

0:00
the town of paradise was shattered in
0:01
2018 by the most destructive fire in
0:04
California history determined survivors
0:06
concern for the environment has
0:08
prioritized rebuilding the town's
0:10
recycling collection program to bring
0:12
back a sense of normalcy and purpose with
0:14
the help of nearly \$200,000 in Grant
0:16
funds from Cal recycle for this
0:18
particular Grant we installed 60 bins to
0:20
replace all our community beverage and
0:23
recycling containers throughout our
0:25
parks in the walkways that's one of the
0:27
beauties of this grant was being able to
0:30
reestablish some consistency in the town
0:32
and it's like a little Beacon of
0:33
rebuilding the town of paradise did more
0:35
than invest in New Recycling bins we
0:38
made a commercial showcasing how to
0:40
properly dispose of Beverage containers
0:42
and that these new Bins were being put
0:44

in all the community spaces and the
0:45
parks and showed everybody that and said
0:47
remember to continue to recycle Paradise
0:49
strong even the little things help those
0:51
little things helped California's
0:53
beverage container recycling program
0:55
keep more than 482 billion beverage
0:57
containers out of our streets Rivers
1:00
landfills over the past three decades
1:02
these bins do more for paradise and give
1:04
a convenient place to recycle cans and
1:06
bottles postfire these recycling bins
1:08
help strengthen the feeling of community
1:11
it's something that we all do together
1:14
and I think that's a really important
1:15
message Coast fire is that it's really
1:17
hard to do any of this by yourself but
1:19
together we can make a really big
1:24
difference
