

PSA from City of Fresno: *Recycle Your Used Motor Oil*

Man's voice and upbeat music:

Sure you love changing your own oil but did you know just one gallon of used motor oil can pollute one million gallons of drinking water? And that's no way to quench your thirst!

Don't pollute our land or drinking water, recycle! It's easy to do and it's the best thing for the environment.

Just take used motor oil and oil filters into a certified collection center.

Or City of Fresno residents can simply recycle at the curb.

Music fades out.
