

July 23, 2026

On June 24, 2026, CalRecycle published updated information regarding the collection and sortation of non-CRV cartons (both gable-top and aseptic). CalRecycle based those updates on information it obtained regarding the number of counties served by LVTPs that sort cartons into PSI Grade 52 bales, which are made up of post-consumer food and beverage aseptic and gable top cartons. This updated information will inform the next update to the Covered Material Categories List, which will be published by January 1, 2027.

Based on newly available information, CalRecycle has determined that three additional LVTP facilities now sort cartons into PSI Grade 52 bales. Those facilities are:

- The Western Placer Waste Management Authority Material Recovery Facility (3033 Fiddymont Road, Roseville, California 95747, SWIS # 31-AA-0001)
- Pacific Recycling Solutions MRF (3515 Taylor Dr., Ukiah, CA 95482, SWIS # 23-AA-0048)
- Cold Canyon Landfill Inc. MRF (2268 Carpenter Canyon Road, San Luis Obispo, CA 93401, SWIS # 40-AA-0004)

These facilities have confirmed to CalRecycle that they are sorting cartons into PSI Grade 52 bales. Based on the updated evaluation, cartons are sorted into PSI Grade 52 bales by LVTPs serving 62% of California counties, as shown in the table below

Category ID	Material Class	Material Type	Form	Updated Percent of Counties Served
25_PF15P	Paper and Fiber	Multi-material laminate	Aseptic Cartons	62%
25_PF5P	Paper and Fiber	Multi-material laminate	Gable-top Cartons	62%
