

## Rigid Plastic Packaging Container (RPPC) Compliance Certification - Product Manufacturer Compliance Certification

### Source Reduction - Reduced Container Weight Compliance Option

Certification Measurement Period (Year)   (January 1 through December 31)

**D. Product Manufacturer Data**

Product Manufacturers must submit the certification information described in the regulations: [14CCR Section 17945.3\(c\) and \(d\)\(2\)](#)

Include all reportable RPPCs in this certification for the measurement period/calendar year. *Sample line of data shown below.*

Include all products in RPPCs offered for sale or sold in California during the measurement period (even if products became discontinued, and/or the total quantity sold by Dec. 31 is zero.)

*If product packaging was changed during the measurement period, please discuss the changes with your CalRecycle representative.*

Indicate the compliance option formula(s) used to calculate the compliance rate: [14CCR 17945.5\(d\)\(1\) and 17945.5\(d\)\(4\)](#)

Please check the appropriate box:  Source Reduction formula for each single rigid plastic packaging container line (14CCR Section 17945.5(d)(1))  Source Reduction formula for averaging multiple rigid plastic packaging container lines (14CCR Section 17945.5(d)(4))

Container Line	Description of the Type of each RPPC (i.e. jar, bottle, clamshell, etc.)	The Product Name or Advertised Brand Name	SKU, Product Code, Model Number or Bar Code (optional)	Volume or Equivalent Capacity of each current RPPC <sup>1</sup> (include units)	Weight of each RPPC <i>After</i> Source Reduction (current weight in grams) "W <sub>S</sub> "	Weight of each RPPC <i>Prior</i> to Source Reduction (previous weight in grams) "W <sub>N</sub> "	Date of Source Reduction (i.e. mm/yyyy)	Plastic Resin Type of each RPPC <sup>2</sup>	Total Quantity Sold During Measurement Period <sup>3</sup>	Is Data Based on Sales in California or Nationally (CA or US)	Name of the associated Container Manufacturer <sup>4</sup>	Percentage each RPPC was Source Reduced as calculated using the formula(s) in Section 17945.5(d) "Percent Source Reduced"
#1	bottle	XYZ Cleaner	5248	14 fl.oz.	37.00	50.00	02/2016	HDPE	2,500	CA	Containers R-US	26.00%

<sup>1</sup> The capacity or size must be expressed in the same unit of volume that is used on the container label; and for products that are sold based on weight or a numeric count, the size should be reported on an equivalent volume basis. CalRecycle uses the common dictionary definition of Volume.

<sup>2</sup> If the reduction was achieved by substituting a different material type for a material that previously constituted the principle material (switching resins), then it is not a sourced reduced container per Section 17942(a)(2)(A).

<sup>3</sup> This data should include: (A) Direct sales by the product manufacturer; (B) Sales through distributors, franchises, dealers, and agents; (C) All mail-order and Internet sales.

<sup>4</sup> Product Manufacturers must also include (in the Compliance Certification submission) the associated container manufacturer (who made each container) and a copy of any Container Manufacturer Certification(s) and information pursuant to Section 17945.4 (see CalRecycle's Container Manufacturer Certification model template). The Product Manufacturer is responsible for ensuring that its report is consistent with any Container Manufacturer Certification obtained.
