

Reporting Requirements by Activity Type

Food Waste Self-Haulers	2
Contract Haulers	3
Transfer/Processing Facilities and Operations (Transfer/Processor)	4
Disposal Facilities (Landfills, Transformation Facilities, & EMSW Conversion Facilities).....	7
Recycling and Composting Facilities and Operations (Recycler/Composter).....	10
Brokers and Transporters (Broker/Transporter)	11

Food Waste Self-Haulers

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Food waste self-hauler	Outflow	In-state	Solid waste disposal	Tons sent by material type and RDRS ID/contact information.
Food waste self-hauler	Outflow	In-state	Recycling and composting	Tons sent by material type and RDRS ID/contact information.
Food waste self-hauler	Outflow	In-state	End users	Tons sent by material type and end user category.
Food waste self-hauler	Outflow	Out-of-state	Solid waste disposal	Tons sent by material type and RDRS ID/contact information.
Food waste self-hauler	Outflow	Out-of-state	Recycling and composting	Tons sent by material type and region.
Food waste self-hauler	Outflow	Out-of-state	End users	Tons sent by material type and end user category.

Contract Haulers

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Contract hauler	Outflow	In-state	End users (land application only)	Tons sent by material type and end user category by region.
Contract hauler	Outflow	Out-of-state	Solid waste disposal	Tons sent by jurisdiction of origin & source sector; and RDRS ID/contact information.
Contract hauler	Outflow	Out-of-state	Green beneficial reuse	Tons sent by jurisdiction of origin and RDRS ID/contact information.
Contract hauler	Outflow	Out-of-state	Non-green beneficial reuse	Tons sent by material type and RDRS ID/contact information.
Contract hauler	Outflow	Out-of-state	Recycling and composting	Tons sent by material type and region.
Contract hauler	Outflow	Out-of-state	Designated waste disposal	Tons sent and RDRS ID/contact information.
Contract hauler	Outflow	Out-of-state	Disaster debris disposal	Tons sent and RDRS ID/contact information.
Contract hauler	Outflow	Out-of-state	End users	Tons sent by material type and end user category by region.

Transfer/Processing Facilities and Operations (Transfer/Processor)

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Transfer/processor	Inflow - transfer/processor	Either	Designated waste	Tons accepted.
Transfer/processor	Inflow - transfer/processor	Either	Disaster waste	Tons accepted.
Transfer/processor	Inflow - transfer/processor	Either	Non-green beneficial reuse	Tons accepted by material type.
Transfer/processor	Inflow - transfer/processor	Either	Green beneficial reuse	Tons accepted.
Transfer/processor	Inflow - transfer/processor	Either	Solid waste	Tons accepted.
Transfer/processor	Inflow - direct-haul	Either	Designated waste	Tons accepted.
Transfer/processor	Inflow - direct-haul	Either	Disaster waste	Tons accepted.
Transfer/processor	Inflow - direct-haul	Either	Non-green beneficial reuse	Tons accepted by material type.
Transfer/processor	Inflow - direct-haul	Either	Green beneficial reuse	Tons accepted by jurisdiction of origin.
Transfer/processor	Inflow - direct-haul	Either	Solid waste	Tons accepted by jurisdiction of origin.
Transfer/processor	Outflow	In-state	Solid waste disposal	Tons sent by jurisdiction of origin and destination RDRS ID/contact information. Report percentage of solid waste outflows that were direct-hauled vs. accepted from other transfer/processors, and report source sector (% residential, commercial, self-hauled) for all direct-hauled tons sent.

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Transfer/processor	Outflow	In-state	Recycling and composting	Tons sent by material type and RDRS ID/contact information.
Transfer/processor	Outflow	In-state	End users	Tons sent by material type and end user category by region.
Transfer/processor	Outflow	In-state	Non-green beneficial reuse	Tons sent by material type and RDRS ID/contact information.
Transfer/processor	Outflow	In-state	Green beneficial reuse	Tons sent by jurisdiction of origin and RDRS ID/contact information.
Transfer/processor	Outflow	In-state	Brokering/transporting	Tons sent by material type and RDRS ID/contact information.
Transfer/processor	Outflow	In-state	Designated waste disposal	Tons sent by RDRS ID/contact information.
Transfer/processor	Outflow	In-state	Disaster debris disposal	Tons sent by RDRS ID/contact information.
Transfer/processor	Outflow	Out-of-state	Solid waste disposal	Tons sent by jurisdiction of origin and destination RDRS ID/contact information. Report percentage of solid waste outflows that were direct-hauled vs. accepted from other transfer/processors, and report source sector (% residential, commercial, self-hauled) for all direct-hauled tons sent.
Transfer/processor	Outflow	Out-of-state	Recycling and composting	Tons sent by material type and region.
Transfer/processor	Outflow	Out-of-state	End users	Tons sent by material type and end user category by region.
Transfer/processor	Outflow	Out-of-state	Non-green beneficial reuse	Tons sent by material type and RDRS ID/contact information.

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Transfer/processor	Outflow	Out-of-state	Green beneficial reuse	Tons sent by jurisdiction of origin and RDRS ID/contact information.
Transfer/processor	Outflow	Out-of-state	Brokering/transporting	Tons sent by material type and RDRS ID/contact information.
Transfer/processor	Outflow	Out-of-state	Designated waste disposal	Tons sent by RDRS ID/contact information.
Transfer/processor	Outflow	Out-of-state	Disaster debris disposal	Tons sent by RDRS ID/contact information.

Disposal Facilities (Landfills, Transformation Facilities, & EMSW Conversion Facilities)

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Disposal facility	Inflow - direct haul	Either	Designated waste	Tons accepted.
Disposal facility	Inflow - direct haul	Either	Disaster waste	Tons accepted.
Disposal facility	Inflow - direct haul	Either	Non-green beneficial reuse	Tons accepted by material type. Only landfills can accept material for beneficial reuse.
Disposal facility	Inflow - direct haul	Either	Green beneficial reuse	Tons accepted by jurisdiction of origin. Only landfills can accept material for beneficial reuse.
Disposal facility	Inflow - direct haul	Either	Solid waste	Tons accepted by jurisdiction of origin & source sector.
Disposal facility	Inflow - transfer-processor	Either	Designated waste	Tons accepted by RDRS ID/contact information.
Disposal facility	Inflow - transfer-processor	Either	Disaster waste	Tons accepted by RDRS ID/contact information.
Disposal facility	Inflow - transfer-processor	Either	Non-green beneficial reuse	Tons accepted by material type and RDRS ID/contact information. Only landfills can accept material for beneficial reuse.
Disposal facility	Inflow - transfer-processor	Either	Green beneficial reuse	Tons accepted by RDRS ID/contact information. Only landfills can accept material for beneficial reuse.
Disposal facility	Inflow - transfer-processor	Either	Solid waste	Tons accepted by RDRS ID/contact information. Only landfills can accept material for beneficial reuse.
Disposal facility	Outflow	In-state	Solid waste disposal (material generated on-site)	Tons sent by material type and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Disposal facility	Outflow	In-state	Recycling and composting	For material generated on-site, tons sent by material type and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.
Disposal facility	Outflow	In-state	End users	Tons sent by material type and end user category by region.
Disposal facility	Outflow	In-state	Non-green beneficial reuse	For material generated on-site, tons sent by material type and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.
Disposal facility	Outflow	In-state	Green beneficial reuse	For material generated on-site, tons sent and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.
Disposal facility	Outflow	In-state	Brokering/transporting	For material generated on-site, tons sent by material type and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.
Disposal facility	Outflow	Out-of-state	Solid waste disposal (material generated on-site)	For material generated on-site, tons sent and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
				and report according to reporting requirements for transfer/processors.
Disposal facility	Outflow	Out-of-state	Recycling and composting	For material generated on-site, tons sent by material type and region. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.
Disposal facility	Outflow	Out-of-state	End users	Tons sent by material type and end user category by region.
Disposal facility	Outflow	Out-of-state	Non-green beneficial reuse	For material generated on-site, tons sent by material type and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.
Disposal facility	Outflow	Out-of-state	Green beneficial reuse	For material generated on-site, tons sent and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.
Disposal facility	Outflow	Out-of-state	Brokering/transporting	For material generated on-site, tons by material type and RDRS ID/contact information. For material received and directly transferred without processing (not generated on-site), must register and report according to reporting requirements for transfer/processors.

Recycling and Composting Facilities and Operations (Recycler/Composter)

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Recycling and composting facility or operation	Outflow	In-state	Solid waste disposal	Tons sent by material type and RDRS ID/contact information.
Recycling and composting facility or operation	Outflow	In-state	Recycling and composting	Tons sent by material type and RDRS ID/contact information.
Recycling and composting facility or operation	Outflow	In-state	End users	Tons sent by material type and end user category by region.
Recycling and composting facility or operation	Outflow	In-state	Non-green beneficial reuse	Tons sent by material type and RDRS ID/contact information.
Recycling and composting facility or operation	Outflow	In-state	Green beneficial reuse	Tons sent and RDRS ID/contact information.
Recycling and composting facility or operation	Outflow	In-state	Brokering/transporting	Tons sent by material type and RDRS ID/contact information.
Recycling and composting facility or operation	Outflow	Out-of-state	Solid waste disposal	Tons sent by material type and RDRS ID/contact information.
Recycling and composting facility or operation	Outflow	Out-of-state	Recycling and composting	Tons sent by material type and region.
Recycling and composting facility or operation	Outflow	Out-of-state	End users	Tons sent by material type and end user category by region.
Recycling and composting facility or operation	Outflow	Out-of-state	Non-green beneficial reuse	Tons sent by material type and RDRS ID/contact information.
Recycling and composting facility or operation	Outflow	Out-of-state	Green beneficial reuse	Tons sent and RDRS ID/contact information.
Recycling and composting facility or operation	Outflow	Out-of-state	Brokering/transporting	Tons sent by material type and RDRS ID/contact information.

Brokers and Transporters (Broker/Transporter)

Reporting Entity	Inflow/Outflow	In-state/Out-of-state	Material Stream	What To Report
Broker or transporter	Outflow	In-state	Solid waste disposal	Tons sent by material type and RDRS ID/contact information.
Broker or transporter	Outflow	In-state	Recycling and composting	Tons sent by material type and RDRS ID/contact information.
Broker or transporter	Outflow	In-state	End users	Tons sent by material type and end user category by region.
Broker or transporter	Outflow	In-state	Non-green beneficial reuse	Tons sent by material type and RDRS ID/contact information.
Broker or transporter	Outflow	In-state	Green beneficial reuse	Tons sent and RDRS ID/contact information.
Broker or transporter	Outflow	In-state	Brokering/transporting	Tons sent by material type and RDRS ID/contact information.
Broker or transporter	Outflow	Out-of-state	Solid waste disposal	Tons sent by material type and RDRS ID/contact information.
Broker or transporter	Outflow	Out-of-state	Recycling and composting	Tons sent by material type and region.
Broker or transporter	Outflow	Out-of-state	End users	Tons sent by material type and end user category by region.
Broker or transporter	Outflow	Out-of-state	Non-green beneficial reuse	Tons sent by material type and RDRS ID/contact information.
Broker or transporter	Outflow	Out-of-state	Green beneficial reuse	Tons sent and RDRS ID/contact information.
Broker or transporter	Outflow	Out-of-state	Brokering/transporting	Tons sent by material type and RDRS ID/contact information.
