

0:00  
California has a trash problem even  
0:02  
after recycling billions of products we  
0:04  
still throw out 40 million tons of  
0:06  
garbage a year turning limited materials  
0:08  
into pollution that piles up in  
0:11  
landfills and in our streets rivers and  
0:14  
ocean the solution is to stop treating  
0:16  
our waste like trash as our population  
0:18  
grows we can keep our convenient lives  
0:21  
by reusing materials in a circular  
0:23  
economy cutting plastic pollution by  
0:26  
having industry use less plastic and  
0:29  
recycle the rest there's about 1.3 1.4  
0:32  
million pounds of trash in this yard  
0:34  
that would have ended up in our landfill  
0:36  
it's going to become products adding  
0:38  
Wine and Liquor to the Redemption  
0:40  
program to reuse more glass one of the  
0:42  
great things about glass is it's 100%  
0:45  
infinitely recyclable cutting climate  
0:47  
pollution from rotting food and yard  
0:49  
waste by turning it into green products  
0:52  
what would otherwise go into a landfill

0:54

we're able to turn it into beautiful

0:56

soil that helps regenerate our lands and

0:59

helps grow food for the community nature

1:01

doesn't make Trash a waste free

1:04

California can help heal our planet
