## NOTICE

To: All Interested Parties
Subject: Biannual Report of Beverage Container Sales, Returns, Redemption, and Recycling Rates

Public Resources Code Section 14551 requires the Department of Resources Recycling and Recovery (CalRecycle) to report biannually on the redemption and recycling rates for each six-month period within 130 days from the end of that period. This notice conveys the Biannual Report of Redemption and Recycling Rates for the second half of 2018 and the full calendar year 2018.

The overall recycling rate for calendar year 2018 was 76 percent. The recycling rate for the first half of 2018 was 80 percent. The second half calendar year recycling rate was lower than the first half at 72 percent, which is consistent with the trend observed over the life of the recycling program.

During 2018, Californians recycled more than 18.5 billion beverage containers. California continues to lead the nation in total quantity of bottles and cans recycled.

If you have any questions about this report, please contact Adam Tauber, Deputy Director, at (916) 323-4248.

Scott Smithline
Director

Biannual Report of Beverage Container Sales, Returns, Redemption \& Recycling Rates

| FOOTNOTE: |  |  |  |  |  |  |
| Please note that the recycling and redemption rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned. <br> On the other hand, the Quarterly Report on the Status of the Beverage Container Recycling Fund, does not include this two-month lag. The Quarterly report presents a month-to-month calculation, meaning that sold beverage containers in one month are calculated against containers returned that same month. This difference is the primary factor in any difference between the sales and returns numbers in the Biannual Report compared to the numbers in the Quarterly Report |  |  |  |  |  |  |

${ }^{1}$ Due to the addition of new beverages on January 1, 2000 from the passage of SB332, the calculation of the redemption and recycling rates for 2000
was based on the sales and return data reported from March - December 2000. This is to account for the two month sales lag. However, the totals for the sales, recycled, refillable and postfilled columns are for January - December 2000.
Beginning 2003, all recycling and redemption rates are presented as whole numbers.
${ }^{2}$ Please note that the recycling and redemption rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned.

On the other hand, the Quarterly Report on the Status of the Beverage Container Recycling Fund, does not include this two-month lag. The Quarterly report presents a month-to-month calculation, meaning that sold beverage containers in one month are calculated against containers returned that same month. This difference is the primary factor in any difference between the sales and returns numbers in the Biannual Report compared to the numbers in the Quarterly Report
