## NOTICE

## To: All Interested Parties

Subject: Biannual Report of Beverage Container Sales, Returns, Redemption, and Recycling Rates

Public Resources Code Section 14551 requires the Department of Resources Recycling and Recovery (CalRecycle) to report biannually on the redemption and recycling rates for each six-month period within 130 days from the end of that period. This notice conveys the Biannual Report of Redemption and Recycling Rates for the second half of 2022 and the full calendar year 2022. The table below is for all material. Material specific rates are provided on pages 2-11.

| Reporting Period | Recycling Rate | Sales Containers | Recycled Containers |
| :--- | :---: | ---: | ---: |
| Jan - June 2022 | $75 \%$ | $12,819,282,916$ | $9,641,365,042$ |
| July - Dec 2022 | $66 \%$ | $15,015,098,894$ | $9,908,660,334$ |
| CY 2022 | $70 \%$ | $27,834,381,810$ | $19,550,025,376$ |

The recycling rate decline for the second half of the year is consistent with the seasonal downward trend observed over the life of the recycling program.

The recycling rate is the number of CRV beverage containers redeemed divided by the number of CRV beverage containers sold which are derived from reports received by CalRecycle from distributors, whereas recycled container counts are derived from the redemption weight (from shipping reports) multiplied by the container per pound rate.

Please note that the recycling and redemption rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned.

If you have any questions about this report, please contact Amy Cameron, Assistant Director, at (916) 323-4248.

Sincerely,

Rachel Machi Wagoner
Director

## Calculation of Redemption and Recycling Rates

A = containers returned from all program types (RC, CS, CP, SP)
$B=$ refillables returned to and reported by beverage distributors
$C=$ postfilled, or non-CRV, containers returned from all program types (RC, CS, CP, SP)
$D=$ number of beverage containers sold
Redemption Rate $=(A+B+[C-(0.05 \times(A+B))]) / D \times 100$ (The value in brackets [ ] is included only when greater than zero.)
Recycling Rate $=(A+B) / D \times 100$

| Container per Pound Rates (CRV / <br> Postfilled) | Aluminum | Glass | \#1 PET | \#2 HDPE | \#3 PVC |
| :--- | :--- | :--- | :--- | :--- | :--- |
| July - December 2022 (RCs Only) | $30.2 / 31.4$ | $2.01 / 0.88$ | $24.4 / 6.8$ | $7.3 / 4.6$ | $9.7 /$ NA | | Container per Pound Rates (CRV / <br> Postfilled) | \#4 LDPE | \#5 PP | \#6 PS | \#7 Other |
| :--- | :--- | :--- | :--- | :--- | Bimetal | July - December 2022 (RCs Only) | $41.1 /$ NA | $10.8 /$ NA | $110.1 /$ NA |
| :--- | :--- | :--- | :--- |

## Footnotes:

*Please note that the recycling and redemption rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned. On the other hand, the Semi-Annual Report on the Status of the Beverage Container Recycling Fund, does not include this two-month lag. The Semi-Annual Report presents a month-to-month calculation, meaning that sold beverage containers in one month are calculated against containers returned that same month. This difference is the primary factor in any difference between the sales and returns numbers in the Biannual Report compared to the numbers in the Semi-Annual Report.

${ }^{1}$ Due to the addition of new beverages on January 1, 2000 from the passage of SB332, the calculation of the redemption and recycling rates for 2000 was based on the sales and return data reported from March - December 2000.
This is to account for the two month sales lag. However, the totals for the sales, recycled, refillable and postfilled columns are for January - December 2000. Beginning 2003, all recycling and redemption rates are presented as whole numbers.
${ }^{2}$ Please note that the recycling and redemption rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned.

On the other hand, the Quarterly Report on the Status of the Beverage Container Recycling Fund, does not include this two-month lag. The Quarterly report presents a month-to-month calculation, meaning that sold beverage containers in one month are calculated against containers returned that same month. This difference is the primary factor in any difference between the sales and returns numbers in the Biannual Report compared to the numbers in the Quarterly Report
