SB 1383 Regulatory Package Resubmittal to OAL and Upcoming Model Tool Webinar Series

CalRecycle has resubmitted the SB 1383 (Short-Lived Climate Pollutant) regulatory package to the Office of Administrative Law for approval as required per the Administrative Procedure Act. [SB 1383 \(Lara, Chapter 395, Statutes of 2016\)](#) requires the implementing regulations to become effective on or after January 1, 2022.

CalRecycle, in coordination with HF&H, Debra Kaufman Consulting, and Diversion Strategies, will host a SB 1383 Model Tools Webinar Series. As a reminder, the model tools are considered drafts until the regulations are approved. The model tools can be found here: <https://www.calrecycle.ca.gov/organics/slcp/education>.

For those who wish to comment or provide clarifying questions, please register using the links below. Note, there are five different links for each webinar, so you will need to register for each presentation separately.

Monday, October 26 from 10:00-11:30 – Overview of Model Tools

<https://attendee.gotowebinar.com/register/7351014096340735246>
