

0:00  
this is definitely I feel like the  
0:01  
future of recycling right here we're all  
0:04  
indoor it we protected from the elements  
0:06  
it's nice it's clean the reason why this  
0:08  
model Works cuz it has a style of  
0:10  
recycling for everybody for example we  
0:12  
have a bagd drop we have two big bulk  
0:14  
feed uh style machines where they dump  
0:16  
in their mixed aluminum plastic and  
0:18  
glass and then we also have one  
0:19  
single-fed rvm um machine the kids  
0:22  
really like using those you know they  
0:23  
like to shove bottles and cans in there  
0:25  
like this was super easy you didn't  
0:26  
really have to think about anything but  
0:28  
that's the thing like if you can make  
0:30  
make it easier it's just going to make  
0:31  
it easier for everyone and you get money  
0:33  
back so I it's not a chore for them  
0:35  
anymore it's a it makes it fun exciting  
0:38  
and it's a you know quick easy painless  
0:41  
it just it just makes sense it's a game  
0:44  
changer
