

Date: June 10, 2019

To: Local Enforcement Agencies

Odor at Compost Facilities: Training Dates and Registration are Now Available

This one day training will focus on odor characteristics, managing odor complaints/investigations, enforcement, as well as local enforcement agencies and air district roles in the odor investigation process. The training will include a classroom-based session in the morning, and an odor sensitivity test and interactive odor circuit session in the afternoon. The training is designed to increase collaboration between local enforcement agencies and air districts in investigating odor complaints.

*Pre-requisite: Please note that you must have taken the Online Odor Workbook Training prior to attending this class.
