NOTICE

To: All Interested Parties

Subject: Biannual Report of Beverage Container Sales, Returns, Redemption, and Recycling Rates

Public Resources Code Section 14551 requires the Department of Resources Recycling and Recovery (CalRecycle) to report biannually on the redemption and recycling rates for each six-month period within 130 days from the end of that period. This notice conveys the Biannual Report of Redemption and Recycling Rates for the second half of 2025 and the full calendar year 2025. The table below is for all materials. Material specific rates are provided on pages 2 through 20.

Reporting Period	Recycling Rate	Sales Containers	Recycled Containers
Jan - June 2025	73%	13,387,139,747	9,812,990,237
July - Dec 2025	69%	15,196,312,521	10,495,177,431
Calendar Year 2025	71%	28,583,452,268	20,308,167,667

The recycling rate decline for the second half of the year is consistent with the seasonal downward trend observed over the life of the recycling program.

The recycling rate is the number of California Redemption Value (CRV) beverage containers redeemed divided by the number of CRV beverage containers sold which are derived from reports received by CalRecycle from distributors, whereas recycled container counts are derived from the redemption weight (from shipping reports) multiplied by the container per pound rate.

Please note that the recycling and redemption rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned.

If you have any questions about this report, please contact Monica Torres at Monica.Torres@CalRecycle.ca.gov or (916) 341-6696.

Sincerely,

Amy Cameron
Assistant Director for Beverage Container Recycling

Calculation of Redemption and Recycling Rates

A = containers returned from all program types (RC, CS, CP, SP)

B = refillables returned to and reported by beverage distributors

C = postfilled, or non-CRV, containers returned from all program types (RC, CS, CP, SP)

D = number of beverage containers sold

Redemption Rate = (A + B + [C - (0.05 x (A + B))]/D x 100 (The value in brackets [] is included only when greater than zero.)

Recycling Rate = (A+B)/D x 100

Container per Pound Rates (CRV/Postfilled)	Aluminum	Glass	#1 PET	#2 HDPE	#3 PVC
July - December 2025 (RCs Only)	29.7 / 33.3	1.87 / 1.55	27.0 / 6.9	8.4 / 4.7	9.7 / NA

Container per Pound Rates (CRV/Postfilled)	#4 LDPE	#5 PP	#6 PS	#7 Other	Bimetal
July - December 2025 (RCs Only)	39.5 / NA	10.9 / NA	109.5 / NA	3.1 / NA	8.2 / NA

Container per Pound Rates (CRV/Postfilled)	WDS-BBP	WDS-BIB	WDS-MLP	WDS-PC
July - December 2025 (RCs Only)	3.1 / NA	1.66 / NA	33.0 / NA	15.18 / NA

Footnotes:

*The recycling rate formula, specified in Public Resources Code §14551(a), equals the quotient of the number of empty beverage containers returned for recycling and the number of beverage containers sold in the state. The number of beverage containers sold is based on reports from beverage distributors, and the number of beverage containers returned for recycling is based on weights in shipping reports for all program types multiplied by the container per pound rate.

Rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned. For example, June recycled data on the Biannual Report is based on April sales. On the other hand, the Semi-Annual Report on the Status of the Beverage Container Recycling Fund does not include this two-month lag. The Semi-Annual Report presents a month to-month calculation, meaning that sold beverage containers in one month are calculated against containers returned in the same month. This difference is the primary factor in any difference between the sales and returns numbers in the Biannual Report compared to the numbers in the Semi-Annual Report.

†The new material types, WDS-BBP, were introduced into the Beverage Container Recycling Program on January 1, 2024. On January 1, 2025, reporting for WDS-BBP materials was replaced with the separate categories for the reporting of Bag in Box, Multilayer Pouch, and Paperboard Carton material. Participants continued to report the new material under WDS-BBP in 2025. The Department will continue to provide technical assistance to participants to ensure the reporting of WDS-BBP material is completed under the separate categories.

Footnotes:

¹ Due to the addition of new beverages on January 1, 2000 from the passage of SB332, the calculation of the redemption are for January - December 2000. Beginning in 2003, all recycling and redemption rates are presented as whole numbers.

² The recycling and redemption rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned. On the other hand, the Semi-annual Report on the Status of the Beverage Container Recycling Fund does not include the two-month lag. The Semi-annual report presents a month-to-month calculation, meaning that sold beverage containers in one month are calculated against containers returned in the same month. This difference is the primary factor in any difference between the sales and returns numbers in the Biannual Report compared to the numbers in the Semi-annual Report.

³ The new material type, WDS-BBP, was introduced into the Beverage Container Recycling Program on January 1, 2024. On January 1, 2025, reporting under the WDS-BBP material type was replaced with separate material types for the reporting of Bag in Box, Multilayer Pouch, and Paperboard Carton. Reporting using the WDS-BBP material type continued in the beginning of 2025 and was completely phased-out by the end of the year.

Footnotes:

¹ The recycling and redemption rates in the Biannual Report are calculated based on a two-month lag on containers sold to account for the time between when a beverage is sold and when it is returned.

² Data is only one year old, therefore the average is a single value representing CY 2025.

³ The data for this material type is from 2024 and 2025. The WDS-BBP material type was introduced in January 2024 and discontinued during 2025.
