1
00:00:11.210 --> 00:00:13.099
Good afternoon all.

2
00:00:13.270 --> 00:00:27.109
It's 10'clock, so we'll get going. I'm Andrew Parrish. I'll be doing most of the walk through for you joined by Chris Bria, which will cover part of it. And then also Peter stockless from our Rdrs side.

3
00:00:27.660 --> 00:00:44.130
So for this particular webinar, we're gonna go a little bit out of order, but just an intro of wire. Here we are here to cover the 2,002 electronic annual report. We made some minor updates. No, no crazy overhaul like we did last year.

4
00:00:44.380 --> 00:00:52.960
And it's mostly just because of your feedback to hopefully make it a better user experience. Add some more functionality, add some more tool tips.

5
00:00:53.060 --> 00:00:58.819
clarify what needs to be reported, and those types of changes

6
00:01:02.400 --> 00:01:08.399
just cover the instructions for the Q. A real fast, and then we'll switch over to doing the walk through.

7
00:01:09.300 --> 00:01:13.389
So please type your question or some of your question into the Q. A. Pane?

8
00:01:14.170 --> 00:01:23.220
It just makes it a lot easier for us to track those questions and responses and make sure we address everything as opposed to putting the questions in the chat

9
00:01:24.510 --> 00:01:33.269
the question should kind of focus on the ear report and kind of questions of how to report and what to report.

10
00:01:33.940 --> 00:01:37.339
and we'll go through those questions on a first come for surfaces.

11
00:01:39.060 --> 00:01:49.869
and then Ray is kind of assisting with logistics side of things, but when prompted you must
unmute yourself on your end, so you can state your name and affiliation. Ask your question.

12
00:01:50.360 --> 00:02:05.089
and if you cannot unmute or you're viewing to the Calipa page. You can submit your questions
also to the Slcp organics@calrecycle.ca, dot Gov email inbox.

13
00:02:05.210 --> 00:02:10.360
and we will from time to time. Check that inbox and make sure there's no questions in there.

14
00:02:12.340 --> 00:02:13.869
So with that.

15
00:02:15.370 --> 00:02:17.420
I go ahead and switch over

16
00:02:18.690 --> 00:02:22.859
and then probably pass it because they're gonna go a little bit out of order. Where is it? There it
is.

17
00:02:24.620 --> 00:02:25.470
Okay.

18
00:02:29.280 --> 00:02:34.829
So to start here. your screen probably looks a lot like this.

19
00:02:39.340 --> 00:02:42.189
Sorry typing the wrong thing.

20
00:02:47.980 --> 00:02:55.679

So on this main screen, only your, the jurisdictions that you're able to access the electronic and your reports will populate here

21
00:02:56.040 --> 00:03:11.199
for demonstration purposes today. And just to kind of note how we know that this yellow bar across the top shows that we're in a staging environment. So there may be some slight tweaks. Actually, no, it could release today. So everything should be in. There should be very similar to what you see today.

22
00:03:11.660 --> 00:03:15.709
but we're going to use Sonoma County as kind of our example, because

23
00:03:16.300 --> 00:03:33.029
it's a regional agency. So it's kind of the maximum extent of a report. So if you're only reporting for a single jurisdiction. Just keep in mind and all of those grids you will only have one row to report on, not multiple in the example that we use here.

24
00:03:34.830 --> 00:03:36.090
So since we have

25
00:03:36.210 --> 00:03:41.039
Peter Stockless with ourdrs to answer some potential questions.

26
00:03:41.130 --> 00:03:52.160
and this first part, we're going to jump straight to disposal rate, calculation and calculation factors and go through that, and then we'll jump through kind of the changes on the rest of the tabs.

27
00:03:52.370 --> 00:03:56.390
So with that, I'm going to pass it over to Crispia and Peter Stockless.

28
00:04:03.540 --> 00:04:08.039
and just give us a minute while we transition with the screen share.

29
00:04:31.390 --> 00:04:33.349
Put on. I'm picking my screen.

30
00:04:35.650 --> 00:04:36.909
You good to go

31
00:04:53.400 --> 00:04:54.360
right

32
00:04:55.170 --> 00:04:58.789
sorry about that. I I have a few different screens open.

33
00:05:00.120 --> 00:05:08.830
yes. So we're going to start with the disposal rate calculation because we have Peter here from
our Rdrs group as well. the

34
00:05:09.070 --> 00:05:24.899
our Drs data was downloaded into the production annual reports early this morning, and it would
be based on all the data that was input. no, by close, a business, yes, or close a business Tuesday.

35
00:05:25.500 --> 00:05:26.310
If

36
00:05:28.280 --> 00:05:46.369
you see any discrepancies in what you have, please. you can use the Rdrs web reports Peter can
explain a few more of those, and before I get into the calculator. I want to pass off to Peter to
describe some of the Rdrs.

37
00:05:46.960 --> 00:05:48.940
reports and calculations.

38
00:05:49.470 --> 00:06:02.429
Peter Staklis: Yeah, sure. Thank you. Chris. Hello there! Peter stackless, with the work on the
side terms of managing the system and developing it and maintaining it so for public reports.

39
00:06:02.800 --> 00:06:22.499
Peter Staklis: to get the arduous reports. Probably the easiest way is there? I think there's a link
here, or you could search for Rdrs. And then there, if you go to the page. There's a link for artists

reports. there are reports that so your show your jurisdiction tonnage. report one and report 2 will show it to you, I think. Report one is

40
00:06:22.610 --> 00:06:24.770
Peter Staklis: the summary for the whole year.

41
00:06:24.780 --> 00:06:39.780
Oh, okay, you got the screen. I said. I' a bunch of different screens out. But I was trying to find it. I was like, it's on one of these. Yeah. So it says, overall jurisdiction tons for disposal and disposal related uses. So this one will give you a

42
00:06:39.920 --> 00:06:41.840
Peter Staklis: basically the same.

43
00:06:41.980 --> 00:07:05.010
Peter Staklis: It won't be the same data that's in the calculator, because this one's always changing. So if in our Drs landfills or transfer processors revise their data, and the disposal changes for your jurisdiction. Then that'll be updated here. But it doesn't get Updated in the year, because I'm sure Chris has mentioned that the data is moved over once, and and that was yesterday. So that data is static.

44
00:07:05.470 --> 00:07:08.770
Peter Staklis: But you can always go here and then look and see how your

45
00:07:08.890 --> 00:07:16.339
Peter Staklis: it's like yourself, as regional. You see our jurisdiction, and you can look at your tons, and then it's laid out by

46
00:07:17.700 --> 00:07:22.210
Peter Staklis: kind of the best thing. Look, as a landfill includes host assigned tons.

47
00:07:23.300 --> 00:07:31.420
Peter Staklis: Oh, sorry. The forest column there landfill includes host assigned tons due to missing report. And so that is like your total tons

48
00:07:31.490 --> 00:07:38.909

Peter Staklis: in the system for that year, which is 22. Since that we're that's what we're concerned with, and then host assigned means.

49
00:07:39.430 --> 00:07:47.129
Peter Staklis: I don't want to go, and not because it probably take too long, but it just means that the tonnage were, as was assigned to a jurisdiction because

50
00:07:47.540 --> 00:07:50.360
Peter Staklis: various factors. One of the factors is

51
00:07:50.530 --> 00:07:57.640
Peter Staklis: a report up the stream where the origins for that for those tons would have been found is not submitted.

52
00:07:57.660 --> 00:08:01.919
Peter Staklis: So the data is host assigned to the facility that

53
00:08:02.130 --> 00:08:04.710
Peter Staklis: the receiver said it came from.

54
00:08:05.190 --> 00:08:11.499
Peter Staklis: So say in that case, like a lantel that it got it from Fremont Transfer Station. Well, then.

55
00:08:11.930 --> 00:08:22.570
Peter Staklis: if Fremont didn't submit their report for a quarter, then those towns would be assigned to Fremont, and in the jurisdiction that that the Fremont transfer station is. So that's one of the ideas.

56
00:08:23.330 --> 00:08:45.499
Peter Staklis: But in general, just use this report as a good reference to see your overall tons, and then what tons are host assigned? And then it has the other types of tons there, like tons from that are sent to transformation facilities or Ems. W. Facilities. And that's the the columns next to landfill includes host assigned tons to the missing reports.

57
00:08:46.730 --> 00:08:49.470
Peter Staklis: Did you want more, Chris, or

58
00:08:49.920 --> 00:08:51.550
Peter Staklis: I think that's good enough.

59
00:08:53.600 --> 00:09:03.280
Sorry sorry it took me as I was trying to remember. Yeah, who gets hopes to sign to who has transformation. It's like I like to to have that right off the back.

60
00:09:05.140 --> 00:09:28.779
 no, that's a that's a good review of the reports. I don't think we. You won't necessarily want to go to in depth on these. I think another one would be report 6, right? Yeah. Report 2 and report. 6, I think, are good ones. Do you want to cover number 6? Really quick? Sure, that's a little some more complicated one. But

61
00:09:31.120 --> 00:09:34.549
Peter Staklis: so this port will show you in greater detail

62
00:09:35.300 --> 00:09:40.279
Peter Staklis: where your tons are coming from in terms of being assigned as a jurisdiction.

63
00:09:40.430 --> 00:09:43.789
Peter Staklis: So if you can show some output, Chris

64
00:09:45.390 --> 00:09:46.679
Peter Staklis: probably want to.

65
00:09:48.900 --> 00:10:05.749
Peter Staklis: and you can do it by quarter, and that's up to those buttons up there quarterly, some or yearly some. So if you just wanted to see if our quarter, which is the actual data submitted, or by the facilities kind of some for that quarter. You pick that. But if you want to see it combined for the year. Then you pick yearly some.

66
00:10:06.590 --> 00:10:14.450
Peter Staklis: So he's picking Los Angeles County, so you'd see all the jurisdictions for Los Angeles county. and obviously you can't pick the quarter

67

00:10:14.960 --> 00:10:20.859
Peter Staklis: because you pick yearly some. So it's Sunday at all. So you don't have to click on key one or Q. 2, etc.

68
00:10:31.250 --> 00:10:41.480
Peter Staklis: So it shows it by different stream, the 2 streams that we're origin this track. So you have solid waste, and you'd also have a green material. Adc.

69
00:10:41.500 --> 00:10:53.029
Peter Staklis: so it looks like it's primarily showing solid waste. But there, if you look at the bottom right there, there's 4,316 records, so don't get fooled like. If you only see a few records, you have to look at that, and then

70
00:10:53.400 --> 00:10:59.520
Peter Staklis: you can either expand it to show about 200 records, or there's an export button. If you just wanna.

71
00:10:59.780 --> 00:11:10.000
Peter Staklis: it'll basically download an excel file. and then you can. That'll have all the data that you just output there and that screen. So you'd have all the 4,000 plus records.

72
00:11:10.130 --> 00:11:21.460
Peter Staklis: So that's a good way to get a look at the data without having to scroll through the report, because sometimes the report can be a little slow. due to that's just due to the technology of it.

73
00:11:22.720 --> 00:11:25.849
Peter Staklis: But overall you it. This would let me see.

74
00:11:27.440 --> 00:11:28.220
Peter Staklis: Yeah.

75
00:11:30.040 --> 00:11:38.660
Peter Staklis: And then you want to enable it. If you want to like, sort the data or whatever you there's a little, if you have excel, is usually that little thing on the top. There it just means, if you.

76
00:11:38.700 --> 00:11:44.390

Peter Staklis: when you enable editing, you can sort it and do things to the data if you wish, but it's your copy.

77
00:11:45.320 --> 00:11:50.709
Peter Staklis: But the main, just to this report would be to see what's coming directly.

78
00:11:50.850 --> 00:12:01.650
Peter Staklis: in terms of if you're a jurisdiction. and it's at the facility that it was sent to. It'll show you whether it was directly sent to that facility.

79
00:12:03.080 --> 00:12:05.900
Peter Staklis: And then let me see, I was looking for the

80
00:12:06.140 --> 00:12:11.889
Peter Staklis: yeah. So it was under the originating type column, you see, sent to California disposal

81
00:12:12.350 --> 00:12:35.419
Peter Staklis: via transfer processor, or you have sent to California disposal via Direct Hall. So transfer processor means that for that destination organization and destination facility which is column H, and the next one there. H. I. That means those tons came through another transfer processor that eventually sent it to the final disposal facility.

82
00:12:35.790 --> 00:12:50.380
Peter Staklis: So they'll give you an idea of for your jurisdiction, which you know, whatever you if you have your la jurisdictions and you're looking at them, you could see. Okay, here's the tons that came through a transfer processor and then went to the final disposal facility

83
00:12:50.710 --> 00:13:07.070
Peter Staklis: in the case of if the tons went through one transfer process. So somebody took it directly to a transfer processor, and then it went to another transfer processor, and then it finally went to the disposal facility. It won't show you that middle transfer processor, because that's too complex to show in this report.

84
00:13:07.130 --> 00:13:17.800
Peter Staklis: But you get the idea of where first, initially was sent to. If it says sent through transfer processor. and then, if it says directly sent to you.

85
00:13:17.930 --> 00:13:19.300
Peter Staklis: then that means

86
00:13:19.530 --> 00:13:27.100
Peter Staklis: that landfill, final disposal facility got that as direct all tons over the gate as in flow to their facility.

87
00:13:27.870 --> 00:13:33.689
Peter Staklis: And then there's also a couple of other options where you can look at 10% exported out of state

88
00:13:33.950 --> 00:13:44.409
Peter Staklis: to different facilities. that's a smaller amount, probably in the larger scope of things. But you can also use this to look for that.

89
00:13:44.710 --> 00:13:54.679
Peter Staklis: I you probably have to. I don't know if la exports stuff out of state. so I don't know but you'd see that in the the filters there also can filter it

90
00:13:55.080 --> 00:14:02.140
Peter Staklis: by whatever you want to see. So you have the ordinary types of streams, solid way screen material Adc.

91
00:14:02.430 --> 00:14:04.669
Peter Staklis: And then for the destination.

92
00:14:05.490 --> 00:14:11.089
Peter Staklis: Entity, activity type, I think, is what you'd want to look at if you want to see like.

93
00:14:12.250 --> 00:14:16.770
Peter Staklis: Oh, no, that's the actual facility type. It's the

94
00:14:17.320 --> 00:14:21.060
Peter Staklis: originating type. Okay, yeah. So that's what I was kind of

95

00:14:21.280 --> 00:14:41.550
Peter Staklis: mentioning. So it's either sent directly to disposal in California or it's sent to California disposal via transfer processor, or it's exported out of state to transfer processor or a contract hall or export it out of state. So you have all those options to see how the jurisdictions tons were either received in California or sent out a State.

96
00:14:42.840 --> 00:14:51.880
Peter Staklis: So that's pretty much it. And this is anything you specifically want to cover on it. Besides what I mentioned Chris on that report

97
00:14:52.360 --> 00:14:54.559
now, I think

98
00:14:54.580 --> 00:15:01.859
I think we're good on the Rdrs report. So those are all publicly available on the website. And I think the last

99
00:15:01.870 --> 00:15:08.630
update to them finished a couple hours about an hour ago, so they should be up to date

100
00:15:09.000 --> 00:15:17.240
and the data that load in the year. Once again. This is the staging data. I don't remember if this is exactly what was on one of those reports from looking at it.

101
00:15:17.520 --> 00:15:37.049
But the correct data was loaded into all the and reports last night. So if you need changes to any of it. You would need to have the facility make those through our drs, any changes made through ourdrs aren't necessarily going to automatically update in this calculator.

102
00:15:37.100 --> 00:15:50.229
And ideally, you won't have to do any of that. But ourdrs may end up changing over the course of the next couple of months, and if you want to reflect that in your report before you submit it, you definitely can.

103
00:15:51.210 --> 00:15:59.409
Peter Staklis: The other thing to mention about those reports. Sorry for an earth is that the data is updated every night. So it's not live.

104
00:15:59.850 --> 00:16:16.610
Peter Staklis: So if, like a jurisdiction changes, revises a report, not just, I mean a facility like a landfill or a transfer processor revises a report and submits it during that day. It's not going to show up till the next day, because it updates it at night for jurisdiction reports and then it's only submitted data that it'll show

105
00:16:17.260 --> 00:16:18.649
yeah

106
00:16:20.540 --> 00:16:30.310
alright cool, thank you. so anything that was a mis allocation or misreport in ourdrs. That shows in your calculator. You would want to make that change on this line.

107
00:16:30.640 --> 00:16:36.189
The rest of these lines for disposal credits are specific to

108
00:16:37.040 --> 00:16:47.989
approved disposal modifications. Those items are all listed, and what qualifies for them in the disposal modification

109
00:16:48.570 --> 00:16:50.080
certification team.

110
00:16:52.280 --> 00:16:57.970
and each of the types of deductions, and what is eligible are noted here on page 4.

111
00:16:59.810 --> 00:17:18.110
So all the descriptions and what counts and what doesn't are right there. You'll notice 2 lines on this count on these fields. The has to waste in class 2 ways. our grade out. They used to be deductions. But now they should be reflected in our Drs, not as Msw. But as

112
00:17:18.670 --> 00:17:27.789
specific disposal streams, so they don't show up in this disposal calculation anymore, or they shouldn't if they are reported correctly.

113
00:17:27.800 --> 00:17:32.660

after you have made updates to this section and you can press save.

114
00:17:34.910 --> 00:17:41.529
it will calculate an annual disposal rate, and you'll notice that because this field was changed

115
00:17:41.540 --> 00:17:44.819
it is yellow noting, indicating there was a change.

116
00:17:44.920 --> 00:17:47.070
If I change one of the

117
00:17:49.330 --> 00:17:50.820
ton fields there

118
00:17:51.960 --> 00:17:56.200
that will also indicate a change. and

119
00:17:57.120 --> 00:18:02.000
that is important, because on the calculation factors page the next tab.

120
00:18:02.430 --> 00:18:14.700
it will check off boxes, depending on whether I made a change to the overall disposal tonnage or the overall disposal tonnage or input a disposal modification credit.

121
00:18:17.260 --> 00:18:32.669
The same field also will indicate, or same boxes will also indicate if there's green material. Adc. Usage. If there are any tons of green material uses, Adc. You do need to answer the question. Number one describing in the box your plan to divert that green material.

122
00:18:33.080 --> 00:18:40.560
If you have green material and you are not mean your per cap annual per capita target. You will have to answer. Question 2 and 3 as well.

123
00:18:42.880 --> 00:18:44.270
If you had

124
00:18:44.920 --> 00:18:56.580
a problem in Ourdrs where it was assigned to your jurisdiction. But you think it was misallocated. You can put in a request to the facility to have it adjusted, and you can check this box off right here.

125
00:18:57.300 --> 00:18:58.320
and

126
00:18:58.580 --> 00:19:14.929
disposal rate, accuracy is related to anything overall or overarching related to your disposal rate, either your target and or your annual rate. If you have something you can put yes, an input an answer. If you don't have anything so you can say no and press save

127
00:19:15.380 --> 00:19:20.289
oh, I forgot to put something in the box for green waste.

128
00:19:20.790 --> 00:19:22.920
So that section is now complete

129
00:19:23.090 --> 00:19:27.619
and on the disposal rate calculation page, just as another

130
00:19:28.210 --> 00:19:38.609
option to show you. So let's say I change this, but then I decide I didn't want to have any of it change, and I didn't want those other 2 box checkmarks triggered on the next page

131
00:19:38.670 --> 00:19:42.639
at the bottom of the calculator. Here you can press, reset, to default.

132
00:19:43.810 --> 00:19:47.460
They'll reset the fields to default, and then on the

133
00:19:47.500 --> 00:19:54.390
next page those boxes should no longer be checked because I didn't end up making any changes to those.

134
00:19:55.330 --> 00:19:57.730
if you have any.

135
00:19:58.210 --> 00:20:11.230
If you have a disposal, modification, sheet, or any record you want to upload along with those you can press the document management button right here and add any other documents associated to a disposal modification.

136
00:20:11.590 --> 00:20:16.420
And there we go. Add new document. And you would choose a file from here.

137
00:20:19.690 --> 00:20:20.530
Okay.

138
00:20:21.470 --> 00:20:22.670
so that

139
00:20:22.730 --> 00:20:26.699
is it on disposal rate calculation.

140
00:20:27.970 --> 00:20:31.039
Ray, do we have any questions?

141
00:20:31.250 --> 00:20:34.149
We do. We have one question from Michelle.

142
00:20:34.560 --> 00:20:42.929
Michelle. You're unmuted on our end. If you could go ahead and unmute yourself, state your name, affiliation, and ask you a question regarding ourdrs, reports, and collection services. Tab.

143
00:20:43.630 --> 00:21:05.020
Michelle Anna Keshishian: Hi, you guys, my name is Michelle Kishian, city of Long Beach, recycling specialist. I was just wondering if the Rdrs reports you were going over if they are also a resource to assist with certain sections of the collection services. Tab like the organic let me say, organic waste

144
00:21:05.710 --> 00:21:19.950
Michelle Anna Keshishian: callers or the hydroversion organic processing facilities. We do annual surveys with our hollers, and we obtain a monthly and annually, which facilities are using. But I was just wondering if these Rdrs reports can also assist with that.

145
00:21:20.620 --> 00:21:26.029
Peter Staklis: we do have an organics measurement report in the list of the

146
00:21:26.240 --> 00:21:36.429
10 or 11 or so reports on that page. I don't know if Chris wants to go there, you could. I'll take this one Peter, so can you go back to the collection systems? Tab?

147
00:21:37.800 --> 00:21:40.559
So I think to the short answer to question.

148
00:21:40.590 --> 00:21:47.050
Michelle is probably not. There's not a whole lot of overlap. What they were talking about

149
00:21:47.080 --> 00:21:51.979
is really more for the disposal rate, calculation and calculation. Factors tabs.

150
00:21:52.040 --> 00:22:03.809
Michelle Anna Keshishian: The only relationship that may be useful is just kind of for specifically identifying any of those Rdrs facility, numbers of the facilities that you or your hollers are using

151
00:22:04.140 --> 00:22:06.419
Michelle Anna Keshishian: on this tab. Specifically.

152
00:22:06.870 --> 00:22:22.510
Michelle Anna Keshishian: okay, just wanted to check. I know that I export the Rdrs facility list. So I'm already using that to help identify the numbers if the hollers don't provide it, but just was just wondering about these reports. So thanks for the Confirmation.

153
00:22:27.070 --> 00:22:29.289
that is the only question we have in right now.

154
00:22:32.050 --> 00:22:34.170
All right. Well, thank you, Peter.

155
00:22:34.830 --> 00:22:40.770
Peter Staklis: I okay, you're welcome. Thank you for having me

156
00:22:41.090 --> 00:22:48.259
all right. Now we'll switch back. We'll switch gears and go back to the electronic and report and kind of go through basic function

157
00:22:49.550 --> 00:22:56.810
just as kind of some reminders. And we're gonna try to leave more time for Q. A.

158
00:22:57.040 --> 00:23:01.480
Then and less time of me talking at you about things.

159
00:23:02.480 --> 00:23:04.240
my screen showing up. Okay.

160
00:23:06.110 --> 00:23:07.470
yeah, okay.

161
00:23:07.850 --> 00:23:23.449
all right. So just to kind of take you back to the beginning. This is kind of the first page. When you open up the electronic and your report, you can navigate through these tabs at the top, or you can navigate through these hyperlinks down the low doesn't matter which order you go in

162
00:23:23.540 --> 00:23:35.400
the important piece. Is it identifies here, next to each section, whether you have completed it or not, with the green checkmark or red checkmark, red Dean, not complete green being complete.

163
00:23:35.600 --> 00:23:45.400
So in order to submit your report down here at the bottom. You will need green checkmarks for each section. and we'll talk about

164
00:23:45.430 --> 00:23:48.160
generally. What that means. Section by section.

165
00:23:50.180 --> 00:23:54.730
All right. I'm going to start with just the procurement, since that's the first tab.

166
00:23:55.840 --> 00:24:03.669
So general ear function for those of the of you that are new this year. So we didn't do a major overhaul like we did last year. If

167
00:24:03.890 --> 00:24:22.850
you wanted to review some of that major overhaul, we do still have all those videos from last year up. it's on this mo model reporting tools, web web page of ours. And it's I'm gonna put the link in the chat here in just a second. But down here at the bottom

168
00:24:23.390 --> 00:24:28.600
there's quite a few. They're all right here. They're all ultimately on Youtube.

169
00:24:28.910 --> 00:24:43.789
and these beginning ones, like June second, through about June 20 eighth, show that year and walk through the new grid structure and the functionality within those grid structures for just kind of good base information.

170
00:24:44.760 --> 00:24:59.499
And then we'll kind of highlight those changes that we made. So if you wanted to go back and review. These could be beneficial for you on how to click, where, how to click and where to click, and how you know if you get an error message stuff like that. So that web page

171
00:25:00.010 --> 00:25:06.960
is that one right there? Nice. But in the chat for just review, okay. so procurement

172
00:25:08.350 --> 00:25:20.869
to access the grids. You have to hit edit on the page, and once you do edit buttons show up next to your jurisdiction. And just as a reminder, we're using Sonoma County

173
00:25:21.270 --> 00:25:37.710

waste management agency. So a regional agency, for example, because it shows the most functionality. So not everything I discuss, especially if you're a collection district or a solid sorry. I'm messing that up a special collection district that does solid waste collection.

174
00:25:37.810 --> 00:25:52.009
There's a lot of reporting requirements. You don't have to do within here. And so your report is tailored for you. Specifically. So, a lot of this stuff may not apply to you. So if you're in your report, and you don't see some of these sections that's on purpose.

175
00:25:53.420 --> 00:26:03.330
Okay, so next to your jurisdiction within each grid, you have to hit the edit button, and then it opens up what we refer to as kind of the form entry screen.

176
00:26:03.800 --> 00:26:05.890
And this form entry screen

177
00:26:06.260 --> 00:26:12.369
this bulleted text, if it exists. Not all grids have this, but it. This is just tool tips.

178
00:26:12.680 --> 00:26:15.720
We have tool tips in a couple of different ways.

179
00:26:16.280 --> 00:26:34.800
It's either there in the bullet or items, and the big red box, or as little question marks next to each entry as a question mark. And the way you get to the question marks. So just kind of hover over it, or you can click on it, you know. Give you a little additional information or a tool tip about what to report there. Specifically.

180
00:26:35.130 --> 00:26:38.469
we felt that I needed a little extra clarification.

181
00:26:40.070 --> 00:26:48.739
anything with a red asterisk is a required reporting field. So you have to put an entry there

182
00:26:48.760 --> 00:26:52.789
of some kind. So if and this particular example.

183
00:26:53.020 --> 00:27:04.110
if you didn't procure all these different things, you would just enter a 0 in these fields that did not apply and then enter the relevant number and the ones that did

184
00:27:06.430 --> 00:27:09.739
the designated units here are the only

185
00:27:09.760 --> 00:27:25.810
and designated units that were allowed within the regulations, I think. to one thing to note in particular, in a point of clarification we made in this year's report was, mulch is required to report it in tons. It cannot be reported in cubic yards.

186
00:27:27.290 --> 00:27:31.370
So we did just kind of add that subtext to hopefully make that more clear there.

187
00:27:32.400 --> 00:27:37.490
So after you enter all the required fields, you'll see that additional description box

188
00:27:37.630 --> 00:27:43.839
does not have a red asterisk tree. Put these, I think every grid has one of these now, but this is a

189
00:27:43.880 --> 00:28:07.790
optional box where you can further explain anything you'd like to about what information is reported. Or if you need to tell more of a narrative about your collection systems which we'll talk about in great length when we get to that section. But this just allows you to opportunity to input any additional information. You'd like to supply calories cycle to maybe explain the numbers or explain what's going on in your particular situation or

190
00:28:07.810 --> 00:28:11.340
issues, you're running into hurdles you're running into, etc.

191
00:28:12.480 --> 00:28:14.459
Once you're done, click, save.

192
00:28:14.900 --> 00:28:16.630
And it records that entry

193
00:28:18.510 --> 00:28:30.699
this particular page. you'll notice that this grid at the top does not have edit buttons. This grid is just calculating your inputs from below. So the annual procurement

194
00:28:31.810 --> 00:28:39.600
is populated by the recovered organic waste product procured grid entries. And it's using the calculation factors

195
00:28:39.860 --> 00:28:50.480
are the sorry. The conversion factors that are listed in the procurement section of the regulations, which I believe is 1, 8, 9, 9, 4, 2,

196
00:28:51.370 --> 00:28:54.050
just double check that I think it says it right here.

197
00:28:57.920 --> 00:29:05.430
Actually, I think I'm wrong with that. Ray, can you double check the procurement section for me? I don't think I'm correct with what I just said.

198
00:29:07.530 --> 00:29:08.330
Okay.

199
00:29:08.990 --> 00:29:17.499
so then the other grid. They populates. That table above is the adjusted, recovered organic waste product procured grid. And this is, if you want to submit

200
00:29:17.990 --> 00:29:28.480
an alternative target for yourself. based on your transportation, fuel, electricity, and gas use for heating applications for municipal purposes within your jurisdiction.

201
00:29:29.010 --> 00:29:35.370
And the reason you would do that is, if you feel your population based, procurement target is too high.

202
00:29:35.900 --> 00:29:47.740

you can submit that information to see if your adjusted procurement target would be lower, and then we would do a comparison of your adjusted procurement target against your annual procurement of based on your entries

203
00:29:47.790 --> 00:29:50.489
instead of the population based

204
00:29:50.610 --> 00:29:51.770
procurement target.

205
00:29:52.890 --> 00:29:54.780
not just open that up real quick.

206
00:29:56.430 --> 00:30:01.179
just a few points of clarification. So this grid is

207
00:30:01.220 --> 00:30:16.649
asking you the question. If you did want to submit it, you'll see these fields are grayed out. So I asked you the question, did the jurisdiction implement and just the recovered organic waste product procurement target? I know it's a mouthful. But if you want to input information here and you say, yes

208
00:30:16.970 --> 00:30:20.540
activates those fields. and then you enter

209
00:30:21.550 --> 00:30:33.840
your transportation, fuel, electricity and gas use for heating applications in these fields above. And so in this particular grid, this is more asking you, for in this case 2,021,

210
00:30:34.100 --> 00:30:41.509
what you use for the entire calendar year, whether it was organically derived or not to calculate this target number.

211
00:30:42.890 --> 00:30:48.810
So I'm sure your numbers will be much higher than what I'm inputting here, but I'll just save those. You can see what happens.

212
00:30:49.310 --> 00:30:51.770
So I've made this entry for Cloverdale.

213
00:30:53.100 --> 00:30:57.589
And so up top, this grid gets populated using those conversion factors here.

214
00:30:59.050 --> 00:31:01.120
So in this particular case.

215
00:31:01.510 --> 00:31:04.909
we'd be comparing your annual procurement

216
00:31:04.970 --> 00:31:08.440
against the adjusted procurement target. If it was lower.

217
00:31:10.440 --> 00:31:20.299
one other significant change that we made throughout the report. You'll notice that there's these green bars, and then actually let me scroll down so you can see both forms.

218
00:31:22.100 --> 00:31:27.830
Alright, so there are green bars, and there are blue bars

219
00:31:27.960 --> 00:31:30.389
to designate different sections or grids.

220
00:31:30.660 --> 00:31:46.989
You'll also notice the green bar has Slcp in parentheses, and these blue bars have combined and parentheses. So we just tried to provide a little more clarification of kind of the origin of these reporting requirements or areas where we made consolidation if there is overlap

221
00:31:47.220 --> 00:31:55.960
within the laws. So any green bar with that Socp designation is a reporting requirement because of 1,383,

222
00:31:56.120 --> 00:32:03.000

and these blue bars have combined reporting requirements, whether that be A. B 939

223
00:32:03.090 --> 00:32:12.420
mandatory, commercial recycling or Ncr. Mandatory commercial organics, recycling, or more as well as

224
00:32:13.130 --> 00:32:22.339
Sp, 1,383 short-lived climate pollutants Act or Slcp, as we have it designated with throughout this report.

225
00:32:22.410 --> 00:32:31.179
So that's hopefully, to make it a little bit easier to navigate for you if you have people doing Socp only reporting and combined fields

226
00:32:34.020 --> 00:32:45.189
in these checkbox sections. You just check all that apply records this entry. Again, there's little tool tips here. They'll populate for you. It's just because I'm in a staging environment, they're not showing up here.

227
00:32:45.420 --> 00:32:52.479
But if you available, or information about what to clarify, what it's referring to, just hover over those tool tips or click on them.

228
00:32:53.660 --> 00:33:02.899
And then last. wherever there's 3 programs which we have left in a gray bar. and these sections, wherever they apply.

229
00:33:02.920 --> 00:33:07.399
If you check the check box you'll notice that it activates a hyperlink.

230
00:33:08.250 --> 00:33:19.630
The details of what you need to do are here. And so by checking that check box. You're confirming that the program details are up to date and current

231
00:33:20.770 --> 00:33:24.320
in order to see that to verify if they are.

232
00:33:25.030 --> 00:33:26.810
you can select the hyperlink.

233
00:33:28.970 --> 00:33:43.050
You'll get that warning message if you haven't saved the data on the page since I'm just doing an example. I don't need to save by before moving on here. But you'll want to make sure if you get that there that prompt to save your data before moving over.

234
00:33:43.710 --> 00:33:45.210
Okay, so

235
00:33:46.340 --> 00:33:49.279
this upper section actually let me activate it first

236
00:33:51.690 --> 00:34:00.660
takes just a minute and staging. Okay. so it's this upper section that it's referring to that by checking that check box. You're confirming

237
00:34:00.760 --> 00:34:07.849
that these details are up to date and current. And if you need to make changes, you do exactly what I just did. You click on the hyperlink.

238
00:34:07.870 --> 00:34:10.090
Make the edits you need to make here.

239
00:34:10.260 --> 00:34:14.560
you can include a note in kind of the back end if you want.

240
00:34:15.429 --> 00:34:20.230
or if you're only in putting a note cancel out of this.

241
00:34:23.510 --> 00:34:24.760
and we'll go back

242
00:34:25.960 --> 00:34:32.219

if you only need to enter a note about your street program and do not need to make any of those changes to that program.

243
00:34:33.850 --> 00:34:41.040
You can enter that note and this text box right here. It's kind of a shortcut. It's the same note field.

244
00:34:41.340 --> 00:34:46.850
And just one thing I would like to highlight. I think it's this bullet right here.

245
00:34:47.820 --> 00:34:54.290
But this particular text box here will only allow 2,500 characters.

246
00:34:54.940 --> 00:35:04.209
If you need to input more information than that, you need to enter it from the back end. So click on that hyperlink. Enter that information in that notes field there

247
00:35:04.890 --> 00:35:08.989
and then it will save here. When you come back to this view.

248
00:35:09.020 --> 00:35:19.569
it will cut it off at that 2,500 character limit as far as what it's displaying, but your entire note will be populated in there and will show up in your Pdf. As well.

249
00:35:21.520 --> 00:35:26.119
and I'm going to pause for just a minute. See if there's any questions on the procurement section.

250
00:35:26.630 --> 00:35:41.040
We do have a couple on procurement, but just one sort of clarifying question. Can you just remind everybody what the report time period is for the 2,022 annual report seen as some of that information was reported in June of last year as well.

251
00:35:42.180 --> 00:35:48.080
Yes, thank you, Ray. So this reporting period is reporting on all of 2,022

252
00:35:48.600 --> 00:36:00.270

and it open today, I believe so you should be able to access your reports now, and the reports are due by August first of 2,022. I'm sorry. 2,023

253
00:36:02.710 --> 00:36:13.750
perfect. Our first procurement related question is from Aaron Brewster. Aaron, if you can go ahead and unmute yourself to your name. Affiliation. Ask your question about conversion factors. You're unmuted on our end.

254
00:36:22.430 --> 00:36:29.900
Okay, I'll go ahead and ask the question for you, Aaron. does color cycle have standard conversion factors for malt to convert from cubic yards.

255
00:36:30.890 --> 00:36:39.920
no, there's no conversion factor in the regulations for mulch, and the reason for that is just because it can vary so much

256
00:36:40.650 --> 00:36:45.450
what we would recommend. Just go back up here as an example.

257
00:36:45.940 --> 00:36:58.390
that if you are making an entry in multi here, and it is in cubic yards. Convert it to tons. But in this additional description box describe the process you went through for that conversion.

258
00:36:58.420 --> 00:37:10.440
That's kind of the key with any of these reporting fields where it's not real clear, or that you think there's a a good reason to provide a narrative just to kind of explain how you got

259
00:37:10.520 --> 00:37:16.120
to your tons and the math that you did to convert your cubic yards to tons for mulch.

260
00:37:20.160 --> 00:37:29.470
Thank you, Aaron. If you had any additional pieces to add to that, go ahead and please put it in the Q. A. Or the chat, and we'll get back to you. Our next question is from Susan Shaker.

261
00:37:29.880 --> 00:37:36.010
Susan, you're unmuted on our end. If you could go ahead and state your name affiliation and ask you a question. Of course.

262
00:37:37.740 --> 00:37:40.300
Susan Shaker: hi!

263
00:37:40.640 --> 00:37:55.240
Susan Shaker: So can you hear me? So my question is, with the last results of the 2,020 census our population. I'm sorry my name is Susan with the city of she know how's actually went down. So it made a few 100

264
00:37:56.160 --> 00:37:59.640
Susan Shaker: few hundreds difference, I guess, in our procurement target.

265
00:37:59.850 --> 00:38:11.020
Susan Shaker: but the one that's in the ear is still the original procurement target based on our population at that time. Will that be reflected? in our procurement target at any point, any changes to that?

266
00:38:11.450 --> 00:38:19.539
Yeah, I believe in the regulations. It's once every 5 years that needs to be re-evaluated. All right, perfect. Thank you.

267
00:38:22.780 --> 00:38:28.629
Thank you, Andrew, before we get to the next question. We do have another sort of

268
00:38:30.420 --> 00:38:39.220
re, I guess, reconfirmation that the the middle for 2022 annual report will be January through

269
00:38:39.240 --> 00:38:42.380
January or January, through December. It will be the entire year. Correct.

270
00:38:42.720 --> 00:38:47.300
correct calendar year 2,022. You're reporting on the entire year.

271
00:38:47.830 --> 00:38:48.740
Perfect.

272
00:38:49.080 --> 00:38:52.020
Next we have Michaela Barber.

273
00:38:54.120 --> 00:38:58.040
You're unmuted on our end. You can go to and unmute yourself. Now

274
00:38:59.890 --> 00:39:03.619
Micala Barber: I just want to verify that when you start the report.

275
00:39:04.150 --> 00:39:13.679
Micala Barber: if I have to come back to it at a later day, as long as everything is saved I can get back into it. It's not something that once you get into it, we have to finish it correct.

276
00:39:14.900 --> 00:39:27.479
correct. But I'm gonna to clarify just a little bit, because there's more than one save button in here. So this, save button that I have on the screen is only saving the form entry. So we'd hit save here.

277
00:39:27.510 --> 00:39:33.340
And it's saving just that row. Item there that it hasn't saved on the page yet.

278
00:39:34.140 --> 00:39:36.240
So to save the page.

279
00:39:36.400 --> 00:39:46.149
You have to click on these save buttons at the top in order to it. And actually, I think this will be a good demonstration. Since I have not done all of the grids on this page.

280
00:39:47.030 --> 00:39:51.339
you're gonna get prompted with an error message. So I would recommend

281
00:39:51.810 --> 00:39:57.589
at least finishing that page to potentially avoid any potential issues with saving.

282
00:39:57.880 --> 00:40:08.679

because it's just kind of a general error that somewhere in here, which I mean in this particular case, it's because I didn't put these entries here or these entries. Here

283
00:40:08.770 --> 00:40:15.910
is why I'm getting that error message as well as check boxes here. So it's a. A, a general error message. So I'd recommend

284
00:40:15.920 --> 00:40:20.370
at least finishing one page before you kind of save an exit.

285
00:40:20.570 --> 00:40:22.689
Micala Barber: Okay, thank you.

286
00:40:24.810 --> 00:40:28.240
And the quick reminder to please go ahead and use the Q. A.

287
00:40:28.400 --> 00:40:40.669
Pain rather than the chat pane. We like to keep everything in one place for transparency purposes, so please go ahead and submit them through either the Slcp organics inbox or through the Q. And A. Pain

288
00:40:40.830 --> 00:40:46.740
For the sake of of time I will go ahead and ask the couple that did go through the chat pain, but just going forward. Please

289
00:40:46.870 --> 00:40:57.610
please remember that. Andrew, can you confirm that counties and cities with rural jurisdictions. Waivers are not subject to the most to most of the procurement reporting requirements.

290
00:40:59.760 --> 00:41:05.099
yeah, so there is, and I'm actually not seeing it. Now, I think it got

291
00:41:05.390 --> 00:41:16.680
reset. But yeah, so if you have an approved and I'll try to go in there and reactivate that. Or maybe, Chris, you can activate it on the back end and then let me know, and I'll log out log back in so we can show people that

292
00:41:16.940 --> 00:41:21.549
But if you have an approved role exemption or approved lo! Low population waiver.

293
00:41:21.850 --> 00:41:29.499
you'll have check boxes that populate in the front of these grids, and we'll demonstrate that before we're done today.

294
00:41:29.670 --> 00:41:40.509
that you check that box, and that essentially tells the system that those fields are no longer required for you, and there'll be no entry required where those

295
00:41:40.520 --> 00:41:42.549
exemptions or waivers may apply

296
00:41:46.780 --> 00:41:53.920
a general question from Isabella Valegas. Isabella, you are unmuted on on. If you could go in and unmute yourself and ask you a question.

297
00:41:59.870 --> 00:42:15.760
Izabella Villegas: Hello! I just like to know? So as a follow up to the saving question, I, I understand, saved one page at a time. But can 2 people be logged in at the same time for the same jurisdiction, and be working on different items.

298
00:42:17.050 --> 00:42:21.149
I think you can, but I wouldn't recommend doing that

299
00:42:21.180 --> 00:42:34.390
just because it may confuse the system, or there may be some overlap in the back end when you save. That might undo what the other user is doing. If you're kind of in the middle of entering so it wouldn't recommend at the exact same time.

300
00:42:34.600 --> 00:42:36.480
and maybe just trying to coordinate

301
00:42:36.580 --> 00:42:42.019
taking alternate turns entering your respective information.

302
00:42:48.130 --> 00:42:50.020
That's all that we have for now.

303
00:42:50.620 --> 00:42:56.979
Alright excellent! All right, we're gonna go through a few sections just for the sake of time. So
we can cover everything

304
00:42:57.130 --> 00:43:01.029
to make sure and noted the main changes on this page.

305
00:43:02.590 --> 00:43:04.259
Okay, I think I did.

306
00:43:04.860 --> 00:43:06.580
All right. So edible food

307
00:43:07.120 --> 00:43:23.169
edible foods pretty straightforward. And the only thing I really wanted to show is how this red
checkmark changes when you know you're done with the page. So I've already pre-populated
most of it. I just left the one entry open. So if I edit the page, and then Edit Cloverdale here.

308
00:43:23.880 --> 00:43:26.149
this is my last required field.

309
00:43:28.560 --> 00:43:35.330
save on that page. You'll see. I don't have that green check mark quite yet, because I have not
saved the page.

310
00:43:35.360 --> 00:43:42.140
and this is a go so good example that these save buttons at the top of out on page do the same
thing, they're not different.

311
00:43:42.430 --> 00:43:53.030
So you can click either one. So if we save that you'll see it switches over to a green checkmark.
And that's how you know you're done with all the required fields on a particular section.

312
00:43:54.860 --> 00:43:58.599
I think one thing to note an additional thing to note here.

313
00:43:58.860 --> 00:44:07.120
This way, we did update the tool tips to hopefully clarify that total pounds needs to be in here, not tons.

314
00:44:07.160 --> 00:44:18.620
And you're reporting on the total pounds of edible food recovered that was reported by food recovery organizations and food recovery services located within the jurisdiction.

315
00:44:18.930 --> 00:44:23.570
That contract with or have written agreements with, commercial edible food generators

316
00:44:25.050 --> 00:44:32.990
so just updated a few of the tool tips. So if we make it more clear here and also just wanted to point out to that, if you have Rover.

317
00:44:33.100 --> 00:44:40.950
the column headers. Those same tool tips will show up for you just as another option to see those 2 tips.

318
00:44:44.130 --> 00:44:53.810
All right. move on to collection systems, and then, after collection systems will pause and go back to questions for both of these sections.

319
00:44:54.950 --> 00:45:11.040
This is a page where we made probably the most significant changes. And it was really and especially in this collection, container system grid up at the top. and it was to hopefully address the variety of options that you may have for collection systems.

320
00:45:13.060 --> 00:45:15.669
So to kind of open it. Open this up.

321
00:45:16.390 --> 00:45:26.190

We have a holler name Field. That does not mean that it needs to be the actual caller. It's just a way to account for it. So as you're entering all the information.

322
00:45:26.230 --> 00:45:38.880
you have a a frame of reference to note that you've entered all the information you need to enter. So this does not need to be waste management, or public services, or atlas, or whoever your hall or actual holler may be.

323
00:45:39.070 --> 00:45:47.020
you can just put things like caller one, all or 2. However, you prefer to identify them. You can enter whatever you want there, just to clarify that one.

324
00:45:48.890 --> 00:45:59.530
So we have this form entry broken up into 2 sections, a residence residential system section, and a commercial system section

325
00:46:00.540 --> 00:46:04.129
some added functionality that we added, we added these check boxes.

326
00:46:04.430 --> 00:46:14.610
So if the holler your entry information for doesn't collect residential or commercial, you can just collect. Check that check box, and you'll see that all these fields down here for

327
00:46:15.280 --> 00:46:17.949
number of generators in the container system

328
00:46:18.120 --> 00:46:19.970
are grayed out. So

329
00:46:20.140 --> 00:46:23.799
it's one thing, we added. We added this optional

330
00:46:24.010 --> 00:46:32.730
container color selection screen. So if you'd like, specify the container colors of your collection container system, you can add those there.

331

00:46:34.360 --> 00:46:40.149
The tool tip kind of is really just explaining how to accept or select multiple.

332
00:46:40.370 --> 00:46:53.009
And there's 2 ways you can do it so you can click and drag, or you can hold down control if you need to skip over a couple. So just to kind of demonstrate that if I start at the top. Hold my mouse button, pull down. I can pick them all.

333
00:46:53.950 --> 00:47:07.159
or just a couple. but if you wanted to jump around so I could select a gray. I'm holding down control. I can jump blue and still hit the arrow button and select split container as well.

334
00:47:09.380 --> 00:47:28.200
All right. So for the collection system that you should be collecting here. You want to select the system that your holler is currently offering those generators. So you are not reporting here the number of containers that each generator may have.

335
00:47:28.420 --> 00:47:31.979
You're reporting on the collection system that you have.

336
00:47:33.230 --> 00:47:42.319
So for this example. I'm going to say, this jurisdiction has a 3 container collection system. So they have a gray for trash, a blue for

337
00:47:42.390 --> 00:47:50.930
green waste and food waste. I'm sorry, mess that up a green for food waste and green waste, and then a blue

338
00:47:50.960 --> 00:47:52.880
for more of the

339
00:47:54.030 --> 00:48:05.219
 The dry recycles, the bottles and cans and paper and cardboard. and then the number of generators that have that system. Let's just say 10,000 have that system.

340
00:48:05.830 --> 00:48:20.069

So I think, in the better. K, and then If you select an additional functionality, we added, as well as if you select the 3 containers or 3 plus containers collection systems, you're going to be prompted with an additional question

341
00:48:20.130 --> 00:48:25.160
of whether or not the organics are allowed in the gray container or black container.

342
00:48:27.460 --> 00:48:35.359
and you just have to select yes or no, and this is a required question to be answered. If you select 3 plus or 3 container.

343
00:48:35.750 --> 00:48:37.899
if you select 2

344
00:48:39.010 --> 00:48:40.399
just on select that

345
00:48:40.600 --> 00:48:44.449
you'll see you don't. You're not prompted with that particular question.

346
00:48:46.230 --> 00:48:53.090
All right. So commercial. Just to kind of walk through one more example, say, we have that 3 container collection system

347
00:48:54.530 --> 00:49:01.540
and 10,000 generators have that. And I'm gonna walk through an example here to kind of clarify a couple of different scenarios.

348
00:49:02.530 --> 00:49:11.190
so that for commercial 3 container system. I think I did 100,000. And just one thing to note, we have the additional description box.

349
00:49:11.390 --> 00:49:18.389
So if you want to describe. Maybe if you're on a noink or a 6, 1 9 cap you can state.

350
00:49:18.670 --> 00:49:26.440

you know, that you're still on that and working with us on implementing your 3 container system. If you only have a 2 at the moment.

351
00:49:27.720 --> 00:49:34.609
and whatever else you'd like to describe. And one thing I just want to really point out is, you'll see on my page I have

352
00:49:35.120 --> 00:49:38.660
for Edge. Here I have the 2 scroll bars

353
00:49:39.290 --> 00:49:47.569
for edge on the left, and down at the bottom. This particular grid grid, because it's quite large at the bottom of it.

354
00:49:47.620 --> 00:49:49.720
has its own scroll bar.

355
00:49:50.230 --> 00:49:54.509
The reason I'm pointing this out is because when you're entering information

356
00:49:55.610 --> 00:50:07.310
to me, I would think that the Save and cancel button for this formantry screen should be somewhere right around where that red box is, but because this grid is so large you have to scroll over because it's centered within the form

357
00:50:07.520 --> 00:50:09.650
in order to save that information.

358
00:50:12.500 --> 00:50:14.849
and I think I forgot to enter a field.

359
00:50:16.940 --> 00:50:27.109
but let me walk to the example. First, to kind of clarify what we mean by this 3 container system or 2 or whatever system. But the examples of 3 container system.

360
00:50:32.430 --> 00:50:33.300

Okay?

361
00:50:35.120 --> 00:50:45.800
All right. So here's kind of our generic example to hopefully clarify what to report as far as the number of generators that have a particular collection container system.

362
00:50:47.270 --> 00:50:58.470
So in this example, this jurisdiction has a 3 container collection system, there are 1,000 total commercial generators. 100 generators have gray only

363
00:50:58.980 --> 00:51:06.500
no green or blue service. 400 generators have gray and blue, no green doing due to not having subscribed yet.

364
00:51:07.030 --> 00:51:14.910
200 generators have gray and blue and a waiver for the green, and 300 generators have all 3 gray, blue, and green.

365
00:51:15.390 --> 00:51:21.779
So what you would report here is that 500 generators have the 3 container collection system

366
00:51:22.350 --> 00:51:35.979
with the 200 generators, with the gray and blue and the approved waiver being combined with that system, and then 300 having the full system. The other generators, since the collection of organic material is mandatory, should have

367
00:51:36.240 --> 00:51:45.620
all 3 of those containers or a waiver for one of those containers of that may apply or self-haul documentation, if that's how they're going about that.

368
00:51:46.400 --> 00:51:51.840
So in the additional description Box, you can kind of add that additional language

369
00:51:52.690 --> 00:51:58.110
that the 100 generators, plus the 400 generators are not subscribed to full service yet

370

00:52:04.250 --> 00:52:06.479
where it's a report.

371
00:52:07.400 --> 00:52:15.039
and I know this one's kind of complicated. So I'm going to pause and see if there's questions on just this grid, and then edible food, if we have any there too.

372
00:52:16.380 --> 00:52:22.250
So we do have both. The first regarding this grid is from Kim Bron

373
00:52:22.580 --> 00:52:26.460
Kim. If you could go to, and I yourself to your name and affiliation. You're unmuted on our end.

374
00:52:27.700 --> 00:52:34.569
Kim Braun: Yes, this is Kimberon. Wrong consulting services. I see a great container. But many cities use black still.

375
00:52:34.630 --> 00:52:39.059
should we just include gray? Then, even if they're just using black container?

376
00:52:39.290 --> 00:52:47.100
Yeah, I believe the regulations are Q, a clarifies that black as a shade of gray

377
00:52:47.120 --> 00:52:49.450
or gray is a shade of black. So

378
00:52:49.920 --> 00:52:59.989
Kim Braun: okay, just because it was identified with green and brown containers for your organic. So I just want to clarify that that Gray would be okay to use. If you have a black and date.

379
00:53:00.480 --> 00:53:01.760
Kim Braun: Okay, great. Thank you.

380
00:53:04.660 --> 00:53:08.319
Up next. We have a question from Aaron Brewster. Aaron.

381
00:53:08.330 --> 00:53:14.800
Are you unable to let me yourself at this time, and tell us a little bit more about that your restrictions? Specific situation.

382
00:53:15.050 --> 00:53:24.840
Erin Brewster: sure. Aaron Brewster town of Trucky. So we have a high elevation waiver. And so we're not required to separate food scraps of foods. We'll paper.

383
00:53:24.870 --> 00:53:40.850
Erin Brewster: But we do have a 3 container system. It just doesn't allow those items. So would we have. Would we be saying, yes, we're allowing organics in the gray container, because those items the food scraps are going in the trash.

384
00:53:43.320 --> 00:53:48.320
 you know, this box is really more reserved.

385
00:53:49.030 --> 00:53:56.870
for if that gray container needs to go to a high diversion organics, waste processing facility. I think in your particular case.

386
00:53:58.230 --> 00:54:07.300
you're still separating the organics. You're required to separate, since you have a waiver for the food scraps and food. So a paper specifically.

387
00:54:07.660 --> 00:54:12.309
Erin Brewster: okay, great, thank you. Yeah. I was, I was concerned that yeah, we didn't want to be.

388
00:54:12.390 --> 00:54:27.050
Erin Brewster: We're not subject to that high diversion facility requirement. So I didn't want to check a box that would send us down that road, and then it just if you wanted to. Just be kind of extra careful. of why, you said no, here

389
00:54:27.500 --> 00:54:33.419
is in the additional description box. And then, Chris, did you get those boxes checked by chance

390
00:54:33.600 --> 00:54:36.220
on the back end for the waivers?

391
00:54:37.550 --> 00:54:42.280
Yeah, at my desktop froze for a minute, so I was slowly getting to it.

392
00:54:42.710 --> 00:54:51.469
I didn't know what would happen if I checked them off while you had this thing actively edited.
So I was gonna wait on Cloverdale.

393
00:54:51.530 --> 00:54:54.049
But check a Sonoma unincorporated.

394
00:54:55.290 --> 00:55:02.280
because that's got all the check. Now, I think I just need to sign out real quick and sign back in.
So give me just a second everyone.

395
00:55:02.500 --> 00:55:03.930
and then I'll get back

396
00:55:04.280 --> 00:55:08.120
to the question at hand, and I might need a reminder where

397
00:55:09.530 --> 00:55:10.740
we were.

398
00:55:11.890 --> 00:55:13.459
Because I want to be able to show

399
00:55:14.060 --> 00:55:17.100
those waivers because they should populate in here

400
00:55:20.190 --> 00:55:35.429

on the high elevation does not populate in this grid. Yeah. So you're still compliant, right? Since you have the approved waiver for the food scrap food to a paper. So yes, the I that my answer still applies. Just want to make sure we're clear on my answer. Are we? Good, Aaron?

401
00:55:37.820 --> 00:55:40.580
Erin Brewster: Yes, thank you.

402
00:55:44.170 --> 00:55:52.020
Before we get into the edible food recovery question. We do have a couple of people still using the chat feature. and I think

403
00:55:52.540 --> 00:56:00.940
it would benefit to go over your slide one more time, Andrew, on. how they would qualify 500, say generators

404
00:56:01.060 --> 00:56:03.760
with the 3 bin or 2 bin system plus a waiver.

405
00:56:06.190 --> 00:56:16.510
Is there a particular question? Then we can unmute them, and they can ask it instead of going over this scenario because it kind of sounds like their scenario is not in line with the example

406
00:56:17.040 --> 00:56:21.009
here. Julianne Rhodes. If you can unmute yourself, you unmute it on our end.

407
00:56:22.930 --> 00:56:31.480
Julianne Rhodes: It's weird. I didn't submit that question. I saw that it said it was me, but I didn't submit that. I I it's the people in compliance that

408
00:56:32.390 --> 00:56:33.350
Julianne Rhodes: accounted

409
00:56:34.860 --> 00:56:36.000
interesting.

410
00:56:36.810 --> 00:56:43.590

Julianne Rhodes: Oh, it's my colleague! She logged in with my login. Go ahead and unmute Corona. Sorry?

411
00:56:56.000 --> 00:57:04.270
Yeah, I don't know if she's using your login. I don't know that we have the functionality on our end to unmute her specifically unless her name shows up.

412
00:57:04.630 --> 00:57:12.769
Yeah, just unmuted. both Julie and that are logged in. But it turns out they can't unmute. So it's enough clarification.

413
00:57:13.180 --> 00:57:14.469
Let's see

414
00:57:15.760 --> 00:57:22.019
Alexander Bridu the third. Are you able to unmute yourself and ask your question regarding the collection section?

415
00:57:22.540 --> 00:57:39.239
Alexander Brideau III: Yeah, thank you. Alex Brido with the La Regional Agency. My question was just I I have a guess. I that I know the answer. But I just wanted to double check when it comes to the collection systems section. I just wanted to verify that. You know it. As as it is, the 2,022, report

416
00:57:39.240 --> 00:58:00.939
Alexander Brideau III: the numbers that would be looking for for the number of generators who participate in in container setup, A or container set up B or C, and so on. What? Because it's a 2022 report. What we're what color cycle is looking for is the last known date within 2022, and how those numbers and what those numbers were at that time. Would that be correct?

417
00:58:01.830 --> 00:58:03.750
Yes, you're reporting on

418
00:58:03.800 --> 00:58:06.410
what occurred in 2,022.

419
00:58:07.450 --> 00:58:08.200

Alexander Brideau III: Okay.

420
00:58:10.830 --> 00:58:21.070
I mean, you can provide additional narrative if you wanted to to give more. And that additional description box, if it doesn't seem to be accurate to kind of explain what currently is going on.

421
00:58:21.380 --> 00:58:23.990
But yes, you are reporting on 2,022

422
00:58:27.970 --> 00:58:35.060
If you're ready to go ahead and jump to edible food recovery. We have a question from Mayor Hoffman.

423
00:58:39.750 --> 00:58:54.089
Maia Hoffman: Hi, everyone! It's my Hoffman from the city of Santa Maria. I just had a question we have. We are still missing 2 reports from our food recovery organizations. I do anticipate that they'll give them to me by the time this is due, but in case they don't

424
00:58:54.170 --> 00:58:56.580
Maia Hoffman: do. How do I report that?

425
00:58:58.810 --> 00:59:10.770
I mean? Well, let me jump to it. So you'd want to report on what you have, obviously. And then, I think, for your specific example, I'd utilize that additional description box to explain

426
00:59:10.950 --> 00:59:16.380
that your number is missing a few of those food recovery services, organizations

427
00:59:16.480 --> 00:59:18.580
and anticipated

428
00:59:18.900 --> 00:59:28.289
dates of when you may get that information. Just kind of explain the steps you've taken to get that information, and why or why not? They're not giving you that information.

429
00:59:28.490 --> 00:59:31.120

Maia Hoffman: Okay, sounds good. Thank you.

430
00:59:34.210 --> 00:59:42.320
That's all that we have for now, Andrew, we may be getting some more through the Slcp in box
shortly. So we'll go ahead and check that while you move forward.

431
00:59:44.350 --> 00:59:50.969
Okay, the next grid. Just gonna walk through it. Kind of I'm sorry I mean, act with the page.

432
00:59:52.390 --> 00:59:55.740
Compulsible plastics and plastic bags allowed in the green container.

433
00:59:56.740 --> 00:59:57.940
If you open this up.

434
00:59:58.760 --> 01:00:12.050
you say yes or no, depending on. If they do, you say? No, there's no additional information
required. you say, yes, it activates the fields, and you either have to identify the facility in this
text box.

435
01:00:12.130 --> 01:00:25.370
or we added this functionality that you can select that Rds facility. if it is an Rdrs facility out of
the list here. So you just pick one and say, select to move it over, or you can click and drag.

436
01:00:25.700 --> 01:00:30.000
or you can click and control and select and move those over.

437
01:00:34.020 --> 01:00:44.119
And so then same for this organic spot to be placed in plastics by yes or no, you say yes,
activates the fields, identify the facility.

438
01:00:44.420 --> 01:00:47.079
or select the Rjs facility number.

439
01:00:49.520 --> 01:00:50.919
and then say, save

440
01:00:52.040 --> 01:01:02.649
so no to significant changes in this particular. sorry moved on me a little bit, and the compulsible plastics and plastic bags allowed in green container and collection facilities grid

441
01:01:04.290 --> 01:01:06.150
organic waste callers.

442
01:01:07.920 --> 01:01:10.560
We did add a little bit of functionality here.

443
01:01:12.050 --> 01:01:16.950
So I'm just gonna go through the mock and get down to where we added it. So

444
01:01:17.260 --> 01:01:26.210
we had some situations where an Rds facility number, or the facility where organic waste hollers are taking organic material did not exist.

445
01:01:26.230 --> 01:01:36.810
So you can select the Rds facility number, or if they don't have an Rds facility number check this box down here, and that essentially activates this text box.

446
01:01:37.020 --> 01:01:40.950
And then you can make an entry to identify that facility down here.

447
01:01:41.730 --> 01:01:51.199
So it's an either or option again. Here, either select the address facility number or check the box and identify them in the text box.

448
01:01:56.730 --> 01:01:58.090
That's done. Okay.

449
01:01:59.150 --> 01:02:03.129
save that entry. okay.

450

01:02:03.410 --> 01:02:10.719
this grid. Here the high diversion organic waste processing facilities. Grid is a new addition to this section.

451
01:02:13.840 --> 01:02:16.240
and the required question is

452
01:02:16.260 --> 01:02:29.910
is organic waste collection service implemented that requires use of a high diversion, organic waste processing facility. So this would be for sure, those 2 in one container collection systems that are selected.

453
01:02:30.210 --> 01:02:37.100
and then potentially as well the 3 and 3 plus. If your organics are allowed to be placed in that great container.

454
01:02:37.180 --> 01:02:43.570
So if so, you just say yes, it activates the field. You select the address facility number and move it over.

455
01:02:45.230 --> 01:02:53.259
If you do not if you do not use a high diversion. So you just say no. And you're done with this section. Say, save.

456
01:02:58.890 --> 01:03:03.869
I don't know. Move through a couple more sections, and we'll pause again for questions.

457
01:03:04.990 --> 01:03:16.219
Okay, commercial programs. So material types collected regardless of you can see that blue bar again and combined. So whether it's for your 939 and Cr more

458
01:03:16.290 --> 01:03:28.809
or 13 a 3 program. You select all that apply. You do not, you're not. There's no requirement to select one in each category here. We just broke it up a little bit, so it wasn't one giant checklist.

459
01:03:30.350 --> 01:03:37.490

And then we changed just the header down here from to additional materials to make it more clear that these are

460
01:03:37.670 --> 01:03:44.999
diverted materials, not necessarily disposed materials here. So select those. If you're diverting those as well from disposal.

461
01:03:46.850 --> 01:03:51.310
All right. This is one of the more significant areas for those free programs.

462
01:03:51.530 --> 01:03:56.339
here in the residential programs. So in these Shree program sections.

463
01:03:56.480 --> 01:04:00.029
you do have to check each one of these check boxes.

464
01:04:01.550 --> 01:04:13.859
And again, you're verifying that the program details in that respective program are up to date and current. If you want to do a short, narrow narrative under 2,500 characters. You can just put that here.

465
01:04:14.240 --> 01:04:26.210
You want to do longer than 2,500 characters. You need to access the hyperlink and go to the program details page, to enter that longer narrative about what you're doing for your Sri program specifically.

466
01:04:27.550 --> 01:04:36.729
And you will kind of notice that only the check box is required in the tree program section, and entry is not required in the text box.

467
01:04:39.790 --> 01:04:44.369
All right. And then, as we get to the bottom of the commercial program section.

468
01:04:44.890 --> 01:04:51.359
we have large venues, and I'm going to pass it over to Chris to talk about the large venue section.

469

01:04:52.160 --> 01:04:54.410
Chris, you want to steal the screen from me.

470
01:05:22.810 --> 01:05:25.730
It should be this one around

471
01:05:25.950 --> 01:05:26.800
on tab.

472
01:05:34.860 --> 01:05:41.030
So at the bottom of the commercial program section is for large venues and events.

473
01:05:41.280 --> 01:05:52.429
If you have questions about what constitutes a large venue, an event, or why these questions are here, there are. There's more information hidden in the little drop downs under these

474
01:05:52.690 --> 01:05:53.950
gray bars.

475
01:05:55.900 --> 01:06:01.159
If you have already started editing this field

476
01:06:02.300 --> 01:06:17.219
when you go down to the bottom, and and possibly add a venue copy an old venue, or add a new one. It's going to prompt you to say, do you? Are you sure you want to leave the change because I haven't pressed saved since I checked those boxes at the top. you want to make sure you press, save

477
01:06:18.230 --> 01:06:18.890
that

478
01:06:19.440 --> 01:06:24.230
before. because see now, these boxes that I checked off are actually saved.

479
01:06:24.330 --> 01:06:27.219
whereas if I haven't, they won't be there anymore.

480
01:06:28.070 --> 01:06:44.349
So now I've got the page, save now, when I go down to edit, I have a couple of options down here related to the venues. If there were no venues or events that meet the criteria of a large venue or event. You can check this box, saying there are no reportable events.

481
01:06:44.490 --> 01:06:57.679
If you want to add a new venue or event, you would press the add venue event button, or you can copy a venue or event from a previous year. Again, I'm going to get the prompt. But I haven't made any changes, so I don't need to save this time.

482
01:07:07.880 --> 01:07:14.600
and this allows you to select a venue or event from the previous year, saying, We're gonna pick the apple fare

483
01:07:15.150 --> 01:07:25.559
I just copied the venue and event information over to this year. Now, just because I copied it over doesn't mean it is quite done. It will still say incomplete over here on the right.

484
01:07:25.610 --> 01:07:48.900
because there are still a couple of required fields in it need to be updated it copies over the previous information for the venue or event. If they didn't provide any further information, you would need to fill out the other required fields. You could check this venue failed by information box or on the practices tab. There are required fields still that you do need to pick an implementation level

485
01:07:48.990 --> 01:07:50.380
and input

486
01:07:51.500 --> 01:07:56.059
tons. If you do not know the tons you can put in 0 and press, save

487
01:07:56.410 --> 01:08:01.770
that, those are those required fields in this section to complete it.

488
01:08:01.790 --> 01:08:04.800
And then I go back to commercial programs.

489
01:08:07.310 --> 01:08:10.119
There's no more incomplete above

490
01:08:10.620 --> 01:08:20.889
in the gray bar here, above the new information I just put in. so still need to complete this section now would check off any other detail boxes

491
01:08:23.300 --> 01:08:42.339
and check off each of these diversion program boxes. As Andrew said. If you want to put in other info, you can write a brief note there, you need to write a long note. You would put it on the hyperlink. But before you travel to one of those hyperlinked pages you are going to want to press, save again to save any other changes that have been made on this page.

492
01:08:43.029 --> 01:08:50.250
and I think that should be did save and now have the green check mark. And this section is complete.

493
01:08:55.800 --> 01:08:56.770
Thanks, Chris.

494
01:09:00.649 --> 01:09:07.330
All right, we're gonna move. I think we'll cover one more section and then we'll pause again and see if we have more questions.

495
01:09:07.800 --> 01:09:13.079
Since the next section we're going to cover is very similar to a commercial section.

496
01:09:13.279 --> 01:09:15.430
and that is residential programs

497
01:09:17.130 --> 01:09:25.440
so residential has kind of the same building. But a specific residential. So this upper section, the material types collected again,

498
01:09:25.700 --> 01:09:33.789

includes all the laws in this particular case. Since it's residential, it's just 939 and Slcp. you just select all that apply.

499
01:09:38.649 --> 01:09:45.549
You can describe additional materials down here. If your option is not listed above. and then the Sri programs.

500
01:09:46.069 --> 01:09:52.179
You have to check all the boxes to prefer to confirm that the program details are up to date and current.

501
01:09:52.250 --> 01:09:54.730
You can access by clicking the hyperlink

502
01:09:55.530 --> 01:10:01.040
and type. A description on that Shree program specifically here in the text box.

503
01:10:01.420 --> 01:10:05.120
Longer notes again. Need to go into the program details. Page.

504
01:10:11.370 --> 01:10:12.960
It's like, save on the page.

505
01:10:13.090 --> 01:10:16.010
Let me get the green check mark that you're done with this section.

506
01:10:16.890 --> 01:10:22.519
We're going to go one more, and then we'll pause for questions, because I think this will generate a few questions here.

507
01:10:23.010 --> 01:10:39.900
So in this first grid, we did change it to blue and say combined, and the intention here is to cover all your education and outreach reporting requirements for Socp. Mcr. More near Shri and Hhw. E. Programs.

508
01:10:40.830 --> 01:10:50.150

I think we even included some additional tool tips in here, as well to hopefully clarify that which, again, are these little question marks next to the boxes.

509
01:10:51.590 --> 01:10:52.590
So

510
01:10:53.720 --> 01:10:58.439
in this particular grid you select the ones that may apply.

511
01:11:00.500 --> 01:11:05.240
So Slcp had a re reporting requirement in the regulations

512
01:11:05.560 --> 01:11:12.440
based on your education outreach selected, you have to report the number of generators that receive the Slcp material.

513
01:11:14.860 --> 01:11:26.439
So that's the only reporting requirement here. The reason I point that out is, if you had kind of that rural or exemption or low population waiver selected here. it's gonna you only have to

514
01:11:26.520 --> 01:11:37.650
select the check box and then describe your education outreach. There's it eliminates the requirement to enter a number there. Just do want to caution a little bit

515
01:11:37.920 --> 01:11:40.479
on the low population. Waiver.

516
01:11:40.640 --> 01:11:44.229
that if you only have some census tracks

517
01:11:45.050 --> 01:11:49.759
that are waved from the collection requirements. But for Slcp.

518
01:11:49.970 --> 01:12:01.920
That yes, checking this box will bypass the requirement to report in here. But if you still have census tracks for Socp does apply. Be sure to include that number here still.

519
01:12:03.240 --> 01:12:05.300
And then here in the text box

520
01:12:05.370 --> 01:12:14.820
and print you can describe. for all of your programs, those education not reach materials that are provided to the generators.

521
01:12:19.330 --> 01:12:24.270
I'm trying to think if there's anything else significant in this grid.

522
01:12:26.870 --> 01:12:28.519
I don't think there was.

523
01:12:30.480 --> 01:12:37.360
A common question we get, for the electronic is figuring out that number of generators that receive the material

524
01:12:37.570 --> 01:12:41.550
and a couple of examples that we've provided in the past is.

525
01:12:42.380 --> 01:12:46.030
you know, if you're sending out text messages, how many

526
01:12:46.710 --> 01:12:58.190
recipients there are of that text message, or how many clicks you have on a web page, or how many likes you have on Instagram or Facebook can all be different metrics that you use to report that number here.

527
01:12:58.760 --> 01:13:01.690
the important piece with that is just

528
01:13:01.810 --> 01:13:06.870
to use this box here to describe what you're reporting above.

529

01:13:07.010 --> 01:13:11.079
So how you got about that number and just explain that down here.

530
01:13:12.350 --> 01:13:16.300
Okay. so this just requires an entry.

531
01:13:17.770 --> 01:13:21.809
And I'm just gonna do some letters. So you don't have to watch me type long sentences.

532
01:13:22.850 --> 01:13:27.340
and then you're done with those reporting crimes here. So it kind of show you this functionality here.

533
01:13:27.880 --> 01:13:32.340
So I on that last one, I select a low population. Waiver this one, I will not.

534
01:13:33.460 --> 01:13:38.040
And so if I try to save this without a number, I get an error message.

535
01:13:39.230 --> 01:13:54.030
So we have to enter that number I forgot to describe. So you have to enter that number to do that. Okay. next grid is only for the education outreach for the commercial edible food generators.

536
01:13:54.690 --> 01:13:57.870
and as the same build as a pub, so you select

537
01:13:58.260 --> 01:13:59.400
what applies.

538
01:14:00.360 --> 01:14:09.159
and since there are no waivers for this requirement. Here you'll see those check boxes don't exist for rural exemption or low population waiver.

539
01:14:09.180 --> 01:14:15.690
so it is required to enter the number of edible food generators that receive those education not reach materials

540
01:14:16.820 --> 01:14:20.299
and then describe those education, outreach materials as well.

541
01:14:24.690 --> 01:14:39.430
And then again, your Sri programs. All that's required in the education outreach section for your tree programs is checking these boxes to ensure that the program details which you can access by going to that

542
01:14:40.060 --> 01:14:49.490
pro hyperlink here are up to date and current. There's no requirement to add an additional description here, if you've already captured it.

543
01:14:49.670 --> 01:14:51.990
and this grid up at the top.

544
01:14:53.420 --> 01:15:03.009
so you don't need to repeat yourself down here if you don't want to. You can, if you like, but you don't. There's no requirement to do so down here. You can just check the check box.

545
01:15:03.130 --> 01:15:16.180
confirming that those program details are up to date and current and say, Save. so I'm getting the error message, because I need to do it for all the jurisdictions here in this particular both the grids.

546
01:15:16.600 --> 01:15:25.210
So pause here and see if there's any questions on anything that we just covered. Whether it be commercial residential programs or education outreach.

547
01:15:26.190 --> 01:15:34.409
We have one question from Megan Browning, Megan. If you could unmute yourself, state your name and affiliation, and ask your question regarding education and outreach materials.

548
01:15:35.320 --> 01:15:45.400
Meagan Browning: Hi, yeah, thank you. My name is Megan Browning. I'm the city of San Diego. I just wanted to clarify in the description box for education outreach material.

549
01:15:45.490 --> 01:15:48.770
Meagan Browning: Is it just more generic like we might have created

550
01:15:49.080 --> 01:15:53.280
Meagan Browning: 7 different types of fires about Sp, 1,383,

551
01:15:53.570 --> 01:15:59.860
Meagan Browning: and like 5 specific to recycling. Or we need to describe each

552
01:16:00.130 --> 01:16:03.050
Meagan Browning: piece of material that's actually created.

553
01:16:04.150 --> 01:16:24.359
Yeah, I would answer your question. But I'd say, be descriptive, as you think you need to be. That explains your education outreach program. I think probably in this section more. The first part of what you said, just kind of a general description should shatify those requirements, since the actual education, outreach materials will be part of your implementation record.

554
01:16:24.490 --> 01:16:31.419
Meagan Browning: So if we ever do a request, the Doc actual documentation of what that education outreach looks like would be in your record.

555
01:16:31.520 --> 01:16:35.460
and we can view view the more detailed as components there.

556
01:16:35.880 --> 01:16:37.359
Meagan Browning: Perfect. Thank you.

557
01:16:42.220 --> 01:16:45.679
Chris, can you check really quickly if we have anything in the Socp in box.

558
01:16:48.760 --> 01:16:55.589
I was just doing that. So this question is from Sharon Simpson.

559
01:16:57.240 --> 01:16:59.199

and the question is

560
01:16:59.270 --> 01:17:07.710
because commercial and residential customers will change throughout the year. Are we picking a
date in time? We're using the largest number at one time.

561
01:17:11.170 --> 01:17:19.169
I mean, I think it kind of depends. But just the one that you believe is the most accurate for

562
01:17:19.320 --> 01:17:34.480
reporting. I mean, open it back up the number of generators that receive that Ss, Soc, P material,
because I'm assuming you don't send it all year round, so you could just say in quarter one. We
sent this many quarter to. We sent this many, or whatever kind of breakdown.

563
01:17:34.570 --> 01:17:35.740
You do

564
01:17:35.860 --> 01:17:47.219
to indicate that. And you could sum those up and just use that description box to describe how
you went about your how you why, you put the number you put in that box.

565
01:17:51.170 --> 01:18:00.820
Jen, we can go in and try to unmute you in case you wanted to add anything to it and just make
sure that that question was for education outreach. Or were you talking about generators in
general?

566
01:18:05.190 --> 01:18:06.150
Sharon Simpson: Okay.

567
01:18:17.940 --> 01:18:37.039
I'm gonna pause, you real quick. I don't know if anyone else has an issues. But I I it's breaking up
quite a bit and can't hear your questions. So if you could put it, maybe in the Q. A. Pane ideally,
or send another email to Slcp dot organics and caloriesycle.ca, Gov.

568
01:18:37.110 --> 01:18:42.669
and maybe we can add additional clarification if we need to. But yeah, sorry I can't unfortunately
hear you.

569
01:18:43.610 --> 01:18:59.710
Yeah, I think it was coming through like that sound like that for me as well, we have one more question from Don Schultz Allen from the city of Antioch. If I have questions on working on the year in the coming weeks. Is this the email address the best place to submit my questions?

570
01:19:00.840 --> 01:19:06.629
No, you should be contacting your land representatives. If you have questions about what to report

571
01:19:06.650 --> 01:19:09.670
in the electronic annual report.

572
01:19:10.820 --> 01:19:13.919
and if you don't know who that is

573
01:19:14.900 --> 01:19:17.730
might not be going about it the rest way. But

574
01:19:18.870 --> 01:19:25.390
you can go to our website. You can see I've already done it a few times. But local assistant contacts

575
01:19:27.080 --> 01:19:28.230
click, search.

576
01:19:31.680 --> 01:19:40.329
A few hit results. So local assistance and market development lamb contacts where you want to go, and I'll put this once. I grab it into the chat for everyone.

577
01:19:41.210 --> 01:19:43.360
Let's see. So right here at the top.

578
01:19:43.540 --> 01:19:47.749
So local assistance contact shirt search is where you want to go.

579
01:19:49.980 --> 01:20:02.859
So now you can pick your jurisdiction. and we'll just do alimated to make it easy to kinda see. So it pops up with all contacts for the jurisdiction and down towards the bottom.

580
01:20:03.910 --> 01:20:06.870
It'll show you your calorie cycle representative.

581
01:20:11.180 --> 01:20:14.010
Let me just clear that real quick.

582
01:20:15.550 --> 01:20:19.470
and we'll put that in the chat for you. There you go

583
01:20:23.020 --> 01:20:28.840
cool. Thank you, Andrew. One more question. and I believe

584
01:20:29.930 --> 01:20:46.489
this is probably for the education and outreach, but not completely sure. Alexander Bradow, the third from city of La the Grid we're looking at seems to have conflicting instructions, one saying to include all outreach for Slcp. Mcr. More, etc.,

585
01:20:46.510 --> 01:20:50.020
and asking about M. Slcp. Only

586
01:20:53.960 --> 01:20:56.419
unmute Alex, and we can discuss it.

587
01:20:57.700 --> 01:21:23.270
Alexander Brideau III: Alex, you're I got it. Thanks so much. Yeah. What I'm looking at right here on the grid is, you know, the the wide bar at the tops is what type of education and outreach. We're provided to all generators. And then it basically clarifies to include the outreach for Slcp. Mcr. More, etc. And then in the individual columns, the sub columns beneath it. It does specify number of generators that received Slcp material, and it seems like it. I think you mentioned earlier. It does seem to call out Slcp.

588
01:21:23.400 --> 01:21:36.689

Alexander Brideau III: specifically and deliberately. Kind of seems or seems to include, this, not include those other Mcr. More on the up, and the 3 related outreach. So so I found that a little I just wanted to clarify

589
01:21:36.750 --> 01:21:54.919
Alexander Brideau III: like, if I'm asking for the number of generators. Let's say it for print media. The number of generators who receive print outreach? Does it still apply to Slcp plus those other categories? Mcr. More, or you no longer want to know about. If if I sent out a mailer that had to do with more because it was targeted towards commercial businesses.

590
01:21:55.210 --> 01:22:06.200
Alexander Brideau III: you would not want me me to include that number any longer, and you'd want me to try to win it down to only be Slcp outreach hopefully. That makes sense the way I'm describing it. Yeah, it does. So

591
01:22:06.260 --> 01:22:12.159
what we're attempting to do here is really easier burden on education outreach

592
01:22:12.340 --> 01:22:28.659
reporting requirements. So the reason Slcp. The number of generators that received Soc. P material is called out specifically is because that's a reporting requirement from Slcp, I think 1, 8, 9, 9, 4, 2.

593
01:22:29.000 --> 01:22:39.859
That specifically says, we need to know the number of generators, whereas no other law, whether that be Mcr. More or 939 tree programs

594
01:22:39.920 --> 01:22:44.770
have that requirement for you to report that number.

595
01:22:45.180 --> 01:23:04.449
So that's why we're being specific about the number of generators that receive the Socp material. If you include all your generators that receive all of your education, outreach materials, because the reason we designed it this way is at this point in time, since essentially

596
01:23:04.920 --> 01:23:08.599
all materials are kind of being diverted in one way or another.

597
01:23:08.670 --> 01:23:23.220
We we're we're kind of making, I guess the assumption that jurisdictions are no longer saying for 9 39. And your free programs do this for Mcr, do this for more. Do this and for Slcp, do this. You're just generally saying.

598
01:23:23.330 --> 01:23:43.650
Put your organic material. Here, put your food waste here, put your bottles and cans here, so you don't need to tease out the ones that only get the Soc P material. If you want to include that total number that are receiving those education and outreach materials, we're just calling it out specifically, because that's the reporting requirement.

599
01:23:44.010 --> 01:23:49.409
And then in that additional description box, you could just say, number reported includes

600
01:23:49.500 --> 01:23:51.040
all generators.

601
01:23:52.740 --> 01:23:54.210
Not answer your question.

602
01:23:54.760 --> 01:23:56.670
Alexander Brideau III: Yeah, I think that makes sense. Thanks. Okay.

603
01:24:01.950 --> 01:24:04.390
no other question so far.

604
01:24:05.000 --> 01:24:09.300
 you could just keep moving.

605
01:24:10.370 --> 01:24:22.000
Alright. So the Am. Well and Calgreen grids, you know, we change to that green bar with the Socp. Tech, since those are a result of Socp and the related reporting requirements

606
01:24:22.710 --> 01:24:30.800
so to access the functions on this grid kind of same as always, and I think just to kind of point out, because I think there's often a question here

607
01:24:31.040 --> 01:24:35.760
of what to report. And this it's the same statement for him well, in Calgreen.

608
01:24:35.940 --> 01:24:44.870
so the activities that should be included are those where the project has been completed and or the necessary information is available to determine compliance with in well

609
01:24:44.990 --> 01:24:48.460
requirements in this particular case. So

610
01:24:48.810 --> 01:24:57.460
just because a project started in 2,022, and you can't confirm whether it was compliant with this, you would

611
01:24:57.640 --> 01:25:00.620
not report it until you had

612
01:25:00.670 --> 01:25:11.310
whatever documentation or completion that for your jurisdiction, in order to determine that compliance with the M. Well or Calgary requirements.

613
01:25:12.280 --> 01:25:14.910
Just kind of wanted to point that out specifically.

614
01:25:19.190 --> 01:25:22.240
So we'll save that. And then I'll just show you in the Calgary.

615
01:25:22.690 --> 01:25:39.949
It says essentially the same thing. So whatever marker you use to indicate that project is completed and necessary information is available to determine compliance with the calgary requirements. That is the number. Your report here. Not necessarily the ones that started in 2,022

616
01:25:42.560 --> 01:25:44.710
just wanted to point that out.

617
01:25:46.550 --> 01:26:01.469
And this particular grid. There's the one tree program that hides here. So if you have this selected in your as one of your tree programs, it just made the most sense to include it with your kind of Calgreen, C and D area. So here you do have to check that box.

618
01:26:04.450 --> 01:26:10.829
Then a nerds used to be a program detail. of 46 dsp.

619
01:26:11.100 --> 01:26:18.130
you just select all that may apply as far as the materials that you're diverting. And then in the shree programs here.

620
01:26:18.860 --> 01:26:22.499
You just confirm those program. Details are up to date and current

621
01:26:23.390 --> 01:26:32.360
in order to complete this page. And so, since I haven't done all the grids up in here. I'm not going to bother saving the page, since I'll get the error message. Since I didn't answer it for the rest of the jurisdictions.

622
01:26:34.700 --> 01:26:37.350
We did include kind of a little note here.

623
01:26:38.550 --> 01:26:42.040
not some additional requirements so just read through that as well.

624
01:26:44.860 --> 01:26:49.009
 move on to household hazardous ways.

625
01:26:49.450 --> 01:26:58.789
Household hazard is waste programs is free programs. Only. So that's why it's the gray bar and just the check boxes not going to activate this page, since it gets pretty straightforward.

626
01:26:59.490 --> 01:27:04.659
check the box, prefer to to confirm that those program details are up to date and current

627
01:27:04.910 --> 01:27:06.570
and then save the page.

628
01:27:09.110 --> 01:27:13.500
Alright. We already covered disposal rate, calculation and calculation factors

629
01:27:13.690 --> 01:27:20.409
earlier. And if additional questions come up we'd be happy to answer them. But I'm going to
jump over those for now

630
01:27:20.820 --> 01:27:23.389
and go to waivers and exemptions.

631
01:27:25.830 --> 01:27:28.290
Okay, so waivers and exemptions.

632
01:27:29.340 --> 01:27:48.120
So department issued waivers is referring to the rural exemption or the low population waiver.
And then it's just asking about the number of generators that are away from the requirement to
subscribe. If you have a department issued waiver, which is the rural exemption or low
population. Waiver. This is not

633
01:27:48.160 --> 01:27:49.660
where your report.

634
01:27:49.850 --> 01:28:04.649
your jurisdictional waivers for de minimis or physical space. I'll show you that in just a minute.
and then, as well as any emergency, waivers and tons that were disposed as a result of those
emergency waivers or disaster

635
01:28:06.010 --> 01:28:07.390
cancel out of that.

636
01:28:08.910 --> 01:28:24.820

So here in jurisdiction issued waivers. is where you'd report the number of de minimis waivers issued, or the number of physical space papers issued. and this one. just to draw your tension is in that green bar and Socp specific.

637
01:28:28.050 --> 01:28:33.100
We do still include more exemptions here.

638
01:28:33.510 --> 01:28:42.559
and we did it in a gray bar, and I know it's a little redundant. But just for consistency, put more in parentheses. There are there as well.

639
01:28:43.300 --> 01:28:44.550
And so this is

640
01:28:44.670 --> 01:29:02.210
really probably applies to most of you, or to any of you that would have a low population waiver. So you're waived from that requirement for Socp. But more still applies, and so you may issue waivers related specifically to mandatory organics, commercial recycling.

641
01:29:03.600 --> 01:29:05.269
So in this section.

642
01:29:08.110 --> 01:29:16.680
if you are not issuing any more exemptions because that so Cp kind of takes precedence over it for your jurisdiction.

643
01:29:17.080 --> 01:29:23.919
An entry still required here. So you just say 0, and you can just say not applicable.

644
01:29:24.740 --> 01:29:30.929
or Socp takes Presidents or see above or waivers issue and say, Save

645
01:29:35.520 --> 01:29:39.879
all right, I'm going to cover one more section that will pause for questions.

646
01:29:42.390 --> 01:29:50.489

All right. Container contamination, monitoring for prohibited container contaminants. We did add a little bit of functionality to this grid.

647
01:29:51.690 --> 01:30:00.350
and that functionality essentially is just the addition of an additional description box. so that if you wanted to add more of a narrative of what you're doing

648
01:30:00.430 --> 01:30:10.009
for your prohibited or contamination monitoring for prohibited container contaminants, you can explain what you're doing for either route reviews or waste evaluations

649
01:30:10.610 --> 01:30:18.759
and these particular goods. You'll see if there's quite a few grade fields. It's initially one in you to select one and or both of these.

650
01:30:20.970 --> 01:30:22.440
When you select one.

651
01:30:22.480 --> 01:30:31.639
it activates the fields that are required for that particular contamination monitoring system that you're selecting.

652
01:30:33.690 --> 01:30:39.050
and if you select the other one, it activates the fields that are required for waste evaluations.

653
01:30:42.770 --> 01:30:57.280
So this number down here, this number of notices, violations, or targeted education materials issued to generators is specifically related to your contamination monitoring for prohibited container contaminants program. So

654
01:30:57.390 --> 01:31:11.840
if you're doing kind of the whoopsy tags as cart tags when you discover contaminants for route reviews or doing an entire route. And if you're doing waste evaluations, that's the number. You're putting here, not your general education and outreach

655
01:31:18.600 --> 01:31:26.760

alright inspections. There is no changes. So you, just noting the number of commercialable food generators, inspections for tier one and tier, 2

656
01:31:26.850 --> 01:31:40.369
inspections for root food, recovery, organization and services, or the commercial businesses inspections if applicable. And that's just because this last field is because that is in the regulations.

657
01:31:40.630 --> 01:31:51.640
and this is just if you are going out to a business to do an additional inspection that is not falling into one of these categories. You can report that number there, but I believe it is.

658
01:31:51.960 --> 01:31:53.220
and optional.

659
01:31:53.950 --> 01:31:59.900
Are you just hit? Enter 0 in that field. If it does not apply to you.

660
01:32:00.530 --> 01:32:10.689
and I think, noting that tier 2 starts in 2,024 so required entry. There, just enter 0, and if you like you can just put that additional note of

661
01:32:11.120 --> 01:32:18.879
haven't done any inspections yet. Then I'll start next year. or I guess, in 2 years, as far as the reporting perspective, but 2024,

662
01:32:21.360 --> 01:32:25.290
and then the complaints. Section. This is more of your

663
01:32:25.900 --> 01:32:36.610
whistleblower type complaints so complaints of not having a proper green container or not collecting food waste, or a neighbors disposing of materials

664
01:32:36.770 --> 01:32:51.080
improperly. Those types of complaints. You do not need to report complaints such as my rates are too high, or I don't like what you're making me do. It's just really related to lack of organics collection services here.

665
01:32:53.480 --> 01:32:57.699
all right, and then I'll pause there to see if we have any questions.

666
01:32:59.360 --> 01:33:02.850
Could you quickly remind everybody where the webinars are

667
01:33:03.050 --> 01:33:12.740
available, where the recordings are? And if we will be hosting an additional, your webinar. This is the second of the series. I'm not sure if it's been determined. If we're going to have host anymore.

668
01:33:13.320 --> 01:33:24.509
Yeah. So the no webinars. We haven't posted the one that we did. I don't believe. Correct me if I'm wrong, right from June seventh of last week for this, for 2,022 reporting cycle.

669
01:33:24.760 --> 01:33:32.370
but this is where all the old ones are that really kind of go over the major overhaul that we implemented last year of this grid structure.

670
01:33:32.980 --> 01:33:46.440
and I believe we'll probably put these new ones here as well. But if we don't, we will be sure to. when we do make them available we'll send out a list. Serve message of where you can find the new recordings.

671
01:33:46.820 --> 01:33:53.619
And then the second part of your question. I'm not sure there's no no more on the calendar, but that does not mean that we won't

672
01:33:56.110 --> 01:33:59.700
thank you. I did submit the request to get the

673
01:34:00.580 --> 01:34:08.650
June seventh webinar to our department Youtube channel. So that'll be available by Monday. So please keep an out for that.

674

01:34:09.020 --> 01:34:13.469
Our next question comes from Andrew, written

675
01:34:14.780 --> 01:34:20.240
Andrew, you are unmeted on Arn. If you would state your name, affiliation, and ask you a question regarding rural jurisdictions.

676
01:34:31.580 --> 01:34:40.900
Okay, I'll go ahead and ask our world jurisdictions with a role waiver required to know how many generators are subject to the waiver. We've never been asked to collect that info.

677
01:34:44.490 --> 01:34:56.939
yeah. So you want to enter the number of generators that are away from that requirement to subscribe to organic waste. So it should just be kind of a billing statement should be a pretty easy data point to collect.

678
01:34:57.860 --> 01:35:02.630
So you can just be including to everyone in your particular case, since the entire

679
01:35:03.480 --> 01:35:06.639
county would be waved from that requirement.

680
01:35:15.320 --> 01:35:18.929
That's all that we have for now, unless we have anything else in the Soc.

681
01:35:23.070 --> 01:35:24.860
No, nothing in the inbox.

682
01:35:29.250 --> 01:35:31.799
Okay, enforcement and monitoring

683
01:35:33.100 --> 01:35:39.290
again, change those headers to make it hopefully more clear on what you're reporting. In each of these grids.

684
01:35:39.430 --> 01:35:55.400

There's a lot of over potential overlap here, depending your program. But just as a reminder that these grids are kind of more talking about the the desk audit that you're doing on your commercial businesses. And again, a change from

685
01:35:55.410 --> 01:36:07.130
last year to this year is that we no longer splitting out the multi-family. and have combined multi-family into this commercial businesses definition with

686
01:36:07.350 --> 01:36:18.710
multi-family specifically fitting the commercial businesses. Definition is, if there are 5 or more dwellings within or units within that multi-family complex, they would be

687
01:36:19.170 --> 01:36:21.870
and considered a commercial business.

688
01:36:22.460 --> 01:36:27.070
So what you're reporting here are the reporting requirement

689
01:36:27.410 --> 01:36:28.470
is

690
01:36:28.640 --> 01:36:44.130
the compliance. We use all solid waste collection accounts for commercial businesses that generate 2 cubic yards or more per week of solid waste. including trash, recycling, and organic waste. So that's all combined collectively. So if they

691
01:36:44.790 --> 01:36:53.930
so, it's not just organics, specifically that it's referring to with that 2 cubic yards as if the combination of trash, recycling and organics

692
01:36:54.230 --> 01:37:00.369
collectively or 2 or more, then you'd want to include them in this number of

693
01:37:00.400 --> 01:37:05.729
the number of promotion businesses included in that Compliance Review, and then the number out of those

694
01:37:05.790 --> 01:37:08.940
that are not recycling organics.

695
01:37:16.850 --> 01:37:18.579
So you'd enter those numbers here.

696
01:37:20.520 --> 01:37:27.200
The more grid. And again, we had to include this and couldn't just combine it into an organic section

697
01:37:27.320 --> 01:37:28.850
because of

698
01:37:29.050 --> 01:37:34.220
for the to kind of just have the functionality for all jurisdictions.

699
01:37:34.550 --> 01:37:44.220
specifically for kind of low population. Waiver jurisdictions. If Socp does not apply. you would enter those numbers here for more specifically.

700
01:37:46.190 --> 01:37:48.550
if if Slcp

701
01:37:48.610 --> 01:37:55.090
covers any of the any of the commercial businesses that are also apply.

702
01:37:55.500 --> 01:38:04.289
or that I am sorry, mumbling my words that mandatory commercial organics recycling would also apply. And that's not the right one. I want to highlight.

703
01:38:05.030 --> 01:38:12.949
So again, it's kind of that same threshold. 2 or more cubic yards per week of solid waste, including trash, recycling or inorganics.

704
01:38:13.260 --> 01:38:17.860

could potentially be the same number that you're reported in the grid above.

705
01:38:18.350 --> 01:38:24.190
You don't only have to report out those separate ones. so you can include the same numbers here

706
01:38:25.660 --> 01:38:35.190
and the monitoring form. Those you can just describe that this is covered by Socp. If Socp kind of takes more precedence in your particular jurisdiction.

707
01:38:39.940 --> 01:38:43.260
And then last, there's mandatory commercial recycling as well

708
01:38:44.390 --> 01:38:46.389
to list those out here.

709
01:38:48.100 --> 01:38:53.550
which may also be some overlap with the Socp since

710
01:38:53.660 --> 01:39:08.639
organics potentially go into that blue container. So if that's your situation where Slcp covers all of these categories. You can report those same numbers and just explain that in this monitoring to inform those not recycling about Mcr.

711
01:39:16.300 --> 01:39:27.189
The last few grids talk about the notice of violation process with the penalty orders, and then the Enforcement action resolves our Enforcement actions resolved.

712
01:39:28.110 --> 01:39:34.239
So you just report on those number of notices you issued for these respective categories. Here

713
01:39:38.310 --> 01:39:42.749
the penalty orders that were issued for those same respective categories.

714
01:39:44.020 --> 01:39:48.380
and then those enforcement actions that were result for those same categories.

715
01:39:50.480 --> 01:39:53.220
And then I'll pause to see if there's any questions there.

716
01:39:55.420 --> 01:39:56.470
Nothing right now.

717
01:39:58.600 --> 01:39:59.430
Okay.

718
01:40:00.610 --> 01:40:05.170
actually, we did just get one in from Justin Sullivan.

719
01:40:05.540 --> 01:40:09.669
Justin, if you could go ahead and unmute yourself, state your name and affiliation and ask your question.

720
01:40:10.520 --> 01:40:14.529
justin sullivan: Hi, there, Justin Sullivan Contra Costa County. quick question about

721
01:40:14.600 --> 01:40:29.370
justin sullivan: The the first 2 you mentioned Slcp and more, had a specific quantity of above 2 cubic yards. I didn't see that on the Mcr. Is there a a threshold of how much a generator needs to make to be considered for reporting in that? Mcr.

722
01:40:29.530 --> 01:40:34.669
yeah. I believe Ncr. Is still at the 4 cubic yard threshold.

723
01:40:35.470 --> 01:40:50.679
But you know. I think most cases Socp. Would supersede that, since probably in that blue bin which would be mandatory commercial recycling. You're allowing kind of cardboard and paper which organic material.

724
01:40:50.850 --> 01:40:58.489
so you're probably covered in those above grids. But for cubic cards, I believe, is the threshold specific for Mcr.

725
01:41:07.150 --> 01:41:11.219
Did that get it answered for you, Justin?

726
01:41:11.290 --> 01:41:13.699
do have one in the inbox

727
01:41:13.830 --> 01:41:18.520
Thomas Hammond from Mid Valley disposal.

728
01:41:18.530 --> 01:41:24.390
Would commercial site assessments be entered under the inspections tab, or in the Compliance Review tab.

729
01:41:26.110 --> 01:41:30.010
I think I'll need more information about what you mean by site assessments.

730
01:41:33.220 --> 01:41:47.520
Thomas Hamon: Yeah. So when we go, do a commercial side assessment, whether it be for contamination, monitoring or just talk to them about diversion. Would that be considered an inspection if we're looking into there

731
01:41:48.120 --> 01:41:51.870
Thomas Hamon: waste stream, or that can be considered compliance.

732
01:41:52.000 --> 01:41:52.680
No.

733
01:41:53.390 --> 01:41:57.189
yeah. So there's a few different things going on. So

734
01:41:57.610 --> 01:42:02.109
I think I think this will answer your question. So on enforcement and monitoring

735
01:42:03.260 --> 01:42:14.789

this is essentially a desk. Got it? So you're kind of looking at your billing statement, looking at those thresholds, identifying who hits that 2 cubic car threshold, and then who does not have

736
01:42:14.920 --> 01:42:24.100
kind of a green or a blue band to divert organics or whatever system we have. I'm kind of using a 3 container collection system and my example that I'm talking about right now.

737
01:42:24.220 --> 01:42:27.450
So this is just kind of strictly off of

738
01:42:28.010 --> 01:42:33.299
you know, a billing spreadsheet of a account for commercial accounts.

739
01:42:34.420 --> 01:42:36.479
What you're talking about

740
01:42:36.640 --> 01:42:41.630
sounds a little bit more, and think I'm getting I mean route reviews you would would put

741
01:42:41.690 --> 01:42:49.660
here, or was it? I'm sorry? Yeah. Any route reviews you'd put in this grid here, but I think specifically what you're talking about

742
01:42:50.080 --> 01:42:58.710
would be would apply. I think, here. So this would be a spot where you could enter that number of. We went to this commercial

743
01:42:58.750 --> 01:43:10.659
business and inspected their system and advise them if you wanted to include that that narrative as well. When you open up that grid. And I can just open it up real quick. Does that answer your question?

744
01:43:15.310 --> 01:43:19.510
So here you put it, does it? Does answer my question. Okay, excellent.

745
01:43:24.450 --> 01:43:28.100

Up next. We have a question from Ian Bevan.

746
01:43:29.690 --> 01:43:54.030
Ian Bevan: and you're unmuted on our end. If you could state your name affiliation and ask you a question there. yeah, I actually am a consultant working with several South Orange County jurisdictions. it was kind of just a piggyback off of that. Mcr, and more numbers. If if if the Slcp number encapsulates that, you can just provide the same number for Mcr more.

747
01:43:54.030 --> 01:44:22.550
Ian Bevan: is it also true? Then, if that question for Mcr. And more, where it says, How are you educating? I guess it's non compliant people, which there are probably none in our jurisdict our jurisdictions, but we still would probably put the education, outreach descriptions there. And now would it be better just to just refer to the Slp Slcp education and outreach which encapsulates all that education stuff.

748
01:44:23.680 --> 01:44:30.809
Yeah, this one here in this particular grid is slightly different. So this would be more of

749
01:44:31.330 --> 01:44:52.950
Ian Bevan: You're kind of sorry. Were you talking about? Mcr. Are we talking about more? Well, both of them? Actually, it's the same question that that question. You got highlighted right there. So if if that's in encapsulated in the Slcp education outreach for the year, could we just say, please see Slcp education outreach section.

750
01:44:53.350 --> 01:44:57.990
So this one's this one's slightly different. So what you're describing is you're just

751
01:44:58.200 --> 01:45:07.320
giving them education, outreach on the requirements of the law, whereas this one here is your specifically kind of noticing

752
01:45:07.420 --> 01:45:24.649
that business that is out of compliance to inform them that they're not recycling with Mcr. Or more respectively. So it's yes, it's education outreach, but it's a little bit more pointed that they're kind of specifically out of compliance instead of just these are the require. These are how our

753
01:45:24.720 --> 01:45:39.629

Ian Bevan: collection system work and where you should put materials. So, okay, so if there's no, no one who's not out of compliance, then probably just don't even answer it. Yeah, you're gonna be required to say something. But you could say exactly what you just said, okay, sounds good.

754
01:45:40.400 --> 01:45:42.300
Ian Bevan: Thank you. I appreciate that.

755
01:45:45.230 --> 01:45:47.420
I think that's all for now, Andrew.

756
01:45:48.190 --> 01:45:51.470
Ian Bevan: So I think we're we're getting close to the end.

757
01:45:51.810 --> 01:45:59.469
and so I think we'll just run through the rest of it, and then we'll open it up for questions where we can go anywhere as needed.

758
01:46:01.990 --> 01:46:09.129
facilities is free programs. Only. So just check the box to make sure those program details are current. You'll be done here.

759
01:46:10.100 --> 01:46:23.750
Infrastructure and barriers. Just how it has the one question about capacity planning. It does not apply to you. Say no. If you say yes, you're required to put a description in this box down below.

760
01:46:26.160 --> 01:46:38.389
all right, and forcible mechanisms and ordinances. We did make a slight change in this grid with the focus just being on the Socp. Required ordinances and changes to those not all ordinances.

761
01:46:39.390 --> 01:46:41.530
So if you had something to report here.

762
01:46:41.760 --> 01:46:45.280
you would just say yes and describe that here

763
01:46:48.410 --> 01:46:58.739

Alternatively, we did put a document management button. So if you wanted to upload that ordinance that got changed. And then in that note box

764
01:46:58.870 --> 01:47:02.140
you could just describe the sections that changed

765
01:47:02.310 --> 01:47:09.619
instead of putting the actual words, is just another option to provide that documentation in a different way. But you would want to

766
01:47:11.830 --> 01:47:16.210
describe in this box if you uploaded a document.

767
01:47:16.590 --> 01:47:22.220
the the the sections, or like the paragraphs that changed in those ordinances.

768
01:47:24.770 --> 01:47:35.609
All right. So this is a chain, one of the main I a major change that we made to this particular grade, which hopefully makes it a lot easier for you. So in this contact changes.

769
01:47:35.670 --> 01:47:51.020
we changed it so that it would populate both your Slcp primary and your Slcp official contacts into the grid that we have associated to your jurisdiction.

770
01:47:51.760 --> 01:48:02.590
So that way it should hopefully serve as kind of a better reference for you. Maybe I shouldn't open that up for everyone to contact people. We'll just go down a little bit below

771
01:48:03.490 --> 01:48:07.769
but it should help serve as a better reference for you to see if you need to

772
01:48:07.830 --> 01:48:19.529
make changes to any of those contacts. And then, if so, you just say yes in that grid, and then make the changes as necessary, and that will allow us to go in and update them on the back end.

773
01:48:21.080 --> 01:48:37.970

Andrew, one thing I want to add on that, because we are now an active year season. Well, I made about 30 or 40 contact changes this morning. So if you have submitted a form. Thank you. We're working through them as fast as we can. And I believe that grid will

774
01:48:38.140 --> 01:48:47.019
upload data based on when you first go to this tab. So I think if the Slcp primary official was changed today

775
01:48:47.610 --> 01:48:50.549
through a contact change request. For

776
01:48:51.560 --> 01:49:16.140
if you haven't been to this part of the year, yet I believe it will reflect the new changes. But once you've been on this page, any changes submitted through the contact change, request form won't necessarily be on here, but they will go beyond the live on the website whenever they get made. And this is specific to the Slcp primary and official contacts. This doesn't necessarily affect the in a report or other jurisdiction contacts.

777
01:49:17.960 --> 01:49:18.980
Thanks, Chris.

778
01:49:20.080 --> 01:49:26.810
A slight tweak we made in this section as we move the Socp. Required ordinances up to the top.

779
01:49:27.300 --> 01:49:36.990
and then also added in parentheses, the Socp. Required tag just for easier reference, and I believe there's some jurisdictions where

780
01:49:37.210 --> 01:49:48.259
ordinances or enforceable mechanisms may not apply to you. And so there's no longer a requirement to select something here. If you're in one of those rare situations

781
01:49:49.680 --> 01:49:54.350
and then tree programs check the box that the program details are up to date and current.

782
01:49:56.350 --> 01:50:01.940

All right. And with that I'm going to pass it back to Chris, and he's going to close this out, and then we should have

783
01:50:02.150 --> 01:50:05.160
a few minutes at least to answer any more remaining questions.

784
01:50:08.780 --> 01:50:12.780
Sorry before I take over we did have a question come into the inbox.

785
01:50:13.700 --> 01:50:16.989
It's a Mark Hill, county of Santa Barbara.

786
01:50:17.460 --> 01:50:24.229
one of the hollers in our jurisdiction uses Hopper cameras to comply with the Route review, position, provision of Slcp.

787
01:50:24.680 --> 01:50:33.619
This is essentially a con, essentially a constant route review process with that in mind what should be reported for Route Review figures for this portion of our jurisdiction.

788
01:50:34.490 --> 01:50:36.509
and he does not have a microphone.

789
01:50:38.350 --> 01:50:45.860
So, as far as the reporting requirement is concerned. since it sounds like you're using route reviews as you'd select. Route reviews.

790
01:50:46.480 --> 01:51:08.900
enter the number of routes that reviewed Conductive for prohibited container contaminants. It doesn't really matter whether you have a human or a machine doing that evaluation and then enter the number of notices, violations, or target education materials issued to those generators. And if you'd like, you can describe specifically what you have for your program and the additional description box.

791
01:51:22.820 --> 01:51:24.449
you know, and take it away, Chris

792
01:51:25.820 --> 01:51:29.000
Yup, switching around my screen. Hold on a second.

793
01:51:35.110 --> 01:51:37.349
and then, while he's doing that.

794
01:51:38.670 --> 01:51:44.000
I think it did see kind of general right. This is not the end of our support for you.

795
01:51:44.310 --> 01:51:53.530
so you can send questions to your Soc. Or organics address if you have questions right now, and we'll kind of follow up with those based on the webinar.

796
01:51:53.650 --> 01:51:56.799
If you need general technical assistance.

797
01:51:58.410 --> 01:52:10.709
you would want to contact your local assistance market development representative. which I'll just put in the chat one more time. which you can find by going to that link that I just put in the chat.

798
01:52:41.140 --> 01:52:43.690
This should be the right screen. Now.

799
01:52:43.930 --> 01:52:44.630
yep.

800
01:52:45.710 --> 01:53:05.450
okay. So this is the planning documents. Section. This is, not necessarily specific to sort of climate plumes or 33 for those of you previously done annual reports? These are, questions that you have generally answered over the last 2030 years doing these reports, but

801
01:53:05.450 --> 01:53:21.550
they still require some answers The first answer is, if you have a rural petition. These were established as part of the 939 process. If you have a rural petition. You probably know there's not a lot of them. There is a link to those that have it

802
01:53:21.550 --> 01:53:34.420
right here. but most are not going to have that rule petition? If you do, we know that you should
know that? And that's where you would put yes, newly incorporated cities. We have not had any
newly incorporated cities.

803
01:53:34.420 --> 01:53:59.359
and in the last, I think, 1215 years. If you know, if you are in a county that may have a newly
incorporated city showing up. This is where you would put this question in This question only
applies to county. So you wouldn't have to do this otherwise ideally, there's no new new
incorporated cities happening. but if you know, if you have an idea, if we put it in there

804
01:53:59.980 --> 01:54:07.310
the last bit here the planning documents assessment. Does the Sri need to be revised?

805
01:54:07.380 --> 01:54:36.719
No, it does not need to be revised 99.9 of the time by updating the diversion program
information, by checking those boxes on previous tabs and or putting in new notes and or make
any other changes to the detailed tree information you are updating your Shree. A Shree revision
is a little different, and requires a whole public process and votes and documents. So there's
generally no need to revise a free.

806
01:54:36.950 --> 01:54:40.769
You are making an update by updating this annual report.

807
01:54:41.040 --> 01:54:53.480
Same goes for the Ha. Ha. Household hazardous waste element by updating a report. You are
updating the codes. The program codes associated to that. So generally, a revision is not required.

808
01:54:54.160 --> 01:55:22.560
no disposal facility element. This is where, if you are going to be using a new diversion facility
that needs to be issued, a solid waste or a composting permit of some type, you would need to
make sure that they are present in either your non-disposal facility element, or the surrounding
counties, or the host county the not having, then the fee updated is required before the
conformance findings. When issuing a permit.

809
01:55:22.870 --> 01:55:46.110

If you do need to make an update, you can write yes or no, if yes. there is a link to our website where you can find more information about making a no disposal facility update. Generally you just send us a letter saying, Here's what we're updating. Please put it with our file, and we will do that. This is a not a formal process, like making a revision to the other planning documents.

810
01:55:46.980 --> 01:55:57.649
So in this case, no, I'm just gonna write. No. So you can get through this summary plan. Assessment generally a summary plan. Assessment update is not needed

811
01:56:00.660 --> 01:56:11.499
the Summary plan assessment as part of the original planning documents. It was like a one time thing. It was really just a Po, a a bow on the rest of the planning documents for the county.

812
01:56:11.530 --> 01:56:29.019
and generally that does not need to be updated at all the areas of concern or approvals. this is related to the original approval of your planning documents. Hopefully, these areas of concern have been addressed some time since planning documents were approved long, long ago.

813
01:56:29.040 --> 01:56:46.159
But if there were some issues, you can always look at old reports to see if this was previously reported or just right. Now, same thing with conditional approvals. Hopefully, those documents that may have had conditional approvals long, long ago are up to date. If not, you can write yes, and put in an answer.

814
01:56:48.500 --> 01:56:56.759
And the citing element assessment this is another county. Only question the counties do need to have.

815
01:56:57.280 --> 01:57:09.839
Could it input an estimate of their minimum number of years available for disposal, either in county or contracted? If you have less than 15, you will need to answer the following question.

816
01:57:10.280 --> 01:57:13.629
right here. So if you not have currently 15 years.

817
01:57:15.550 --> 01:57:31.710

you would have to do that. But in this case we have 15 years, and the citing element adequacy. Generally, the citing element does not need to be updated. It is adequate unless you do not have 15 years, in which case you would have to put in

818
01:57:32.040 --> 01:57:39.650
may answer some type there to complete the section. And I miss something in planning documents. Oh.

819
01:57:41.910 --> 01:57:46.430
question number 3. describe any changes in the

820
01:57:46.530 --> 01:57:49.200
and the there we go

821
01:57:49.280 --> 01:57:53.300
now, save and that section is complete.

822
01:57:55.590 --> 01:58:16.239
The additional information and report management section this last bit. This is more late to the shred. We diversion programs. Most of these were updated throughout the previous tabs. If you would like to come in and add any specific notes. Or take a last look at some of these. This is where you can catch any of the other programs that might need to be edited, and from here

823
01:58:16.240 --> 01:58:30.480
generally this information at the top has been here for a bit. You are not going to necessarily need to change the start year or the sectors unless something has changed. If you are dropping an existing program that's on that list, you would input the program S to drop.

824
01:58:30.500 --> 01:58:40.010
And then you'd need to input a reason why you were dropping that program. Generally you would want to drop a lot of these. but if you are. That's where you would put it.

825
01:58:40.830 --> 01:58:42.050
save.

826
01:58:46.750 --> 01:58:58.729

And then also on the additional information and report management page. This is more of an open-ended spot where you can write anything that didn't fit into any of the previous sections.

827
01:58:58.920 --> 01:59:10.129
And if you have any other documentation beyond the disposal modification, I said earlier, where the other button is. This is another opportunity to upload any last documents you'd like to share.

828
01:59:11.870 --> 01:59:13.190
and

829
01:59:13.240 --> 01:59:16.350
on the last tab submit confirmation

830
01:59:16.900 --> 01:59:21.889
when when it's the report is actually complete, you should be able to

831
01:59:22.690 --> 01:59:29.190
submit. You should be able to submit the report, because all of these are going to be green, and I do believe I had

832
01:59:30.550 --> 01:59:35.840
a test report done from last night. But oh, wait! I don't have access to that from here.

833
01:59:36.070 --> 01:59:39.300
Let me see. here we go

834
01:59:50.400 --> 01:59:53.789
that I I think I'm already submitted this one actually.

835
01:59:54.020 --> 02:00:06.990
but when the report is complete you will have green check marks next to all the field, and there will be a submit confirmation button down here at the bottom if you want to take a look at your report

836
02:00:09.350 --> 02:00:19.119

button right here, and that is a way to download the report before you actually submit it. In case anyone else needs to read through it and take a look.

837
02:00:19.970 --> 02:00:28.890
I will mention that the some of the changes to Field and some of the headers that Andrew showed earlier are not necessarily reflected in this Pdf.

838
02:00:28.920 --> 02:00:43.249
Pdf. Report, yet those will be updated at probably early next week. It's one of the the last things we have to do. Once we get all the other changes in. So that is currently being worked on, and I would think would be updated early next week.

839
02:00:46.160 --> 02:00:47.380
So

840
02:00:50.600 --> 02:00:51.660
that

841
02:00:53.300 --> 02:00:58.869
do we have any questions on the last little bits I covered there, Ray.

842
02:00:59.810 --> 02:01:18.180
I'm not on the last pieces, but if we could go back to the collection collection systems tab, we have a question from Andrew Britain, who doesn't have a mask so I can. I'm sorry, doesn't have a mic, so I can go ahead and walk you through their issue. Yeah, before you do, Ray, I'm going to steal the screen back from you. Chris.

843
02:01:18.840 --> 02:01:24.990
1 point of clarification I want to make before we go to that collection systems. Grid is on

844
02:01:26.430 --> 02:01:30.320
this additional information and document management screen.

845
02:01:30.650 --> 02:01:38.249
If you go into your street programs here and enter the program notes there, you still have to go through each tab

846
02:01:38.790 --> 02:01:50.460
and check the box next to the tree program in order to be able to submit the report. You can't just go to that table at the back end and enter all your notes. You still have to go section by section and check

847
02:01:50.630 --> 02:01:53.350
each one of these industry programs. Areas.

848
02:01:54.780 --> 02:01:56.489
Just want to point that out.

849
02:01:56.930 --> 02:02:01.020
Okay, we're ready now, Ray, if we want to go to collection systems

850
02:02:01.150 --> 02:02:02.090
perfect.

851
02:02:02.280 --> 02:02:08.150
So once Andrew enters all the necessary info. It's not allowing them to save

852
02:02:08.450 --> 02:02:19.189
 I don't know if that's a reoccurring issue, but they'd also like to know who's the best staff person to follow up with more technical questions on the report rather than what is being reported.

853
02:02:19.910 --> 02:02:27.209
Yeah, I mean, I'll answer that last question first, but I think I know what's maybe going on, and maybe hopefully, Andrew's still here, Andrew, still here

854
02:02:31.220 --> 02:02:44.880
in any way. yes, he is. Okay. Good. So the con, the link that I provided in the chat. That's your local assistance market development contact there, your best point of contact. If you have questions after this, Webinar.

855
02:02:45.620 --> 02:02:51.590
I have a feeling, though, that probably what's going on like right now. And correct, hopefully, I'm

856
02:02:51.610 --> 02:03:06.020
hopefully, I'm right, actually, because we're hoping we don't have any issues. But you feel like, probably that button should be right about here. because it's kind of in the senior grid. But this grid in particular, the collection systems grid because it's so big, has its own scroll bar.

857
02:03:06.680 --> 02:03:15.330
So you have to scroll over a decent ways, and the say button should be there. So is that what's going on? The button is not showing for you.

858
02:03:32.020 --> 02:03:34.730
Do we have Andrew on on muted.

859
02:03:36.670 --> 02:03:38.899
So it doesn't look like Andrew has a mic.

860
02:03:39.160 --> 02:03:44.240
So let's give it a second to see if that fixed the issue.

861
02:03:44.730 --> 02:03:53.879
if you'd like, we can move on to another question, what? And has a chance to respond in the Q. And a

862
02:03:53.980 --> 02:03:55.510
running a little long here.

863
02:03:55.610 --> 02:04:01.000
Okay. So Andrew did follow up, saying, they found the save button, but it wasn't an option.

864
02:04:02.740 --> 02:04:03.550
Hmm.

865
02:04:04.060 --> 02:04:12.000
yeah, probably you need to. I think it'd be helpful if we could have a conversation. because there's quite a few things you have to select here. So

866

02:04:12.040 --> 02:04:18.450
I mean as an example, if you click here and then try to save. It's not necessarily a parent

867
02:04:18.590 --> 02:04:31.080
that you're running into an issue after you click that button, but if you kind of scroll back down and then scroll back to the left, it should prompt you with some sort of error message of what you're not doing.

868
02:04:31.360 --> 02:04:36.499
because there's quite a few components in this particular grid that you need to answer.

869
02:04:40.190 --> 02:04:45.100
or potentially a name you might need to just put something in there as kind of a placeholder.

870
02:04:46.670 --> 02:05:03.929
but I think it's probably one of those 2 options, or you're not answering the organics allowed in great container question. If you selected the 3 plus or 3, or not entering a number of some kind or not answering for both residential and commercial, because you do have to answer both every time you open up

871
02:05:05.230 --> 02:05:10.239
the screen so hopefully. That's resolved. If not, reach out, to your lambda rep.

872
02:05:10.510 --> 02:05:12.619
Yep, they're going to go ahead and keep trying.

873
02:05:12.710 --> 02:05:17.849
I think our final question for today is from Derek.

874
02:05:17.990 --> 02:05:21.650
Do we need to provide a description for all of the Sri programs.

875
02:05:22.560 --> 02:05:32.659
But no, there is no. Let's see, let's go to an example of that. Just so everyone can see and be on the same page. So I have a believe you're talking about free programs here.

876

02:05:32.800 --> 02:05:35.329
And one of these as an example.

877
02:05:36.110 --> 02:05:47.410
So no, there is no requirement to enter information in this box. The only requirement we use a different color is to check that box. And by checking that box

878
02:05:47.460 --> 02:05:52.770
you're saying that the program. Details in that hyperlink are up to date and current

879
02:06:03.100 --> 02:06:04.780
anything else before we wrap.

880
02:06:05.410 --> 02:06:09.640
I think that was that was our final question in the Zoom Platform.

881
02:06:09.710 --> 02:06:18.529
If there's anything in the Slcp inbox that we didn't get to please be patient, and we'll get back to you as soon as we have a chance to follow up with our lamb staff.

882
02:06:20.380 --> 02:06:27.619
All right, and thank you so much. You know we did release. My final closing message is, we did do some changes this year.

883
02:06:27.800 --> 02:06:42.760
and inevitably, unfortunately, they're usually our bugs. Hopefully, they're few and far between. And maybe, Andrew, that's what's going on with you. But please just Where, Chris, can you state where you want those messages? If they run across any bugs

884
02:06:46.430 --> 02:06:50.219
logic, cal recycle. Gov.

885
02:06:51.360 --> 02:07:01.459
I see a. And if they go to the Slcp. In box, that's fine, too. They will. They will make their way to you or me, or both of us, in some way.

886

02:07:01.700 --> 02:07:21.699
Yeah. And so, if you do encounter any bugs, as much information as you can possibly give us really helps us correct them quickly. So where the error occurred what you were doing when you got the air, and then screenshots, or especially helpful. So hopefully that does not occur. But if it does that information helps us to

887
02:07:21.810 --> 02:07:24.080
resolve those much faster.

888
02:07:25.560 --> 02:07:28.749
And with that, thank you very much for attending

889
02:07:28.840 --> 02:07:36.380
and reach out to your local assistance market development. representative. You have any questions. Thank you so much. Have a good day.
