001, 2000, 1999

22707 Wilmington Ave
Carson, CA 90745-4321

Mesa Systems, Inc.

Mesa Systems, Inc. is a small-sized company that provides commercial repair service on electro-mechanical components. In regards to its waste reduction program, Mesa Systems reduces excess amounts of resources by double-siding paper on its test prints, and makes use of its online system and bulletin board as a paper conserver. Mesa Systems also reuses all of its shipping materials such as cardboard boxes, foam-inserts, plastic bubble-wraps, and repairing wood pallets for reusing again. The company sells all of its recyclable materials like office paper, scrap metals, and cardboard boxes. By doing these things, in the year 2000 Mesa Systems diverted 32 tons of waste from the landfill.
Years Awarded: 2001

Livermore, CA 94550

Moore Recycling Associates, Inc.

Moore Recycling Associates, Inc. (MRA) is an environmental consulting and management firm specializing in waste assessment, strategic planning, and program implementation. In the past year, MRA has recruited its neighboring businesses to participate in office paper recycling, diverting 23 cubic yards of office paper from the landfill. Moore Recycling also diverts from the landfill approximately one half ton of organic material (through vermi-composting) and other recyclables yearly. These conservation measures result in company savings of up to \$1,500 for the year.
Years Awarded: 2002, 2001, 2000, 1999, 1998, 1997

772 West Napa Street
Sonoma, CA 95476

Narbonne Animal Clinic

The Narbonne Animal Clinic (NAC) in Lomita provides quality medical care for all animals while respecting and protecting the environment. The NAC reduces, recycles, and reuses all materials. They have strived to eliminate color paper all together to make the separation of black and white paper from color not necessary. This hand separation has been very time consuming in the past. At the NAC, even discarded x-rays are recycled. By decreasing the amount of paper they use and recycling of all paper products, they have been able to drastically reduce the amount of trash, resulting in a monthly savings.
Years Awarded: 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

25445 Narbonne Ave
Lomita, CA 90717

Nasco Modesto

Nasco Modesto is a catalog business that sells educational and agricultural supplies. Nasco Modesto purchases misprinted food-packaging wrappers that were previously going into landfills, to package most of their shipments. All packing materials and approximately fifteen percent of the cardboard boxes sent to Nasco are reused in outgoing shipments. Nasco's waste reduction program annually keeps more than 30,000 pounds of otherwise discarded waste out of landfills. In addition to helping our environment, these efforts have saved Nasco thousands of dollars.
Years Awarded: 2002, 2001, 2000, 1999, 1998, 1997, 1996

4825 Stoddard Road
Modesto, CA 95356

National Catholic AIDS Network

The National Catholic AIDS Network provides technical support, referrals, resources and programs for over five thousand

individuals and organizations in the Catholic Church who are involved in HIV/AIDS education and outreach. In the Network's effort to encourage respect for all life and precious human resources, it also takes pride in making full use of paper resources to eliminate waste and unnecessary expense. The Network posts the Wrap award in its newsletter to encourage colleagues around the country to practice waste reduction and recycling. The National Catholic AIDS network continues to use a small shredder to create packing materials for shipping in order to eliminate use of Styrofoam and has asked its supplies to do the same. The Network saves about \$500 per year in packing materials and does not add this filler to landfills. The Network also uses recycled containers provided by the US Postal Service for their Priority Mail shipping.

Years Awarded: 2001, 2000, 1999, 1998, 1997, 1996

National Emblem Inc.

National Emblem Inc. manufactures fabric emblems for clothing and clients such as Universal Studios, Los Angeles Lakers and the Chicago Bulls. The facility recycles 9800 lbs per year of cardboard and office paper. National Emblem also reuses 1,000 cardboard thread spools per week and 1,000 plastic thread spools per week.

Years Awarded: 2001

17036 South Avalon Blvd.
Carson, CA 90746

NCR Corporation

The NCR Corporation's facility in San Diego is a 500,000 square foot facility that employs 950 associates and is responsible for the research and development for the world's largest parallel processing computer solution. NCR recycles paper, cardboard, toner cartridges, plastic, glass, metal scrap, computers, test equipment, circuit boards, florescent lamps, light ballasts, concrete, asphalt, oil, aluminum cans, and wood pallets. In addition, usable furniture and obsolete equipment is donated to local schools and non-profit organizations. NCR has diverted more than 1275 tons (75% of its total trash) from landfills to the reuse markets during the past six years. NCR has also generated an on-going revenue stream totaling \$780,000 for the same period.

Northrop Grumman, Space Systems Division

Aerojet, a segment of GenCorp, is a major aerospace/defense contractor specializing in propulsion, smart munitions, electronic systems, and fine chemicals. Since the company was founded in 1942, it has led the way in the development of crucial technology and products that have kept America strong and furthered man's exploration of space. Aerojet has contributed to many of the nation's most important aerospace and defense projects including Titan, Minuteman, Polaris, Apollo, Gemini, Space Shuttle, TOW, SADARM, the Defense Support Program, and the Space Based Infrared System. With a tradition of success and a dedication to excellence, Aerojet remains competitive in several product sectors: Electronic and Weapon Systems; Strategic and Space Propulsion; and Fine Chemicals. Customer, product, and common processes and technologies group Aerojet's Integrated Product Sectors. Integrated product teams within each sector are responsible for ensuring customer satisfaction regarding performance, cost, schedule and quality.

Northstar-at-Tahoe Resort

Northstar-at-Tahoe is a ski and summer resort located in the Sierra Nevada mountain range near Lake Tahoe. In an effort to reduce erosion into the local watershed and enhance the appearance of the ski runs in the summer, Northstar composts horse manure from its stables and uses that manure for fertilizer in the re-vegetation of its ski runs. In addition to using pine needles for erosion control, the compost produces healthy native grasses on the ski runs, which limits runoff. Northstar composts approximately 6200 cubic feet of horse manure annually. The cost of fertilizer is \$0.30 a pound, which results in a savings of approximately \$9,300 annually by using composted manure for fertilizer.

Nypro San Diego

Nypro San Diego is an ISO 9002 certified plastics manufacturer that uses a precision injection molding process to manufacture plastic products for the telecommunications, health care and automotive industries. Nypro's waste reduction success has been achieved through a reuse, reduce and recycle approach that involves their practice of on site re-grinding of plastic bi-products and their reintroduction into the manufacturing process, the employment of a system that utilizes reusable cardboard gaylords for shipping raw materials to their facility and lastly, the implementation of an office/break room/warehouse recycling program that recycles all mixed paper, beverage containers and cardboard boxes throughout their facility. This practice has saved the company labor, energy and transportation costs and has diverted approximately 268,000 pounds of waste per year from the local landfills.

Ocean Beach People's Organic Food Co-op

Ocean Beach People's Organic Food Co-op is a customer-owned California Cooperative and retail vegetarian food store specializing in organic produce and natural foods. They pride themselves on being San Diego's "best in organic produce and customer service" where "anyone can join". Their most successful waste reduction activity is the recycling of all cardboard boxes received in daily shipments. Other reduction activities include the "free food box" available to employees and the reuse of all office

paper products, plastic buckets, and packaging materials. O.B. People's Co-op recycles absolutely everything that the City will accept, mixed papers, selected plastic, cardboard, glass bottles, tin cans, aluminum cans, and newspaper. As the cost for waste collection is partly determined by weight, their waste reduction efforts help keep their monthly cost for collection low, under \$650 per month. O.B. People's Co-op exercises their commitment to environmental stewardship by supporting local and global organic agriculture and by reducing, reusing, and recycling approximately 85% of the waste generated in the store.

Ocean View Farms, Inc.

Ocean View Farms, Inc., is a Los Angeles organic community garden with 295 gardening families cultivating 500 vegetable/flower garden plots on 7.5 acres of scenic land. Members work and grow their product within a green belt oasis in the midst of an urban area setting. They recycle, help the environment, and organically grow and eat those wonderful vegetables. The gardens 25 H.P. chipper machine handles 100% of all the green and brown waste, which is then composted and recycled back into the soil. This operation produces an annual cost savings of \$18,000 for the members and a waste reduction of 340 tons that would have been destined to the landfill.

Omnidesign

In 1977, Omnidesign, a contemporary home furnishings store, pioneered recycling and conservation among retailers. Every year they made improvements, including the challenge of creating awareness among staff and customers. Their innovations include offering recycled shopping bags, recycling packing materials and cardboard and composting newspaper. In 2000-2001 Omnidesign moved to a location 1/7 of the size of their previous site after twenty-four years. They were able to donate, recycle, sell, compost or readapt all materials except 1 cubic yard, which was trashed. The extra labor cost was about sixty hours and the savings was about fifty-four cubic yards of potential landfill space.

Orchard Supply Hardware

Orchard Supply Hardware is a large retail company that sells hardware, tools and plants to homeowners and businesses. Outdated or damaged goods are donated or sent back to "DC" at an average of 52,000 pounds a year. All cardboard is recycled at 78,000 pounds per year. Plastic pots/flats are returned for reuse at 4,340 pounds per year, and pallets are reused at over 55,000 pounds per year. Osh/Orchards Hardware Store just started a recycling program for stretch wrap. The retail store has reduced waste, and because of the reuse of certain items, they have been able to save thousands of dollars in waste hauling fees.

San Dimas, CA 91773-1487

OrthoSource, Inc.

OrthoSource is a small wholesale distributor of medical orthopedic soft goods and devices and has established a unique program to protect the environment and conserve valuable materials and resources. Since the city does not provide sanitation services to the small building which houses OrthoSource, the employees actually transport recyclables and the small amount of material destined for land waste to their homes for proper disposal. Although it is feasible for the company to hire a private disposal business to remove waste, OrthoSource generates only a small amount of waste and its employees consider their practice of transporting waste to be good business and ecological practice. Additionally, whenever possible, OrthoSource donates surplus equipment and materials to schools and non-profit organizations.

PALCO

The Pacific Lumber Company produces high quality redwood and Douglas fir lumber, electricity and steam power, gardening soil products, and cement blocks. The Company's Scotia power plant, which burns wood waste from logging and milling operations,

produces energy for the lumber mill and the town, and sells power to help the state of California deal with the energy crises. Recent energy conservation by Pacific Lumber employees and Scotia residents has allowed the power plant to supply more energy to the state. 100% of the ash byproduct from the power plant is reused. Some is made into charcoal briquettes, some is used for water filtration systems, and some is applied to local agricultural fields as a soil amendment. Pacific Lumber has begun buying water-based solvents and using water-based cleaning machines for logging equipment and milling parts. Recycling waste oil, antifreeze and solvents has diverted over 22,000 gallons from landfill disposal. Burning wood waste in their power plant consumes approximately 430,000 green tons annually. Landfill disposal costs for that amount of material would be in excess of \$32 million! In addition, The Pacific Lumber Company derives revenue from power sold to the state and from sales of the gardening soil products. Years Awarded: 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1996, 1995, 1994

Pasadena Waldorf School

The Pasadena Waldorf School is a private school in Altadena, servicing children from kindergarten through grade eight. The school is committed to both reusing and reducing waste generated from their facility. The school is proud of the fact that, although their student body and facility size has doubled over the last five years, the amount of waste generated has not. Through community awareness programs, a recycling program run by students, and efforts to compost, they have only slightly increased the amount of material sent to the landfill. In addition, the school has increased its participation in programs designed to recycle corporate surplus for school use.

Planet Squared, Inc.

Planet Squared Inc. is a small company that developed an innovative manufacturing process to produce the patent-pending line, "Resourceful Living Arrangements", for the home and office furniture market. The line is made up of a series of Ecological furniture modules that are designed, engineered and produced in a closed loop system. The company's manufacturing process utilizes a precision-cut method to produce a consistent specified sized product. The minimal waste material that is left over from producing each product is taken to a local recycling center. In reference to closing the loop, not only are the materials to produce their products and packaging made from recycled materials, but the products as well as the packaging, are also recyclable. Compared to conventional materials, Planet Squared's modular products are made with high-content recycled materials that typically save 25% of the energy used to manufacture it. For example, every ton of recycled fibers they use saves 53.2 million BTU's. To that of conventional materials, their approach also preserved clean air and water! They substantially helps to reduce the amount of air pollution and water pollution when they produce their products made with the specified recycled materials. Using recycled paper

fibers, for example, cuts the emission of sulfur dioxide. Their approach also saves landfill space! For every ton of recycled fibers that they used, they saved 17 trees, 6,953 gallons of water, 463 gallons of oil and 9 cubic yards of landfill space.

Portola Hotel and Spa

Doubletree Hotel at Fisherman's Wharf is a 380-room, full service hotel. The hotel, adjacent to the Monterey Conference Center, recycles, reuses, donates, or sells nearly every type of waste item that is generated. From bottles and cans to cooking oil and wire hangers, Double Tree Hotel believes that almost everything has a second life. Last year, they established an area called the "Green Mile" where items such as used light fixtures and old carpet are placed for the taking by the staff. The hotel estimates that their waste reduction efforts divert nearly 150 tons of waste from the landfill on an annual basis, saving over \$10,000 in disposal costs each year.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994

Monterey, CA 93940

Portola Packaging, Inc.

Portola Packaging is the global leader in proprietary liquid packaging systems. For over 30 years with a reputation for high quality products, Portola offers customer's worldwide innovative closure and packaging systems through a combination of leading edge technology, outstanding quality and superior customer service and support. With the recycling and waste reduction programs established over the last 10 years, Portola recycles or diverts from its San Jose facility approximately 200 tons of material each year resulting in a savings of over \$50,000 a year. The program with the most lasting effect is the donation of materials to Resource Area for Teachers (RAFT) that offers the materials to local schools, who use the materials for science and educational programs, benefiting over 550,000 school children in the San Jose/South San Francisco Bay Area.

Years Awarded: 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994, 1993

3055 East Fruitland Ave
Vernon, CA 90058

Puzzle People

Puzzle People is a small business that manufactures thousands of children's name puzzles each year and ships them to homes across the country. Owners Michael and Pat Smith devised a use for surplus thin wooden letters created as a by product of their manufacturing process by inviting elementary students to tour the wood shop, then decorate letters with colors and glitter glue to create name signs and coat racks. This spring, over 1500 students and adults learned how the Puzzle People turn sheets of wood into puzzles plus waste-diverting by-products such as sawdust into compost for the company's strawberry beds, wood scraps into kindling for the employees, surplus letters into name signs. The business estimates annual savings in waste reduction at a few hundred dollars, income from increased sales at several thousand dollars, and the education of youngsters as invaluable.

21235 Canyon Way
Weimar, CA 95736

Radio Shack Distribution Center

Radio Shack's Distribution Center, located in Woodland, is a large sized facility which handles materials for resale to Northern and Southern California stores. Unused or damaged materials/goods are sold in outlet stores to reduce waste. Cardboard boxes are reused whenever possible saving money. Unwanted or damaged cardboard boxes not reused are recycled at over 75 tons a year. Since Radio Shack recycles and reuses materials, costs are less by thousands of dollars, money is gained and profits rise.

Years Awarded: 2001

660 N Pioneer Ave
Woodland, CA 95776

Rainforest Preservation Foundation

The Rainforest Preservation Foundation, as a non-profit organization, does everything they can to reduce waste by source reduction or "reuse" and recycling of materials whenever possible. Any materials left over from construction of the Reclaimed Office Project, mostly wood, are donated. This year with CalMax's help, they have been able to reclaim and reuse over 1 ton of materials. Generated materials like sawdust and wood chips are donated for landscaping or garden projects. They have little or no waste due to all these reuse and recycling efforts, which save money, reduce waste to landfills and makes the Earth happy.

Years Awarded: 2008, 2006, 2005, 2004, 2002, 2001, 2000, 1999, 1998, 1997, 1996

Remo, Inc.

Remo Inc., the world's largest manufacturer of percussion instruments, is wholeheartedly involved in a waste reduction and recycling program, recycling fifteen categories of scrap metals. In 2000, Remo Inc. achieved a new milestone by recycling 1.02 million pounds, which is 60% of the total waste stream, while earning an income of \$30,300, and saving trash disposal costs of \$18,000, for a total bottom-line benefit of \$48,300. The beneficial environmental impact of the recycling program is substantial, saving 900 cubic yards of landfill space, more than 5,200 barrels of oil, 1.4 million gallons of water, and 3,500 trees or approximately 18 acres of forestland. Even though Remo Inc.'s total waste stream has been increasing due to business growth, the recycling rate has steadily increased over the last three years from 45% in 1998, 54% in 1999 to 60% in 2000.

Rite Aid #5529

At Rite Aid of La Canada-Flintridge, practical and effective waste management is standard practice. Plastic totes are continuously

reused, displacing nearly 1,100 pounds of cardboard per year. Pallets are also reused, amounting to just above 13,500 pounds per year. Along with the recycling of paper and plastic containers, also 15,600 pounds per year of cardboard are recycled. Rite Aid believes that waste reduction should benefit the surrounding community environment and donates a minimum of 500 pounds per year of food, books, and candy.

Years Awarded: 2001

647 Foothill Blvd.
La Canada-Flintridge, CA 91011

Rite Aid Distribution Center

The Rite Aid Distribution Center in Woodland California is a large size business that distributes goods and materials throughout California. These goods and materials consist of soft and hard lines plus medical materials. This distribution center donates thousands of pounds of good/materials including food every year. The facility recycles cardboard from incoming goods and materials at 3.5 million pounds a year. They also reuse and repair reusable plastic totes that come and go to stores throughout California, which displaces cardboard boxes at 190,000 pounds per year. Also, they recycle all white ledger paper and computer paper at 130,000 pounds. Because of reduced waste, reuse and recycling, the Rite Aid distribution center saves tens of thousands of dollars a year and brings in profit from the sale of recycled material.

Years Awarded: 2001

1755 E Beamer St

Save Mart Supermarkets

Save Mart Supermarkets is a retail chain comprised of 83 conventional supermarkets and 14 warehouse-style markets. Save Mart has two very successful closed-loop recycling operations. Bakery and produce trim are collected from each site and converted to compost that is sold in Save Mart Garden Shops. In addition, tons of compost has been donated to schools, churches, and city parks. In a cooperative program with Enviro-Bag, customer's plastic carry-home bags are collected by school children for fundraising. Bags are recycled in Enviro-Bag brand trash and kitchen bags and subsequently sold on retail shelves. In 2001, this recycling teamwork recaptured 235,000 plastic bags and paid \$2,900 to schools. This is a 30% increase over the previous year. Save Mart's multi-faceted recycling efforts have reduced waste sent to landfills by over 70%.

SCPMG Regional Reference Laboratories

Southern California Permanente Medical Group (SCPMG) Regional Reference Laboratories performs clinical diagnostic laboratory testing for each of the twelve Kaiser Permanente hospitals and over 90 associated medical clinics throughout Southern California. Kaiser Permanente Regional Reference Laboratories process over thirteen million specimens each year which results in the generation of a significant amount of bio hazardous, chemical, medical, and solid wastes. Maximum waste reduction strategy includes solvent re-distillation and recycling, plastic recycling, glass recycling, paper and newspaper recycling, cardboard recycling, packing material recycling and multiple process oriented reuse methodologies. These programs have resulted in over \$175,000 in savings in the year 2000 and significantly reduced the amount of waste produced annually. The SCPMG Regional Reference

Laboratories is committed to environmental protection and conservation of natural resources which includes the elimination of all waste types. This places a strong emphasis on pursuing technologies and processes which will achieve this goal.

Shallow Creek Ranch

Shallow Creek Ranch is a small family owned business that raises Red Wiggler and European Night Crawler worms which produce worm castings. Everything from composted grass, leaves, old hay and weeds to manure from dairy farms and horse stables to barley waste from breweries and coffee grounds from local businesses, all provide food for worms. Approximately 240 tons of discarded material is composted, screened and recycled, then fed to the worms, which in turn produce the worm castings. Worm castings are used as soil amendment by landscapers, nurseries, organic farmers, master gardeners and of course, by many

homeowners, thus completing the cycle. What comes from the earth is returned through vermiculture.

Sierra Nevada Brewing Company

The Sierra Nevada Brewing Company is the ninth largest brewer in the United States and produces ales and lagers of the highest quality. At every stage of the brewing and packaging process, the company attempts to reduce waste generation. This includes recycling cardboard, plastics, metals and other materials, utilizing spent brewing grains, hops and yeast for cattle feed, reducing water use and operating its own water purification plant. In 2001, the company will reduce waste sent to the landfill in the approximate amounts: 35 million pounds of grain and hops, 10 million pounds of yeast, 300,000 pounds of cardboard, 200,000 pounds of brown glass, 12,000 pounds of white paper, and a significant amount of various other materials. In this same time period, the brewery will save in excess of 1.5 million dollars by reducing high strength water treatment charges, selling recyclable materials, and reusing surplus supplies and equipment.

Solectron Global Services

Artesyn Solutions is a company involved in receiving, repairing, warehousing and shipping various computer parts and systems. The engineering staff constantly strive to reduce the percentage of garbage taken to the landfill. Artesyn Solutions recycles aluminum, steel, metallic computer components, many plastics, wood, foams, paper, cardboard, peanuts, instapak and bubble wrap. Some of the more unique waste packaging goes to specialized processes established by the engineering staff. Polyurethane waste is sorted, bagged and sold to a recovery facility in the Bay area that converts it into carpet padding. Polystyrene waste is sorted, bagged, and then trucked to another facility where it is densified in a special machine. The densified material is sold to Timberon, a company that mills the materials down to make alternative wood products. These "green" products can be purchased at "The Home Depot." Some employees at Artesyn Solutions have already installed the Timberon crown molding and baseboards in their homes. Polyethylene is sorted, bagged, bailed and shipped to a Dixon processing facility when possible. After the material has

been shredded, it is sold for bean bag chair filling. Artesyn Solutions continues to be on the cutting edge of reducing waste. On average, the company diverts 94% of all waste to reuse programs or recycling. With high production schedules, that percentage equates to nearly one million pounds of garbage saved from the landfill per month! With new ideas for densifying Expanded Polyethylene and Expanded Polypropylene, the recycle percentage will surely grow in the future.

Southern California Edison

Southern California Edison is the nation's second-largest investor-owned utility company and has provided reliable electric service for over 110 years. In 2000 and 2001, 12,600 SCE employees served over 4.3 million homes and businesses in a 50,000 square mile service area in coastal, central and southern California. In 1993, Edison initiated its first recycling pilot. The "Waste-Not" recycling pilot grew into a trademarked company-wide program that focuses on waste prevention, green purchasing, reuse and recycling. Edison recycles paper, cardboard, compostables, glass, plastic, metal and wood. In 2000, Edison generated over 17,000 tons of waste materials. Over 90% of these materials were recycled. Last year SCE's recycling efforts reduced enough greenhouse gas emissions to provide power to 6400 California households for one year. SCE saved over \$4.3 million in solid waste hauling fees at 112 California facilities by recycling.

Standard Register

Standard Register's Porterville facility prints continuous business forms and negotiable documents. In 2000 they achieved an outstanding 97% rate of recycling. With a total waste stream of 2,339 tons, 2,258 tons were recycled and only 81 tons, or 3%, went to landfill for disposal. The 2000 recycling rate of 97% is a significant increase over the 85% rate achieved in 1999 when 2,196 tons were recycled, and 388 tons were disposed of by land filling, from a total waste stream of 2,584 tons. The majority of the 2000 improvement was accounted for by the label matrix and the commercial form waste totaling 306 tons, or 14% of the waste stream. Although this material brought in little or no income, recycling it did result in a substantial savings in waste disposal costs estimated at \$12,873 (306 tons x 42.07, the average disposal cost per ton). The recycling program worked so well that in only four months, no trash pickups were required. Using published waste engineering statistics; the environmental impact benefits of the Standard Register recycling program were calculated for the results in 2000. The 2,258 tons recycled saved 3,928 cubic yards of landfill space that would have otherwise been occupied. A total of 4,459 barrels of oil worth of energy, 15.3 million gallons of water, and 37,177 average type pulp trees (loblolly pines) were saved due to recycling this material as opposed to use of virgin pulp.

State Farm Insurance

State Farm Insurance Companies is the world's largest personal lines insurance company. Through their recycling efforts, State Farm has drastically reduced the amount of paper products that are sent to landfills. Recycling efforts target materials such as computer paper, office paper, cardboard, aluminum, glass and plastic. Through the year 2000, an average of 12.7 tons of products were sent for recycling each month. Combined revenues from these recycling efforts and the reduced monthly waste removal costs, produced a savings of \$12,646 in 2000 for the Rohnert Park office. As a WRAP award recipient every year since 1994, State Farm continues to work hard at improving recycling efforts.

Stone-Quarre, Medical Claims Management

Stone-Quarre, Medical Claims Management provides direct assistance to families facing health insurance and medical claims problems. The service manages all medical financial information and processes medical claims for individuals and families. The business is very paper intensive. All papers are recycled including the reuse of client file binders. Office products purchased are made from recycled material. The business has virtually no garbage each week although there are at least three bags of papers to be recycled! In additions, the business helps clients recycle their old claims and paper so there is less waste and more recycling.

Straus Family Creamery

Straus Family Creamery produces high quality certified organic dairy products. Straus packages their milk in reusable glass bottles, thus mainstreaming an "old" concept in the modern marketplace. By placing a \$1 deposit on all bottles, Straus encourages their customers to return bottles for reuse. Californians are throwing away more than 55 million one-way containers into landfills each month. Straus, which averages 7 reuses per container, estimates that their glass bottle program has prevented over 4 million pounds of one-way milk containers from going into the landfill. Straus Family Creamery has been nationally recognized as environmental pioneers, combining ecologically sensitive manufacturing and farming practices.

Sunset Scavenger Company

Sunset Scavenger Company, a subsidiary of Norcal Waste Systems, Inc., is an employee owned garbage and recycling collecting company. Sunset Scavenger is committed to protecting the environment through an application of stringent standards and by innovatively recycling more materials than other hauling companies. They recycle the basics (cans, bottles and paper) as well as all food waste and non-recyclable paper (i.e. food soiled paper, milk cartons, etc.). Reusing one-sided used paper for draft fax paper, recycling batteries, and providing ceramic mugs for employees is the company's standard practice. To reduce waste, Sunset Scavenger replaced bathroom paper towel dispensers with reusable cloth towel rollers. An industrial service supplier, who also exchanges their cloth kitchen hand towels, services these pull down cloth rolls. Participating in these easy to follow programs has allowed Sunset Scavenger Company to achieve an amazing 63% diversion rate!

San Francisco, CA 94107

TABC, Inc.

TABC provides truck bodies, truck parts, steering columns, and catalytic substrates and converters to downstream Toyota manufacturing plants. Its two main waste streams that are recycled are the paint sludges and the purge solvents produced from cleaning processes. TABC has recently installed an oil/water separation unit that eliminates the disposal of oil/water waste, saving \$50,000 per yr. The small amount of oil contamination is recovered and sent out for recycling. Currently, TABC sends 20% of its NHSW to an energy recovery facility (CERF). In the near future TABC will increase this percentage for recycling, at a small cost increase to the company.
Years Awarded: 2010, 2006, 2003, 2002, 2001, 1999, 1998, 1997, 1996, 1995, 1994

Tandem Properties, Inc.

Tandem Properties, Inc. is a large Real Estate Development and Property Management Company. Operating in the City of Davis for 30 years, the company has won several environmental awards including the prestigious WRAP award and an award from the City of Davis (Partners for a Cleaner Davis). Tandem prides itself on its comprehensive and successful waste reduction program. Tandem recycles and re-uses items by donating various items to many charitable groups, including, among other things, refrigerators, furniture, cardboard, wood products, solar panels, grass clippings, cans and bottles, and the list goes on. This past year they started a new program of recycling. They joined many other apartment complexes in Davis and had an apartment property garage sale at each site. Any and all residents could display and sell their items on a given day. This proved to be very beneficial! Tandem estimates about a \$25,000 savings in hauling and dumping fees alone in its waste reduction efforts.

Thanksgiving Coffee Company

Thanksgiving Coffee Company, a leader in the specialty coffee industry, focuses on using coffee as an educational tool. The 27 year-old company purchases green coffee beans from more than 15 countries around the world, then roasts, packages, and distributes them. In 1999, Thanksgiving Coffee undertook a self-initiated Environmental Audit which identified 8 areas that needed improvement. Out of this audit several new company-wide initiatives were born including a reduction in propane usage, decreased electricity consumption, an increase in recycling, and a partnership with the non-profit organization Trees for the Future. In mid-1999, Thanksgiving Coffee switched to a more energy efficient model of coffee roaster. This resulted in a savings of 5396 gallons of propane in 1999 and 7419 gallons in 2000. Thanksgiving Coffee began the switch to energy efficient bulbs and ballasts to light their 15,000 square foot plant in 2001. The program should result in energy savings of over 43,000 kilowatt hours per year. Organic waste made up 10-20% of Thanksgiving Coffee's dumpster trash, before they started a vermiculture farm in 1999. The worms have now produced over 2,000 pounds of finished compost from whole and ground coffee beans, coffee chaff produced in the roasting process, and organic waste from the employee break room. Thanksgiving also began to recycle the sticker tape backing that comes with the coffee labels. These two changes in recycling allowed the company to switch to a smaller dumpster size, reduce their dumpster trash by 33% and as a result save over \$280 per year. Along with reducing consumption and recycling waste, Thanksgiving also tries to mitigate the consequences of its actions. A partnership with the non-profit organization Trees for the Future helps Thanksgiving to offset the carbon that is emitted in the production, distribution and consumption of its coffee. Annual carbon emissions were calculated by assessing the total amount of diesel fuel, gasoline, electricity, and propane gas used. The 22,500 trees that Thanksgiving will plant over the next year will help to offset more than 560 tons of carbon. These trees will be planted in conjunction with a local community group in Ethiopia, providing them with the benefits of firewood, fruit and nuts, shade, and reduced soil erosion.

THARCO

THARCO is a San Lorenzo, California based manufacturer of corrugated boxes and packaging materials. Through THARCO's line of corrugated "stock" boxes, all of which are manufactured from at least 50% recycled materials, the small to medium sized end-user of corrugated boxes is now able to make environmentally pro-active purchasing decisions. The small and medium size users historically have not had the purchasing power to pull through the environmentally pro-active feature of recycled content in corrugated shipping boxes. THARCO was able to bring this environmentally pro-active feature of their stock box program to the marketplace so those purchasers would not be paying a premium for the aggressive recycled content. The product line has grown to the point that in 2000 THARCO was able to utilize 22,198 tons of post-consumer fiber to produce the boxes in the THARCO Stock Box catalog.

The City Market of Los Angeles

The City Market of Los Angeles is the oldest terminal produce market in continuous wholesale operation in the City of Los Angeles with 35 wholesale merchants providing fresh fruit and vegetables to millions of people in the city, state and even internationally each year. Thirty to fifty tons of vegetable trimmings and uneatable produce per week have begun a new life as compost since the Market began source separating and sending this material as feed stock for a composting operation in Ventura County. Recently, the company has been sending organic waste to a local livestock farmer for feed. The Market has achieved a remarkable diversion rate well in excess of legislated goals. Each ton of diverted organic waste saves the Market merchants \$24 of disposal costs. Each ton of recycled cardboard saves about \$36 plus whatever revenue it generates. There are costs associated with recycling, as well; but the long-term benefits of the Market's commitment outweigh short run costs. This commitment continues to strengthen.

The Fairmont Hotel San Francisco

Opened in 1907, the world-renowned Fairmont San Francisco is a luxury hotel that has recently completed an award-winning \$85 million restoration to recapture its original splendor. All areas of historic importance have been painstakingly restored and the hotel's 591 guestrooms and suites have been luxuriously refurbished. Situated atop Nob Hill, The Fairmont features two restaurants and lounges, 50,000 square feet of meeting and banquet space, and a full service health spa. Fairmont Hotels & Resorts, a collection of 38 properties throughout the United States, Canada, Mexico, and the Caribbean, details a comprehensive approach to sustainable hospitality in its publication "The Green Partnership Guide." As the flagship property for Fairmont Hotels & Resorts, The Fairmont San Francisco has been evaluating its performance and establishing procedures in four primary areas: waste management, energy conservation, purchasing, and water conservation. The hotel is currently recycling almost 60 tons of bottles, cans, paper, cardboard, and food waste each month, saving as much as \$6,000 on its monthly garbage bill. An important component of the hotel's aggressive waste diversion program is redirection of unwanted but usable materials from the hotel to community non-profit organizations. This year alone, several tons of materials, in the form of excess food, lumber, construction materials, clothing, furniture, and various other streams of usable goods have been donated to child care centers, women's and homeless shelters, AIDS organizations, and employment programs throughout the city of San Francisco.

The Orman Grubb Company

The Orman Grubb Company recognizes the finite resources they have to work with and strives to decrease waste by increasing quality through continual product improvement and manufacturing innovation. They have successfully engineered and manufactured a full range of bedroom furniture from previously wasted wood. About 700,000 sq. ft. (raw material value about \$1m) of this wood is recovered each year saving over 4,000 trees. Defected tree wood that is not usable in their regular line of computer desks, entertainment centers and bedroom furniture, is now finger jointed together and made into large solid oak panels. These are processed into their popular high volume mid-range group of bedroom furniture called Manhattan 2. Residual wood waste is converted for soil amendment use in the local agricultural industries saving 50,000 cu. feet of landfill per week, while cardboard and steel are recycled locally. Solar and woodburning co-generation of electricity and other innovative energy saving procedures for manufacturing are being investigated with help from the Anaheim Public Utilities, Anaheim Advantage. The success of The Orman Grubb Company requires everyone in all areas of the business to perform their work correctly the first time, every time to reduce waste. The Orman Grubb Company motto is, "Do it right the first time."

Years Awarded: 2001, 2000

Anaheim, CA 92807

The Real Earth, Inc.

The Real Earth Environmental Company was started in order to provide environmental friendly product alternatives to "business as usual" recycled and tree-free paper, recycled janitorial paper and office products and non-toxic cleaning products. As a natural and important adjunct to this activity, the company also serves as an educational resource for the average consumer whose understanding of critical and widespread environmental issues is often limited. The reason for this "informational component" is their belief that a deeper understanding of environmental issues will naturally contribute to responsible "earth-friendly" purchasing; that increasing numbers of people who want to "do the right thing" would purchase with a conscience, if they had the information, and the choice. The Real Earth provides that choice by offering a wide selection of everyday office and paper products with a non-everyday difference; they recycled, in whole or in part, but all containing post-consumer content. The Real Earth also provides a full line of non-toxic and biodegradable cleaning products. The Real Earth is a small company with, they hope, a large and growing impact. As they grow, they will continue to operate in a manner that views sustainability, and not profit, as their foremost consideration.

Years Awarded: 2005, 2004, 2003, 2002, 2001, 2000

6430 Seastar Drive
Malibu, CA 90265-3625

The Soto Company, Inc.

In 1990, The Soto Company made a philosophical decision to reduce and recycle all green waste generated from their landscape maintenance operations. They felt it was not only environmentally prudent, but was also economically sound. The uses of grass clippings, shrub trimmings and tree cuttings are unlimited. This raw material (when dried, ground up into small particles and mixed) is aged through the composting process and becomes an excellent "all natural" planting mix. Even before its final stage as compost, there are several stages where these raw materials can be incorporated into the landscape. The facilities tree maintenance division within their Arboriculture Operations generates several by-products, when natural green waste is generated. This operation includes processing the raw material on-site through a "chipper", resulting in the material being chipped or ground down into 1"- 4" size pieces. The combination of leaves and wood in this material makes it ideal for large open green areas or horse trails. They are currently using this end product for the many horse trails throughout the Nellie Gail Ranch trail system. After an in-depth review of their turf management, they felt it was the best investment to purchase "recycling" type-mowing equipment. This action reduces their out-take to the local waste facility and permits positive benefits to the lawns. At present, The City of Orange, and locally, The City of Dana Point are enjoying the benefits of our recycling mowing operations. The company's shrubs and groundcover maintenance operation generates the largest amount of green waste. It becomes an infinite mixture of materials (shrubs, groundcovers, weeds and possibly even Rose bush cuttings). This material goes to the green waste-recycling center. Once the raw material is ground-up, aged and segregated, it becomes available to the company and the public as planting mix, groundcover mulch and even weed control. Their commitment to recycling is such that they will not use any bagged planting material, only bulk end products from green waste recycling operations. In closing, the residents of Dana Point take great pride in their green waste-recycling program. Their program is integral to their City contract and to the many private homeowner associations for whom they are privileged to provide landscape services. They commend any effort to promote the use of green waste materials by the private sector and/or public

agencies. The Soto Company saves over \$600 per month using a green waste facility.

The Union

The Union has come a long way during its 134 years in Grass Valley, outliving 25 other newspapers that sprang up in the area before 1910. But that was then, and now The Union is taking an interest and a different type of leadership in the community. By covering stories about recycling and waste prevention activities, and learning how they can improve their own environmental management, The Union has been in the middle of recent enthusiasm regarding recycling and business-to-business waste exchange. Recently, The Union has downsized the newsprint feedstock by 2.5" -- mostly affecting the amount of end scrap which previously was cut off and recycled anyway. This decision, however, will amount to over 41.5 tons of paper savings -- resulting in the generation of LESS recycled scrap. So if The Union recycles less paper next year it's not because they're recycling less -- it's because they're saving more!!

The Westin Saint Francis Hotel

The Westin Saint Francis Hotel is the first hotel in San Francisco to begin a recycling effort on a large-scale basis. Recycling all of the hotel's cardboard, glass, newspaper, white paper as well as composting food waste has been a major part of the Hotel's Stewarding department for the last two years. Following this example, the Hotel's Housekeeping and Laundry-Valet departments have followed suit by implementing the hotel wide "Green Machine" program. The department's effort gives the Saint Francis' Guests the opportunity to save our natural resources. The Green Machine program assists the hospital in maintaining its efforts to become San Francisco's first truly environmentally friendly hotel. The Saint Francis will continue its dedication to the environment by continually evaluating its operation to find new ways to reduce, reuse, and recycle, doing their part to save and preserve our natural resources and the environment.

The Wood Guys

The Wood Guys manufacture residential furniture and distribute throughout the western states. The Wood Guys sort their wood scrap to reduce waste and recycle. The Wood Guys send all wood scrap that can be used in furniture to the co-generation plant where it is burnt to generate electricity. The Wood Guys donate approximately 20 yards of material each week to the power plant for fuel. The Wood Guys separate their sawdust into fine and coarse particles. The fine particles are used to make fuel pellets and the coarse material is used for animal bedding. The Wood Guys post instructions for their waste reduction programs in three languages (English, Spanish and Mong) to ensure that all employees know where to send trash. The Wood Guys promote a ride share

program and average three passengers per vehicle that commute to work. The Wood Guys programs have saved \$17,000 and reduced the amount of waste sent to the landfill by 1,600 yards.

Topnotch Foods Inc.

Topnotch Foods Inc. receives 300,000 lbs per month of date expired bread. The facility processes 135,000 lbs per month of white and wheat bread into bread crumbs. Approximately 165,000 lbs per month of sweet, garlic and moldy bread is sent to another facility where it is made into livestock feed. Topnotch Foods Inc. also recycles and reuses wooden pallets and also reuses large cardboard boxes.

Years Awarded: 2001

1988 East 57th Street
Vernon, CA 90058

Town & Country Market

Town & Country Market is a retail grocery store. The store recycles 96,000 pounds of cardboard, 7,200 pounds of pallets and 15,600 pounds of metal scrap per year. The store also has three forty-yard containers provided by TOMRA for drop-off recycling of ONP, bottles, cans and plastic in the Winters area.

Years Awarded: 2001

121 East Grant Avenue
Winters, CA 95694

Toyota Motor Sales, USA, Inc. North American Parts Center

Toyota Motor Sales, USA (TMS) is the marketing, sales, distribution and customer services arm of Toyota America. Toyota is America's fourth largest carmaker and manufactures more than one million cars per year in North America. In its daily business, Toyota is committed to waste reduction, pollution prevention and protecting the environment. At Toyota North American Parts Center in California (NAPCC), associates have implemented programs to support these commitments. In NAPCC's efforts last year to reduce waste, they recycled 1.4 million pounds of cardboard, thus saving trees and valuable landfill space. NAPCC is currently implementing a program to distribute parts to other Toyota facilities on reusable pallets instead of wooden pallets, again conserving trees.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000

Trader Joe's

Trader Joe's is a mid size business located in La Canada and various other cities. Whenever possible Trader Joe's donates food waste. These materials such as bread at 7,000 plus pounds a year and produce at 4,700 pounds per year are donated instead of wasted. Trader Joe's reuses plastic pallets that last longer than wood pallets and can be recycled when they get old. At the La Canada store this is approximately 83,200 pounds per year of reused pallets. Trader Joe's uses plastic totes, which displace cardboard boxes at 8,436 pound per year. Trader Joe's recycles cardboard boxes and bales them at 364,000 pounds per year. Due

to Trader Joe's recycling efforts thousands of dollars are saved in waste hauling costs, and waste is reduced that is destined to go to landfills and help save the environment.

Years Awarded: 2001

475 Foothill Blvd. #D
La Canada-Flintridge, CA 91011

Trader Joe's #28

Trader Joe's #28 located in San Dimas promotes a healthier environment through its dedication to providing its customers with high quality products. Trader Joe's is also making a concentrated effort to improve the state of the environment through their recycling program. They make an effort to reduce the amount of food waste generated, donating 40-50 loaves of bread per day to a church. They also provide reusable mugs for employees in order to reduce waste, and they recycle 250,000 lbs of cardboard per year.

Years Awarded: 2001

856 West Arrow Highway
San Dimas, CA 91773

Traditional Medicinals

Traditional Medicinals was founded in 1974. Traditional Medicinals is a socially responsible and environmentally conscious company, providing high-quality botanical products (herbal teas) with a balance of responsible business practices as its guide. The company strives to create a positive, healthy, and supportive working environment. Employees are encouraged to participate in community services and the company actively donates time, products, and profits to charitable, environmental, and educational non-profit organizations." Traditional Medicinals' commitment to the environment is reflected through their use of recycled materials company- and product-wide, resulting in minimal contribution to landfill and increased company savings in excess of \$50,000 per year.

Years Awarded: 2011, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997

Trips for Kids and the Re-Cyclery

Trips for Kids Re-Cyclery is devoted to recycling used bikes parts. Their goal is to keep bikes out of landfills and to return them to the streets as efficient, environmentally friendly modes of transportation. Their used bikes are affordable and useful for both adults and children. They recycle about 35 bikes per week, repairing and reselling approximately 12 of those, while donating the remainder to other bike repair programs or taking them to a scrap metal recycler. All proceeds from the sale of bikes in their thrift shop goes toward supporting the non-profit organization's programs like taking inner-city kids on mountain bike outings and helping low-income kids learn job skills while earning a bike of their own.

Years Awarded: 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995

United Postal Service (UPS)

The San Gabriel hub at UPS Baldwin Park helps customers from around the world rely on UPS to ship two million packages and documents a month. United Parcel Service has developed an elaborate network of "hubs" or central sorting facilities located throughout the world such as the facility in Baldwin Park. The packages from the local area are picked up, unloaded, sorted by ZIP code and consolidated on 711 conveyor belts. Packages bound for a specific geographical region are all consolidated on the same conveyor belt and are routed to either an out-bound trailer for local delivery, or to a delivery truck serving the immediate area. UPS reduces waste by recycling cardboard and plastic. In consolidating small packages and documents to similar destinations, UPS uses a reusable nylon bag vs. a plastic bag. This change has helped save the company \$6000 this year in supplies and waste removal.

Years Awarded: 2006, 2001

1100 Baldwin Park Blvd
Baldwin Park, CA 91706

United States Aluminum Corporation

The Vernon facility is a large volume aluminum manufacturer with over one hundred employees. In its ongoing efforts to increase recycling, they have implemented a comprehensive training program to source separate aluminum, paper and cardboard wastes. Over 300,000 lbs. of aluminum is recycled annually from this facility.

2370 E Main St
Woodland, CA 95776

Walser's

Walser's is a family-run art store which has been in business for over 25 years. They have over 28,000 square feet of combined retail merchandise, imaging center and warehouse space. Walser's is fortunate to have storage space, which allows reuse of many items such as packaging. They make displays that are no longer needed in the store free for customers to take . This helps prevent waste and excessive trash from being dumped and gives customers new ways to store their products at home. One of Walser's most successful waste recycling activities has been the recycling of empty plastic and glass bottles, as well as cans. These are collected from employees, from customers that want to throw them away and even from the bushes and parking lot outside. From the money earned from recycling these products throughout the year, Walser's is able to have a huge Christmas feast on Christmas Eve day for all of their employees and their families. The entire lunchroom table is covered with food. Walser's does this not only to reward their employees as good workers, but also to recognize their efforts in recycling. Since their local city instigated a larger

scale collection of recycle material, they now collect packaging, small boxes, glass bottles, etc...from both the store and employees. This last year, Walser's brought in some plastic tote bins and asked their employees to put paper materials that are not reusable in them for later recycling. The contribution to these bins adds up to 100 pounds a week. Employees have gone to such efforts as to voluntarily bring in items from their homes to contribute to the program instead of disposing of them. Because there is not yet a recycling collection available from commercial facilities in their area, the owners transport these items to their home for the city residential recycle collection.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999

Warner Bros. Entertainment Inc.

Warner Bros., 145-acre motion picture and television studio, offers a wide array of manufacturing, construction and production services and resembles a small city. It has its own Fire Department, a population ranging from 4,000 to 5,000 (up to 8,000 in full production season), and it even has its own zip code. Warner Bros. is committed to conserving resources, reducing waste through reuse, donations, recycling, and educational programs in order to benefit the economy and assist the local community in the course of doing business. One program that fulfills all of these goals simultaneously is the "Second Time Around - A Community Reuse Partnership" project, through which reusable materials such as furniture, computers, and office supplies are donated to non-profit and educational organizations, using a matching database with over 800 participants. Warner Bros. also has an environmental purchasing program, a sustainable design and construction policy, and is committed to energy conservation. Since the inception of its recycling programs in 1992, Warner Bros. has increased its waste reduction rate more than seven-fold, from less than 7 percent to a current diversion rate of 61 percent, exceeding the AB939 year 2000 goal of 50%. In addition to savings in waste hauling fees of approximately \$150,000 per year, Warner Bros. has also generated revenues of approximately \$30,000 annually from the sale of recyclables.

Years Awarded: 2004, 2003, 2002, 2001, 2000, 1999, 1998, 1997, 1996, 1995, 1994, 1993

Western Environmental Equipment Corporation

Western Environmental Equipment Corporation (WEEC) is a manufacturer's representative and contractor serving California, Arizona, Nevada, and New Mexico with primary products in air and water pollution control, combustion, and material handling selling to heavy industry and utility accounts. In 1998, WEEC purchased another corporation, IMS, which merged into their business. WEEC revamped and computerized all of the IMS documentation encompassing over 25 years worth of information, files and documents, and converted to computer systems for all purchasing, billing, accounting and sales related functions. The storage and operating space needed for the functions were assimilated into WEEC's existing data storage areas by heavy computerization, which is more efficient, faster, easier to access, and doesn't waste natural resources. The cost of the space saved was \$25,000 per year, plus head count decreased by a full time clerical/accounting position, with the total savings of over \$75,000 per year just by dropping all the paper filing and tracking. The end result is better information that is more accurate, easier to access, and much less wasteful. In 2000, the companies was running the combined operation successfully with the reduced head count, and have found that they are more efficient, data retrieval is faster and they are able to better service their customers needs. The company went a step further and took all of the document files that needed to be kept and scanned these documents into Omnipage Pro where they can be searched for easily by either name or a single word document. As a result, their library is now primarily electronic. This allowed the company to further reduce the paper retained and move those documents into paper recycling for reuse.

Westfield Shoppingtown Mission Valley

Westfield Shoppingtown Mission Valley is a super regional outdoor mall located in central San Diego. With three major department store anchors, the Shoppingtown has over 100 tenants, an AMC 20 Screen Multiplex Theatre, many excellent full service and fast food restaurants including a micro-brewery, and occupies 81.5 acres with 1,583,469 square feet of stores and 7,181 parking spaces. On an average day, 26,000 people will arrive at the Shoppingtown to shop, eat and drink, see a movie, or just enjoy the time in an exciting environment. At Westfield Shoppingtown Mission Valley, everyone is involved in the recycling program. Each retailer participates, all the employees play a part, and every customer is requested to assist by following the simple instructions posted throughout the Shoppingtown. They even extend their services to the customers' homes and businesses by hosting the City of San Diego "Christmas Tree Recycling Station" in their parking lots during the busiest times of the sales year. In addition, they host the "old telephone books" recovery program when new directories come out. In 2001, the Shoppingtown will recycle over 1,000,000 lbs. of materials, which would otherwise have gone directly to the landfills. Westfield Shoppingtown Mission Valley has saved over \$51,000 in hauling fees alone since January 1, 2000, with their recycling program. When this amount is added to what would have been costs for dumping and rental fees for equipment to handle the storage and transport of these materials, the savings move into the even larger 6-figure area.

Westfield Shoppingtown, Plaza Bonita

Westfield Shoppingtown Plaza Bonita is a super-regional shopping center encompassing 820,000 square feet on 70.4 acres of land. As the owner and management company, Westfield Corp. is responsible for the daily operations of the shopping center including but not limited to environmental management. Plaza Bonita's most successful waste reduction and recycling activity is cardboard recycling; 12 to 15 tons of cardboard are diverted monthly resulting in an almost 180 ton reduction in landfill trash and savings of close to \$15,000 annually. The success of this program is accomplished through constant communication, monitoring and providing incentives (and when necessary, penalizing) to the 140 tenants that occupy the center. These tenants are encouraged to separate their cardboard and other recyclable materials for the housekeeping staff that picks up these items each night. Cardboard is bailed for the resource management company to take to local recycling facilities. Because the housekeeping staff plays such an important role in the process, they are treated to lunches, thanking them for their efforts. Plaza Bonita also recycles its landscape greenwaste, paper products, pallets, etc. And whenever possible materials such as wood and metal from vacant stores are either donated or sold, instead of dumped.

White Eagle

White Eagle, the world's leading manufacturers of beautiful holographic gifts for the whole family, is dedicated to handcrafting rainbow-art pieces that blend holographic technology with images from nature. Their processes include using recycled material whenever possible. All employees of White Eagle participate in the company's recycling awareness program, often contributing their own ideas. In the past, White Eagle sent the material outtakes to schools in Sonoma and Contra Costa counties. This year White Eagle is working with their local solid waste transfer station to distribute these materials closer to home. This activity helps reduce other energy consumption such as gasoline and human resources.

Whole Foods Market Santa Rosa

Whole Foods Market offers a large selection of high-quality, great-tasting natural and organic fresh foods and products to support wellness and a healthy lifestyle. Whole Foods Market maintains high standards when it comes to reducing and recycling. Beginning nine years ago as Food For Thought, the company carries on its green ways with mandated recycling for all of its ten departments, as well as makes recycling bins available to its customers. The market primarily offers paper products made with post consumer waste for all packaging and carry out items. Whole Foods Market is accustomed to saving money by reducing and recycling because, for them, there is simply no other way!

Work of Art Catering, Inc.

Work of Art is proud to be a company that composts, recycles, routes unserved food, and promotes environmental consciousness serving as a testimonial for the community. In their initial pursuit of a recycling program, they discussed pick-up schedules, volume, and physical storage issues with representatives from Golden Gate Disposal. They now compost on site at events as well as at their facility. They use recyclable containers as much as possible and also try not to use any disposable products for service. In their catering activities, their emphasis is on tabletop design where they incorporate organic products into both food and design. By incorporating organic concepts into the food presentation, they are able to raise their clients' awareness of environmental waste and conservation. As a result of their recycling and organic product composting efforts, they reduced their garbage amounts by half and rerouted the balance to compost and recycling. Clients support their efforts and understand the additional costs incurred for this service. In fact, from a marketing standpoint, having received a recycling award from the city and being a part of a progressive approach to waste management has proved to be extremely beneficial for bringing in new business. The people of San Francisco embrace composting and recycling and with communication, systems, and support, they are willing participants. Work of Art has taken a great leadership role in the composting area by separating their compost and maintaining their environmental practices strictly. The food service industry can be particularly effective in reducing waste and this company has proven that the system works! Work of Art has proven to be highly successful in their composting and recycling programs.

WorldWise, Inc.

WorldWise is an environmentally responsible consumer products company offering home/garden/hearth products made from recycled, reclaimed or sustainable harvested materials. They distribute their products through mass-market retail channels, making healthier, more environmentally sound products accessible and affordable to the average American consumer. WorldWise products employ vast quantities of recycled materials. For instance, a single 14" Eco-Planter uses the equivalent of 2,500 square feet of plastic wrap - enough to blanket the floors of a large home. By making the choice to distribute their products through large retailers, this allows them to sell large quantities of products, exponentially increasing the need for recycled resources.

Yoplait Colombo

Yoplait USA manufactures yogurt. Whenever possible, they donate limited shelf-life product to non-profit organizations. In 2000, Yoplait donated 395 tons of such products to these organizations. In addition they received \$25,000 from recycling over 700 tons of material that would otherwise have been sent to landfill. Yoplait continually investigates possible ways to reduce packing materials, modify manufacturing processes to use materials more efficiently, and recycle waste.

Yoshi's Restaurant and World Class Jazz House

Yoshi's Restaurant and World Class Jazz House is the premier jazz venue in the Bay Area. World-renowned jazz artists perform in this intimate spot while patrons dine on sushi, sashimi and other Japanese delicacies. Yoshi's is a medium-sized restaurant with approximately 120 employees. The restaurant has over 200 seats and the jazz club seats over 300 patrons. Multi-talented restaurant owner Kaz Kajimura encourages employees to be environmentally conscious by enforcing a paper recycling program that he implemented over five years ago. Sorting office paper, newspapers, and telephones books is a simple way to divert waste. It was more challenging to sort the paper and food waste for the busy restaurant. In the past, Yoshi's was unable to recycle the restaurant paper and napkins, since they are usually soiled with food debris. This year, with the help of Golden Gate Waste Disposal, Yoshi's learned that compost could tolerate some paper mixed in with food waste. Kajimura spear-headed the restaurant's composting program, reducing waste destined to be landfilled by 75%. Prior to composting, Yoshi's generated eight yards of waste per week. Now, Yoshi's only generates two yards of waste per week and five yards of compostable material. Kajmura personally labeled and color-coded all the waste bins for the facility and then trained restaurant, jazz club, bar and kitchen staff to use them. The employees and safety training materials were also updated to educate new employees about composting and recycling programs at Yoshi's. It's challenging to keep an entire organization faithfully sorting its waste. With a network of staff members committed to waste reduction, Yoshi's has never had a pick-up rejected by the compost collection crew at Golden Gate Waste Disposal. Applying this new method of waste reduction made it easier for servers to handle waste and diverted a much higher percentage of the restaurant waste to recycling via composting. By adding composting to Yoshi's paper, cardboard, bottle, and oil recycling programs, Yoshi's now recycles more that 85% of the waste it produces.
