Section 1. Contact Information

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program.

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(1) Contact information. Identify the manufacturer or stewardship organization responsible for the annual report submittal. Stewardship organizations shall include an updated list of participating manufacturers and any updates to their respective contact information per §18952(a)(2).

Stewardship Organization

PaintCare Inc., a non-profit 501(c)(3) organization, was formed to serve as the representative stewardship organization of architectural paint manufacturers to fulfill their obligations under the California Paint Stewardship Law. PaintCare was created by the American Coatings Association, the primary trade association of the paint and coatings industry. PaintCare's Board of Directors consists of eleven non-paid representatives of architectural paint manufacturers.

PaintCare representation is open to all architectural paint manufacturers.

A current list of participating manufacturers and their mailing addresses is included in the appendix.

Section 2. Executive Summary

Regulatory Citation

Title 14, Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(2) Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the manufacturer or stewardship organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the manufacturer or stewardship organization's architectural paint recovery efforts during the reporting period pursuant to PRC §48705(a). This may include anticipated steps, if needed, to improve performance and a description of challenges encountered during the reporting period and how they will be addressed. This may also include a description of paint container management and market development activities if the manufacturer or stewardship organization has chosen to engage in those activities.

A. California Paint Stewardship Law and Annual Report

In September 2010, Governor Schwarzenegger signed Assembly Bill 1343 (Huffman), the California Paint Stewardship Law. This law requires manufacturers of architectural paint to develop and implement a program to reduce the generation of postconsumer architectural paint, promote the reuse of postconsumer architectural paint, and to provide a system for the management of postconsumer architectural paint in an environmentally sound manner that includes collection, transportation, processing, recycling, and proper disposal.

The California program began October 19, 2012. PaintCare, on behalf of participating paint manufacturers, submits an annual report to the California Department of Resources Recycling and Recovery (CalRecycle). Annual reports cover the period July 1 – June 30. As prescribed in Section 48700 of the California Public Resources Code and further detailed in Title 14, Section 18954 of the California Code of Regulations, the information submitted in an annual report shall be organized according to this standard outline:

- (A) Contact Information
- (B) Executive Summary
- (C) Program Outline
- (D) Description of Goals and Activities Based on the Stewardship Plan
- (E) Financing Mechanism
- (F) Education and Outreach
- (G) Audits

B. Year Nine Program Highlights

B1. Sites and Services

- Provided 820 year-round paint drop-off sites consisting of paint retailers, municipal household hazardous waste (HHW) facilities, solid waste transfer stations, and other voluntary locations to create a network of convenient paint drop-off points in California. The program provided access to a year-round site within 15 miles for 99% of the state's population, exceeding the target of 90%.
- Managed paint from 274 HHW drop-off events at 165 locations. PaintCare also planned, promoted, and held 9 paint-only drop-off events. Paint-only event locations were chosen to provide recycling opportunities in areas with either high local demand or limited access based on existing locations.
- In 2021, PaintCare increased rural convenience and strengthened partnerships with county programs by adding a year-round HHW site in Riverside County and a landfill drop-off site in Kern County.
- Reduced the minimum gallon threshold for large volume pickups (LVP) from 200 to 100 gallons of accumulated paint. Provided 599 LVP from businesses, institutions, and others. In addition, provided recurring large volume pickup (RLVP) services to 70 sites. The LVP service now represents 6% of total program collection volume.

B2. Collection Volume

- Collected and processed 4,033,477 gallons of postconsumer paint, of which 92% was reused, recycled back into paint or another product, or used for a purpose other than landfill disposal; 43% of the paint came through retail and other non-municipal sites and services; 57% came from municipal sites and services.
- Reuse volume continued to increase. PaintCare increased its outreach to recruit new reuse sites, as well as support for the HHW facilities, reuse stores, and paint recyclers that made paint available for reuse. As of June 30, 2021, PaintCare had 39 reuse partners.
- The program recycled approximately 2,216 tons of plastic and metal paint cans.

B3. Operations

- Concluded a grant program that awarded \$100,000 to a paint recycler seeking to develop new methods of recycling latex paint that cannot be recycled back into paint. The winning recycler, Visions Recycling, Inc., used its grant to make landscape décor utilizing the pre-cast molds it obtained with this grant.
- From the onset of COVID-19 in March 2020 and forward, PaintCare maintained a robust communication structure that kept program stakeholders and the general public informed of the state of program services and infrastructure. PaintCare met regularly with CalRecycle to keep the agency informed of the program's actions and the impact of COVID-19 on the program, the public, and its drop-off site partners. In

addition, PaintCare shared HHW program and retail drop-off site closure updates with the HHW Information Exchange (HHWIE) listserv, providing statewide visibility on program status.

- Continued efforts to establish partnerships with municipal and county programs through engagement at virtual conferences, ESJPA (rural counties) and HHWIE meetings, in-person site visits, and conference calls.
- The COVID-19 pandemic continued to impact progress to increase reuse. Many existing reuse partners suspended their reuse programs until spring of 2021 and PaintCare did not offer reuse at any PaintCare hosted events. Understanding the importance of highest and best use, PaintCare sent out a solicitation letter for non-participating Habitat for Humanity stores throughout the state informing them of the opportunity to partner with PaintCare. In addition, PaintCare continued to explore opportunities to expand reuse at events and with existing partners. PaintCare intends to reassess local needs, assist those interested in expanding reuse while reinstating reuse at PaintCare events in FY22.

B4. Outreach and Education

- Continued the comprehensive outreach campaign to educate consumers on the program, the amount and purpose of the PaintCare fee, and convenient recycling opportunities, while also promoting buying the right amount of paint and using up leftovers.
- Public outreach activities were significantly impacted by the COVID-19 pandemic that began in March 2020. Some advertising campaigns scheduled for the first half of the reporting year were reduced due to limitations in PaintCare's paint drop-off sites and services. Most outreach activities returned to normal levels by December 2020.
- PaintCare launched a new brand identity intended to make outreach materials more effective by making them clearer, more accessible, and more memorable.

Section 3. Program Outline

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program
Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(3) Program Outline. Describe the paint stewardship program, including information on the following topics:

(A) A description of the methods used to collect, transport, and process postconsumer architectural paint, by type, in California.

(B) Description of how each consumer of architectural paint in California had an opportunity to recycle and properly manage their postconsumer paint on a state-wide basis, including the number, location, and type of collection points located in the state.

(C) Description of best management practices followed by service providers that are acting as collection points, which may include any training that the manufacturer or stewardship organization provided or required of service providers to ensure proper collection and management of postconsumer paint.

(D) A statement that the manufacturer or stewardship organization coordinated with existing household hazardous waste collection programs and retailers as potential collection points per Section 18953(a)(3)(E) and (F) during the reporting period.

A. Paint Drop-Off Sites and Services

A1. Site Types

PaintCare continued to grow its paint collection system in both urban and rural communities. The sites and services used to collect paint from the public include the following:

- Paint retailers, including paint, hardware, and building supply stores
- HHW collection facilities and events
- Solid waste transfer stations, recycling centers, and landfills
- Material reuse stores (e.g., Habitat for Humanity Restores)
- Paint-only drop-off events
- Large volume pickup service for sites that have accumulated more than 100 gallons of postconsumer paint (most commonly painting contractors). [Note: Sites that receive a single or infrequent pickup (less than 3 per year) are referred to as “large volume pickups” (LVP), while sites that receive pickups on an ongoing basis are called “recurring large volume pickup” (RLVP) sites.]
- Partnership with door-to-door HHW programs

PaintCare had 820 year-round drop-off sites in California at the end of the year. For the purpose of defining convenience, PaintCare defines a site (including an event site) by its physical address and considers it to be “year-round” if the site is open at least one day per month, every month of the year. Sites that are open less frequently are considered supplemental sites. Sites that close permanently or stop participating in the PaintCare program during the year are also considered supplemental and are noted as being partial-year only.

The program managed paint from 274 HHW drop-off events, held 9 paint-only drop-off events, partnered with 17 door-to-door collection programs, had 17 other supplemental sites, completed 599 LVP appointments, and served 70 RLVP sites.

Paint-only event locations were chosen to provide recycling opportunities in underserved areas with either high local demand or limited access based on existing drop-off locations. In lieu of holding a paint-only event, PaintCare also consults with communities on alternative means of paint recovery, such as LVP/RLVP services.

The following tables summarize PaintCare sites and services during the year, with a comparison to the previous two years.

SUMMARY OF PAINTCARE DROP-OFF SITES AND SERVICES

Year-Round Sites

Site Type or Service	Year 7 FY2019	Year 8 FY2020	Year 9 FY2021
Paint Retailers	580	596	615
HHW Facilities	120	120	124
Transfer Stations	42	47	49
Landfills	4	6	7
Recycling Centers	4	4	4
Other Sites	5	6	6
Paint Recyclers	5	5	5
Reuse Stores	5	9	9
HHW Event Site	1	0	1
Total	766	793	820

Supplemental Sites and Services

Site Type or Service	Year 7 FY2019	Year 8 FY2020	Year 9 FY2021
HHW Events	323	250	274
Large Volume Pickups	560	469	599
Recurring Large Volume Pickup Sites	63	71	70
Door-to-Door Programs	16	16	17
Seasonal HHW Facilities	9	7	7
PaintCare Paint-Only Events	13	11	9
Paint Retailers (partial-year only)	89	8	9
Other Sites (partial-year only)	1	0	2

[Notes regarding the tables above: (1) Only stand-alone door-to-door programs are counted in the table above. While PaintCare also partners with HHW facilities that also host door-to-door operations, such as the city of Folsom, they are not included in the Door-to-Door Programs category to avoid counting multiservice HHWs twice. (2) The Other Sites category in the top table includes fire stations, municipal public works yards, and other miscellaneous types of paint drop-off sites that do not fall into the primary categories. The

Other Sites category in the bottom table is a catch-all category for sites other than retail stores that closed or left the program during the year. As such closures rarely occur, they are grouped together to keep the table compact.]

The locations of the year-round sites, supplemental sites, and LVP/RLVP sites are shown in the maps in section 4 of the report. A full list of all sites and door-to-door program partners is provided in the appendix.

A2. Site Configuration

All PaintCare drop-off sites accept both latex paint and oil-based paint. LVP/RLVP sites may also manage both latex and oil-based paint through PaintCare, but with some limits on oil-based paint volumes.

Retail drop-off sites and paint-only drop-off events accept paint from both households and qualifying businesses, while HHW programs, transfer stations, and some other locations may limit participation to their normal service area and customers, which may or may not include businesses. LVP/RLVP sites may be households, businesses, or others (i.e., government agencies or nonprofits).

PaintCare pays for paint collection bins, training materials, transportation of paint from the site, and paint processing for all drop-off and LVP/RLVP sites. Spill kits are also provided to most sites. PaintCare also negotiates payment for additional services with HHW sites, transfer stations, and some other sites. Additional services include:

- Paint reuse
- Latex paint reprocessing
- Oil-based paint bulking
- Internal transportation (from remote sites to a primary location)

B. Paint Transportation and Processing

B1. Paint Transportation

PaintCare employed two main haulers for statewide transportation services: Clean Harbors Environmental Services and Clean Earth (formerly Stericycle). PaintCare also worked with select haulers that held existing contracts with HHW programs, such as ACTenviro, Veolia Environmental Services, Waste Management, US Ecology, and Visions Paint — and worked with Acrylatex to service some of the LVP customers. Several HHW programs also provided transportation services for PaintCare.

Haulers schedule pick up appointments in two ways: (1) by request as needed or (2) on a set schedule (e.g., every Monday). Haulers are responsible for delivery of empty collection bins and program supplies and for picking up full bins from drop-off sites. Haulers provide PaintCare all data on the transportation and processing of PaintCare products taken from

all sites to their final destination. Shipments of PaintCare products from HHW facilities that have partnered with PaintCare are arranged between the facilities and haulers, typically to coincide with the sites' regular shipments of other HHW. Contracted haulers and their downstream processors are subject to audit by PaintCare.

Various paint collection containers are used in the program. Most drop-off sites pack paint cans into cubic yard bins. A few sites pack paint cans into 55-gallon drums and large shipping containers (20 cubic yards or larger), and some bulk (pour off) paint into drums. Full collection bins of commingled paint (latex and oil-based paint cans in the same collection container) are transported to the haulers' facilities for sorting by type. From there, latex paint is transported to a latex paint recycler and oil-based paint is transported to downstream processors. Collection containers of paint sorted by type at drop-off sites (typically by HHW programs) are either shipped to the haulers' facilities for transportation efficiency or are shipped directly to downstream processors.

Containers are shipped using either a bill of lading or a hazardous waste manifest as appropriate.

B2. Latex Paint Processing

The following describes how latex paint was processed:

Reuse. Reuse programs generally screen for paint containers that are at least 50% full and in good condition and give them away free or sell them to the local community.

Recycled Paint. The largest portion of latex paint was used to manufacture recycled-content paint by HHW programs (also referred to as "reprocessing" in this report) and private paint recyclers. The following HHW programs reprocessed paint during the year: Kern, Lake, Mendocino, San Bernardino, Santa Cruz, San Francisco. Recycled paint was given away to the local community by HHW programs and sold through domestic and international markets by private recyclers.

Concrete Products. A portion of latex paint was used by Visions Environmental in Oroville, CA, as a raw material to manufacture retaining wall blocks, landscape stones, and parking stops for passenger and commercial vehicles.

Energy Recovery. A portion of latex paint was processed by Amazon Environmental in Riverside, CA, by combining with sawdust to create a biomass fuel for a California-based cement kiln.

Alternative Daily Cover. The County of Santa Cruz used a small portion of latex paint as a component of alternative daily cover (ADC) for their landfill.

Disposal. Dry and unusable latex paint was sorted by Acrylatex, GDB International, and Visions and sent to various permitted landfills.

B3. Oil-Based Paint Processing

The following describes how oil-based paint was processed:

Reuse. Reuse programs generally screen for paint containers that are at least 50% full and in good condition and give them away free or sell them to the local community.

Energy Recovery. Oil-based paint was fuels blended at Rineco in Haskell, AR or Safety-Kleen in Smithfield, KY then processed for energy recovery at one or more of the following facilities: Ash Grove Cement in Chanute, KS, Ash Grove in Foreman, AR, Buzzi Unicem in Cape Girardeau, MO, Buzzi Unicem in Greencastle, IN, Covanta in Tulsa, OK, or Systech in Fredonia, KS.

Incineration. A portion of the oil-based paint was incinerated at Clean Harbors' facilities in Aragonite, UT, Deer Park, TX, El Dorado, AR, and Kimball, NE.

B4. Container Recycling

Downstream paint processors and HHW programs sent empty metal and plastic paint containers for recycling when possible. Commodity market conditions have an impact on the extent to which container recycling is feasible.

The program recycled approximately 2,216 tons of plastic and metal paint cans.

C. Best Management Practices for Drop-Off Sites

PaintCare has contract agreements with all its drop-off sites, as well as door-to-door programs, and RLVP sites. For municipal sites that do not operate their own sites, PaintCare contracted either directly with the municipality or with their site operator.

PaintCare requires all sites to be staffed during operating hours, store PaintCare products in a secure location, and follow all procedures covered in site trainings and PaintCare site guidelines.

C1. Site Training and Guidelines

With the exception of HHW programs for which it is optional, all other sites received an on-site, in-person training. These sites receive a binder that includes program guidelines, a training presentation, record-keeping forms, and signage. The binder is required to be kept on-site and readily available. The training and guidelines cover.

- Identification of program and non-PaintCare products
- Acceptable containers
- Whom to accept paint from and how much
- Screening procedure for Very Small Quantity Generators (VSQGs) and the required log form
- Proper storage
- Spill response procedures and reporting requirements
- How to schedule a pickup
- Required paperwork and retention schedules

Variations of these guidelines are provided to retail stores, reuse stores, transfer stations, RLVP sites, and others. The current version of the site guidelines is in the appendix.

Retailers and other non-HHW drop-off sites are not allowed to accept PaintCare products without original labels or not in original containers. However, HHW programs often receive unlabeled containers and products not in their original containers in the course of normal operations and have the skills and tools to identify whether the material is an acceptable program product.

C2. Site Visits

Drop-off sites typically receive site visits throughout the year by PaintCare regional coordinators to check on operations, answer questions, and provide additional program outreach materials. Beginning in March 2020, many site visits were conducted virtually due to the onset of COVID-19. Normal site visit activities resumed in Summer 2021. PaintCare has six regional coordinators in California.

C3. Paint Collection Bins

Drop-off sites are equipped with collection bins in which to store PaintCare products, with sites required to ship a minimum of two bins unless otherwise granted an exception by PaintCare. Sites are required to keep collection bins in a secure location that is not directly accessible to the public. Depending on the location of the bins, and preference of the site, PaintCare supplies two types of bins: fiber bins (made of corrugated cardboard) and reusable bins (plastic).

C4. Paint Acceptance Limits

PaintCare requires sites to accept at least 5 gallons of paint per customer per day. Some drop-off sites voluntarily accept more than 5 gallons; many accept up to 20 gallons per customer. A few stores accept up to 100 gallons, while some recyclers, transfer stations, and HHW sites accept unlimited volumes of latex paint.

C5. Scheduling Bin Pickups

All drop-off sites are advised to order a bin pickup before they reach their storage capacity. Sites in urban areas receive pickups within five business days of a request; sites in rural areas receive pickups within ten business days. Many sites in high volume areas have also been placed on an automatic pickup schedule.

D. Coordination with Existing HHW Programs and Retailers

D1. HHW Programs and Solid Waste Facilities

PaintCare continued its efforts to partner with all HHW programs. During the program year, PaintCare added a permanent HHW facility in Riverside County and maintained all existing partnerships. Kings County is the only county HHW program that has expressed interest but has yet to complete a contract. Imperial County has chosen not to collect paint at their HHW facility and refers households and businesses to local PaintCare retail locations.

The program also added year-round sites at solid waste facilities in Kern County.

D2. Retailers and Reuse Stores

PaintCare maintains a comprehensive list of California paint retailers and reuse stores, including independent and corporate stores. PaintCare recruits new sites through in-person site visits and coordination with corporate contacts at paint retailers. PaintCare continued its efforts to recruit and retain retail and reuse store drop-off sites. While 11 stores closed or moved in FY2021, PaintCare added 31 new sites, resulting in a net addition of 20 retail and reuse store drop-off sites.

Section 4. Description of Goals and Activities

Statutory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(4) Description of goals and activities based on the stewardship plan. State goals from the approved stewardship plan, the baseline from which goals were measured, and report on achievement during the reporting period. Describe any adjustments to goals stated in the approved stewardship plan that may be made for the upcoming reporting period and accompanying rationale for those changes. The annual report must include quantitative information and discussion on the following categories pursuant to PRC §48705(a) and PRC §48703(d):

(A) The total volume of architectural paint sold, by type, in the state during the preceding reporting period.

(B) The total volume of postconsumer architectural paint recovered, by type, in the state during the preceding reporting period.

(C) Disposition of postconsumer paint collected, by type and by estimated volume, including name(s) and corporate address(es) for contracted processors for each

A. Program Goals

The California Paint Stewardship Law requires PaintCare to establish goals to reduce the generation of postconsumer paint, to promote the reuse of postconsumer paint, and for the proper end-of-life management of postconsumer paint, based on current household hazardous waste program information.

This section of the report addresses architectural paint recovery and recycling goals. Section 6 (Education and Outreach) addresses postconsumer paint reduction and reuse goals.

B. Program Convenience

As described in the Program Plan, to ensure adequate collection coverage, Geographic Information System (GIS) modeling was used determine the number and distribution of drop-off sites needed to provide a convenient program. A report detailing updates to the GIS modeling was included in the appendix of the 2016 annual report. The following convenience criteria were applied and resulted in a goal of 750 drop-off sites:

Distribution Criterion. To provide statewide coverage, establish sites within 15 miles of 90% of the state's population.

Density Criterion. To address densely populated areas, provide an additional site for every 50,000 population of an Urbanized Area, as defined by the U.S. Census Bureau.

For transfer stations, HHW sites and events in California, PaintCare continually updates defined service areas for each location (typically confined to a city or county). Only the population within a 15-mile radius (the "distribution" criterion) of each location, and that are also within a given location's known service area, are counted. Service area updates may produce slight changes in the distribution criterion results from year to year. Population is based on the US Census Bureau decennial (2020) Census Block level data.

B1. Convenience Level

California had a fair number of HHW programs prior to implementation of the PaintCare program. However, service levels varied across the state, and many HHW programs did not accept paint (and other hazardous waste) from businesses. With the addition of more than 600 additional year-round paint drop-off sites, PaintCare has made it significantly more convenient to recycle paint in the state, especially for businesses.

The combination of additional year-round drop-off sites (primarily paint retailers) and partnerships with the existing year-round HHW programs provided a site within 15 miles of 99% of the state's population – satisfying the distribution target of the program. When including supplemental sites and events in the distribution analysis, population coverage increases to 99.3%.

The density criterion applies to Urbanized Areas with a population of 50,000 or greater – there are 57 such areas in California. Four of the larger Urbanized Areas have been subdivided into smaller regions to better manage and understand local convenience levels, increasing the number of areas to 73. GIS modeling determined the target number of sites needed within each area.

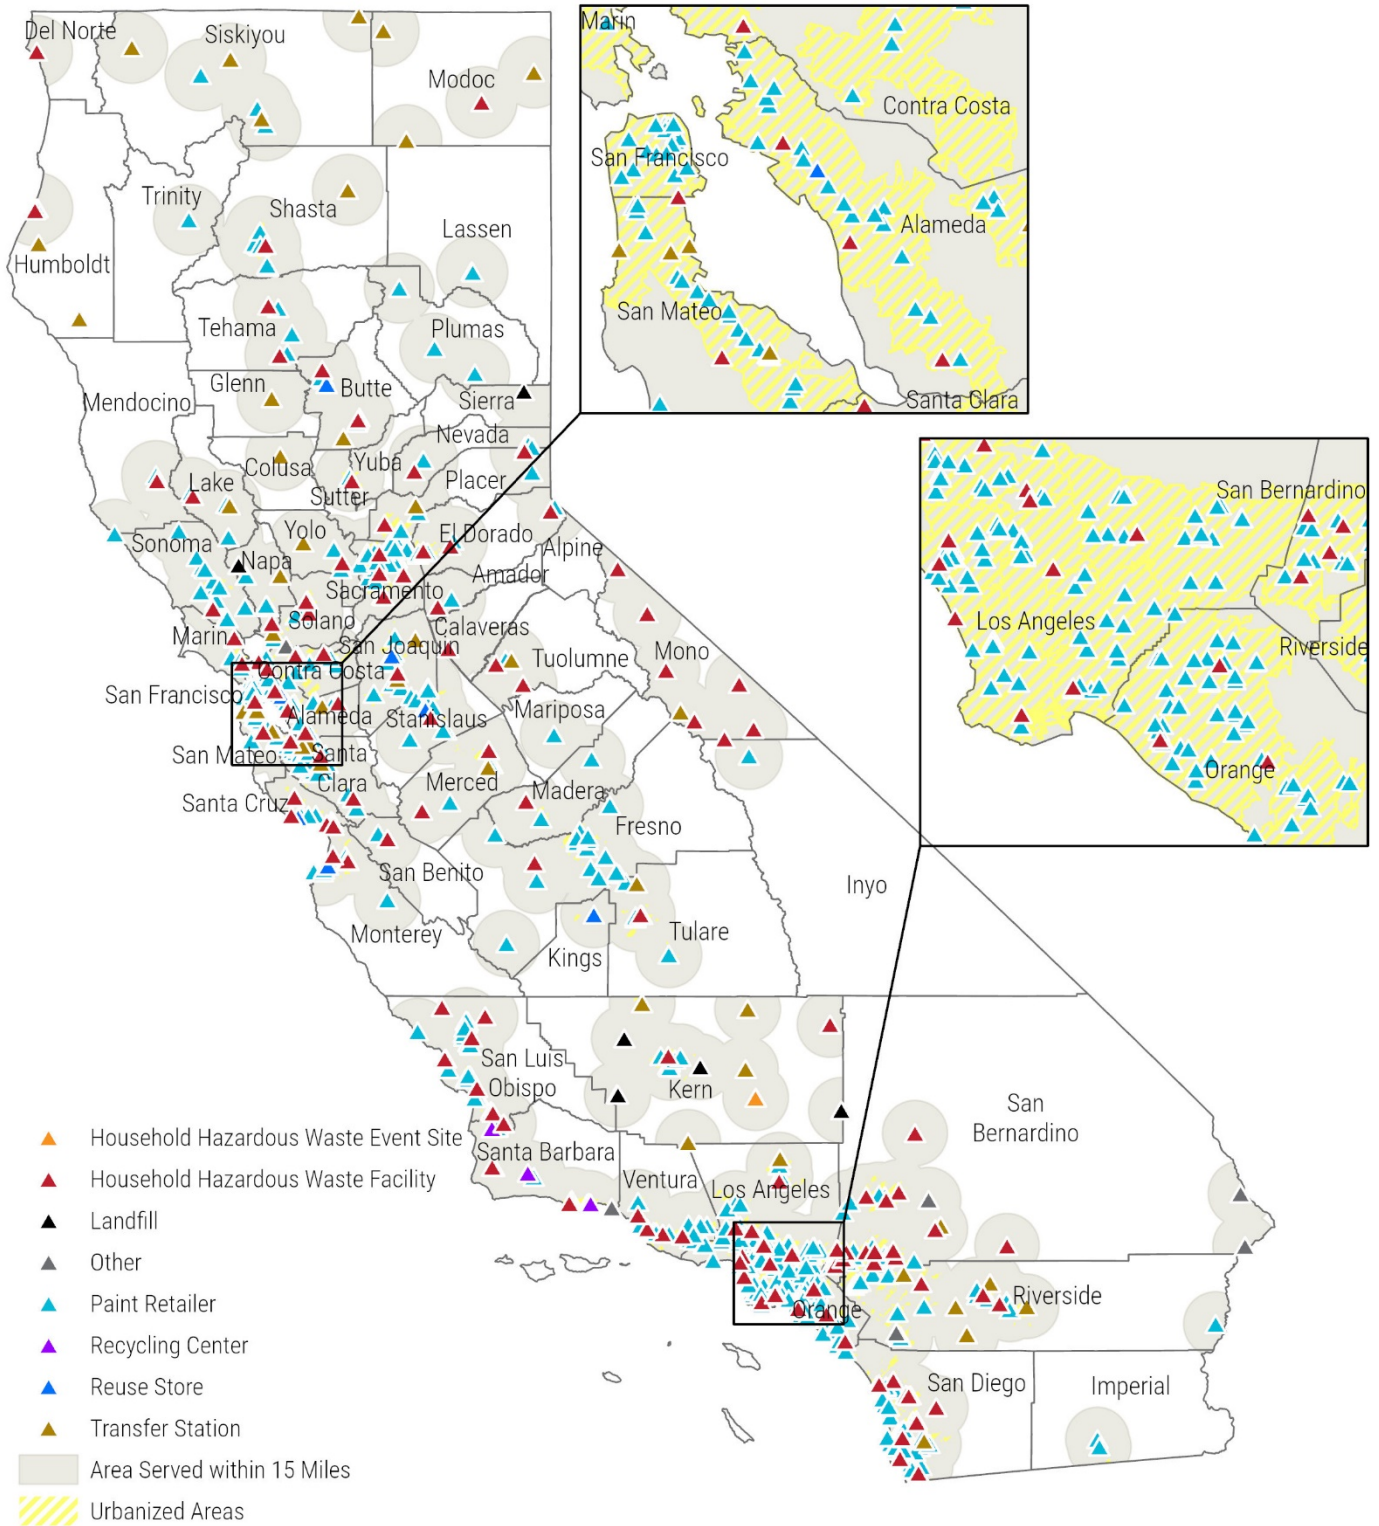

In 54 of the 73 areas, the program is meeting the density criterion targets. PaintCare narrowed the shortfall in four areas (Bakersfield, Orange County North, Murrieta-Temecula-Menifee, and East Bay North). When including supplemental sites in the analysis, 60 of 73 areas meet the targets. The details for each area, including the target number of sites and density coverage levels at the end of the year are included in the appendix.

B2. Site Maps

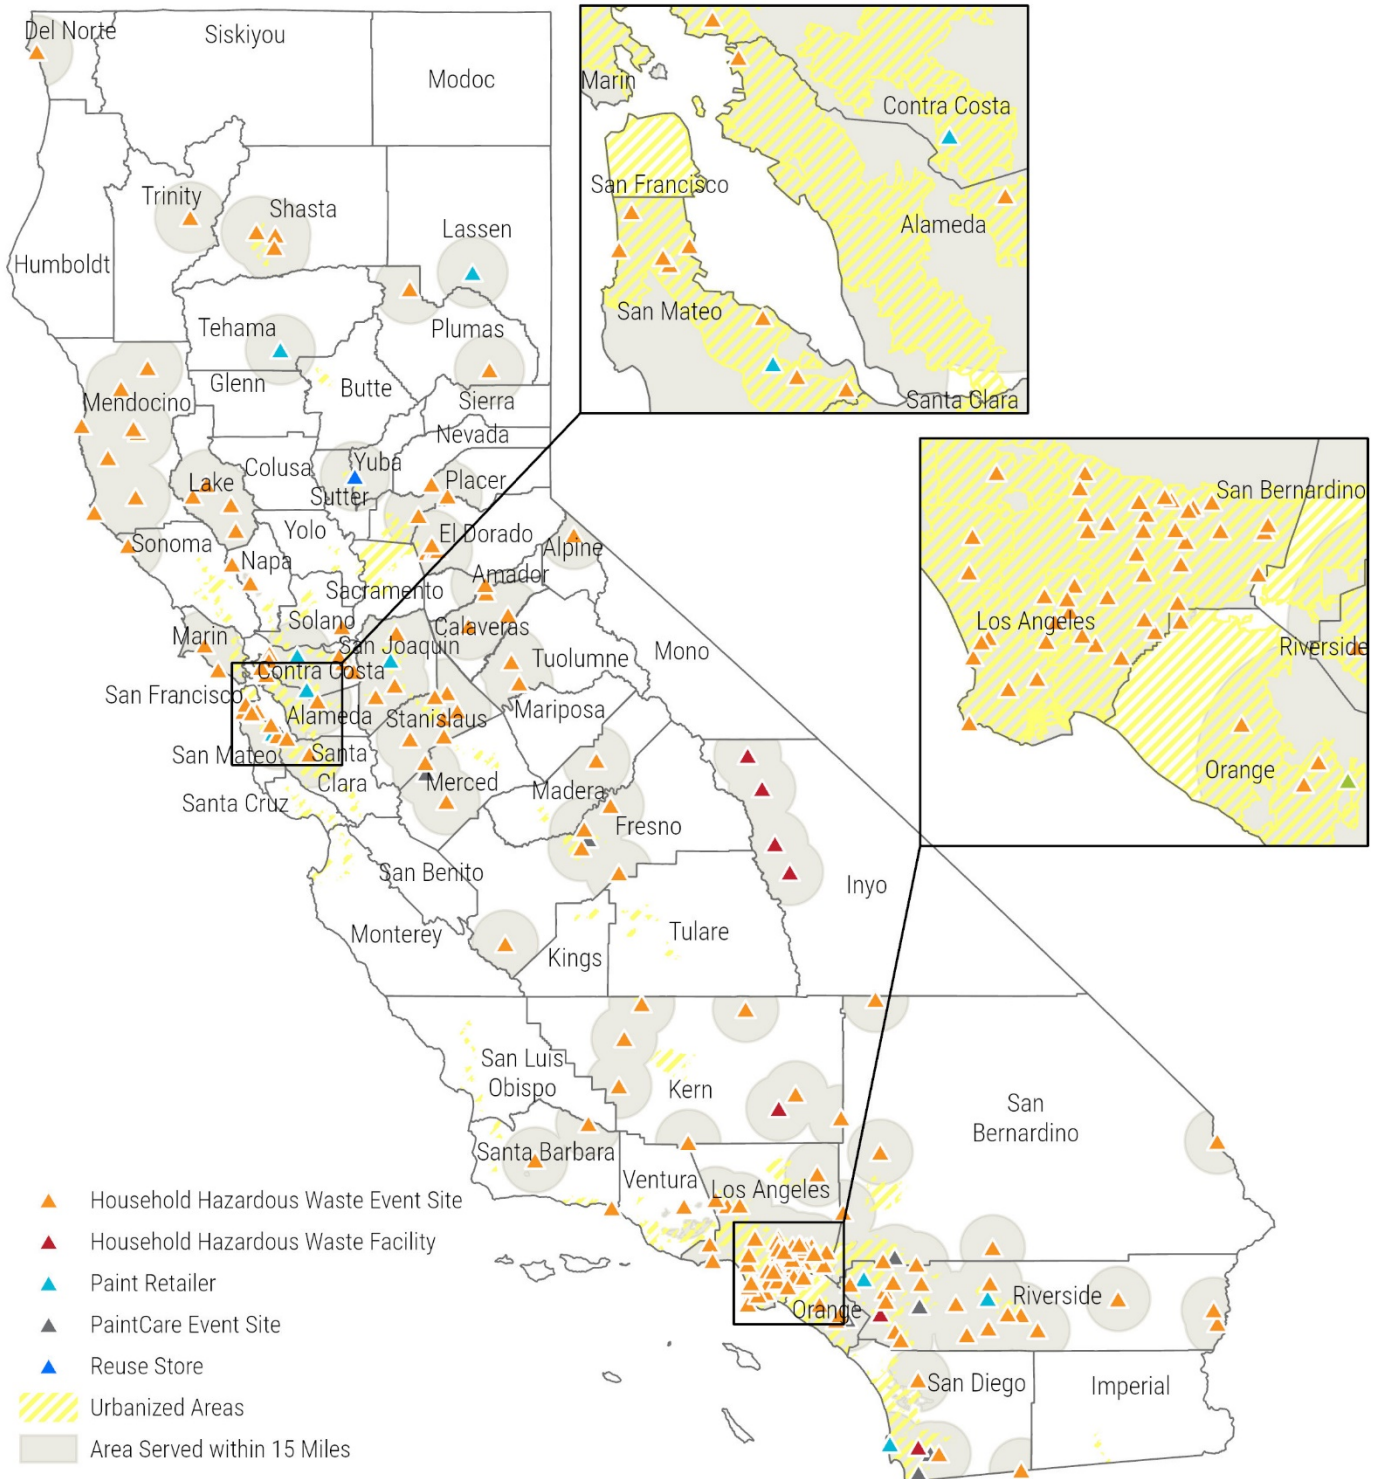

Section 3 of this report described the number and types of paint drop-off sites offered by the program. The maps on the following pages show their locations. Appendix Section A includes a list of sites used to generate these maps with site types and city names.

- Map 1 shows the locations of year-round drop-off sites and their service areas within a 15-mile radius.
- Map 2 shows the locations of supplemental sites and their service areas within a 15-mile radius.
- Map 3 shows both year-round and supplemental sites and their service areas within a 15-mile radius.
- Map 4 shows the locations of LVP and RLVP sites. Though the LVP/RLVP service provides tremendous convenience for its users, these sites are not included in any convenience analysis because they are not public drop-off sites and therefore do not add to the program's convenience level for the general public. Similarly, door-to-door programs are also not included in any convenience analysis, nor are they included in any map since we do not track their service area.

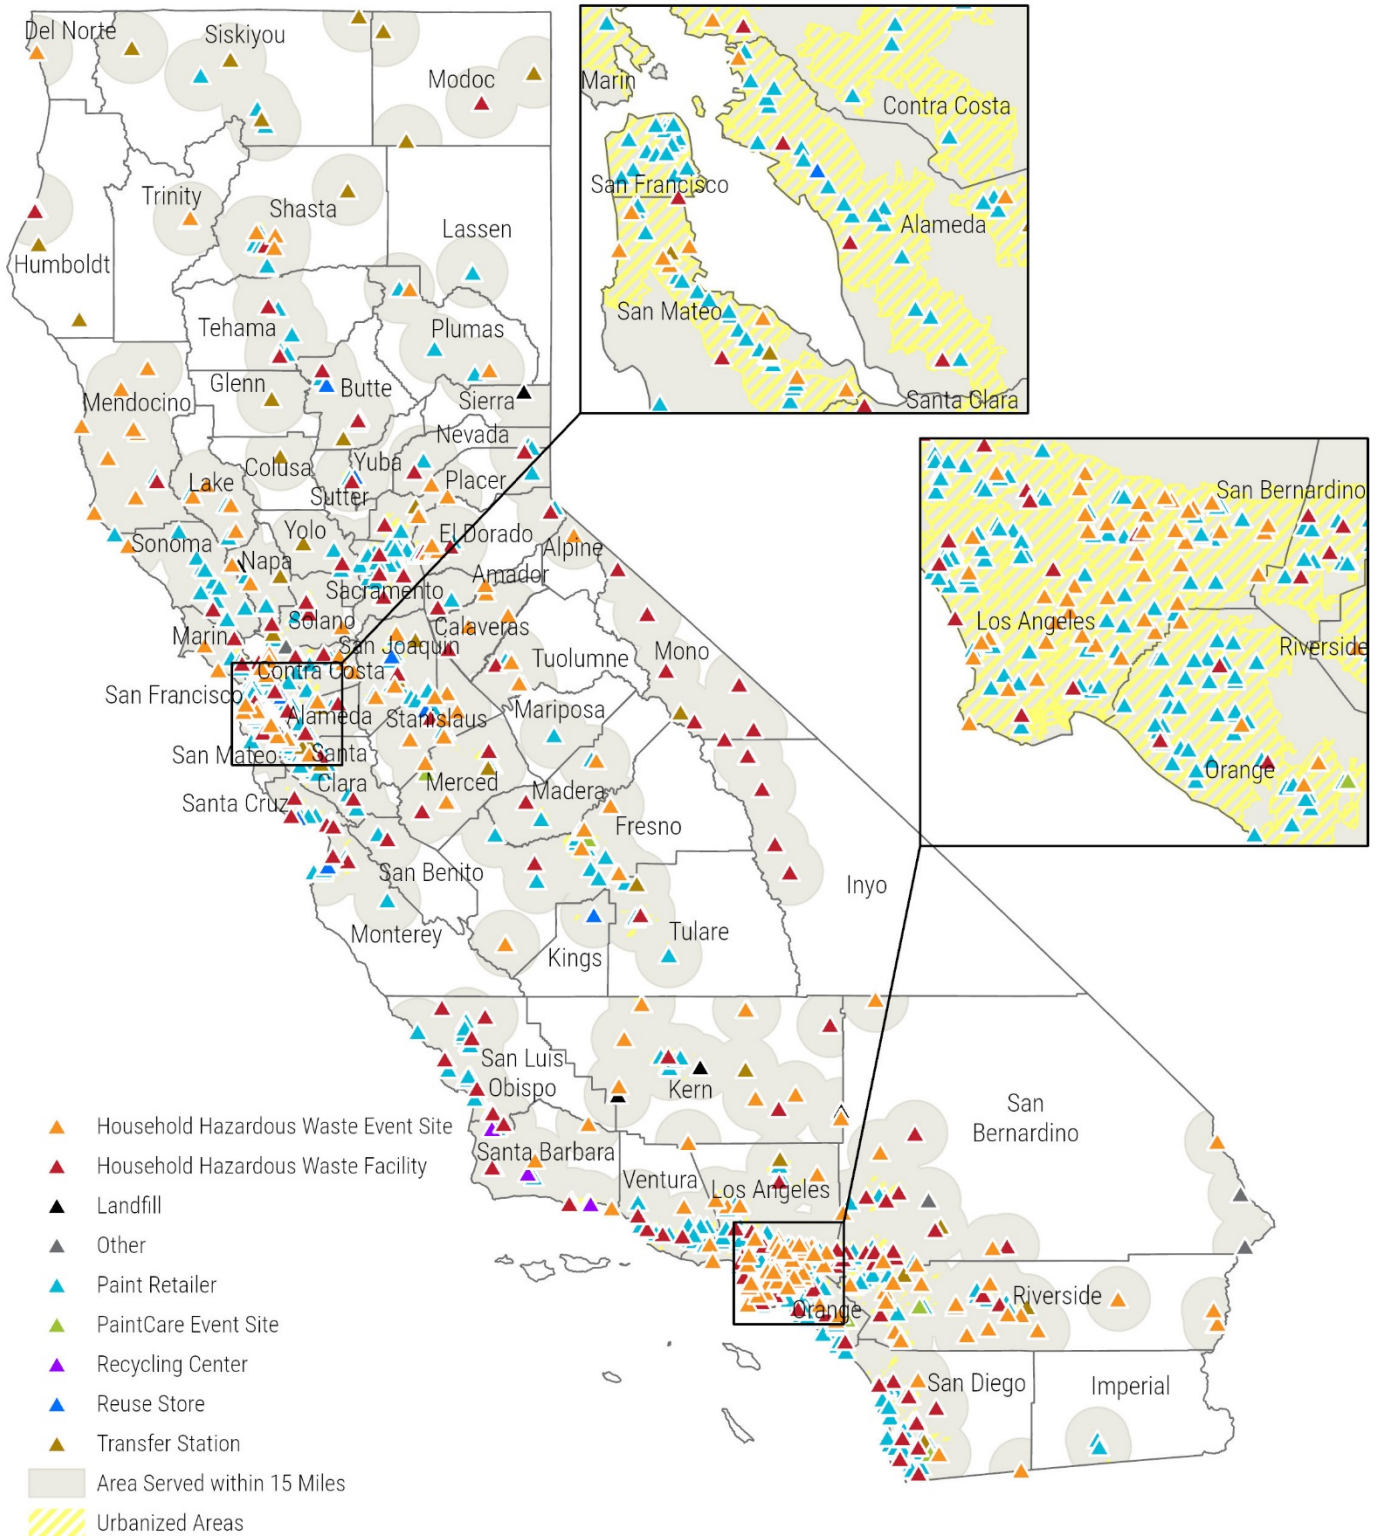

Map 1. Year-Round Drop-Off Sites

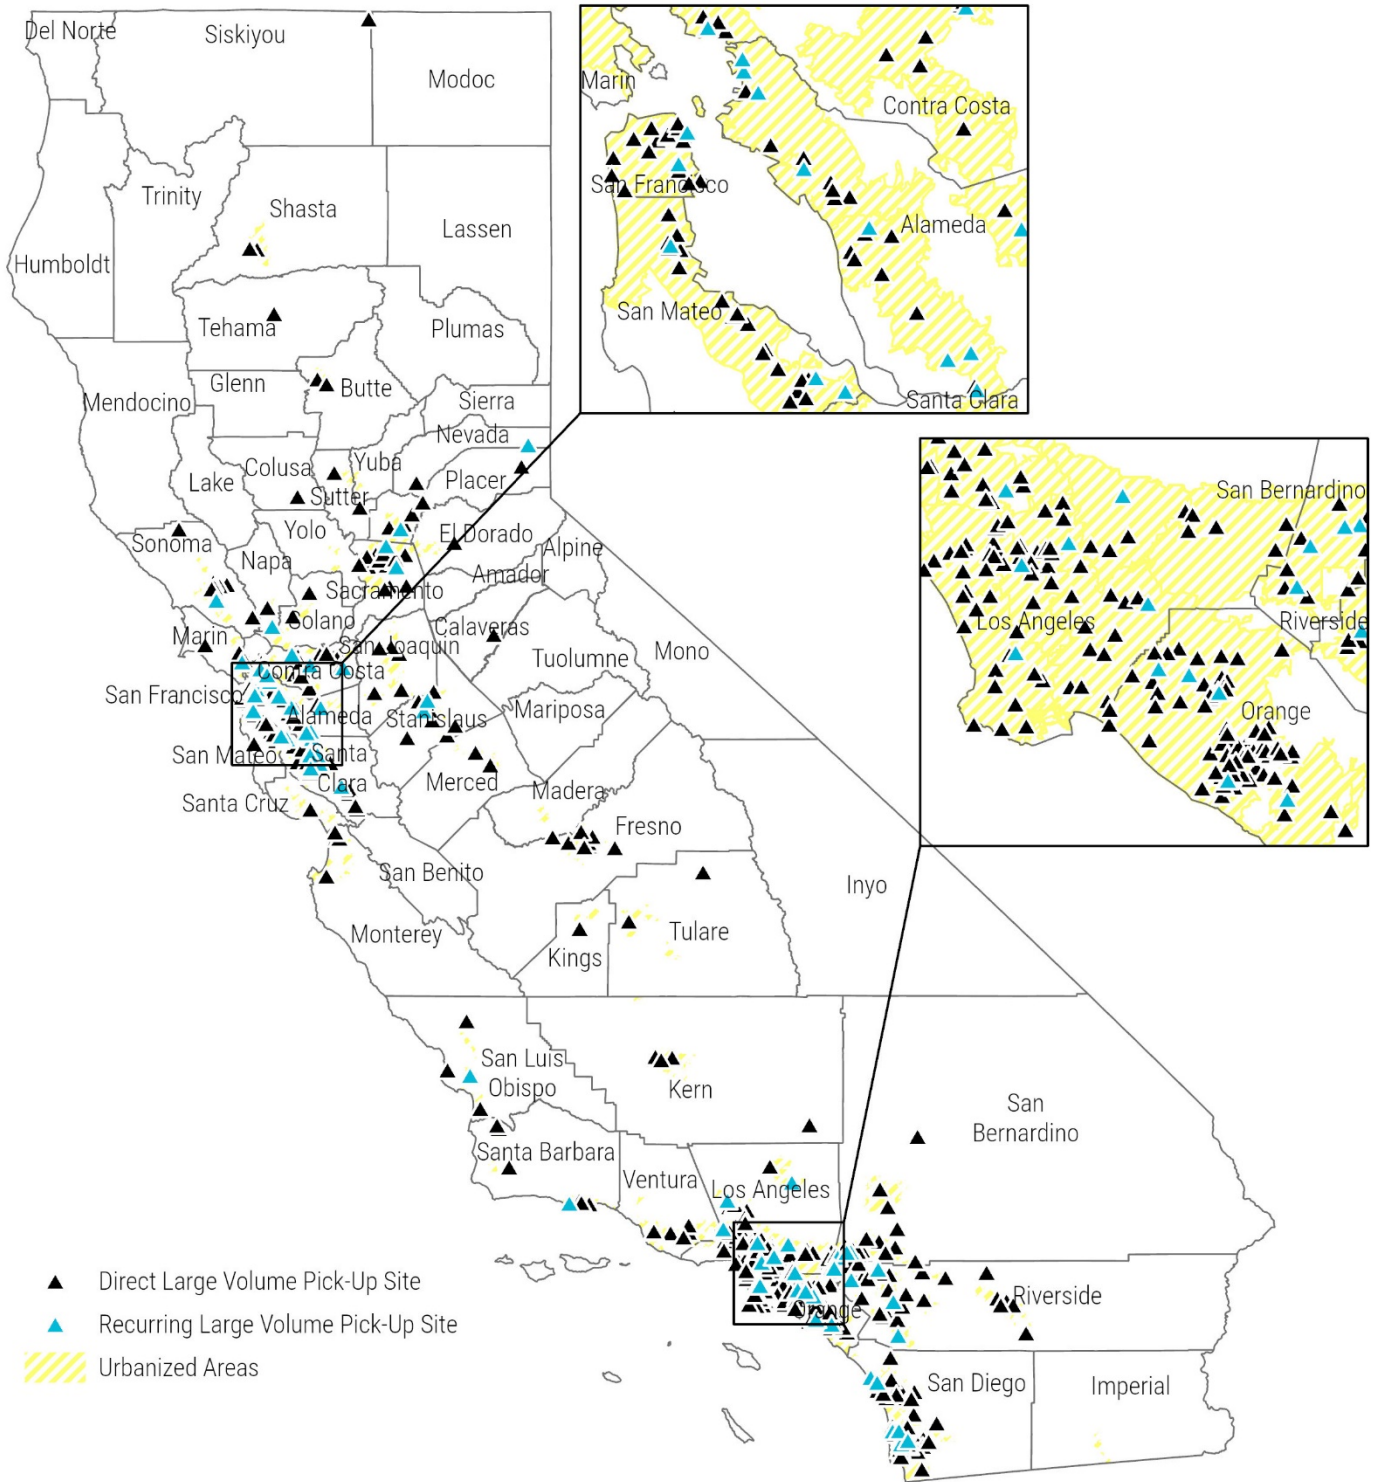

Map 2. Supplemental Drop-Off Sites

Map 3. Year-Round and Supplemental Drop-Off Sites

Map 4. Large Volume Pickup Sites

C. Paint Sales

The volume of architectural paint sold in the year was over 76 million gallons, an increase from the previous year. The following table shows paint sales, broken out by container size categories, in the last five program years.

Paint Sales

Container Size	Year 6 FY2018 Gallons	Year 7 FY2019 Gallons	Year 8 FY2020 Gallons	Year 9 FY2021 Gallons
Half pint or smaller	27,412	29,839	30,780	39,077
Larger than half pint to less than 1 gallon	2,423,459	2,270,114	2,536,353	2,776,917
1 Gallon	23,232,726	22,690,523	23,824,173	25,737,872
Larger than 1 gallon up to 5 gallons	45,474,525	45,048,420	45,542,330	48,032,828
Total Gallons	71,158,122	70,038,896	71,933,636	76,586,693

D. Paint Processed and Recovery Rate

A total of 4,033,477 gallons of postconsumer architectural paint was processed during the year. A sizable volume of oil-based paint collected during the year was not processed by the end of the reporting period and is not included in this report's processing and disposition figures. While a gap in the time between collection and processing occurs every year and generally balances out from year to year, oil-based paint processing in this reporting period was abnormally impacted by a weather-related event and by supply chain issues exacerbated by a shortage of drivers.

The following tables provide the breakdown of the volume of paint processed by type and the recovery rate for each of the past four years. Recovery rate is the volume of paint collected and processed compared to the volume of paint sold in the same year.

The first table also shows year-over-year changes in the volume of paint processed.

Gallons Processed

Description	Year 6 FY2018	Year 7 FY2019	Year 8 FY2020	Year 9 FY2021
Oil-Based Paint Processed, Gallons	650,988	666,519	702,749	577,326
Latex Paint Processed, Gallons	3,230,925	3,221,725	2,863,132	3,456,151
Total Paint Processed, Gallons	3,881,913	3,888,244	3,565,881	4,033,477
Change versus Prior Year, Gallons	417,764	6,331	(322,363)	467,596
Change versus Prior Year, Percent	12%	<1%	(8%)	13%

Recovery Rate

Description	Year 6 FY2018	Year 7 FY2019	Year 8 FY2020	Year 9 FY2021
Total Paint Processed, Gallons	3,881,913	3,888,244	3,565,881	4,033,477
Paint Sold, Gallons	71,158,122	70,038,896	71,933,636	76,586,693
Recovery Rate, Percent	5.5%	5.6%	5.0%	5.3%

This year, 57% of paint processed came from municipal programs (this includes HHW facilities and events, as well as municipal transfer stations and other municipal sites that collect paint). Paint from retail stores made up 33% of the volume, LVP/RLVPs claimed a 6% share, paint recyclers received 3% and paint-only drop-off events accounted for 1% as shown in the following table:

Paint Management

Site Type	Percent
HHW Program	54
Retail	33
LVP	6
Paint Recycler	3
Transfer Station	3
Paint Only Event	1

E. Methodology for Determining Volumes

PaintCare was provided aggregate data by each service provider for total paint reused and processed.

For haulers, one of two methods were applied: (1) For data where the weight of paint processed was provided by recyclers to haulers, packaging weight assumptions were made by each hauler and removed from the total weights. Next, a conversion factor of 10 pounds per gallon was applied to weight data to obtain volume. (2) For data where actual volume of paint processed was provided by recyclers to haulers, no conversions were applied, and volume was reported without modification.

For HHW programs that reprocessed latex paint, data provided to PaintCare was the volume of paint reprocessed and given out to the public. If the paint was not given away in the year, even if reprocessed during the year, it was not counted in the year.

For reuse programs, data was calculated one of the following two ways: (1) containers larger than 1 quart and at least 50% full were counted and, then converted to gallons by assuming an average fullness of 75%; or, (2) containers of any size and fullness were measured and reported in gallons using an accepted methodology (with documentation provided to PaintCare upon request).

F. Paint Disposition and Processors

PaintCare contracts for processing and proper end-of-life management of all PaintCare products either directly or through the program's haulers. In addition, to support the waste hierarchy of reduce, reuse, recycle, PaintCare encourages and provides financial compensation for reuse and reprocessing.

As described previously, paint was managed in the following ways:

Latex Paint. Reuse, recycled paint, concrete products, energy recovery, alternative daily landfill cover (ADC), and disposal.

Oil-Based Paint. Reuse, energy recovery, incineration.

The following tables show latex and oil-based paint disposition for the most recent and previous two years:

Summary of Paint Management

Latex Paint

Disposition	Year 7 Gallons	Year 7 Percent	Year 8 Gallons	Year 8 Percent	Year 9 Gallons	Year 9 Percent
Reuse	125,604	4	152,126	5	212,540	6
Recycled Paint	2,290,516	71	1,950,037	68	2,393,543	69
Decorative Ground Cover	7,547	<1	1,347	<1	0	0
Concrete Products	169,086	5	163,703	6	175,403	5
Energy Recovery	393,006	12	454,825	16	415,243	12
ADC	1,125	<1	1,643	<1	592	<1
Disposal	234,841	7	139,451	5	258,830	8
Total Latex	3,221,725	100	2,863,132	100	3,456,151	100

Oil-Based Paint

Disposition	Year 7 Gallons	Year 7 Percent	Year 8 Gallons	Year 8 Percent	Year 9 Gallons	Year 9 Percent
Reuse	16,775	3	11,008	2	12,873	2
Energy Recovery	368,844	55	423,365	60	409,726	71
Incineration	280,900	42	268,376	38	154,727	27
Total Oil-Based	666,519	100	702,749	100	577,326	100

The following lists provide the names and addresses of paint processors that managed PaintCare paint during the year.

Latex Paint Processors

- Acrylatex Coatings & Recycling, Inc., 1000 W Kirkwall Rd, Azusa, CA 91702
- Amazon Paint, Inc., 5101 Raley Blvd, Sacramento, CA 95838
- Amazon Paint, Inc., 779 Palmyrita Ave, Riverside, CA 92507
- GDB International, Inc., 6775 Speedway Blvd, Las Vegas, NV 89115
- Visions Environmental, LLC, 4801 Feather River Blvd #20, Oroville, CA 95965
- Visions Paint Recycling, Inc., 4105 S Market Ct Ste A, Sacramento, CA 95834

Oil-Based Paint Processors

- Ash Grove Cement, 1801 North Santa Fe Ave, Chanute, KS 66720
- Ash Grove Cement, 4343 Hwy 108, Foreman, AR 71836
- Buzzi Unicem, 2524 South Sprigg St, Cape Girardeau, MO 63703
- Buzzi Unicem, 3301 South County Rd 150W, Greencastle, IN 46135
- Clean Harbors Environmental Services (Aragonite facility), 11600 North Aptus Road, Grantsville, UT 84029
- Clean Harbors Environmental Services (El Dorado facility), 309 American Circle, El Dorado AR 71730
- Clean Harbors Environmental Services (Kimball Facility), 2247 South Hwy 71, Kimball, NE 69145
- Clean Harbors Environmental Services (Deer Park Facility), 2027 Independence Pkwy S, Deer Park, TX 77571
- Covanta Energy, 2122 S Yukon Ave, Tulsa, OK 74107
- Systech Environmental Corp, 1420 S. Cement Rd, Fredonia, KS 66736

G. Grant Program

In FY19, PaintCare awarded \$100,000 to a California paint recycler seeking to develop new methods of recycling latex paint that cannot be recycled back into paint. In FY21, the winning recycler, Visions Recycling, Inc., used the remaining grant funds to make landscape décor using the pre-cast molds previously developed with this grant. With latex paint replacing heavier product components, such products can be up to 40% lighter, providing the benefits of lightweighting, in addition to recycling.

Section 5. Financing Mechanism

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(5) Financing Mechanism. The annual report shall include the total cost of implementing the architectural paint stewardship program and an evaluation of how the program's funding mechanism operated, including whether or not the funding was sufficient to recover, but not exceed, the administrative, operational, and capital costs of the manufacturer or stewardship organization's program. Include a statement that any surplus funds are put back into the program to reduce the costs of the program, including the assessment amount. Any proposed change in the amount of the architectural paint stewardship assessment must be submitted to the department for re-approval (see §18952. Submittals). If a manufacturer or stewardship organization conducts activities that are separate from the implementation and management of the California paint stewardship program, then the annual report shall include documentation on how the collection and expenditure of assessment funds shall be kept separate from other activities of the manufacturer or stewardship organization and the methodology for distribution of shared costs. Consistent with PRC §48705(a)(5), the annual report shall include the following:

- (A) Assessment amount per container
- (B) Total program cost
- (C) Capital costs
- (D) Cost(\$)/capita
- (E) Cost(\$)/gallon collected
- (F) Education/Outreach (% of total program cost)
- (G) End-of-life materials management (% of total program cost, with line items for reuse, transportation, recycling, fuel incineration, and proper disposal)
- (H) Program administration (% of total program cost, including annual administrative fee for service payments to the department)
- (I) Surplus funding, if any, and how it will be applied to reduce program costs

A. Financing Mechanism

PaintCare maintained its financing mechanism and fully covered the cost of continuing to implement the program through the year. The funding system places an assessment (PaintCare fee) on every container of architectural paint sold in California. The fees were set at a rate to cover but not exceed the cost of implementing the California program.

Reserves have been accumulated, due to delays that took place in the first two years to sign up HHW programs. To address the accumulation of reserves, PaintCare has proposed a revised PaintCare fee structure as part of an updated program plan submitted to CalRecycle in October 2021.

A1. PaintCare Fee

The program utilizes the following approved fee structure.

PaintCare Fees

Container Size	Fee (\$)
Half pint or smaller	0.00
Larger than half pint to smaller than 1 gallon	0.35
1 gallon	0.75
Larger than 1 gallon up to 5 gallons	1.60

A2. Total Program Cost

Total program cost for the year was \$37,103,825

The independent financial audit of the California PaintCare program (referred to in the financial audit by its formal name, the California Architectural Paint Recovery Program) is in the appendix. Detailed information on program costs are included in the audit.

A3. Capital Costs

There were no capital costs during the year.

A4. Cost per Capita

The cost per capita for the year was \$0.94.

Cost per capita was calculated using the 2020 US Census of California population of 39,538,223.

A5. Cost per Gallon

The cost per gallon (of paint collected) during the year was \$8.63, compared to \$8.59 the previous year.

Note that PaintCare reports and uses collected gallons in its calculation, rather than processed volume, because PaintCare is charged for all services (transportation and processing) when the paint is collected rather than when it is actually processed.

A6. Education/Outreach

Education/outreach cost for the year was \$3,981,907 – 11% of total program costs.

A7. End-of-Life Materials Management

Transportation cost for the year was \$3,925,563 – 11% of total program costs.

Processing cost for all disposition methods was \$21,488,016 for the year – 58% of total program costs.

Actual cost broken down by specific disposition is not available due to the format of transport and processing vendors' contract pricing, which maximizes (and charges the program for) highest-best use, generally considered to be paint-to-paint recycling at this time.

The costs for each disposition method are estimated below:

Disposition Method	Estimated Cost (\$)	% of Total Program Cost (\$37,103,825)
Recycled Paint	13,506,204	36
Energy Recovery	4,655,107	13
Incineration	873,088	2
Concrete Products	989,758	3
Reuse	360,661	1
Disposal	1,460,517	4
Alternative Daily Landfill Cover (ADC)	3,341	<0.1
Total	21,488,016	58

A8. Administrative Costs

Administrative costs (also called indirect costs or corporate expenses) are those that are shared by all jurisdictions that have passed a paint stewardship law, such as salaries for DC-based corporate staff who work on activities for all states. Other examples of corporate expenses include construction of data management systems, legal fees, and general communications.

The corporate allocation for each PaintCare jurisdiction is the proportion of its population relative to the population of all PaintCare jurisdictions combined. California's share of the corporate activity allocation was 57%. Administrative costs were \$2,860,496 or 8% of total program costs.

Service payments to CalRecycle are not presented as an administrative expense in the audited financial statements, but rather as a direct California operational expense. Payment to CalRecycle was \$322,228 or 1% of total program costs.

A9. Surplus Funding

The net assets of the California program at the end of the year were \$63,222,930. Net assets are also referred to as reserves. The following tables summarize program revenue and expenses for four years.

Financial Summary

Revenue

Revenue Category	Year 6 FY2018 (\$)	Year 7 FY2019 (\$)	Year 8 FY2020 (\$)	Year 9 FY2021 (\$)
Containers larger than half pint to smaller than 1 gallon	3,392,842	3,178,125	3,550,894	3,887,684
1-Gallon containers	17,424,545	17,017,852	17,868,130	19,303,404
Containers larger than 1 gallon up to 5 gallons	14,551,848	14,415,470	14,573,546	15,370,504
Total revenue	35,369,235	34,611,457	35,992,569	38,561,592

Expenses

Expense Category	Year 6 FY2018 (\$)	Year 7 FY2019 (\$)	Year 8 FY2020 (\$)	Year 9 FY2021 (\$)
Paint processing	19,592,350	19,229,945	17,577,413	21,488,016
Paint transportation	3,497,224	3,431,137	3,129,648	3,925,563
Collection supplies and support	3,088,154	3,134,671	2,851,573	3,515,795
Communications	3,449,964	3,394,905	2,772,951	3,981,907
Personnel, professional fees, and other	2,184,444	1,348,563	1,060,980	1,009,820
State administration fees	167,633	224,526	412,640	322,228
Allocation of corporate activity	2,679,071	2,855,647	2,843,138	2,860,496
Total expenses	34,658,840	33,619,394	30,648,343	37,103,825

Other

Description	Year 6 FY2018 (\$)	Year 7 FY2019 (\$)	Year 8 FY2020 (\$)	Year 9 FY2021 (\$)
Allocation of investment activity	1,380,251	2,567,226	2,098,712	4,909,930
Change in net assets (revenue less expenses)	2,090,646	3,559,289	7,442,938	6,367,697
Net assets, beginning of year	43,762,360	45,853,006	49,412,295	56,855,233
Net assets, end of year	45,853,006	49,412,295	56,855,233	63,222,930

Reserve Level

Description	Year 6 FY2018	Year 7 FY2019	Year 8 FY2020	Year 9 FY2021
Reserves (% of Annual Expenses)	132%	147%	186%	170%

B. Reserves Policy

Reserves represent the accumulated surplus (cash and investments) of PaintCare's programs. The reserves provide each program with a balance that is sufficient to pay its bills in times of either higher than expected paint collection (higher expenses), lower than expected paint sales (lower revenue), or a combination of the two.

PaintCare's Reserves Policy has a target reserve as a percentage of annual expenses. It also sets a range with minimum and maximum thresholds. If the reserves fall below the minimum threshold or rise beyond the maximum threshold, an evaluation of the program's expenses and revenue will be performed to determine if changes are needed in operations, outreach, and/or the fee structure to bring the reserve balance within range.

The PaintCare Board of Directors has established a target reserve of 100% of annual expenses. The minimum threshold is 75% (i.e., nine months) of expenses and the maximum is 125% (i.e., 15 months).

At the end of FY2021, the California program had built a reserve of \$63,222,930, 170% of FY2021 operating expenses. To address the accumulation of reserves, PaintCare has proposed a revised PaintCare fee structure as part of an updated program plan submitted to CalRecycle in October 2021.

C. Investment Activity

PaintCare invests a portion of its reserves (from most PaintCare programs) in a financial portfolio. PaintCare maintains investments for all programs in a single portfolio. Claim of ownership in the investment portfolio was shared by all participating programs and allocated among them based on relative net asset balances. Programs that have positive net asset balances have a claim on the assets invested in the portfolio; programs with negative net asset balances carry a liability representing an amount due to the portfolio.

D. Formation of Limited Liability Companies

In 2015, to better separate each state program in terms of liability and financial independence, PaintCare Inc. began implementing a plan to establish sole-member limited liability companies that are each dedicated to administering the paint stewardship program in a particular state. As of the date of this report, PaintCare programs now operate under an LLC format in Connecticut, Maine, Oregon, Rhode Island and Washington. The New York program will begin as an LLC in 2022. The remaining programs continue as before. While this process has taken longer than expected, PaintCare still plans to transition the remaining jurisdictions to sole-member limited liability companies over the course of the next two to three years.

Section 6. Education and Outreach

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program
Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(6) Education and Outreach. Describe educational and outreach activities in context of those identified in the stewardship plan. Provide a description of educational materials that were provided to retailers, consumers, and contractors during the reporting period and provide electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. These education and outreach materials may include, but are not limited to, any of the following per PRC §48703(e):

- (A) Signage that is prominently displayed and easily visible to the consumer.
- (B) Written materials and templates of materials for reproduction by retailers to be provided to contractors and consumers at the time of purchase or delivery or both.
- (C) Promotional materials or activities, or both, that explains the purpose of paint stewardship and the means by which it is being carried out.
- (D) Links to website(s) created and maintained by the stewardship organization.

Introduction

PaintCare's education and outreach efforts focus on building awareness of the program and encompass four primary messages: reduce, reuse, recycle, which PaintCare has modified to "Buy right, Use It Up, Recycle the Rest" and proper disposal. PaintCare is committed to providing robust and successful education and outreach using a variety of communication tools. The main objective of outreach was to drive the public to PaintCare's website to find a drop-off site using PaintCare's site locator search tool.

Most creative work is done by PaintCare's in-house communications team. PaintCare's marketing firm for the California program, Civilian Agency of San Diego, handles most of the advertising purchases. PaintCare uses Demographic Market Areas (DMA) to customize the mix of media purchasing to the populations of each DMA. PaintCare, through its marketing firm, developed plans for each of the 14 DMAs incorporating all 58 counties in California. The plans considered different audiences in each market and determined the appropriate mix of media to reach the most people.

In May 2021 PaintCare announced an updated brand, including a new logo design, new website, and updated graphic designs for public education materials. The updated brand

was developed by PaintCare’s in-house communications team after soliciting feedback from the staff and the public about how well the previous branding represented PaintCare’s work and comparing PaintCare’s brand with that of peer organizations. The goal of creating the new brand was to make PaintCare’s communications and outreach materials more effective by making PaintCare’s purpose more apparent to readers, improving clarity and legibility of the branding elements, making the PaintCare graphic design and website more accessible through stronger color contrasts, and making PaintCare’s name and a new tagline (“Recycling Made Easy”) more noticeable and memorable. Updated branding is displayed in some of the outreach samples included in the following sections of this report; in other cases, samples may date from the period prior to the update.

The relative amount of spending dedicated to outreach activities about the California program are summarized in the following table:

Relative Spending on Outreach Activities

Activity	Percent
Digital Ads	42
Social Media	17
Video	17
Print	15
Streaming Audio	4
Event Promotion	2
Other	2
Radio	1

The “Other” category includes public relations, translations, joint outreach, fulfillment, and awareness surveys.

A. Signage Displayed to Customers

PaintCare developed a number of signs for drop-off sites to help inform the public about the program, screen PaintCare products, and address concerns about illegal dumping. Drop-off sites may order the following signs: PaintCare products (English/Spanish), Program Partner, Combination (program partner with simplified products list), No Dumping, and Please Wait for Assistance. The following are examples of signs available to drop-off sites:

B. Print Materials

B1. Point of Sale Print Materials

PaintCare continued to distribute print materials to retailers for them to make available to consumers in their stores to educate them about the PaintCare program. Staff fulfilled requests for materials by mail, distributing a total of 21,409 brochures, mini cards, fact sheets, and posters during the year. Program staff also delivered additional materials in person during site visits.

PaintCare provided counter mats to retailers for use in the paint department to reference when customers have questions. The counter mat is popular with retailers and more likely than the poster to be seen by customers while they wait for their paint to be mixed.

Larger versions of the materials shown below are included in the appendix of this report and are available on the PaintCare website.

B2. Fact Sheets

Several fact sheets are available on PaintCare's website for different target audiences, and printed versions are distributed upon request. Minor updates are made throughout the year. Current versions of the fact sheets on PaintCare's website include:

- How Does the Paint Stewardship Program Affect Paint Retailers?
- How to Become a Retail Drop-Off Site
- About PaintCare Fees
- Information for Solid Waste Facilities Including Transfer Stations, Recycling Centers, and Landfills
- Reuse Programs – Compensation and Reporting
- Information about the Large Volume Pickup Service
- Information for Painting Contractors
- Information for Paint Purchasers

B3. Translations

PaintCare has translated its program brochure into Amharic, Arabic, Armenian, Bengali, Chinese, Farsi, French, Haitian Creole, Hawaiian, Hmong, Italian, Japanese, Khmer, Korean, Lao, Polish, Portuguese, Russian, Somali, Spanish, Tagalog, Thai, Turkish, Ukrainian, Vietnamese, and Yiddish. Two widely used fact sheets that provide information about the LVP service and guidance for painting contractors are also available in the aforementioned 27 languages. PaintCare maintains a Spanish language translation button on its website, making the site fully bilingual. Additionally, live interpretation in Spanish and other languages is available on PaintCare’s telephone hotline by request.

C. Promotional Materials/Activities Explaining Product Stewardship

C1. Press Releases and Earned Media

PaintCare issued a statewide press release in February 2021 about the previous year’s annual report, highlighting the growth in the use of the program’s LVP service since the start of the program. PaintCare also issued local press announcements in areas where PaintCare events were being held and new sites were added. These resulted in the program being mentioned in at least 13 press stories, including coverage in the Antelope Valley Press, Redlands Community News, Malibu Surfside News, Newsbreak, Our Weekly – Los Angeles, PBS SoCal, Redlands Daily Facts, San Diego Union Tribune, The Eco Conscious Ginger, and Valley News.

C2. Digital Advertising

Monthly throughout the year, PaintCare ran digital banner ad campaigns on numerous websites promoting its key messages. Ads in a variety of dimensions were used, and some ads were translated into Spanish language. Two examples of digital banner ads are shown below:

During the year, PaintCare ran a digital ad campaign promoting its individual paint retail drop-off sites. The campaign consisted of an interactive digital banner ad displayed on websites and apps on smartphones. When viewers touch the banner, it opens to full screen displaying PaintCare’s image and message. Using the phone’s location settings, it also displays the PaintCare drop-off site nearest to the viewers at that time. This ad allows viewers to click through to the PaintCare website to learn more or call the store directly by clicking on the store phone number.

Monthly throughout the year, PaintCare ran “native display” digital ads in English and Spanish, which are ads that appear to be embedded within a web article. Native display ads were used to promote paint reuse messaging. The following image shows the PaintCare native display ad promoting using up leftover paint:

C3. Streaming Audio

From August to September 2020 and January to June 2021, PaintCare utilized streaming audio platforms Pandora, iHeartRadio, and Entercom to run 15- and 30-second audio commercials. The following script was used:

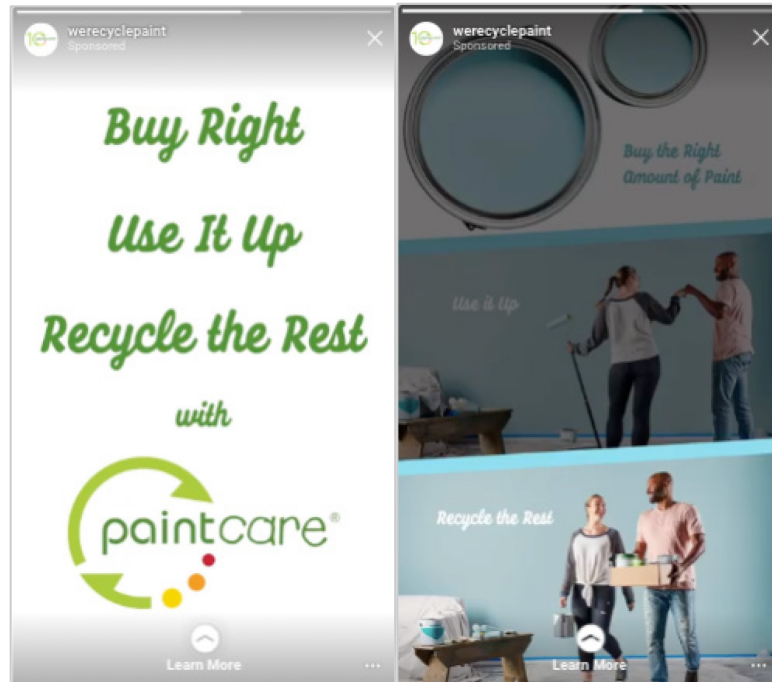

“Over the years, a lot has changed. And our paint colors reflect the styles of the times. You know another thing that’s changed? What to do with old house paint. Now you can recycle your leftover paint with PaintCare. It’s easy and convenient. And that’s a change that will never go out of style. Find a drop-off location near you at PaintCare.org.”

C4. Social Media

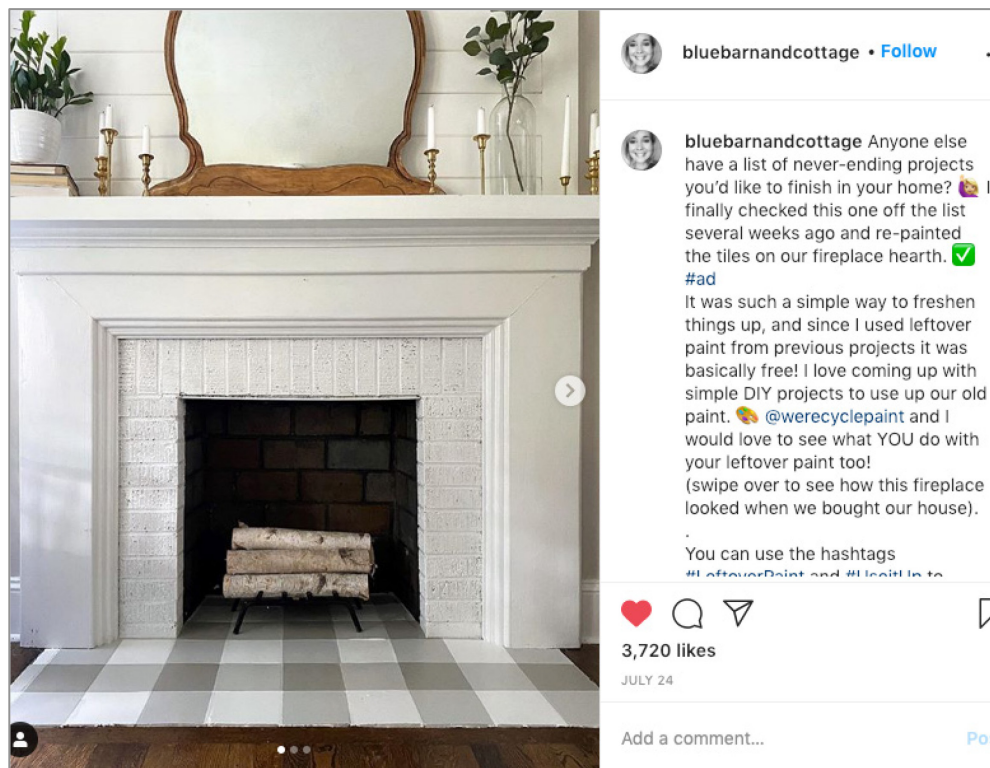

Throughout the year PaintCare continued to grow its Facebook, Instagram, and Twitter presence and posted messaging to audiences on those platforms. Social media messages included promotion of PaintCare’s three key messages: buy the right amount of paint, use up leftover paint, and recycle the rest with PaintCare. The following image shows a PaintCare Instagram post about using up leftover paint on DIY projects at home:

Monthly throughout the year PaintCare ran a variety of interactive social media advertising campaigns on Facebook, Instagram, and Pinterest promoting Buy Right, Use It Up, and Recycle the Rest messages. Some social media ads were also run in Spanish language. The following images show samples of “Instagram Stories” advertisements that allowed viewers to swipe through each stage of the painting process:

In April to June 2021, PaintCare ran an Instagram “influencer” campaign promoting its key messages. An influencer campaign means paying popular Instagram accounts to post approved, mission-aligned images and copy to large audiences that would otherwise be difficult to reach. The following image shows one of the influencer posts from user @bluebarnandcottage encouraging their thousands of followers to use up leftover paint.

C5. Video

From August to November 2020 and January to June 2021, PaintCare ran online video and connected television device commercials. The commercial used shows a single room painted and decorated several times in changing eras by contractors and a DIYer homeowner. While the styles and fashions of décor evolve with time, the leftover paint stacks up in the closet. The audience learns that, finally, in the present era there is a new solution for an ongoing problem; now you can recycle leftover paint with PaintCare. The following images are still frames from the second video commercial:

C6. Radio

Monthly throughout the year PaintCare sponsored KQED-FM's California Report program. Since the California Report is picked up by numerous public radio stations throughout the state, PaintCare's message ran thousands of times on 19 public radio organizations in over 70 cities. Additionally, an accompanying digital banner advertisement was placed on KQED's website. The following script was used:

"Support for the California Report comes from PaintCare. Ideas to use up leftover house paint taking up space can be found at PaintCare dot org."

C7. Print Advertising

In April and May 2021, PaintCare used additional funds allocated to Communications in this year's budget to send 1,764,130 direct mail cards to households across the Central Valley area. The cards were intended to raise awareness of paint recycling opportunities to a large population area and encouraged recipients to find a local drop-off site on PaintCare's site locator or schedule an LVP for large amounts of paint (though the mailer was sent in April and May, it was ordered and printed before the minimum eligibility was lowered from 200 to 100 gallons). The cards were sent to households in Fresno, Kern, Stanislaus, Tulare, San Joaquin, Merced, Sacramento, and Butte Counties. The following image shows the direct mailer:

Paint project done. Now the easy part.

RECYCLE YOUR LEFTOVER PAINT

There are 818 sites in California where households and businesses can recycle or dispose of unwanted paint, stain, and varnish all year round.

Find a drop-off location near you:
[DropOffMyPaint.com](https://www.dropoffmypaint.com)

Have a lot of paint to recycle?
Households and businesses with 200 gallons or more can contact PaintCare for a free pick-up. Visit [paintcare.org/pickup](https://www.paintcare.org/pickup).

Please call ahead to confirm business hours and ask if they can accept the type and amount of paint you would like to recycle. Sites do not accept aerosols (spray paint), leaking, unlabeled, or empty containers.

PaintCare also used newspaper and direct mail advertising to promote PaintCare drop-off events held during the year.

C8. Joint Outreach Projects with Local Government

PaintCare welcomes the opportunity to work with local HHW programs on outreach projects. PaintCare provides creative support and funding in the form of reimbursement for projects that are preapproved. This year PaintCare supported the cost for an outreach flyer distributed by Kern County Public Works to the local population about paint recycling opportunities at Kern County's facility locations. The flyer was printed in English and Spanish. The following image shows the page dedicated to paint recycling:

Kern County Public Works

in collaboration with the
PaintCare Program

encourages you to recycle your paints at several convenient locations in Kern County!

Accepted at the following County facilities:

- All Kern County Special Waste Facilities
- Bena Landfill
- Shafter-Wasco Landfill
- Taft Landfill
- McFarland-Delano Transfer Station
- Lebec Transfer Station
- Loraine-Twin Oaks Transfer Station
- Kern Valley Transfer Station

About PaintCare
PaintCare, Inc. is a non-profit organization that represents the paint manufacturing industry. The PaintCare program has established paint collection centers at several County solid waste disposal sites for the collection of unused architectural paint products from residential & commercial sources. PaintCare products have fees when purchased and are accepted at PaintCare collection centers free of charge. Paint products that do not have fees when purchased are not accepted.

Locate other PaintCare recycling centers near you at, www.paintcare.org/drop-off-locations/#find-a-drop-off-site

ACCEPTED PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based enamel (including textured coatings)
- Deck coating, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coating, rust preventatives
- Field and lawn paints

NON-ACCEPTED PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For more information, visit www.paintcare.org

HANDLING & ACCEPTANCE

- Kern County residents and small businesses only*
- Limit 15 gallons per visit
- No containers larger than 5 gallons
- Items must be in original containers with original label
- Items must have secured lid - No leaking containers
- No other Household Hazardous Waste items accepted

*A qualifying small business is one that generates no more than 220 lbs. of all hazardous waste per month.

- Qualifying small businesses must sign certificate of eligibility when bringing oil-based paint products.
- Up to 220 lbs. (~25 gallons) of oil-based paint products can be accepted from a qualifying business per month.

The Kern County Special Waste Facility also accepts most of the **non-accepted products** (listed above) along with unused paint for recycling, as well as other household hazardous waste items. For more details, visit www.KernPublicWorks.com/hazardous-waste

REDUCE. REUSE. RECYCLE.

Kern County Public Works

en colaboración con el
PaintCare Program

Le anima a reciclar sus pinturas en varios lugares convenientes en el Condado de Kern!

PRODUCTOS ACEPTADOS

- Pinturas arquitectónicas interiores y exteriores; latex, acrílico, a base de agua, alquídico, esmalte a base de aceite (incluidos los revestimientos texturizados)
- Recubrimiento de cubierta, pinturas, (incluyendo elastomérico)
- Impresores, selladores, impermeables
- Tintura
- Shellacs, lacas, barnices, uretanos (componente único)
- Impermeabilización de hormigón/masonería/selladores de madera y repelentes (no alquitrán ni a base de betún)
- Recubrimiento metálico, preventivos de óxido
- Pinturas de campo y césped

PRODUCTOS NO ACEPTADOS

- Diluyentes de pintura, minerales, disolventes
- Pinturas en aerosol (latas de aerosol)
- Pinturas de auto y marinas
- Pinturas de arte y artesanía
- Compuestos de calafateo, epoxi, pegamentos, adhesivos
- Aditivos de pintura, colorantes, tintes, resinas
- Conservantes de madera (que contienen pesticidas)
- Parcho y reparación del techo
- Productos a base de asfalto, alquitrán y betún
- Recubrimientos de 2 componentes
- Limpadores de cubiertas
- Pinturas de tráfico y señalización
- Recubrimientos de mantenimiento industrial (IM)
- Fabricante de equipos originales (OEM) (aplicación de taller) pinturas y acabados

Para más información, visite www.paintcare.org

MANEJO Y ACEPTACIONES

- Solo para residentes del Condado de Kern y pequeñas empresas*
- Limite de 15 galones por visita
- No contenedores de mas de 5 galones
- Los artículos deben estar en recipientes originales con la etiqueta original
- Los artículos deben tener tapa asegurada - No se pueden filtrar contenedores
- No se aceptan otros artículos de residuos peligrosos domésticos

*Una pequeña empresa que califica es aquella que genera no más de 220 libras de todos los residuos peligrosos por mes.

- Las pequeñas empresas que califican deben firmar el certificado de elegibilidad al traer productos de pintura a base de aceite.
- Se pueden aceptar hasta 220 libras (25 galones) de productos de pintura a base de aceite de una empresa calificada por mes.

La Instalación de Residuos Especiales del Condado de Kern también acepta la mayoría de los productos no aceptados (mencionados anteriormente) junto con la pintura no utilizada para el reciclaje, así como otros artículos de desechos peligrosos del hogar. Para más detalles, visite www.KernPublicWorks.com/hazardous-waste

Acerca de PaintCare
PaintCare, Inc. es una organización sin fines de lucro que representa la industria de fabricación de pinturas. El programa PaintCare ha establecido centros de recolección de pintura en varios sitios de eliminación de residuos sólidos del condado para la recolección de productos de pintura arquitectónica no utilizados de fuentes residenciales y comerciales. Los productos de PaintCare tienen tarifas cuando se compran y se aceptan en los centros de recolección de PaintCare de forma gratuita. No se aceptan productos de pintura que no tengan tarifas al comprarlos.

Localice otros centros de reciclaje de PaintCare cerca de usted en, www.paintcare.org/drop-off-locations/#find-a-drop-off-site

REDUSCA. REUSE. RECICLE.

C10. Annual Webinar

PaintCare typically hosts an annual public webinar, providing an opportunity for interested parties to better understand the program and to highlight key results from the previous year. This webinar typically takes place soon after the January public meeting held by CalRecycle, so as to better incorporate stakeholder feedback and recommendations from CalRecycle's annual compliance determination. The meeting was not held this year. PaintCare intends to resume holding the annual webinar in 2022.

D. Website

Nearly all PaintCare advertising and outreach efforts direct the public to PaintCare’s website for more information and to find a local paint drop-off site. PaintCare’s website is updated throughout the year. The website is easy to navigate and features topics on buying the right amount of paint, storage tips, reuse tips, and recycling. It has special pages for manufacturers and a general section for retailers, explains what products are covered by the program, and has a California-specific page with tabs for different audiences (Everyone, Contractors, Retailers, Waste Facilities, and Official Docs).

The most frequently visited part of the website is the site locator tool which can be used to find a PaintCare drop-off site in California and states with PaintCare programs.

Monthly Website Traffic from California

E. Awards

In September 2020, PaintCare received the BUILD Recycling and Waste Management award for Best Paint Recycling Initiative. The award recognized PaintCare’s more than ten years of successful paint stewardship programs across multiple U.S. states.

F. Awareness Survey

In March 2021 PaintCare ran its annual public awareness survey to measure the ongoing effectiveness of its outreach activities with the assistance of market research firm KB Insights. KB Insights analyzed the data to help PaintCare better understand trends and guide future outreach targeting.

Following are some highlights from the survey results:

- 554 surveys were completed by residents of California, providing 90% confidence in the accuracy of the measured results for the population within +/-3%.
- 43% of California respondents knew that paint can be recycled. General awareness has trended upward from 40% to 43% over the last three years.
- Of those who were aware that paint can be recycled, 68% knew where to take it and 61% knew about the fee added to paint purchases to support future recycling.
- About half of California respondents (49%) purchased paint in the year leading up to the survey. Of those, over half reported seeking help from paint retail staff (55%) or taking measurements themselves (67%) in order to purchase the right amount of paint and reduce the amount left over.
- 59% of California respondents reported that they will choose a sustainable option if they have leftover paint in the future. This includes dropping it off at a paint retail store (14%) or HHW facility (35%) or giving it away to someone else who needs it (10%).

The full report for this year's awareness survey is included in the appendix of this report.

Section 7. Audits

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program
Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(7) Audits. The annual report shall include an independent financial audit of the California Architectural Paint Recovery Program funded from the paint stewardship assessment. The audit shall be conducted in accordance with auditing standards generally accepted in the United States of America, and standards set forth in Government Auditing Standards issued by the Comptroller General of the United States. The financial audit submitted to the department shall be prepared by an Independent Certified Public Accountant (CPA). The CPA shall not perform non-audit services for the manufacturer or stewardship organization that would impair independence as defined in the Government Auditing Standards issued by the Comptroller General of the United States (e.g., accounting services, development of internal controls, management decisions). The independent financial audit shall include:

- (A) California Architectural Paint Recovery Program financial statements, as required by GAAP.
- (B) An opinion on the manufacturer or stewardship organization's compliance with the financial aspects of PRC §48700 and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations.
- (C) Findings and recommendations as they relate to the financial aspects of the Architectural Paint Recovery Program.
- (D) Management Letter, if issued, by the manufacturer or stewardship organization's CPA.

Audit

An independent financial audit was conducted of the California PaintCare program by Rogers & Company PLLC. This independent CPA firm conducted the audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that the firm plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. The audit process includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. The audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. In Rogers & Company's opinion, the financial statements of the California PaintCare program present fairly, in all material respects, the financial position as of June 30, 2021, and the changes in its net assets and its cash flows

for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The independent financial audit report of the California PaintCare program is in the appendix and addresses all requirements of Title 14, Section 18954(a)(7) of the California Code of Regulations as listed above.

Independent Auditor's Report

To the Board of Directors of PaintCare Inc.

We have audited the accompanying financial statements of PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program ("the Program"), which comprise the statement of financial position as of June 30, 2021; the related statements of activities, functional expenses, and cash flows for the year then ended; and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall

presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Program as of June 30, 2021, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also used our report dated October 22, 2021, on our consideration of PaintCare's internal control over the Program's financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering PaintCare's internal control over the Program's financial reporting and compliance.

Notes to Financial Statements

PaintCare Inc. California Architectural Paint Recovery Program - June 30, 2021

1. Nature of Operations

The California Architectural Paint Recovery Program (“the Program”) is authorized by Public Resources Code Section 48700 to implement measures to require paint manufactures to develop and implement a program to collect, transport, and process postconsumer paint to reduce the costs and environmental impacts of the disposal of postconsumer paint in California. The Program is administered by PaintCare Inc. (“PaintCare”).

PaintCare, a not-for-profit 501(c)(3) organization, was created in October 2009 by the American Coatings Association (ACA), who, working with state and local government stakeholders, passed the first ever paint product stewardship law in the United States in the state of Oregon in 2009. The paint stewardship legislation guides an industry-led, end-of-life management program for post-consumer paint, which PaintCare operates. The PaintCare Board is made up of architectural paint manufacturers and participation in PaintCare is not limited to ACA members, but open to all architectural paint manufacturers. There are no dues or registration fees associated with PaintCare.

2. Summary of Significant Accounting Policies

Basis of Accounting and Presentation

The Program’s financial statements are prepared on the accrual basis of accounting. Net assets without donor restrictions represent funds that are not subject to donor-imposed stipulations and are available for support of the Program’s operations. There were no assets with donor restrictions as of June 30, 2021.

Accounts Receivable

Accounts receivable are recorded at net realizable value and represent amounts due for post-consumer paint recovery fees. The Program provides an allowance for bad debts using the allowance method, which is based on management’s judgment considering historical information. Accounts are individually analyzed for collectability, and will be reserved based on individual evaluation and specific circumstances. When all collection efforts have been exhausted, the accounts are written-off against the related allowance. At June 30, 2021, an allowance of \$34,722 was recognized.

Investment Allocation

PaintCare invests a portion of its accumulated surplus in a portfolio with Bank of America/Merrill Lynch. The sole objective of the portfolio is to earn a return equal to the rate of inflation and thus preserve the purchasing power of its capital. Interest, dividends, changes in market value, and other investment activities are allocated to each state program based on the relative net asset balances of each state program. Oversight of the investments is provided by the PaintCare Budget and Finance Committee and by the PaintCare Board of Directors.

Revenue Recognition

The Program recognizes revenue from post-consumer paint recovery fees at the time the architectural paint product is sold by a manufacturer participant of the paint product stewardship program. Manufacturer participants in the Program pay the PaintCare recovery fee to PaintCare based on the amount of program products they sell on a monthly basis.

Program participants report their monthly unit sales of paint through a secure, HTTPS online system using their unique user ID and password. The participant must pay a paint recovery fee per unit sold, based on container size, according to the established fee schedule. As the PaintCare recovery fee is added to the wholesale price of paint and passed through uniformly to the retail purchase price of paint—so that the manufacturer, distributor, and/or retailer is made whole—in some cases, distributors or retailers have elected to undertake the obligation of the manufacturer for these fees. Thus, PaintCare has allowed remitter agreements in the Program, whereby a distributor or retailer reports and remits directly to PaintCare on behalf of a participant manufacturer's brand or brands. Reports and payment are due by the end of the month following the reporting period.

Functional Allocation of Expenses

The costs of providing the various program and supporting activities have been summarized on a functional basis in the accompanying financial statements. The statement of functional expenses presents the natural classification detail of expenses by function. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Subsequent Events

In preparing these financial statements, the Program has evaluated events and transactions for potential recognition or disclosure through October 22, 2021, the date the financial statements were available to be issued.

3. Liquidity and Availability

At June 30, 2021, financial assets available for general expenditures, that is, without donor or other restrictions limiting their use, within one year of the statement of financial position date, consist of net accounts receivable totaling \$4,040,828. There are additional liquid assets available to the Program that are the liquid assets of PaintCare as a whole. PaintCare strives to maintain liquid financial assets sufficient to cover 90 days of general expenditures for the Program. Financial assets in excess of daily cash requirements are handled and invested in money market funds and highly liquid securities by PaintCare.

4. Related Party

ACA, a related party, is a separate, 501(c)(6) nonprofit organization working to advance the needs of the paint and coatings industry and the professionals who work in it. ACA serves its members as an advocate on legislative, regulatory, and judicial issues at the federal, state, and local levels. ACA also provides members with such services as research and technical information, statistical management information, legal guidance, and community service project support and acts as a forum for the exchange of information and ideas among the industry and its business partners. ACA incorporated PaintCare for the sole purpose of implementing programs for post-consumer architectural paint, including the recovery program pursuant to Public Resources Code Section 48700. ACA maintains a controlling interest in PaintCare through the ability to appoint its Board of Directors.

In February 2011, ACA and PaintCare entered into an affiliation agreement whereby ACA charges PaintCare an administrative fee, annually, to cover the following expense categories: allocation of time incurred by PaintCare officers, allocation of other direct labor, and allocation of occupancy and infrastructure costs. The term of the agreement is for one year and automatically renews for one-year terms unless canceled by either party.

For the year ended June 30, 2021, total administrative fees charged by ACA to PaintCare were \$2,442,319, and of this amount, \$1,398,249 related to the Program. At June 30, 2021, PaintCare owed the Program \$64,406,439 related to paint recovery fees that are being held on behalf of the Program and are included in the accompanying statement of financial position.

5. Methods Used for Allocation of Expenses from Management and General Activities

The financial statements report certain categories of expenses using the direct allocation method. Each expense is assigned to a functional category based on direct usage.

6. Income Taxes

The Program itself is not subject to income taxes. The steward of the Program, PaintCare, is recognized as a tax-exempt organization under Internal Revenue Code Section 501(c)(3), and is exempt from income taxes except for taxes on unrelated business activities

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors of PaintCare Inc.

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States, the financial statements of PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program ("the Program"), which comprise the statement of financial position as of June 30, 2021; the related statements of activities, functional expenses, and cash flows for the year then ended; and the related notes to the financial statements; and have issued our report thereon dated September 22, 2021.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered PaintCare's internal control over financial reporting ("internal control") over the Program to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of PaintCare's internal control over the Program. Accordingly, we do not express an opinion on the effectiveness of PaintCare's internal control over the Program.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Program's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

EXAMINATION REPORT OVER COMPLIANCE WITH THE FINANCIAL ASPECTS OF THE PUBLIC RESOURCES CODE SECTION 48700, AND TITLE 14, DIVISION 7, CHAPTER 11, ARTICLE 2 OF THE CALIFORNIA CODE OF REGULATIONS

To the Board of Directors of PaintCare Inc.

We have examined PaintCare Inc. (“PaintCare”) California Architectural Paint Recovery Program’s (“the Program”) compliance with the financial aspects of the Public Resources Code Section 48700, and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations during the year ended June 30, 2021. Management is responsible for PaintCare’s compliance with those requirements. Our responsibility is to express an opinion on PaintCare’s compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence about PaintCare’s compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on PaintCare’s compliance with specified requirements.

In our opinion, PaintCare complied, in all material respects, with the financial aspects of the Public Resources Code Section 48700, and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations during the year ended June 30, 2021.

This report is intended solely for the information and use of the Board of Directors, management, and the California Department of Resources Recycling and Recovery, and is not intended to be and should not be used by anyone other than these specified parties.

Schedule of Findings

PaintCare Inc. - California Architectural Paint Recovery Program
for the Year Ended June 30, 2021

Section I – Summary of Independent Auditors' Results

Financial Statements

Description	Result
Type of auditor's report issued:	Unmodified
Internal control over financial reporting: Material weakness(es) identified?	No
Internal control over financial reporting: Significant deficiency(ies) identified that are not considered to be material weaknesses?	None Reported
Noncompliance material to financial statements	No

Section II – Financial Statement Findings

There were no financial statement findings reported during the 2021 audit.

Appendix C. Outreach Materials

Brochure

PaintCare Products
These products have a fee when you buy them and are accepted for drop-off at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyl, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomers)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caustic epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (for application) paints and finishes

For information about recycling and proper disposal of non-PaintCare products, please contact your garbage hauler, local environmental health agency, household hazardous waste program, or public works department.

Recycle WITH PaintCare

Places to Take Leftover Paint
Paint recycling is more convenient with PaintCare. We set up paint drop-off sites throughout the state. To find your nearest drop-off site, use PaintCare's search tool at www.paintcare.org or call our hotline at (855) PAINT09.

How to Recycle
PaintCare sites accept all brands of leftover house paint, stain, and varnish, whether recently used or many years old. Containers must be five gallons or smaller, and some types of paint are not accepted. See back panel for a list of what PaintCare accepts for recycling.

All PaintCare drop-off sites accept up to five gallons of paint per visit. Some sites accept more. Please call sites in advance to make sure they can accept the amount of paint you would like to recycle.

Make sure all paint containers have lids and original labels, and load them securely in your vehicle. Take them to a drop-off site during their regular business hours. We'll take it from there.

What Happens to the Paint?
PaintCare makes sure that your leftover paint is remixed into recycled paint, used as a fuel, made into other products, or is properly disposed if no other beneficial use for it can be found.

Who Can Use the Program?
Households may drop off as much latex or oil-based paint as the site is willing to accept.

Businesses may drop off any amount of latex-based paint the site is willing to accept. To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/9020 for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products.

Do You Accept Large Volumes of Paint?
If you have at least 100 gallons of paint to recycle at your business or home, ask about our free large-volume pickup service. Please visit www.paintcare.org for more details or to request a pickup.

PaintCare Fee
PaintCare is funded by a fee paid by paint manufacturers for each can of paint sold in the state. Manufacturers pass the fee to retailers, who then apply it to the price of paint. Retailers are encouraged to show the fee on customer receipts. The fee is based on the size of the container as follows:

\$ 0.00	Half pint or smaller
\$ 0.35	Larger than half pint up to smaller than 1 gallon
\$ 0.75	1 gallon
\$ 1.60	Larger than 1 gallon up to 5 gallons

Not a Deposit
The fee is not a deposit—it is part of the purchase price. The fee is used to fund the costs of running the program, including recycling, public education, staffing, and other expenses.

Contact Us
To learn more or find a drop-off site, please visit www.paintcare.org or call (855) PAINT09.

California

Recycle with PaintCare

A Program to Manage Leftover Paint

Each year about 800 million gallons of architectural paint are sold in the United States. Did you know that about 10 percent goes unused and is available for recycling?

California's paint stewardship law requires the paint manufacturing industry to develop a financially sustainable and environmentally responsible program to manage postconsumer (leftover) architectural paint. Paint manufacturers established PaintCare, a nonprofit organization, to run paint stewardship programs in states with applicable laws.

The program includes education about buying the right amount of paint, tips for using up remaining paint, and setting up convenient recycling locations throughout the state.

Places to Take Old Paint

Paint recycling is more convenient with PaintCare. We set up paint drop-off sites throughout the state. To find your nearest drop-off site, use PaintCare's search tool at www.paintcare.org or call our hotline at (855) PAINT09.

PaintCare Products

These products have fees when you buy them and are accepted for free at drop-off sites at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For information about recycling and proper disposal of non-PaintCare products, please contact your garbage hauler, local environmental health agency, household hazardous waste program or public works department.

In-Store Poster

About the Paint Recycling Program

Paint manufacturers created PaintCare, a nonprofit organization, to provide convenient places for households and businesses to recycle leftover paint. PaintCare sets up paint drop-off sites throughout states that pass paint stewardship laws.

PAINTCARE PRODUCTS

These products have a fee when you buy them and are accepted for drop-off at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

PAINTCARE FEE

The PaintCare fee is applied to the purchase price of architectural paint as required by law. The fee funds collection, transportation, and processing costs. The fee is based on container size as follows:

\$0.00	Half pint or smaller
\$0.35	Larger than half pint up to smaller than 1 gallon
\$0.75	1 gallon
\$1.60	Larger than 1 gallon up to 5 gallons

For more information or to find a place to take your unwanted paint for recycling, please ask for the PaintCare brochure, visit paintcare.org, or call (855) PAINT09.

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

XX-PIEN-0421

About the PaintCare Program

Paint manufacturers created PaintCare, a non-profit organization, to set up convenient places for households and businesses to recycle leftover paint. PaintCare sets up paint drop-off sites throughout states that adopt paint stewardship laws.

PAINTCARE PRODUCTS

These products have fees when purchased and are accepted for drop-off at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based
Deck coatings, floor paints, (including textured coatings)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen based)

- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturing (OEM) (shop application) paints and finishes
- Containers that are leaking or empty, and containers without original manufacturer's labels are not accepted at retail drop-off sites.

PAINTCARE FEE

PaintCare fees are applied to the purchase price of architectural paint sold in the state as required by state law. Fees are applied to each container and vary by the size of the container as follows:

- Half pint or smaller \$ 0.00
- Larger than half pint and smaller than 1 gallon \$ 0.35
- 1 gallon \$ 0.75
- More than 1 gallon up to 5 gallons \$ 1.60

Recycle with PaintCare!

Buy Right: Consult with painting professionals and retailers to buy the right amount of paint and reduce potential waste.

Use It Up: Use up leftover paint on the surface you are painting, on additional painting projects around the house, or give it to someone else in your community.

Recycle the Rest: When you can't use up leftover paint, drop it off with PaintCare to get it recycled!

Visit www.paintcare.org to find a year-round paint drop-off site near you or schedule a large volume pickup.

PaintCare™
RECYCLING MADE EASY

What types of paint products can be recycled with PaintCare?

PAINTCARE PRODUCTS
The following are products included in the program. When purchased, the PaintCare fee is applied. These products are accepted at no additional cost when dropped off at PaintCare's participating drop-off sites.

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based
- Deck coatings, floor paints (including textured coatings)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS
The following are non-PaintCare products and are not included in the program. When purchased, the PaintCare fee is not applied. They are not accepted at PaintCare's participating drop-off sites.

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, mixes
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturing (OEM) (shop application) paints and finishes
- Containers that are leaking or empty, and containers without the original printed manufacturer's label are not accepted at retail drop-off sites

PROGRAM FUNDING
The PaintCare fee is applied to the purchase price of architectural paint sold in your state as required by law. The fee is based on container size:

Half pint or smaller	\$0.00
Larger than half pint up to smaller than 1 gallon	\$0.35
1 gallon	\$0.75
Larger than 1 gallon up to 5 gallons	\$1.60

Fact Sheet for Painting Contractors

PAINT STEWARDSHIP LAWS IN THE U.S.
Information for Painting Contractors
Updated — June 2021

How do paint stewardship laws affect painting contractors?

PaintCare
PaintCare is a nonprofit organization established by the American Coatings Association to implement manufacturer-led paint stewardship programs in states that pass paint stewardship laws. PaintCare currently operates programs in California, Colorado, Connecticut, District of Columbia, Maine, Minnesota, Oregon, Rhode Island, Vermont, and Washington, and is developing a program for New York.

Paint Drop-Off Sites
The primary requirement of paint stewardship laws is for paint manufacturers to set up paint drop-off sites at retailers and other locations where households and businesses can take postconsumer (leftover) architectural paint, free of charge. Most drop-off sites are paint and hardware stores; others are waste transfer stations, recycling centers, landfills, and household hazardous waste (HHW) facilities. Participation as a drop-off site is voluntary. There are more than 2,000 drop-off sites across all PaintCare programs. To find a drop-off location, visit www.paintcare.org.

Fee and Funding
As required by laws in PaintCare jurisdictions, the program is funded by a fee (known as the PaintCare fee) that must be added by manufacturers to the wholesale price of all architectural paint sold in the state, including paint sold in stores and online. This fee is paid by manufacturers to PaintCare to fund program operations including paint collection and recycling, consumer education, and program administration. Displaying the fee on receipts is optional for retailers; however, PaintCare encourages retailers to show the fee to inform consumers about the program.

The PaintCare fee is based on container size and varies from one program to another:

California, Colorado, Connecticut, Maine, Rhode Island
\$ 0.00 — Half pint or smaller
\$ 0.35 — Larger than half pint up to smaller than 1 gallon
\$ 0.75 — 1 gallon
\$ 1.60 — Larger than 1 gallon up to 5 gallons

District of Columbia, Oregon, Washington
\$ 0.00 — Half pint or smaller
\$ 0.45 — Larger than half pint up to smaller than 1 gallon
\$ 0.95 — 1 gallon up to 2 gallons
\$ 1.95 — Larger than 2 gallons up to 5 gallons

Minnesota
\$ 0.00 — Half pint or smaller
\$ 0.45 — Larger than half pint up to smaller than 1 gallon
\$ 0.99 — 1 gallon up to 2 gallons
\$ 1.99 — Larger than 2 gallons up to 5 gallons

Vermont
\$ 0.00 — Half pint or smaller
\$ 0.49 — Larger than half pint up to smaller than 1 gallon
\$ 0.99 — 1 gallon
\$ 1.99 — Larger than 1 gallon up to 5 gallons

New York
The fee structure for New York is not yet known. PaintCare will propose a fee structure in the program plan for New York, and it will be based on the anticipated costs to run the program. The fee must be approved by the state oversight agency. Visit www.paintcare.org for updates.

Recommendations for Contractors

Preparing Estimates
When estimating jobs, contractors should take the PaintCare fee into account by checking with suppliers to make sure their quotes for paint products include the fee.

Pass Fee to Customers
PaintCare suggests that painting contractors pass on the fee to customers in order to minimize the fee they pay. Tell customers that quotes include the PaintCare fee and that the fee funds a statewide paint recycling program.

Convenient Paint Drop-Off Sites
With paint drop-off sites conveniently located throughout PaintCare states, anyone can drop off their leftover paint year-round. Many contractors report cleaning out their storage spaces and no longer stockpiling paint. Contractors now have an answer for customers who ask what to do with old paint they no longer want; they can recommend that they use PaintCare drop-off sites too.

Most drop-off sites take 5 gallons per customer per trip, though some take more. All retail drop-off sites take paint from businesses, although some transfer stations and household hazardous waste programs only serve households. Always call a drop-off site ahead of visiting to make sure they have space for your volume and to confirm they take paint from businesses.

Pickup Service for Large Volumes
Painting contractors, property managers, and others with at least 100 gallons of leftover paint to recycle may qualify to have their paint picked up by PaintCare for free. To learn more about this service or to request an appointment, visit www.paintcare.org/pickupcall (855) PAINT09.

Business Limits
To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VOC0 for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. Non-exempt generators will be able to use the program under development in the New York program.)

What Products Are Covered?
The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in containers of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM) coatings (original equipment manufacturer (OEM), or specialty coatings).

PAINTCARE PRODUCTS

- Interior and exterior architectural coatings: latex, acrylic, water based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not for oil or silicate-based)
- Metal coatings, rust preventatives
- Field and base paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, tints
- Wood preservatives (containing pesticides)
- Roof paints and repair
- Asphalt, tar, and bitumen based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings (Original Equipment Manufacturer (OEM) (shop application) paints and finishes)

- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives

- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Fact Sheet for Large Volume Pickup Service

PAINT STEWARDSHIP PROGRAMS IN THE U.S.
Large Volume Pickup (LVP) Service
 Updated — June 2021

PaintCare offers a free pickup service to painting contractors, property managers, and others with large amounts of leftover architectural paint.

Who is PaintCare?
 PaintCare is a nonprofit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

Paint Drop-Off Sites
 In states with a paint stewardship program, PaintCare's primary effort is to set up conveniently located drop-off sites—places where households and businesses may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit (usually from 5 to 20 gallons). To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) PAINT09.

Large Volume Pickups
 For those who have accumulated a large volume of paint, PaintCare offers a pickup service. Large volume means 100+ gallons, measured by container size (not liquid volume). On a case-by-case basis, PaintCare may approve a pickup for less than 100 gallons. After two or three pickups, you may be switched to a repeat pickup service (see next page).

Drums and Bulked Paint Are Not Accepted
 PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels, do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a paint recycling company or a hazardous waste transportation company to assist you.

HOW TO REQUEST A LARGE VOLUME PICKUP

- Sort and count your paint**
 Tally the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains, and (2) oil-based paint and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).
- Fill out the LVP Request Form**
 Fill out the Large Volume Pickup Request Form on our website. Upon request, the form is also available as a PDF and can be returned to PaintCare by email, fax, or regular mail. Visit www.paintcare.org/lvp or call PaintCare for the form.

Scheduling
 After reviewing your form, PaintCare staff will either approve your site for a pickup or inform you of the best place to take your paint if you do not meet the requirements. If approved, you will be put in contact with our licensed hauler to schedule a pickup. It may be several weeks before your pickup occurs.

On the Day of Your Pickup
 Sort your products into the two categories noted above and store them in an area that has easy access for the hauler. If the paint is far from where the hauler parks, the path between should be at least four feet wide to accommodate movement of the boxes.

The hauler is responsible for packing the paint into the shipping containers. Once your paint is properly packed and loaded onto the hauler's truck, you will sign a shipping document and receive a copy for your records. Your paint will then be taken to an authorized processing facility for recycling.

Repeat Service for Large Volume Pickups
 For businesses that generate large volumes of unwanted paint on a regular basis, a service for recurring direct pickups is available. With this service, you will be provided with empty bins and can request a pickup when at least three bins are filled. Your full bins will be swapped with empty bins each time a pickup occurs. You will be required to sign a contract with PaintCare, and PaintCare will provide onsite training on how to properly pack the paint.

Business Limits
 To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators will be able to use the program under development in New York. Contact PaintCare for details about the New York program.)

If You Have Products We Don't Accept
 PaintCare does not accept all paints (such as aerosols and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that households contact their local household hazardous waste (HHW) program. Businesses should contact their local HHW program to determine if they are eligible to participate. Some HHW programs allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

What Products Are Covered?
 The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in container sizes of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including insulated coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- Z-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

PAINT STEWARDSHIP PROGRAMS IN THE U.S.

Large Volume Pickup (LVP) Service

Updated — June 2021

PaintCare offers a free pickup service to painting contractors, property managers, and others with large amounts of leftover architectural paint.

Who Is PaintCare?

PaintCare is a nonprofit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

Paint Drop-Off Sites

In states with a paint stewardship program, PaintCare's primary effort is to set up conveniently located drop-off sites—places where households and businesses may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit (usually from 5 to 20 gallons). To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) PAINT09.

Large Volume Pickups

For those who have accumulated a large volume of paint, PaintCare offers a pickup service. Large volume means 100+ gallons, measured by container size (not liquid volume). On a case-by-case basis, PaintCare may approve a pickup for less than 100 gallons. After two or three pickups, you may be switched to a repeat pickup service (see next page).

Drums and Bulked Paint Are Not Accepted

PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels; do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a paint recycling company or a hazardous waste transportation company to assist you.

HOW TO REQUEST A LARGE VOLUME PICKUP

1. Sort and count your paint

Tally the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains, and (2) oil-based paint and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).

2. Fill out the LVP Request Form

Fill out the Large Volume Pickup Request Form on our website. Upon request, the form is also available as a PDF and can be returned to PaintCare by email, fax, or regular mail. Visit www.paintcare.org/pickup or call PaintCare for the form.

Scheduling

After reviewing your form, PaintCare staff will either approve your site for a pickup or inform you of the best place to take your paint if you do not meet the requirements. If approved, you will be put in contact with our licensed hauler to schedule a pickup. It may be several weeks before your pickup occurs.

On the Day of Your Pickup

Sort your products into the two categories noted above and store them in an area that has easy access for the hauler. If the paint is far from where the hauler parks, the path between should be at least four feet wide to accommodate movement of the boxes.

The hauler is responsible for packing the paint into the shipping containers. Once your paint is properly packed and loaded onto the hauler's truck, you will sign a shipping

document and receive a copy for your records. Your paint will then be taken to an authorized processing facility for recycling.

Repeat Service for Large Volume Pickups

For businesses that generate large volumes of unwanted paint on a regular basis, a service for recurring direct pickups is available. With this service, you will be provided with empty bins and can request a pickup when at least three bins are filled. Your full bins will be swapped with empty bins each time a pickup occurs. You will be required to sign a contract with PaintCare, and PaintCare will provide onsite training on how to properly pack the paint.

Business Limits

To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators will be able to use the program under development in New York. Contact PaintCare for details about the New York program.)

If You Have Products We Don't Accept

PaintCare does not accept all paints (such as aerosols and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that households contact their local household hazardous waste (HHW) program. Businesses should contact their local HHW program to determine if they are eligible to participate. Some HHW programs allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

What Products Are Covered?

The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in container sizes of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)

- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Appendix D. Site Guidelines

Drop-Off Site Guidelines

This document contains detailed information of PaintCare’s program guidelines and operations procedures. In combination with the state-specific guidelines, this comprehensive document can be used for self-training yourself and your staff without PaintCare staff. The training slides that proceeds this document summarizes the most important information of this Drop-Off Site Guidelines document in a concise manner. The training slides are used during training by PaintCare staff and can be used as a supplement for self-training.

Contents

- Guidelines Section 1. Training and Safety
- Guidelines Section 2. General Guidelines
- Guidelines Section 3. Collection Bins and Storage Area
- Guidelines Section 4. Accepting PaintCare Products
- Guidelines Section 5. Limit per Participant
- Guidelines Section 6. Working with Haulers
- Guidelines Section 7. Spill Response
- Guidelines Section 8. Inspections and Records
- Guidelines Section 9. Direct Reuse

Retailer Guidelines Section 1. Training and Safety

Training

For the safety of the program and your staff, all employees handling PaintCare products must receive training in product identification, acceptance, handling, packaging, inspection, and emergency response procedures before collecting PaintCare products or engaging in any PaintCare program activities.

Training helps ensure that employees conduct PaintCare products collection activities in a safe manner that protects workers and the environment.

Ensure that drop-off site employees are equipped for and understand hazards associated with PaintCare products.

Maintain training plans and records for each employee. Record staff training using the form included in the PaintCare training binder.

Safety

Store personal protective equipment (PPE) and spill response equipment in an accessible location adjacent to the collection bins. Ensure those materials are protected from the weather.

The drop-off site must be equipped with appropriate emergency response equipment including a fire extinguisher, spill kit and PPE. Monthly inspections of equipment are recommended.

PaintCare products collection activities need to follow general safety practices including proper lifting techniques.

Post emergency procedures and emergency contact numbers including police, fire department and emergency services by a phone — in close proximity to the drop-off site area, if possible.

If applicable, develop and maintain an emergency action plan as required by OSHA.

If required by federal, state or local law, familiarize police, fire departments, and emergency response teams with the layout of your facility, properties of PaintCare product(s) handled at your facility, and evacuation routes.

For your convenience, a form for recording emergency contacts is included in the PaintCare binder.

Retailer Guidelines Section 2. General Guidelines

PaintCare Provides Your Site

- Operations binder with recordkeeping forms/logs
- Signage identifying your site as a PaintCare drop-off site
- Educational print materials for the public

PaintCare's Hauler Provides Your Site

- Paint collection bins
- Labels and/or markings for paint collection bins

General Guidelines for Drop-Off Sites

Each PaintCare drop-off site has unique logistical and operational considerations. Each drop-off site must make its own decisions and use its best judgment to operate in the safest manner possible in accordance with applicable law. To ensure the highest standards of safety for you and your staff, drop-off sites must:

- Have appropriate signage that informs the public of the hours of operation

- Accept PaintCare products from participants during your regular advertised or posted operating hours
- Display PaintCare signage to identify you as a drop-off site – signage should be posted in a highly visible area, at the entrance of your site
- Assist and supervise participant when they come to drop off PaintCare products. Drop-off site staff should greet participants and must verify eligibility of the participant and their leftover paint products as PaintCare products (see Section 5 for a description of PaintCare products)
- **IMPORTANT:** Never allow a participant to open a PaintCare product container
- Have adequate space, staffing, and training to collect and store PaintCare products
- Provide a secure space for empty and full collection bins
- Except for PaintCare products that you choose to manage on-site (e.g., via direct reuse), place all PaintCare products immediately in collection bins approved for use by PaintCare and provided by its contractors
- Pack only PaintCare products into collection bins
- Schedule shipments of PaintCare products from your drop-off site
- Maintain all records relating to the program (see Section 9)
- Train staff to be familiar with the requirements and practices of this guide
- Follow state-specific guidelines (located in this binder, following the cover page)

Retailer Guidelines Section 3. Collection Bins and Storage Area

Storage Area and Collection Bin Placement

Establish a dedicated storage area for collection bins and PaintCare products.

Place collection bins on an impermeable surface (e.g., sealed wood floor) at all times.

Place collection bins away from ignition sources, storm drains and floor drains.

Ensure there is adequate ventilation if stored indoors.

Protect collection bins from precipitation and temperature extremes. If stored outdoors, keep collection bins under cover (to prevent exposure to precipitation) and move indoors at times to protect against temperature extremes. If you store collection bins outdoors, you may need approval from your local fire or hazardous materials oversight agency.

Comply with any local fire codes or other regulations that might pertain to your storage of collection bins at your site.

Maintain enough space around collection bins to inspect for leakage and emergency access.

Use good housekeeping standards; keep paint storage areas clean and orderly.

Setting Up, Packing and Maintaining Collection Bins

Collection bins must be set up, used, and closed according to the manufacturer's closure instructions. PaintCare's haulers should set up the collection bins that they provide, unless otherwise requested by the drop-off site staff.

Ensure cardboard bins have liners. The liners provide secondary containment to contain liquids in the event a can leaks while in storage or transit. Reusable plastic bins that are leak-proof by design don't need liners. PaintCare's haulers are responsible for including secondary containment with all collection bins they provide to the drop-off site staff.

Collection bins must be structurally sound. If you see any evidence of damage that may cause a leak or spill, notify PaintCare immediately.

Mark the collection bin with the date the first PaintCare product is placed in it.

Place paint containers in bins immediately. Keep collection bins closed except when adding PaintCare products.

Pack 5-gallon buckets on the bottom layer of the collection bins for stability.

Pack all PaintCare products (cans, buckets) upright and as tight as possible in the collection bins to protect contents from shifting and leaking in transit.

Do not open containers to verify product.

Do not overfill collection bins; allow enough space for a lid to fit securely.

Do not take PaintCare product out of the bin.

Security

The drop-off site and collection bin storage area must be secured and locked when closed or not attended.

Only drop-off site staff should have access to the collection bins and storage area until the collection bins are ready for pick-up by PaintCare's hauler. Never allow "self-serve," public access to the collection bins.

Retailer Guidelines Section 4. Accepting PaintCare Products

What are PaintCare Products

PaintCare drop-off sites should accept only PaintCare products (architectural paint products) for management under the PaintCare program.

Listed below are the primary examples of architectural paint products accepted by the PaintCare program and paint or paint-related products not accepted by the PaintCare program.

Generally, PaintCare products include latex and oil-based house paint, stains, and clear coatings (varnish, shellac, etc.). The program excludes anything that is:

- in an aerosol spray can
- intended and labeled “for industrial use only”
- mostly used in the manufacture of equipment
- on the list of specifically excluded products for some other reason

PaintCare products are classified as either latex (water-based) or oil-based (alkyd) and the classification is important in order to decide how the product should be handled and processed. Knowing how to tell the difference between latex and oil-based products is also important in determining which types of businesses/organizations can use the PaintCare program (if your site accepts paint from this audience).

PaintCare Products and Non-PaintCare Products

Acceptable products (PaintCare products)

- Interior and exterior paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings and floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Unacceptable products (Non-PaintCare products)

- Paint thinner, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For more information, please see www.paintcare.org/products-we-accept.

If non-PaintCare Products end up in a drop-off site's bin, such products will not be returned to the drop-off site and will be managed by PaintCare's hauler. Haulers identify Non-PaintCare Products and report all instances to PaintCare. PaintCare staff will notify the site of any contamination in the bins. If the problem persists, additional training may be provided.

Who Can Drop Off PaintCare Products

The program accepts PaintCare products from the following:

Households. Households may drop off any volume of PaintCare product, subject to the volume limit set by the site.

Businesses/Organizations. Non-households may also drop off any volume of latex PaintCare product, subject to the volume limit set by the site. Non-households may only drop off oil-based PaintCare products if they comply with federal and state hazardous waste generator rules that, among other criteria, require that the business/organization (1) generates no more than 100 kilograms (about 25 gallons or 220 pounds) of hazardous waste per calendar month, and (2) does not accumulate more than 1,000 kg of hazardous waste at any time. Painting contractors and commercial property owners typically meet these criteria. For more information about these criteria, please see: <http://www.paintcare.org/vsqq>

How to Know If a Business/Organization Qualifies

Each business or organization is responsible for determining its own generator status under applicable law.

When a business/organization has oil-based PaintCare product to drop off at your site, it must sign the Paint Drop-Off Log included in this binder to verify that it qualifies to use the program for oil-based paint. The log includes an explanation of the requirements. (If a business/organization has only latex paint, it does not need to sign the log.)

Once a business/organization signs the Paint Drop-Off Log, you may accept oil-based paint from that business/organization to the extent permissible under applicable law. Paint Drop-Off Logs may be reviewed by PaintCare or government agencies and compared with a list of registered hazardous waste generators to verify that only qualified businesses/organizations are using the program for their oil-based paint.

Acceptable Containers vs. Unacceptable Containers

Before accepting products from participants for management under the PaintCare program, drop-off site staff must (1) check the condition of the container for acceptance in the program, and (2) check the product label to verify that it contains a PaintCare product.

Acceptable

- The PaintCare product must be in its original container*
- The container is labeled as containing one of the designated PaintCare products listed below*
- The container must be in good condition and not leaking*
- The container must be 5 gallons in size or smaller
- The container contains dry latex paint

Not Acceptable

- The container is not original (e.g., paint was transferred into a jar)*
- The container does not have an original label (Drop-off sites permitted to accept household hazardous waste may accept unlabeled and leaking containers by following the procedures described below.)
- The container is leaking or has no lid*
- The container is larger than 5 gallons
- The container is empty

Unlabeled and Leaking Containers

A drop-off site permitted to accept household hazardous waste may, at its discretion, choose to accept unlabeled and/or leaking containers if it follows the protocols below and otherwise complies with all applicable laws:

Unlabeled Containers: A drop-off site may accept containers that do not have an original label if a staff person appropriately trained in identifying unknown wastes (1) identifies the material in the container as a PaintCare product, and (2) applies a label identifying the contents to the container before placing it in a collection bin.

Leaking Containers: A drop-off site may accept a leaking container or a container with no lid if an appropriately trained drop-off site staff person (1) verifies that the container contains a PaintCare product, (2) places the contents of the leaking/open container into an appropriate substitute container (which can include bulking such PaintCare products into 55-gallon drums), and (3) applies an appropriate label to the substitute container.

Refusing an Unacceptable Product or Container

Do not accept non-PaintCare products from any participant unless they are accepted as part of normal site operations and are not placed in PaintCare collection bins. Do not accept into the PaintCare program any PaintCare products in unacceptable containers unless your site is permitted to manage household hazardous waste as described on the previous page.

When refusing a PaintCare product, drop-off site staff must explain why the PaintCare product cannot be accepted (e.g., material is not part of the program, cannot accept material from non-exempt generator). If you have a participant with products that your location cannot manage, refer the participant to their local hazardous waste disposal program, garbage hauler, environmental health agency, or public works department. Local contact information is provided following the cover page of the binder.

Retailer Guidelines Section 5. Limit per Participant

How to Handle Storage Limitations

While the PaintCare program intends to collect as much PaintCare product as possible, we recognize that your drop-off site may have storage limitations. PaintCare drop-off sites, in agreement with PaintCare, may limit the amount of PaintCare products they accept per participant.

If your collection bins are completely full, inform the participant that you are temporarily unable to accept PaintCare products and redirect them to the nearest alternative PaintCare drop-off site (refer to the site locator at www.paintcare.org or contact PaintCare hotline at 855-724-6809) or ask them to come back at a later date. Contact the PaintCare hauler immediately to have your collection bins picked up and replaced.

If you have a participant with a significant amount of PaintCare products that your location cannot manage, ask the participant to contact PaintCare directly for additional assistance. We may direct the participant to another PaintCare drop-off site that can manage the large load or offer a direct pickup.

Large Volume Pickups (LVP)

PaintCare offers a free pick-up service to painting contractors, property managers, households and others with a large volume of leftover PaintCare products. Typically, a minimum of 200 gallons (by container size) is required to qualify for the LVP service.

To refer a participant to the LVP service:

- Provide the participant an LVP fact sheet
- Ask the participant to request a pick-up using the online LVP form
- The LVP fact sheet and online form are available at www.paintcare.org (select the “Large Volume Pickup” button on the homepage)
- For additional questions, refer the participant to PaintCare for assistance

Retailer Guidelines Section 6. Working with Haulers

PaintCare contracts with haulers for the delivery of supplies, delivery of empty collection bins, and pick-up of full collection bins.

Scheduling the Hauler to Pick Up Collection Bins

When you anticipate your collection bins will be full within your site’s pick-up timeframe (generally 5 business days in urban areas, 10 business days in rural areas), call your hauler to schedule a pickup, or use their online order system if they have one. The name and contact information of your hauler is provided at the front of your training binder.

When establishing an appointment for pick-up, please indicate:

- Your site is a PaintCare drop-off site
- Name of drop-off site and address
- Your name
- Your phone number
- Number of full collection bins to be picked up
- Number of empty collection bins needed for replacement

Preparing Collection Bins for Pickup

On the scheduled pickup day, collection bins and your loading area must be readily accessible to the hauler for quick and efficient loading.

- Identify which bins are full and ready for pickup
- Make sure the path between your bins and the hauler's vehicle is clear and at least 4 feet wide to accommodate movement of bins

The hauler will bring the necessary shipping documents and labels for the collection bins. The hauler is responsible for labeling, loading and off-loading collection bins, and will provide a copy of the shipping documents to the drop-off site. Sign and keep a copy of the shipping documents for your records.

Retailer Guidelines Section 7. Spill Response

Spills

The information in this section will assist with spills from damaged or leaking program containers. It is important that all drop-off site staff understand corrective actions to minimize exposure to people and the environment.

Collection bins must be kept in a clean, accessible area. Clean up any spill or release of PaintCare product immediately and place spill residue in a sealed container, label it and place sealed container in a collection bin. Contact the hauler or PaintCare to replenish spill kit materials as needed.

Reporting

Report spills as required by law, summarized in the state-specific guidelines at the front of this binder. Contact PaintCare within 24 hours of making such a report.

Prominently post emergency contact numbers including police, fire department, and emergency services.

Spill Response Procedures

Always follow all applicable spill response procedures set forth in your operating permit or as otherwise required by applicable law.

If a spill is small enough to be managed by drop-off site staff, follow these steps:

- Isolate the area and restrict access to the spill
- Ensure personal safety, put on protective gear (glasses and gloves) provided in the spill kit
- Stop the movement of paint by placing the leaking container upright or in a position where the least amount will spill, and place leaking container in plastic bags provided in spill kit, or into the spill kit container

- Contain the spill by placing absorbent pads or granular absorbent around and on the spill – if outdoors, place barriers around storm drains to prevent a release to the environment
- Collect the contaminated absorbent material and place it in plastic bag(s) or spill kit container, along with the leaking container and contaminated PPE, seal the bag(s) and place in the collection bin
- Remove any clothing that may be contaminated, wash thoroughly to remove spilled material from your hands or body
- Replace any used spill control supplies
- Document the date, location, and amount and type of material spilled

Retailer Guidelines Section 8. Inspections and Records

Inspections and Record Keeping

Drop-off site staff are responsible for regularly inspecting collection bins and spill kits to ensure that such materials are in proper working order, include any necessary labeling, etc. Please report any damaged materials or other problems to PaintCare immediately so PaintCare may arrange for prompt replacement or repair.

Maintain the following records for a minimum of 3 years:

- Internal and external inspection records
- Paint Drop-Off Logs (provided in PaintCare training binder)
- Direct Reuse and Reprocessed Paint Waivers (provided in PaintCare training binder)
- Employee training records (provided in PaintCare training binder) – discussed in Section 1
- Bills of lading and/or other documentation required by applicable law for outgoing shipments of PaintCare products

Retailer Guidelines Section 9. Direct Reuse and Paint Processing

Direct reuse is an additional service permitted for certain site types. These guidelines only apply to sites with a contract with PaintCare to engage in direct reuse. Paint retailers are not direct reuse sites.

Requirements for Direct Reuse

PaintCare encourages reuse of leftover paint through direct reuse (also known as a “paint exchange” or “swap shop”). Reuse sites return good quality unused paint to the local community at low or no cost.

When selecting products to place in the direct reuse area, products must be in their original container, have an original label, and be in good physical and aesthetic condition. Contents must be liquid and relatively new. The container must be closed securely before placing it in the reuse storage area. Containers must never be opened by participants at the drop-off site. Direct reuse products must be displayed by drop-off site staff in a storage area separate from the PaintCare collection bins.

Requirements for Paint Reprocessing

PaintCare also encourages on-site latex paint reprocessing. On average, 30-60% of latex paint brought to the site is reprocessed back into usable paint available for return to the community. Containers of reprocessed paint offered to the public at a drop-off site must not display any unauthorized third-party branding; generally new containers are used to pack reprocessed paint.

A household hazardous waste facility permitted to conduct paint reprocessing must have and follow its own procedures for sorting and reprocessing paint. At a minimum, these procedures will include:

- Open each container to visually inspect the contents
- Determine if the contents are latex, oil-based, or other paint
- Determine if the condition of the paint is suitable for recycling (e.g., not moldy, rusty, etc.)
- Sort containers according to type, quality, and color

For containers of products suitable for paint reprocessing:

- Bulk contents into larger container (e.g. drum) for mixing
- Mix paint until homogenous
- Repackage paint into 5-gallon or smaller containers
- Label as reprocessed paint

For containers of products unsuitable for reprocessing, either:

- Close container and pack in a collection bin (must be completely resealed and not leaking)
- Sort and bulk the contents into a drum

Participant Waiver

Participants taking paint from a drop-off site must sign the Direct Reuse and Reprocessed Paint Waiver log included in the training binder (or an approved equivalent thereof) explaining that the paint is taken “as-is” with no guarantee of quality or contents. The participant must read, complete, and sign the form and the staff must verify what has been taken by the participant. The staff must record on the log the volume taken by each participant and the total volume.

Appendix E. Registered Manufacturers

Registered Manufacturers California Paint Stewardship Program as of 6/30/2020

1. 2Guard, 1276 S Lyon St, Santa Ana, CA 92705
2. AP Nonweiler Co., 3321 County Rd A, Oshkosh, WI 54901
3. Ace Hardware Paint Division, 2200 Kensington Ct, Oakbrook, IL 60523
4. Acrylatex Coatings & Recycling Inc, 1001 W Kirkwall Rd, Azusa, CA 91702
5. Acrylic Technologies Inc, 8914 NE Alderwood Rd, Portland, OR 97220
6. Advanced Protective Products, 17 -12 River Rd, Fair Lawn, NJ 07410
7. AFM Safecoat (See American Formulating & Manufacturing)
8. Akzo Nobel Paints, 16651 W Sprague Rd, Strongsville, OH 44136
9. All Deck (See Environmental Coating Systems Inc)

Appendix G. Awareness Survey

FY2021 Awareness Survey

Introduction

In March 2021, PaintCare surveyed 554 individuals throughout California in order to measure consumer behavior, paint recycling awareness, and effectiveness of outreach activities. Surveys were conducted via web survey using a panel of respondents reflective of the demographic composition of California. The sample size provides 90% confidence in the accuracy of the measured results for the population within +/-3%.

The results were analyzed by KB Insights to help PaintCare better understand trends in the data and help guide future targeting. Data from all PaintCare state programs were included in the analysis, providing the additional benefit of comparing results between programs throughout the nation. The following report focuses only on California outcomes for FY2021.

FY2021 California results are presented below in four categories: behavioral outcomes, awareness outcomes, marketing outcomes, and recycling intentions.

A. Behavioral Outcomes

- About half (50%) of California respondents purchased paint in the last year. Of those, over half reported seeking help from paint retail staff and taking measurements themselves in order to purchase the right amount of paint and reduce the amount left over.
- About half of respondents who knew that paint can be recycled said they had taken paint to be recycled in the past, a key performance index used to track recycling success.
- The percentages of people who store paint at their home/business vs. those who do not are also used as a barometer for recycling success. In FY2021, 70% of respondents said they were storing paint at home; 30% were not. Among those who were storing paint, the median amount stored was “less than 1 gallon.”

Question: “How much leftover or unwanted paint do you have in your home or business at this time (e.g., primer, interior or exterior house paint, stain, deck sealer, or clear finishes like varnish)?” (Sample size: 668)

Answer	Percent
None	30
Less than 1 gallon	23
1 to 5 gallons (would fit in a cardboard box)	28
5 to 15 gallons (would fit in a shopping cart)	7
15 to 30 gallons (would fit in 2 shopping carts)	3
More than 30 gallons	2
I have some paint, but I do not know how much.	7

- Over 80% of stored paint is left over from jobs that consumers did themselves or that a contractor left behind.

Question: Where did most of the leftover paint come from that you currently have in your home/business? (Sample Size: 387)

Answer	Percent
I did some painting myself and I had some leftover paint when I was done.	61
I hired someone to paint, and they left it behind.	21
I found the paint in my home or business when I moved in.	7
I don't remember where the paint came from.	6
I am a professional painter or contractor, and it is from one or more of my jobs.	2
Other	4

FY21 results for each of the aforementioned measures were similar to those in FY19 (i.e., within the +/-3% confidence interval).

Comparison of FY2019 to FY2021 Behavioral Outcomes

Behavioral Trend (Question)	FY2019 Percent	FY2020 Percent	FY2021 Percent
Have you purchased paint in the last year? For the purposes of this question, "paint" includes primer, interior or exterior house paint, stain, deck sealer, and clear finishes like varnish.	48	51	50
Before purchasing, did you take any measurements of the area to be painted to figure out how much paint was needed for the project?	65	66	67
Did the staff of the paint retail store assist you with figuring out exactly how much paint you needed for your specific project?	55	55	55
Have you ever taken paint somewhere to be recycled?	51	51	51
How much leftover or unwanted paint do you have in your home or business at this time? (% "None")	29	28	30

B. Awareness Outcomes

- 43% of FY21 respondents knew that paint can be recycled prior to receiving the survey.
- Of those, 68% knew where to take it and 61% knew about the fee added to paint purchases to support future recycling.

Comparison of FY2019 and FY2020 Awareness Outcomes

Awareness Trends (Question)	FY2019 Percent	FY2020 Percent	FY2021 Percent
Prior to this survey, did you know that paint can be recycled?	40	42	43
Are you aware that when you buy paint in California, there is a small fee added to the price to pay for a program to recycle any leftover paint you have?	58	62	61
If you wanted to take paint somewhere to be recycled, do you know where to take it?	65	70	68

C. Marketing Outcomes

- 13% of respondents said they had heard of PaintCare before completing the survey.
- 9% remembered a PaintCare advertisement.

- 12% had heard of PaintCare via other means, such as from a friend/relative/colleague, brochure/card at a paint retail store, sign/poster at a paint retail store, from a local hazardous waste center, received information in the mail, Facebook/social media, and/or online research.
- FY2021 results for each of the aforementioned marketing measures appear to have increased slightly since the previous year; however, because changes fall within the +/-3% confidence interval, our confidence level falls below 90%.

Comparison of FY2019 and FY2020 Marketing Outcomes

Marketing Trend (Question)	FY2019 Percent	FY2020 Percent	FY2021 Percent
Have you ever heard of PaintCare before?	11	13	13
Do you recall seeing an advertisement for PaintCare in the last several months?	8	10	9
Do you recall hearing about PaintCare in any of the following other ways (list)?	10	12	12
Have you ever attended one of PaintCare's one-day collection events?	8	10	NA

D. Recycling Intentions

- In order to contrast future recycling intentions to past behavior, questions were asked both about how consumers have disposed of paint in the past and what they intend to do in the future.
- More than a quarter of respondents reported that they chose a sustainable option for paint disposal in the past, including: dropping it off at a paint retail store (5%) or HHW (19%), or giving it away to someone else who needs it (3%).

Question: Which has been your preferred method to dispose of leftover or unwanted paint? (Sample Size: 545)

Answer	Percent
Stored it in the basement, garage, or a closet because I intended to use it someday	23
Not applicable - I have never stored or disposed of leftover or unwanted paint.	19
Took it to a household hazardous waste facility/event or transfer station	19
Dried it out and put it in the trash	10
Put cans of liquid paint in the trash	5

Took it to a paint, hardware, or lumber store	5
I don't remember what I did with the leftover or unwanted paint.	5
Gave it away to family, friends, or a community organization	3
Poured paint down the drain	4
Other (please specify)	3
Left it behind when I moved	2
Mixed it with hardener or kitty litter and put it in the trash	2

- In contrast, over half of respondents reported that they will choose a sustainable option if they have leftover paint in the future, such as dropping it off at a paint retail store (14%) or HHW (35%) or giving it away to someone else who needs it (10%).

Question: If you wanted to get rid of unwanted paint in the near future, what would you most likely do with it? (Sample Size: 662)

Answer	Percent
Take it to a household hazardous waste facility/event or transfer station	35
I don't know	18
Dry it out and put it in the trash	10
Take it to a paint/hardware/lumber store	14
Give it away to a family member, friend, or community organization	10
Put cans of liquid paint in the trash	5
Mix it with hardener or kitty litter and put it in the trash	4
Other (please specify)	2
Pour paint down the drain	4

Finally, respondents were asked to rate the likelihood that they would recycle paint in the future. 78% said they would be either extremely likely or likely to recycle paint in the future. Note: that this question was added in FY2020 so no trend information is available for this metric.
