**March 15, 2017****NOTICE****To: All Interested Parties****Subject: 2<sup>nd</sup> Quarter 2017 Processing Payment Adjustments**

Section 14575 of the Public Resources Code (PRC) requires the Department of Resources Recycling and Recovery (CalRecycle) to establish a processing payment for any beverage container type that has a scrap value less than the cost of recycling. CalRecycle makes processing payments to processors. Processors pay recyclers the entire processing payment.

Pursuant to PRC Section 14575, the calculation of the 2017 processing payments is based on the difference between the scrap values offered to recyclers and the sum of the actual costs of recycling for certified recycling centers, excluding centers receiving handling fees, plus a reasonable financial return.

**PROCESSING PAYMENT ADJUSTMENTS:** PRC §14575(f) gives CalRecycle the discretion to adjust the processing payment not more than every three months if CalRecycle has determined that the average scrap value for a specific beverage container material type for the most recent available twelve-month period directly preceding the quarter the processing payment is calculated is five percent more or less than the statewide average scrap value used as the basis for the processing payment currently in effect; and that adjusting the processing payment is necessary to further the objectives of the beverage container recycling program.

As the change in scrap value as described for glass is greater than five percent, CalRecycle has concluded it is appropriate to adjust the processing payment at this time. The scrap value for #1 PET and #2 HDPE had a less than five percent change, so there will be no adjustment to #1 PET or #2 HDPE processing payments.

Processing payments for bimetal and plastics #3 - #7 are not being adjusted as the scrap values for these container material types are highly volatile and based on small volumes. The changes in scrap values and adjusted processing payments for glass, effective April 1, 2017, is shown on the table on the next page.

Scrap values are based on the average scrap values paid to recyclers for the period between January 1, 2016 and December 31, 2016.

The processing payments shown below become effective April 1, 2017.

<b>Change in Scrap Value Per Ton and Adjusted Processing Payments</b>
