

0:00
massive Tire fires burning for months or
0:02
even years LED California to track the
0:04
safe management of its waste tires we
0:06
used to see a lot of illegal dumping of
0:08
trash and tires across the state more
0:10
local governments are taking the lead to
0:12
protect their communities if they're
0:14
properly stored there's less of a hazard
0:16
with up to
0:17
\$650,000 in annual funding Cal recyc
0:20
local government waste tier enforcement
0:22
grant program covers cost for things
0:24
like program staff Administration
0:26
equipment and travel to support local
0:28
oversight of neighborhood business
0:30
businesses any facility that generates
0:32
waste tires whether it be airports golf
0:34
courses mechanic shops local inspectors
0:37
ensure local businesses meet state
0:39
standards for safe hauling tire storage
0:41
disposal and recordkeeping they take
0:44
time to really educate the business
0:46
owners they're ensuring the number of

0:47

tires going into the facility or the

0:49

number of tires going out State funding

0:51

coupled with Cal recycled training and

0:53

support helped more than 30 communities

0:55

take control of their waste Tire

0:56

inspection programs I think that just

0:59

the fact that we're out there doing

1:00

these inspections really helps out our

1:02

communities protecting Californians

1:05

building trust with local businesses and

1:07

advancing California's circular

1:09

waste-free
