

Waste Reduction Awards Program (WRAP)

WRAP Winners Listing for 1994

The Waste Reduction Awards Program (WRAP) was administered by CalRecycle (formerly the California Integrated Waste Management Board) from 1993-2011. WRAP provided an opportunity for California businesses and nonprofit organizations to gain public recognition for their outstanding waste reduction efforts and lets the community know the business takes waste reduction seriously. WRAP evaluated the waste reduction, procurement, and education activities in the internal business practices of the applicant, not its services or products.

WRAP Winners Statewide during 1994

20th Century Fox Film Corp

Fox Inc., a subsidiary of News Corp., creates, distributes, and delivers feature films and television programming worldwide. Fox has made recycling a part of all employees' job descriptions, and they have a recycling hotline for employees. Furthermore, their mission statement requires the use of recycled and nontoxic construction products when possible. Since 1990, Fox has reduced their waste by more than 37 percent.

Years Awarded: 2011, 2010, 2009, 2007, 2001, 2000, 1999, 1998, 1997, 1994

3M ESPE Dental Products

3M Dental Products Division manufacturing and distributing facility has been located in Irvine, California since 1978. 3M Dental Products Division, a business unit of 3M since 1964, manufactures and markets a broad line of restorative crown and bridge materials for use by dentists and dental laboratories around the world. They have been actively involved in the elimination and reduction of both hazardous and nonhazardous wastes, and specifically have reduced the level of nonhazardous waste sent to landfill by 50 percent. Their waste reduction program has saved them money in waste disposal fees, and they have made approximately \$3,000 per year from their recyclables.

Years Awarded: 2004, 1998, 1995, 1994

2111 McGaw Ave
Irvine, CA 92614

AB&I Foundry

AB&I is a grey iron foundry, producing custom castings, cast iron soil pipe and fittings. AB&I has promoted a company wide recycling program with the ultimate goal of becoming a zero waste generator. Approximately 90% of all waste generated at the site is recycled. AB&I's effort involve all employees. AB&I recycles most items, no matter the volume generated.

Years Awarded: 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1995, 1994

7825 San Leandro St
Oakland, CA 94621-2515

Accurate Office Machine Co

Accurate Office Machine Co. sells and repairs typewriters, calculators, time clocks and associated equipment. Their company policy is to reduce all waste to absolute minimum and allocate the remainder to the disposal bin for future salvage.

Aerojet - Sacramento Operations

Aerojet is a major aerospace/defense contractor specializing in rocket propulsion systems, space sensor systems, and smart munitions. Employees at Aerojet's Sacramento Operations recycled 290 tons of paper over the last 31 months. This equates to saving over 1,000 cubic yards of municipal waste landfill space and over 5,600 trees! These efforts have results in combined receipts and cost avoidance totalling \$31,000.

Years Awarded: 2011, 1998, 1997, 1996, 1995, 1994

PO Box 13222
Sacramento, CA 95813-3222

AIDS Project Los Angeles--Sacramento Office

AIDS Project Los Angeles is a private, non profit community based organization that provides direct client services for over 4,300 persons with HIV/AIDS, education and training to further prevent the spread of the disease, and public policy efforts at the local, state, and federal levels. To minimize waste, the Sacramento Office of AIDS Project Los Angeles uses two-sided fax cover sheets, rechargeable batteries, and recycles all paper, aluminum, and glass. Their efforts to reduce waste have cut their paper use by one third.

Anheuser-Busch InBev - Los Angeles Brewery

The Anheuser Busch Los Angeles Brewery, located in Van Nuys, California, is the world's 3rd largest brewery. The brewery manufacturers and packages malt beverages for the southwestern United States, Hawaii, and for export to the Far East. In accordance with a company policy of minimizing environmental impact, the brewery recycles or reuses over 97% of its waste product and uses recycled material in its product packaging. The brewery has also recently begun a major modernization project which includes environmental upgrades such as bulk material handling to minimize waste and high efficiency lighting and water systems.

Years Awarded: 2011, 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2002, 1998, 1995, 1994, 1993

15800 Roscoe Blvd
Van Nuys, CA 91406-1379

Anheuser-Busch, Inc., Fairfield Brewery

Anheuser Busch Companies, Inc., is a St. Louis-based diversified corporation with subsidiaries that include the world's largest brewing organization, the world's largest beverage container recycling company, the world's second largest family theme park operation and the world's second largest provider of fresh baked goods. The Anheuser Busch brewery in Fairfield has succeeded in finding markets for numerous "waste" materials, such as the brewery's famed beechwood chips, which now are converted to compost or used as fuel for electrical cogeneration. The recycling of 800 tons of beechwood chips has saved the Fairfield brewery \$30,000 annually, while conserving enough landfill space to hold the waste generated by a town of about 1,000 people.

Autry National Center

The Gene Autry Western Heritage Museum is the largest museum in the nation devoted exclusively to the history of the American West. The history is depicted through multimedia exhibits, fine arts, artifacts, participatory exhibits, and educational programming. The Museum's extensive recycling program covers such unique items as trees, use of recycled water for irrigation and landscaping. All items that could possibly be recycled are recycled by the Museum staff and volunteers. The Museum's waste reduction program has enabled it to reduce its weekly trash pick up from 5 times a week to just 1, a large savings for the Museum. Money raised from recycling its cans, bottles, etc. is used to fund the Museum's employee recreation program.

Contra Costa Landscaping, Inc. (CCL, Inc.), has been in business for 25 years with a focus on large landscape construction, maintenance, erosion control, wetland restoration and most recently biological aquatic management. CCL, Inc., has developed their own on-site composting operation utilizing green material and paper waste generated by all of their divisions. Since the development of their recycling program, CCL, Inc., has realized a 70 to 80% reduction of their waste stream. This in turn reduces the burden on landfills while furnishing feedstock for soil amendments used in landscape projects.

Delectables Catering

Delectables Events and Catering is a corporate catering company specializing in fine catering to the major businesses in Silicon Valley, California. Delectables established a "Sweet Deal" program for their clients where disposable platters, trays, bowls, pans, and utensils are recycled back to Delectables in exchange for cookies and other delicious homemade goodies. Delectables also assists its clients with distributing unserved food from catered events to homeless shelters in the area. Overall reduction of in house waste has resulted in the reduction of the total number of trash pickups required, with a significant savings. Money collected from in-house recycling of glass, plastic, cans, and aluminum goes into an employee fund for parties, picnics, and prizes.

Doubletree Hotel at San Francisco Airport

The Doubletree Hotel is a San Francisco Airport property with 291 guest rooms, a restaurant, lounge and banquet/meeting facilities for individuals and groups. The Hotel has 160 employees and all are dedicated to the Hotel's recycling program that was introduced in February, 1992. Each office employee maintains a personal recycling file to maintain their own desk side recycling system. Separate bins (one for copy paper and one for computer paper) are located at each copy machine. The commitment the Hotel has made to its recycling program has resulted in a reduction of the size of containers used and fewer pick ups for an approximate savings of \$10,000 per year. Additionally, Doubletree Hotels of California are the proud sponsor of the statewide "Spare the Air" campaign.

East Shore RV Park

East Shore R.V. Park rents sites to recreational vehicles on a daily, weekly, or monthly basis, supplying to the renter full hook ups, telephone, cable TV, grass, trees, other convenient amenities, and lake access for fishing. In an effort to reduce their weekly trash pick ups, they no longer throw their clippings in the dumpster, but have started a program of mulching their 37 acres of grass cuttings, three times a month, back on to the lawns. Once a month the clippings are picked up and composted on-site. They mix the composted grass clippings with chips from tree trimmings and spread it in planter beds for weed control, thereby reducing their use of chemical weed control. East Shore's efforts to reduce weekly trash pick ups has resulted in a savings of \$7,000.00 minimum a year or 46 less hauls a year.

Grover Landscape Services, Inc.

Grover Landscape Services, Inc. takes green material from businesses and local cities to produce a quality compost. Grover Landscape Services is teamed up with the City of Modesto, Stanislaus County Environmental, Modesto Junior College, and the University of California Ag Extension office in a two year land and nursery application of compost to study the benefits to agricultural land in California. By diverting green material to Grover's composting facility, there is a substantial savings by not going to landfills and transfer stations.

Modesto, CA 95356

Growing Grounds Farm & Nursery/Mental Health Association

The Mental Health Association (MHA) is a nonprofit, community based agency that provides social and vocational rehabilitation for people with a persistent psychiatric disability. Their most noteworthy waste reduction efforts are the composting of unsold nursery materials for use in the lettuce fields and buy back program instituted for nursery pots and containers at MHA's Growing Grounds Farm. The other is the education they provide their clients, customers, and vendors about decreasing waste and increasing awareness. The Mental Health Association's waste program has reduced their landfill waste by 75 percent and saved over \$5,000 in materials by not having to purchase nursery containers.

San Luis Obispo, CA 93406

Hanson Aggregates Mid-Pacific Region & Hanson Permanente Cement

Kaiser Materials is a leading northern California producer of raw building materials such as sand, gravel, asphalt and cement. Kaiser Materials' high participation employee volunteer office program emphasizes both recycling and reuse of office paper. Kaiser Materials is posting information on widely located message boards in lieu of paper memos, recycling toner cartridges and similar office equipment plus collecting and selling cans, glass and plastic. Reuse of paper reduces new purchases and recycling has reduced trash pickup volumes.

Santa Clara, CA 95054

HdB Electronics

As a small business electronic parts distributor with a shipping department, HdB Electronics controls waste through reuse of packaging materials and recycling of those which cannot be reused. They purchase many components in bulk and package these in small bags as opposed to purchasing prepackaged parts enclosed in cardboard and plastic. Their customers are provided with reused cardboard boxes for their purchases. Most of HdB's paper products are made from recycled materials, and they have redesigned their invoices and receipts to reduce multiple copies and paper waste.

Hotel Inter-Continental Los Angeles at California Plaza

The Hotel Inter Continental Los Angeles at the California Plaza is a 439 room luxury hotel located in a prime business, cultural and residential area of downtown Los Angeles. The Hotel Inter Continental uses water saving toilets and showers throughout the building; is in the process of testing water energizers to reduce the need for chemicals in their cooling tower; and, in 1995, has allocated funds for sub metering systems for gas, water and electricity in high usage areas such as the kitchens and laundry. With the large amount of cardboard, glass, plastic, and metal the hotel uses, having a comprehensive recycling program keeps these items out of their trash bins, and thus out of the landfills. The Hotel Inter Continental has also performed a lighting retrofit which will save the hotel approximately \$65,000 per year.

1840 Century Park East
Los Angeles, CA 90067

Northrop Grumman Corporation - B-2 Division

The Northrop Grumman Corporation, B 2 Division, is the leading producer of the most advanced defense aircraft designed today. B 2, through its policies and employees, demonstrates a respect for the environment by minimizing the impact of production activities. In addition to an award-winning hazardous waste pollution prevention program, B 2 also has a strong nonhazardous waste reduction program. Aside from metals and aluminum can recycling, other noteworthy activities include recycling various papers, cardboard, and wood. To "close the loop," B 2 purchases many recycled products, including toner cartridges.

Years Awarded: 1994

8900 E Washington Blvd
Pico Rivera, CA 90660

Northrop Grumman Military Aircraft Division

The Northrop Grumman Corporation, Military Aircraft Division (MAD), produces military aircraft. Noteworthy nonhazardous recycling programs include metals, toner cartridges, computer and mixed paper, cardboard, and wood. MAD purchases recycled products whenever possible. MAD also sends a representative to the Corporate Nonhazardous Waste Minimization Committee to share information on waste reduction and recycling.

Pacific Gas & Electric Company - De Anza Division

Pacific Gas and Electric (PG&E), DeAnza Division, is a service center that provides gas and electric service to Sunnyvale, Mountain View, Cupertino, Los Altos, Los Altos Hills, Los Gatos, and Monte Sereno areas. A comprehensive recycling program has been initiated that includes the following commodities: white and mixed paper, glass bottles, cardboard, antifreeze, toner cartridges, scrap mixed metals, scrap copper, scrap aluminum, aluminum cans, recycled wood, batteries, motor oil, newspaper, and other items. The PG&E DeAnza Division Recycle Program has reduced waste disposal costs by \$28,000 annually. Additional revenue is being generated from selling scrap aluminum, mixed metal, and copper.

Years Awarded: 1996, 1995, 1994

10900 N Blaney Ave
Cupertino, CA 95014

Pacific Gas and Electric Company

The Investment Recovery (IR) department at PG&E in San Francisco is responsible for the Company's system-wide recycling contracts. In 1994 IR's contracts will account for an estimated \$3.2 million in revenues, \$1.1 million in related disposal cost avoidance, and will divert a combined total of 14,860 tons of metals, paper and plastic from landfills. IR's recycling activities include a unique use for plastic cable choppings left over from the metals recovery process. If the current testing program is successful, an additional 2,700 tons of LDPE will be diverted from landfills each year and used in a mix for riding surfaces in equestrian facilities.

San Francisco, CA 94132-1098

Sanford Winery

Established in 1981 and moved to its current location two years later, Sanford Winery is located just outside of Buellton in Santa Barbara County. Kitchen wastes from the winery are composted and used as fertilizer and excess corks are donated to local schools for craft projects. As a result of their employees' dedication to reducing waste, the winery was able to switch from a 4 yard to a 3 yard trash container and reduce its waste bills.

Years Awarded: 1994

7250 Santa Rosa Rd
Buellton, CA 93427

Sanford/Paper Mate

The Gillette Company reduces packaging waste and increases the recycled content of packages through a system that controls package weights and promotes the use of recycled material for new products. The company's Stationery Products Group manufactures ball point pens, felt tip pens, markers and pencils under the PAPERMATE brand name. During 1993, the Stationery Products Group incorporated 200,000 pounds of recycled materials in packaging materials, increasing total recycled material for the Group to 1 million pounds. Other activities include changing all Paper Mate pen blister cards, shelf packs and shipping cartons to recycled materials and selling plastic scrap to a local company that uses the scrap to make garden hoses, thus saving over 230,000 pounds annually in waste disposal.

Shred Away

Shred Away is a small entrepreneurial company that was established to process vegetative waste for 100% reuse or recycling. A machine called a "Shred Vac" is taken to the customer's location where leaves, needles, and other yard waste are shredded and blown into a dump truck with a filter device. The fine mulch is then deposited for the customer's reuse, delivered to others for reuse, or combined with other organic waste and recycled into compost. Shred Away uses the same reduce, reuse, and recycle strategies in their maintenance program and business office to reduce cost and create a positive effect on our environment.

Southern California Edison

Southern California Edison is an electric utility serving customers in parts of southern, central and eastern California with a service territory of approximately 50,000 square miles. Edison has nearly 18,000 employees. Employees at the two downtown Long Beach offices range between 800 to 900. For many years, Edison has been recycling cardboard, oil, wood, metal, wire, reels, pallets and many other items. Several years ago Edison began a program to recycle paper in its offices. In 1993, the company started its Waste Not pilot project in two of its Long Beach office buildings to test and develop a program to increase the reduction, reuse and recycling of office resources which might otherwise go to landfills. The ultimate goal is to reduce landfill waste to zero in a manner that makes good environmental and business sense.

Years Awarded: 2006, 2005, 2004, 2003, 2002, 2001, 2000, 1999, 1994

St. John's Episcopal Church

St. John's Episcopal Church ministers to a diverse population in the Eastern Coachella Valley. Their founder, over 50 years ago, was a frugal Englishman. They follow his example of stewardship of trees and landfills by reusing every sheet of paper with a blank side; folded pages get cut in half for sermon notes, smooth pages get reused in the copier; fully used pages go to be recycled. People find the back of their handouts a never ending revelation.

UNOCAL - San Francisco Refinery

Unocal's San Francisco Refinery in Rodeo, California possesses crude oil and semi refined products into gasoline, diesel fuel, jet fuel, lubricating oils, food grade waxes, residual fuel oil, petroleum coke, and elemental sulfur. In May, 1993, Unocal's San Francisco Refinery began recycling cardboard in key locations and began an aggressive segregation process of already recycled materials such as wood and metal. In 1992, the refinery was generating approximately 248 cubic yards of domestic trash per month. In 1994, the monthly average was reduced by 70 percent to approximately 176 cubic yards, resulting in a \$22,000 annual savings in garbage fees and 72 fewer cubic yards of recyclable materials going to the landfill. Industrial trash was also drastically cut by an average of 29 tons per month for an annual savings of \$20,000. In 1993, Unocal began recycling all metal and glass sample containers used in the Refinery Laboratory, which eliminated four cubic yards of monthly waste and saved \$4,800 per month.
