Executive Summary

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(2) — Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the mattress recycling organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the mattress recycling organization's used mattress recovery efforts during the calendar year pursuant to section 18962.

Executive Summary

Overview of the Mattress Recycling Council California, LLC

California's Used Mattress Recovery & Recycling Act, SB 254 (as amended), requires that mattress producers, through a certified "mattress recycling organization," develop, implement and administer a statewide recycling program for mattresses and foundations (collectively mattresses or units) discarded in the state and combat illegal mattress dumping.

The International Sleep Products Association (ISPA) created the Mattress Recycling Council (the Council) as a Section 501(c)(3) nonprofit corporation for this purpose. The California Department of Resources Recycling and Recovery (CalRecycle) certified the Council as the mattress recycling organization and approved its statewide mattress recycling plan. The Council launched the program on December 30, 2015. MRC created a consumer brand for the program known as Bye Bye Mattress.

In addition to operating in California, the Council also administers similar statewide mattress recycling programs in Connecticut and Rhode Island. In 2017, the Council created separate nonprofit limited liability companies for each of the three state-specific mattress recycling organizations it administers. The California organization is called Mattress Recycling Council California, LLC (MRC).

This Year's Annual Report

MRC submits annual reports to CalRecycle to provide updates on program developments during the previous calendar year and our efforts to achieve plan objectives and goals set by CalRecycle. In 2020, CalRecycle established new statewide baselines and goals. To communicate our progress to meet these new goals, MRC is using new CalRecycle terminology for certain data points that is not consistent with how we have reported progress in previous reports. This report will also introduce new data points that CalRecycle had not previously required MRC to meet. Due to the differences between the new and old baselines and goals, we may not be able to present year-over-year comparisons, or when previous year data is presented, we may have needed to recalculate the prior year data to align with the new goals.

Year Six Program Highlights

MRC's performance in 2021 demonstrated the resiliency of the program as MRC continued to grow and evolve despite lingering effects of the COVID-19 pandemic. The program's most notable achievements included:

- MRC increased collection opportunities for residents, retailers and other businesses for the sixth consecutive year, surpassing CalRecycle's 2021 goal.
- MRC's extensive collection network, strategic use of resources and creative use of partnerships provided a highly accessible program for residents in all areas of the state, including residents of rural and environmental justice communities.
- MRC recyclers diverted from disposal 76.9% by weight of the units and materials sent from their facilities (including for recycling, reuse and biomass), making more than 66 million pounds of steel, foam, fiber and wood available for use in making new products.
- MRC successfully launched three illegally dumped mattress mitigation pilot studies and recruited entities from 11 new counties to participate in the Illegally Dumped Mattress Collection Initiative.
- MRC allocated nearly \$1 million to research projects with a continued focus on improving efficiencies in mattress collection, efficiencies in transportation and deconstruction activities, and on identifying new and better uses for recycled mattress materials.
- MRC launched a circularity committee and a new materials committee to facilitate cooperation and information sharing across the mattress supply chain. These committees discuss component materials, design, and construction types that may improve the recyclability of mattress products at end-of-life.
- Through a multichannel, multilingual consumer education strategy, MRC's outreach
 efforts achieved 605 million impressions and increased awareness among California
 consumers of mattress recycling, the retailer take back obligation and how to recycle
 old mattresses.

Collection Network

Since the California program's inception, MRC has expanded its collection network each year. In 2021, MRC added more curbside bulky item collection programs, increased the number of sites accepting commercial volumes and resumed collection events after many were cancelled in 2020 due to the COVID-19 pandemic.

Residential Collection Opportunities

In 2021, MRC's collection opportunities surpassed CalRecycle's 2021 statewide goal. Residents could access 223 permanent collection sites (including recyclers). MRC also supported 161 collection events and collected units from curbside bulky item collection programs at 76 permanent collection sites, an increase from 65 in 2020.

TABLE 1: 2021 MRC Residential Collection Network Highlights

Residential Collection Channel	Number
Permanent Collection Sites	223
Curbside Bulky Item Collection Programs	76
Collection Events	161

Retail & Other Commercial Volume Opportunities

MRC's Commercial Volume Program (CVP) serves mattress retailers, lodging establishments, educational facilities, military bases and healthcare facilities. These entities can choose to drop off their mattresses at designated collection sites or a recycler. Entities with at least 100 units can request no-cost transportation to a participating recycling facility.

Throughout 2021, MRC added no-cost drop off access for small volume commercial sources through MRC's existing permanent collection network. During the year, 140 permanent collection sites accepted units from commercial sources — a 35% increase from 104 locations in 2020.

MRC also provided on-site trailers and reoccurring pickups to more entities that consistently generate at least 100 discarded units per month. The number of entities receiving this level of service grew from 61 in 2020 to 63 in 2021.

Eligible entities that reach the 100 unit minimum less frequently may request a pickup at their convenience. MRC conducted 170 such live load pickups in 2021 serving 62 commercial entities, an increase from 94 pickups serving 38 commercial entities in 2020.

TABLE 2: Commercial Volume Collection Network Highlights

Commercial Collection Channel			
Permanent Collection Sites Accepting Commercial Volume at No Cost	140		
On-Site Trailers	63		
Consolidation Sites	8		
Live Load Pickups	170		

Program Access

MRC annually measures the percentage of residents and retailers who can conveniently access the collection network. MRC evaluates program access for the general population, rural counties and environmental justice communities. We use these results to determine where to focus resources and expansion efforts.

Residential Access

Geographic analysis shows that 96.5% of California's population lived within 15 miles of MRC's permanent collection network (an MRC recycler, collection site, or curbside bulky item collection program) in 2021.

TABLE 3: Percent of Population Within 15 Miles of MRC's Collection Network in 2021

Population Catagory	Permanent Collection	Permanent Collection Network &
Population Category All Residents	96.5%	Collection Events 99.1%
Residents in Rural Counties	93.4%	95.6%
Residents in Environmental Justice Communities	97.4%	99.7%

Access in Environmental Justice Communities

Using program access metrics, units reported through the Illegally Dumped Mattress Collection Initiative and CalRecycle's CalEnviroScreen 4.0, MRC focused its network expansion efforts in areas where MRC's collection network is less accessible or that experienced high per capita rates of illegal mattress dumping. In those areas, MRC worked with CalEPA's Environmental Justice Task Force, the Central California Environmental Justice Network, Local California Conservation Corps and other solid waste groups to provide targeted collection events and establish new permanent collection sites. In 2021, 97.4% of California's residents residing in environmental justice communities lived within 15 miles of MRC's permanent collection network, including recyclers, collection sites and curbside bulky item collection programs. Adding collection events to the calculation increases access to 99.7%. These residents were also eligible for no-cost take back from mattress retailers, the impact of which is not included in the access metrics.

Retailer Access

CalRecycle's newly established goals require that MRC demonstrate by January 1, 2024, that 95% of rural retailers and 80% of urban retailers have convenient access to the collection network. In conjunction with CalRecycle, MRC determined the best way to calculate retailer access is to measure the percentage of households that are within a reasonable driving distance of a location that accepts commercial volume, because the discarded mattress originates at a consumer's home, not a mattress retailer's storefront. Based on retailer feedback, CalRecycle set a 20-mile radius for urban areas and 40-mile radius for rural areas. Using this methodology, MRC found 99.4% of rural households and 99.1% of urban households are within range of a location accepting commercial volume, surpassing the 2024 goal.

Statewide Collection and Disposition

Units collected through the program increased 6% in 2021, from 1,511,553 in 2020 to 1,602,332 in 2021. MRC's recyclers generated 89,012,160 pounds of material, of which they diverted 68,458,525 pounds of material and units from landfill through reuse, recycling and biomass, representing a 76.9% recovery rate.

TABLE 4: 2021 Program Collection and Disposition Highlights

Highlights	Amount
Units Collected	1,602,332
Pounds Recycled, Reused, Biomass	68,458,525
Total Pounds Outbound (Including Disposal)	89,012,160
MRC Recovery Rate	76.9%

Mitigation of Illegal Dumping

MRC increased participation in the Illegally Dumped Mattress Collection Initiative (the Initiative). In 2021, MRC received data from 85 entities, an increase from 70 in 2020. MRC also recruited entities from 11 counties that had not previously participated in the Initiative. Collectively, the 85 participants reported removing 73,380 units from public rights-of-way in California.

Using 2020 Initiative data, MRC analyzed possible correlations between illegal mattress dumping and various factors, including demographics and opportunities for no-cost mattress recycling. In 2021, MRC provided individualized "heat maps" to each reporting entity, which identified areas where illegal dumping was more prevalent in order to help guide their local decision making and resource allocation.

MRC also invited Initiative participants and all California municipalities, nonprofits and solid waste facilities that had at least one year of baseline data for illegal mattress dumping from 2020 or later to apply for MRC funding of projects to reduce illegal mattresses dumping in their communities.

In tandem with these efforts, MRC engaged with communities actively combating illegal dumping by attending relevant working groups and providing resources, including a white paper MRC commissioned that discusses illegal dumping policy recommendations and school lesson plan activities focused on combating illegal dumping. Additionally, MRC hosted targeted mattress collection events, added permanent collection sites and increased education and outreach efforts in areas affected by illegal dumping.

TABLE 5: 2021 Illegally Dumped Mattress Collection Initiative Highlights

Highlights	Number
Initiative Participants	85
Illegally Dumped Mattresses Reported	73,380

Research

MRC's research program focuses on increasing the efficiency of mattress collection, transportation, deconstruction and recycling systems, and identifying new and better markets for recycled mattress materials. To meet these objectives, MRC:

- Funded improvements to mattress collection facilities and other operational enhancements that increase landfill diversion and the recyclability of discarded units. Improvements included, paving areas to improve unit quality and decrease mattress loading times as well as funding equipment to increase efficiency and improve worker safety when loading discarded units.
- Improved transportation data collection and analytics, resulting in increased numbers
 of units loaded per container, which reduced transportation costs and improved
 hauling efficiencies despite lingering supply chain challenges from the COVID-19
 pandemic.
- Provided recommendations for improving mattress dismantling and recycling operations by offering lean manufacturing assessments to MRC's recyclers.
- Funded a UCLA research project to create a lightweight, low-carbon concrete using upcycled polyurethane foam. The project determined that recycled foam outperformed virgin material in the application.
- As part of MRC's multi-year Life Cycle Analysis (LCA), MRC completed two
 projects providing important analytics to measure the program's carbon footprint.
 The first was a waste characterization study to understand how much and which
 post-consumer materials are being landfilled and why. The second measured the
 percentage by weight of each component in mattresses and foundations.
- Continued to foster innovation, cooperation and communication among suppliers, manufacturers, recyclers and end-market commodity buyers around the world by working with industry experts and sharing information on efforts to develop a circular economy for polyurethane foam.
- Organized a New Materials Recycling Committee comprised of representatives from foam, textile and spring manufacturers as well as MRC board members. The committee's objectives are to identify end-of-life challenges posed by current products and materials available to consumers, advise MRC on anticipated longterm changes in product mix and raise industry awareness about how design and marketing decisions can affect recycling.

Circularity and Sustainability

MRC's program is consistent with California's waste management hierarchy and is active in addressing source reduction. MRC's source reduction efforts focus on reducing the environmental footprint of the mattress manufacturing process, encouraging the mattress supply chain to consider end-of-life design issues when creating new products and encouraging consumers to maintain their mattresses properly to extend their useful life.

MRC encourages manufacturers to implement internal continuous improvement processes that will help them measure and reduce both the amount of resources consumed in manufacturing new mattresses and the amount of waste generated from those activities. In addition, MRC has formed committees that are facilitating information sharing across the mattress industry value chain, including mattress manufacturers, component suppliers and recyclers, to improve the recyclability of mattress materials.

Circularity Committee

In 2021, MRC created the MRC Circularity Committee to help mattress component suppliers and mattress manufacturers take end-of-life recycling challenges into account when they design new components and mattresses. The committee has begun by focusing on adhesives and plans to engage with other component suppliers as the committee progresses. The primary goals of the committee are to:

- Discuss how to improve the circularity of mattresses.
- Share recyclers' experiences with suppliers, designers and manufacturers to understand design impacts on mattress deconstruction and end-of-life component recycling.
- Anticipate whether new materials and assembly techniques will require adjustments to recycling infrastructure when a mattress is discarded.
- Establish consensus circular design principles for the mattress industry.

Sleep Products Sustainability Program

To encourage mattress manufacturers to reduce the environmental impact of their mattress assembly operations (and thereby support California's source reduction goals), MRC's Sleep Products Sustainability Program (SP2) offers a proactive program that mattress manufacturers may use to reduce waste and increase operational efficiencies. SP2 helps companies establish a management system that identifies steps for reducing environmental impacts, developing best practices and defining metrics to track progress. SP2 can also serve as a foundation for pursuing an ISO 14001 certification, the international standard for effective environmental management systems. Training, program resources and certification are all offered at no-cost to eligible mattress manufacturers. MRC will extend the program to eligible manufacturers selling into California

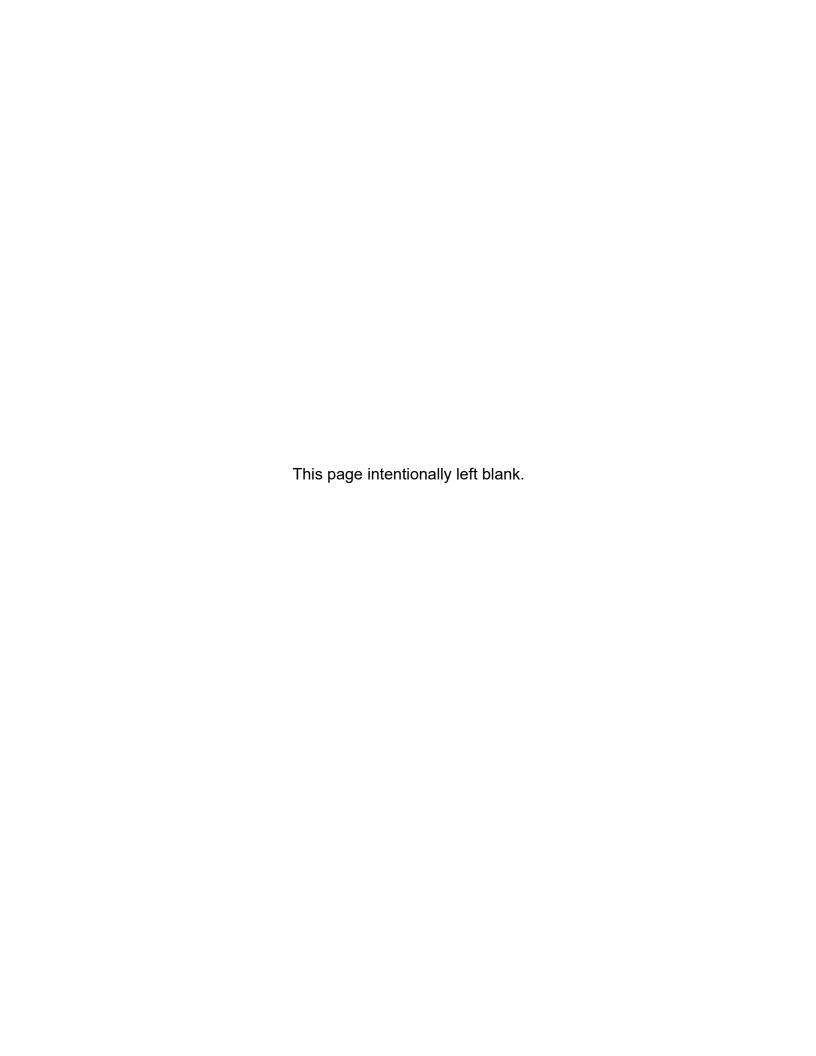

In 2021, MRC announced Pleasant Mattress was the first manufacturer to complete the facility certification. Two additional manufacturers have been trained and are working towards certification and two others have enrolled in the program.

Consumer Education and Outreach

MRC is known to consumers as Bye Bye Mattress. Consumer education and outreach efforts focus on promoting the collection network, raising awareness of the retailer take back requirement and discouraging illegal dumping.

In 2021, more than 446,000 users visited ByeByeMattress.com to find where to recycle their mattress, learn about retailer take back or use the bulky item curbside collection directory.

MRC's Bye Bye Mattress advertising campaigns, public service announcements, media coverage and social media content generated over 605 million impressions, with advertising targeted at areas with high per capita rates of illegal dumping and environmental justice communities. We supplemented these efforts by providing collection sites, recyclers and public officials with tools they can use to promote mattress recycling in their communities. The program continues to promote recycling in multiple languages and retains a multicultural consultant to build awareness of mattress recycling in Black, Latino and Asian-Pacific Islander communities.

Program Collection, Transportation and Processing

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18962(a)(2)(A) — Identify program objectives consistent with California's solid waste management hierarchy as required by subdivision (a) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(3) — A description of the methods used to collect, transport, and process used mattresses in California.

14 CCR § 18964(b)(5) — Description of how consumers of mattresses in California had an opportunity to recycle and properly manage their used mattresses, including the number, location, and type of collection points in the program.

14 CCR § 18964(b)(6) — May include a description of activities to ensure proper collection and management of used mattresses.

14 CCR § 18964(b)(7) — A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.

14 CCR § 18964(b)(8)(A) — Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.

Cal. Pub. Res. Code § 42987.1(i) — A description of methods used to coordinate activities with existing used mattress collecting and recycling programs, including existing nonprofit mattress recyclers, and with other relevant parties as appropriate, with regard to the proper management or recycling of discarded or abandoned mattresses, for purposes of providing the efficient delivery of services and avoiding unnecessary duplication of effort and expense.

Cal. Pub. Res. Code § 42990.1(f) — The uses for the recycled materials.

Cal. Pub. Res. Code § 42990.1(m) — For reports submitted on and after July 1, 2021, all of the following:

- (2) A report on activities, which the mattress recycling organization shall undertake, to prioritize, to the extent economically practical, the use of in-state processing facilities over out-of- state processing facilities. If the mattress recycling organization decides to use out-of-state processing facilities, the organization shall provide an explanation of that decision.
- (3) A report on research activities, which the organization shall undertake, to improve used mattress collection, dismantling, recycling operations, source reduction and green product design, and the response to the problem of illegal dumping and a report on the progress made as a result of the research activities.
- (5) If the mattress recycling organization determines during a particular year that any of the activities undertaken to implement paragraph (3) or (4) were unsuccessful, the organization shall identify the problems with the current activities, and report on the new activities undertaken and progress made, in the following year's annual report.

Program Collection, Transportation and Processing

Mattress Collection

Pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(C), CalRecycle's baseline and goals requires MRC to meet a certain number of convenient collection drop-off, recycling, or disposal opportunities throughout the state each year. In 2021, MRC contracted with 223 permanent collection sites that offered permanent collection for residents.

In 2021, MRC continued to recruit sites for the used mattress collection network, making it more convenient for California residents and businesses to have their mattresses recycled at no charge by MRC, either by dropping their units off at a permanent collection site or by otherwise accessing the network.

Table 6 summarizes MRC's collection network in 2021 and <u>Figure 1</u> geographically illustrates the network. See <u>Appendix B</u> for a list of all the locations.

TABLE 6: MRC Mattress Collection Network

Collection	O'' =	.	Transportation and	Number of Sites/

	No-Cost Collection Site (Small Volume Commercial Drop-Off)	Mattress Retailers, Commercial Entities	Transported to recycler for dismantling	N/A (140 no-cost collection sites accept units from commercial entities and are counted in the permanent collection sites above)	

 $^{^{3}}$ A live load occurs when employees of a collection site load mattresses into a trailer while the carrier waits.

FIGURE 1: MRC Mattress Collection Network

Collection Channels

MRC collects used mattresses through the following channels in California:

- 1. retailer take back
- 2. permanent collection sites
- 3. curbside bulky item collection programs
- 4. mattress collection events
- 5. Commercial Volume Program (CVP).

During 2021, MRC contracted with 223 permanent collection sites that offered permanent collection for residents. MRC also increased the number of curbside bulky item collection programs from 65 to 76 (21 of these are operated by franchise haulers

and municipalities at a private yard, and 55 are operated by franchise haulers and municipalities at SWFs that also serve as permanent collection sites) an increase of 17% from 2020. MRC also participated in 161 collection events. Additionally, MRC increased the number of permanent CVP sites from 61 to 63.

In 2022, MRC continues to expand the permanent collection network to increase access for California residents and commercial entities, who can learn more about the drop-off and recycling options available to them at ByeByeMattress.com. See Appendix B for a list of all locations by type.

Collection Site Types

Retailer Take Back

A retailer that delivers a new mattress to a California consumer must offer to take back a mattress that the consumer has discarded upon request at no cost. Consumers can use this collection channel when purchasing a new mattress. Retailers then may recycle the used mattresses at no cost through the program (MRC bears the cost of recycling).

In 2021, the retailer take back requirements expanded to include mattresses delivered to a consumer by a common carrier. These retailers can drop off mattresses at an MRC recycler or use MRC's CVP services.

Permanent Collection Sites

Since the inception of the program, MRC has created a robust, permanent collection network throughout California where residents can discard used mattresses for recycling. MRC initially targeted SWFs and then expanded its site recruitment efforts to focus on underserved areas by including alternative collection locations, such as nonprofits, public agencies, Native Nations and California Redemption Value (CRV) recycling centers. As of December 31, 2021, the California program had 223 permanent collection sites. These sites are listed in Appendix B.

Except for mattress recyclers, MRC pays contracted collection sites a handling fee if they accept mattresses from the public (MRC compensates recyclers for serving as collection sites as part of the general recycling services they provide). MRC bears the cost of transporting the units to a recycler and recycling them.

The specific types of permanent mattress collection sites that the program offers California residents and commercial entities are as follows:

Solid Waste Facilities

SWFs comprise the majority of MRC's permanent collection network. In 2021, MRC had contracted with 153 SWFs, 46 of which operate in rural counties of the state. All of these sites accept mattresses dropped off by residents at no cost, and 84 accept commercial

drop-off at no cost, a 45% increase from the 58 SWFs that accepted commercial drop-off in 2020. Additionally, in 2021, MRC reclassified 16 permanent collection sites from SWFs to public agencies to reflect the type of collection location more accurately.

As of January 1, 2021, three SWFs remained temporarily suspended due to the COVID-19 pandemic. In March 2021, one permanently ceased operating as a collection site. As of April 2022, one of the suspended SWFs resumed operations. MRC continues to monitor the one SWF whose operations remain suspended and will provide an update in the next annual report.

In 2021, MRC worked with an existing permanent collection site in Del Norte County to expand days of operation by adding an additional five days of collection per week by appointment only.

MRC prioritizes which SWFs to recruit as potential new collection sites based on mattress disposal data that SWFs annually report to CalRecycle. This resulted in two SWFs being added to the collection network in 2021. MRC is continuing this recruitment effort in 2022. At the time of this report, one additional SWF joined the permanent collection network in Trinity County.

Mattress Recyclers

In most cases, MRC recyclers accept mattresses directly from residential and commercial entities at no cost. In 2021, MRC's recycling network consisted of nine locations throughout California. This is a decrease in the number of locations reported in 2020 because one recycler terminated operations and four recyclers consolidated facility locations.

Recyclers track the number of units they receive from each of the following sources (see <u>Program Collection and Disposition Data</u> section for number of units collected from each source):

- Retailer Drop-off: This includes mattress retailers that use their own transportation or MRC's CVP services.
- Institutional Drop-off: This includes hotels, educational facilities and other largevolume purchasers of mattresses that use their own transportation or MRC's CVP services.
- Consumer Incentive Payment (CIP): Through MRC's CIP program, California residents may drop off discarded mattresses at specified recyclers and receive an incentive payment of \$3 per unit for as many as five units per vehicle per day.

Nonprofits

MRC contracts with nonprofit organizations such as Goodwill, Habitat for Humanity ReStore and Local California Conservation Corps to serve as public collection sites. Depending on the site, residents and/or commercial entities may drop off units at

these nonprofit sites at no cost. In 2021,16 nonprofits accepted mattresses from the public through MRC's program, a decrease of one from 2020. Additionally, 15 of the 16 nonprofits accept commercial drop-off at no cost.

In 2020, two nonprofit sites terminated operations due to logistical challenges, but MRC added one new nonprofit to its collection network in 2021, resulting in a net loss of one location between 2020 and 2021.

CRV Recycling Locations

MRC contracts with collection centers that participate in the CRV Beverage Container Recycling Program. In 2021, California residents and commercial entities could drop off mattresses at three CRV recycling centers throughout the state, all of which are in rural counties. In 2021, MRC reclassified one CRV location as a local business because they ceased being a CRV location for the state of California but continued to collect mattresses for MRC.

At the beginning of 2021, one CRV location temporarily suspended operations. MRC will provide updates on this location in the next annual report.

Mattress Retailers

To increase mattress retailer and residential access to the program, MRC contracts directly with some mattress retailers to become public drop-off sites. In 2021, MRC had established eight public drop-off locations at retailers. Both California residents and commercial entities may drop off mattresses at seven retailer drop-off locations. One retailer only accepts discarded units from residents. Additionally, four of the eight retailers accepting public drop off are located in rural counties.

Mattress Renovators

Residents and businesses may drop off discarded units at mattress renovators at no cost. In 2021, seven mattress renovators collected mattresses through MRC's program. Any mattresses they did not renovate were sent to MRC recyclers for dismantling.

In 2022, MRC continues to recruit renovators identified through annual data reported to CalRecycle to become permanent collection sites.

Other

In 2021, MRC recruited two new local businesses, two public agencies and one Native Nation as permanent collection sites. In total, MRC had contracts with seven local businesses, 19 public agencies and one Native Nation. Two local businesses and one Native Nation are located in rural counties. MRC reclassified 16 permanent collection sites from SWFs to public agencies to reflect the type of collection location more accurately.

Curbside Bulky Item Collection Programs

Some franchise haulers and municipalities provide curbside bulky item collection of mattresses at no additional charge to residents. Residents schedule a pickup for their discarded mattress. Participating haulers and municipalities collect the mattress and load it into an MRC-provided trailer positioned at their yard or SWF. Finally, MRC transports full trailers to recyclers for dismantling.

Units may be collected through bulky item pickups through either of two processes:

- MRC contracts with a municipality or franchise hauler to recycle units collected through its existing bulky item program. The MRC-provided trailers in which these units are consolidated typically are located at private yards and are not publicly accessible. In 2021, MRC collected mattresses from 21 municipalities or franchise haulers in this way.
- 2. Some SWF operators that have contracted with MRC to serve as a permanent collection site that is accessible to the public also collect mattresses from bulky item pickup services. These SWFs consolidate mattresses collected curbside in an MRC-provided trailer with other units collected at the permanent collection site. In 2021, MRC collected mattresses from 55 collection sites that accept mattresses from bulky item programs, a 25% increase from 44 sites in 2020. To avoid double counting, these locations are counted under the SWF category, and not counted again under the curbside collection category in Tables 6 and 7.

Mattress Collection Events

To supplement the permanent no-cost collection network, MRC hosts mattress collection events where California residents may drop off mattresses at no cost. MRC partners with municipalities, waste services providers, Local California Conservation Corps, Native Nations, retailers and other interested parties to hold collection events. When hosting events, MRC provides labor, transportation, recycling and publicity.

MRC often combines mattress collection events with events accepting other products to increase convenience for residents, target underserved areas or mitigate illegal dumping.

In 2021, MRC participated in 161 collection events (compared to 61 in 2020). Notably, the events that occurred provided access in 13 rural counties (Alpine, Amador, Del Norte, El Dorado, Imperial, Kings, Lake, Madera, Siskiyou, Sutter, Trinity, Tuolumne and Yuba).

In addition, MRC supported events in areas identified with high per capita rates of illegal dumping – Berkeley, Richmond, Clearlake and Victorville. See <u>Mitigation of Illegal</u> Mattress Dumping section for more detail.

Two other events were scheduled to take place in San Francisco County but unfortunately, disruptions caused by the COVID-19 pandemic forced them to be cancelled.

Commercial Volume Program (CVP)

MRC provides no-cost transportation and recycling of discarded mattresses from retailers, lodging establishments, educational institutions, healthcare facilities and military bases if they have at least 100 discarded units to be picked up at a single site. Transportation is offered in three ways (see Commercial Access for more detail):

- 1. CVP On-Site Trailers: If a business generates at least 100 mattresses per month at a particular location, MRC provides a permanent on-site trailer at a specific location. In 2021, MRC increased the number of on-site trailers from 61 to 63. This arrangement works well when a retail chain uses a central distribution center to deliver mattresses that consumers purchased in the chain's multiple retail storefronts and then consolidates back at the distribution center the discarded mattresses that its delivery teams take back from consumers. In this manner, MRC can provide efficient collection service for all of a retailer's storefronts within its local distribution network.
- 2. Temporary CVP Site: For businesses that generate at least 100 units at a time at a particular location, but not on a monthly basis, MRC does not provide a permanent on-site trailer. Instead, MRC dispatches a truck and trailer to the collector when requested and the units are loaded into the trailer while the driver waits. This is referred to as a "live load" pickup. In 2021, MRC provided 170 live load pickups for 62 CVP entities resulting in an 81% increase in live load pickups from the previous year.
- 3. **Consolidation Locations:** To provide no-cost drop-off for smaller retailers and businesses, MRC positions centrally located trailers where these entities can consolidate the mattresses that they collect. By the end of 2021, MRC had a total of eight strategically placed commercial consolidation locations, an increase of five from 2020.

Small Volume Commercial Loads

To provide no-cost drop-off for commercial sources generating smaller volumes (that is, fewer than 100 units at a time), some permanent collection sites will accept small commercial loads. By the end of 2021, 140 permanent collection sites accepted no-cost drop-off for small commercial loads. To avoid double counting, these locations are counted under the Permanent Collection Site category, and not counted again under the CVP category in Tables 6 and 7. See Commercial Access for more detail.

In order not to undermine mattress renovation, as intended by the Legislature, MRC is communicating with renovators regarding the CVP program. MRC also provides a list of compliant renovators to businesses that are not eligible for CVP transportation services. See the **Reuse** section for more detail.

Table 7 shows the total number of collection sites by type from 2017 through 2021. For a complete list of all collection sites and events, see Appendix B.

TABLE 7: Collection Network by Site Type, 2017 Through 2021

Site Type			2018	2019	2020	2021
	Solid Waste Facilities	133	145	162	172	153
	Mattress Recyclers	12	15	11	14	9
	Nonprofits	6	12	14	17	16
Permanent	CRV Recycling Locations	3	7	6	5	3
Collection Sites	Mattress Retailers	5	6	7	7	8
	Mattress Renovators	2	2	7	7	7
	Others	2	3	4	5	274
	Total Permanent Collection Sites	163	190	211	227	223
Curbside Bulky Item Collection Programs			19	20	21	21
Mattress Collection Events			97	152	61	161
Commercial	CVP On-Site Trailer Site	N/A	19	36	61	63
Volume	Temporary CVP Site (Live Loads)	N/A	0	127	94	170
Program (CVP)	Consolidation Locations	5	6	4	3	8

⁴ In 2021, MRC reclassified 16 permanent collection sites from SWFs to public agencies to reflect the type of collection location more accurately.

Collection Site Mattress Management

When adding new collection sites, MRC provides on-site training and guidelines to educate site staff regarding proper handling, efficient stacking techniques and best practices to increase the recyclability of mattresses received. MRC's Mattress Recycling Program Guidelines (see <u>Appendix C</u>) are included in all collection site and event contracts.

The guidelines define products eligible and ineligible for recycling and explain how collectors can efficiently load mattresses into trailers. They also describe non-recyclable mattresses (e.g., those that are wet, insect-infested, excessively soiled, etc.) and how to identify bedbug-infested units.

To further assist collection sites in identifying and managing instances of bedbug contamination, MRC offers an online training video about bedbugs that collection site staff can access on demand. See MRC's Resources Library for a link to the video.

In 2020, MRC began developing a six-part video series to assist in onboarding new collection sites and their staff. As of this report, MRC has completed five videos (available on MRC's Resources Library) that address bedbug identification and management, efficient mattress stacking and loading, effective collection site operations, program and non-program products identification and collection event promotion. These are available in English and Spanish with an accompanying one-page reference document. MRC visits new collection sites as they are being established, and

on average visits existing locations annually. In 2021, MRC staff conducted routine site visits providing collection sites supplemental training and resources. During site visits, staff answer questions, confirm whether the site is following the guidelines, provide updates on how a site may apply to MRC for improvement funds, provide resources on stacking and loading of mattresses to improve efficiency, offer suggestions to maintain the quality of collected mattresses and provide necessary signage, invoicing support, etc.

In 2021, MRC continued its collection site support by awarding collection site improvement funds to nine applicants. MRC awards funds for projects intended to increase the recyclability of mattresses or improve efficiency (such as a covered/paved mattress storage area to keep the units dry and clean, forklift equipment, etc.). See the Research section for more information.

Mattress Transportation

For each MRC collection site in California, MRC pays for or provides storage containers that are appropriate for the size and location of each facility. MRC uses 53-, 48- and 28-foot trailers, as well as sea containers and roll-off bins for sites with limited space or other logistical constraints. The 53-foot trailer is preferred because it can hold the most mattress units, resulting in a lower per unit transport cost. Roll-off containers, which are the smallest storage option, are the least efficient alternative, but may be the only option for collection sites with small or restricted loading areas. All containers that MRC provides are covered to reduce contamination of the mattresses and eliminate damage from weather.

To provide mattress transportation throughout the state, MRC contracts with mattress recyclers, third-party logistics companies, transportation companies and SWFs to pick up and transport mattresses from specific facilities.

Collection sites that do not transport units using their own equipment will contact a transporter provided by MRC when a full container is ready to be picked up and swapped for an empty one. For sites located in urban areas, MRC transporters have 48 hours to swap a trailer after receiving a request, and up to five days for sites in rural areas. High-volume locations may be assigned a regular pickup schedule to make sure transporters can keep up with the volume. MRC is available to assist with any issues that may arise regarding transportation. Mattresses are bulky and light cargo, and as a result, efficient transportation helps control costs. MRC assigns mattress loads to individual recyclers in an effort to achieve efficiency throughout the collection network.

In 2022, MRC released an RFP for transportation services. We will provide an update in the next annual report.

Mattress Processing and Recycling

Recycler Procedures

After discarded mattresses arrive at a recycling facility, the recycler unloads the container. Mattresses contaminated with bedbugs or putrescible solid waste cannot be recycled and are separated to minimize facility contamination and worker exposure, and then landfilled.

Non-contaminated mattresses then are dismantled. The outer ticking layer is removed so each internal component material can be separated. The dismantling process varies from one recycler to the next, but most use a combination of manual and mechanical processes. Each recyclable material type is separated and sometimes compressed into bales for shipment to buyers. See the <u>Uses for Recycled Materials</u> section for details regarding what happens to each material type after consolidation at recyclers.

Some recyclers separate and sell high-quality used mattresses or their component materials to renovators, who use them to renovate mattresses for sale in secondary markets

Uses for Recycled Materials

Recyclers sell the materials reclaimed from used mattresses and foundations for use in manufacturing new products. See the <u>Program Disposition Data</u> section for quantitative information. Although there were no significant changes in these uses in 2021, MRC continues to invest in research to identify new end markets to increase the program's recycling rate and to help MRC's recyclers become more financially sustainable. MRC's research efforts target many of the product categories discussed below. See the Research section for more detail.

Steel Wire: Most used mattresses contain steel springs, either in the form of innersprings or pocketed (fabric-encased) coils. Likewise, most used foundations contain a steel wire interior structure. The steel from both mattresses and foundations can be shredded or baled for sale in steel scrap markets. Steel mills then purchase the scrap steel and re-melt it for use in manufacturing new steel products, such as appliances, automobiles and building products.

In 2021, scrap metal recyclers continued to reject pocketed coils for recycling because they considered the polypropylene fabric encasing the coils, which amounts to 8% to 10% of the pocketed coil's weight, to be a contaminant. Rather than landfill thousands of tons of pocketed coils, MRC transported this material from all its California recyclers to companies in Fresno, Los Angeles and Stanislaus Counties that removed the fabric and sold the steel to scrap markets.

Foam: The interiors of most mattresses contain one or more layers of polyurethane and/or latex foam. After the outer quilt panel is removed, the recycler separates the inner foam layers for baling and sale to scrap purchasers. Most post-consumer foam is sold to carpet underlayment manufacturers to make carpet padding. The scrap foam is chopped into small pieces, mixed with rebonding adhesive and exposed to steam to cure the mixture. The result is rebond foam that then is cut into thin sheets to make carpet pad. Carpet pad is constructed primarily of post-industrial polyurethane foam, but also may contain a small percentage of used carpet pad, as well as post-consumer mattress foam and quilt panels.

Quilt Panel: The mattress sleep surface (that is, the top layer of a one-sided ("no-flip") mattress and the top and bottom layers of a two-sided mattress) typically is a composite material that includes a decorative outer fabric (also called ticking), one or more layers of fiber batting, non-woven fabric or foam (polyurethane and/or latex) and a thin backing fabric (usually a non-woven fabric). These layers usually are quilted together. Once the quilt panel has been removed from the mattress, recyclers typically bale it for sale separately from other reclaimed commodities.

Demand for recycled quilt panel is limited for several reasons. First, quilt panels lack consistent construction and input materials. Second, quilt panels are more likely to become contaminated with dirt, water, bodily fluids or other environmental impurities because they are the outermost layer of a mattress. As a result, quilt panel is most commonly sold to carpet underlayment manufacturers, which chop the quilt into small pieces to make carpet pad. In this application, post-consumer quilt panel represents a small percentage of the finished carpet pad.

Foundation Wood: Most consumers use a foundation or box spring underneath their mattress. The foundation raises the sleep surface of the mattress to a comfortable height and helps prolong the life of the mattress by acting as a shock absorber. A typical foundation is composed of a wood

frame assembled using nails or staples. A steel wire structure attached to the wood frame by staples or nails provides the spring support for the foundation. Some foundations contain a wood interior structure instead of a steel wire structure. The sides of the foundation typically are covered by a decorative ticking while the top and bottom typically are covered by a non-woven fabric.

To dismantle a foundation, recyclers remove the ticking and non-woven fabric, then shear or shred the unit to separate the metal from the wood. If the wood is free of significant metal or fabric contamination, it can be finely shredded for use as mulch, or burned for energy value in a biomass or waste-to-energy (WTE) facility. Wood is either sold or given away, or recyclers pay a tipping fee for the wood to be made into mulch or alternative daily cover (ADC), or to be burned as biomass fuel.

In 2021, one recycler periodically sent a portion of foundation wood to a SWF that used most of it as mulch and a fraction was used as ADC. In 2022, that recycler sends wood to a biomass facility.

Cotton: Depending on product construction, a mattress may contain other non-woven fiber layers such as cotton. Recyclers separate and bale the reclaimed cotton. Fiber markets for used cotton are limited and depend on whether the reclaimed material is co-mingled with other fibers and prevailing market conditions. End uses for this material include insulation and acoustic panel products for the construction and building industry.

Other Fiber: Many mattresses also contain layers made from one or more other types of fiber. Depending on the construction of the mattress, these fibers may include polyester, rayon and other synthetic fibers, wool, horse and other animal hair, and coconut fiber. Coconut fiber can be composted or added to wood chips for use as ground cover. Nevertheless, recycling options for these other fibers are limited. As a result, most typically are landfilled or, at best, transformed for use in WTE facilities.

Shoddy Felt: Another common layer in mattresses is shoddy felt (also called shoddy pad or just shoddy). This material usually is placed between the metal springs and foam layers to insulate the foam from sharp points on the springs and to keep the foam from working its way into the springs during the

life of the mattress. Shoddy is a non-woven material comprised of mixed shredded recycled post-industrial fabric and apparel. Given the mixed nature of the fiber types used to make shoddy which would be cost prohibitive at present to separate into different fiber categories, shoddy is usually landfilled.

In 2021, one recycler sent shoddy felt to a manufacturer that makes textile fillers.

Plastics: Retailers often place the discarded mattresses they collect from consumers in plastic bags (usually polyethylene) so that dirt, bedbugs or other biological materials on the discarded units do not contaminate new units being delivered on the same truck. These bags are frequently on the discarded mattress when it arrives at the recycler. Most recyclers bale and sell this material to plastic recycling companies where the bags are converted into plastic pellets. Manufacturers of new plastic products melt and use this recycled plastic as a feedstock in their manufacturing processes. Potential end uses for these pellets include composite plastic lumber and plastic film products.

Cardboard: Mattress foundations may contain a layer of cardboard that separates the wood base structure from the bottom non-woven fabric. Recyclers bale the cardboard and sell the bales to companies that make chipboard for cereal boxes, corrugated cardboard and other packaging materials.

Materials Management/Waste Hierarchy

MRC and its recyclers implement the program consistently with California's solid waste management hierarchy: source reduction, reuse (including renovation), recycling, composting, biomass, transformation/waste to energy (WTE) and landfill. The following describes MRC activities undertaken for each management method in the hierarchy.

Associated data is provided under the Program Disposition Data section.

Source Reduction

Healthy, restorative sleep is essential to physical and psychological wellbeing. The mattress industry manufactures durable, comfortable and affordable products to meet those needs. Almost every American consumer will sleep on a mattress for all their life. These are long-term durable goods that consumers use over a multi-year period. MRC's source reduction efforts focus on reducing the environmental footprint of the mattress manufacturing process, encouraging the mattress supply chain to consider end-of-life design issues when designing new products and encouraging consumers to maintain their mattresses properly to extend their useful life.

MRC encourages manufacturers to implement internal continuous improvement processes that will help them measure and reduce both the amount of resources consumed in manufacturing new mattresses and the amount of waste generated from those activities. In addition, MRC has formed committees that are facilitating information sharing across the mattress industry value chain, including mattress manufacturers, component suppliers and recyclers, to improve the recyclability of mattress materials. In 2022, MRC will enhance these efforts by building consumer awareness of mattress care best practices.

Circularity Committee

In 2021, MRC initiated pilot discussions about mattress circularity with suppliers from one segment of the mattress value chain. The objective of the Circularity Committee is to help mattress component suppliers and mattress designers develop products that support recycling.

The Circularity Committee members will meet regularly to:

- Discuss how to improve the circularity of mattresses to achieve waste source reduction and improve total value;
- Share recyclers' experiences with specific materials with suppliers, designers and manufacturers to understand design impacts on end-of-life management;
- Anticipate whether new materials and assembly techniques will require adjustments to recycling infrastructure when a mattress is discarded; and
- Establish consensus circular design principles for the mattress industry.

Sleep Products Sustainability Program

In 2019, MRC launched an initiative called the Sleep Products Sustainability Program (SP2) that is focused on providing manufacturers a process for reducing material waste, water and energy consumption. SP2 helps individual mattress manufacturers analyze and understand the environmental impacts of their products by examining:

- The raw materials they manage and consume in manufacturing and distributing those products;
- The energy, water and other resources needed to manufacture and distribute mattresses, and how to manage and minimize waste products generated at each stage in the manufacturing and distribution process;
- The nature and designs of the products they manufacture; and
- How the products they manufacture today are managed at the end of their useful lives by recyclers.

SP2 helps mattress manufacturers develop methods for improving their businesses, products and processes in light of these factors. For example, these methods identify steps manufacturers can take to reduce their environmental impacts, define metrics for measuring the impact of those changes and learn from best practices. The goal is to help mattress manufacturers create voluntary, practical environmental management systems that can produce continual improvements over time, reinforced by periodic follow-up reviews by MRC.

MRC will evaluate the results of the SP2 initiative in future years and consider whether to expand the program to include mattress retailers and component suppliers.

Program Criteria

SP2 includes methods to train and verify the participant meets the SP2 requirements. A participant must meet the criteria in Table 8 to obtain SP2 certification:

TABLE 8: Sleep Products Sustainability Program Criteria and Requirements

Category	SP2 Criteria	Requirement	
	Environmental Policy	Must be written, adopted by management and communicated to staff	
	Facility Impact	Must evaluate activities, their impact on waste	
Plan	Assessment	and control methods	
	Goals and Targets	Must have targets for waste reduction,	
		reviewed by top management	
Measurement of Progres		Must track waste generation and disposition	

Category	SP2 Criteria	Requirement	
	Employee Awareness	Must train, gather improvement ideas and	
	and Engagement	provide feedback	
People	Supplier Partnership	Must conduct one supplier project each year to reduce waste	
	Doct Dractice Charing	Must share best practices in industry at least	
	Best Practice Sharing	once per year	
	Regulatory Compliance	Must be in compliance with all environmental	
	Tregulatory Compliance	regulations	
	Program Verification	Must conduct periodic walk throughs for waste	
Process	1 Togram vermeation	programs	
	Corrective and	Must track corrective actions and review	
	Preventative Actions	periodically	
	Program Resilience	Must plan how to respond to program	
	Togram Nesillence	disruptions	

Program Resources

MRC developed the following resources to meet the needs of SP2 participants:

- **Training:** A comprehensive, personalized training for all participants. Offered in-person or virtually (which was especially useful during the pandemic).
- **SP2 Requirements Document:** A concise document detailing the minimum requirements for certification.
- **SP2 Guidance Document:** A comprehensive document that details each of the 11 requirements, providing a description, examples and gap analysis questions.
- **SP2 Resources Website:** A participants-only website that contains program material, archived webinars and downloadable tools to assist with certification.
- **SP2 Newsletter:** A monthly newsletter that provides methods and examples to achieve one of the SP2 requirements.
- Program Tools: Downloadable tools to help participants assess, track and make
 progress towards certification. Tools include facility impact assessment and gap
 analysis templates, a utility tracking tool, a corrective and preventative action
 tracking tool and a program verification checklist.
- **Program Case Studies:** Summary documenting certified members' SP2 process to achieve waste and energy reduction goals and other program highlights. Program case studies are available on www.MattressRecyclingCouncil.org.

In 2022, MRC will continue to develop additional resources and online tools to assist participants in the SP2 process.

Program Status

In 2021, three facilities completed SP2 training. One facility received certification and the remaining two facilities are scheduled for certification verification in 2022. Two additional facilities registered for SP2 in 2021 and were trained in early 2022.

In February 2021, MRC held a webinar with accompanying training materials to explain to SP2 participants the program requirements and how to achieve certification.

MRC will continue to assist trained facilities with achieving their SP2 certification and recruit eligible manufacturers that sell mattresses to California residents and businesses

Program Metrics

MRC uses the following metrics to determine the success of the program:

- **Participant Status:** Participant count at each stage (registration, training, developing, certification, recertification).
- Waste Diversion: Qualitative description on waste diversion activities and quantitative data on waste diverted by certified participants (anonymized and aggregated after completing five certifications).
- Education and Outreach: Number of impressions or touchpoints with current participants (newsletters, emails, trainings and webinars, etc.), and number of impressions with potential participants (marketing, advertising, webinars, etc.).

Participant Status

Table 9 provides the participant count at each stage of SP2 for 2021.

Participant Status 2020 Count 2021 Count Registered/Untrained 2 1 2 3 Trained/Developing Program Certified 0 1 Recertified 0 0 Total 5 4

TABLE 9: Participant Status

Registered/Untrained participants have registered to participate in the program but have not received training. Trained/Developing participants received training and are in the process of working on the SP2 requirements. Participants can be in this stage for six months to one year while evaluating current sustainability activities, identifying opportunities and implementing new practices. Certified participants have met all the requirements and obtained SP2 certification. Recertified participants have recertified their SP2 program at least once.

Waste Diversion

To achieve SP2 certification, each participant must set qualitative goals and quantitative targets for waste reduction and diversion.

The participant certified in 2021 achieved the following waste reduction impacts by combining its existing sustainability efforts with targets developed using SP2 principles:

- Identified quilting transitions as a source of waste in its quilting department. Staff collected production data on the quilting transitions and modified participant's sewing process, reducing waste by 15% so far.
- Reduced average per-mattress waste sent to landfill by 39% (by weight).
- Reduced, reused or recycled 77.5% of its waste profile, an increase of nearly 27 percentage points since joining SP2 This was achieved by applying SP2 principles to their production processes, reducing quilting department waste, identifying production process reuse opportunities and adding recycling outlets for materials previously landfilled.
- Implemented various energy-saving practices and equipment upgrades that reduced per- mattress energy consumption by 30%.

In 2022, MRC will continue to provide in the annual report qualitative descriptions on the waste diversion targets selected by SP2 participants. When five participants have been certified with SP2, anonymized and aggregated waste diversion quantitative data will be reported in future annual reports.

Education and Outreach

To recruit potential participants, MRC publicizes SP2 among mattress manufacturers. In 2021, MRC advertised SP2 in industry trade publications (19 print and digital ads published by two major industry news sources), distributed two promotional emails to SP2 prospects, promoted SP2 in four MRC Highlights newsletters and dedicated a couple of social media posts each month explaining the program and encouraging interest. MRC generated further awareness through a speaking opportunity at the American Home Furnishing Alliance's Sustainability and Regulatory Summit and through media coverage about the first manufacturer to complete the SP2 certification. To further engage those indicating interest, MRC hosted a webinar to provide further details about the SP2 requirements and answer questions. MRC estimates these activities generated 264,274 impressions, as shown in Table 10.

All SP2 announcements, advertisements and outreach materials encouraged readers to visit a dedicated webpage (www.MattressRecyclingCouncil.org/SP2).

In 2021, the webpage received 1,635 views, a 36.8% increase from the previous year, indicating MRC's success in reaching potential participants.

MRC regularly communicates with existing participants to answer questions, provide guidance, schedule training and share tools to help them achieve SP2 certification. This

is accomplished through meetings, phone calls, emails and a monthly newsletter. The newsletter is sent to all registered participants and provides valuable information on one specific SP2 requirement per month to help participants understand the significance of each requirement and how to meet it. In 2021, MRC offered a new webinar for participants that provided a comprehensive look at the steps required to develop their SP2 system for certification. Overall, MRC contacted participants on 152 occasions through email, the webinar and the SP2 newsletter.

TABLE 10: Marketing Tactics and Metrics

Tactic	Impressions	Percentage
Trade Publication Ads (Print and Digital)	160,544	60.8%
News Coverage	79,557	30.1%
Emails	19,408	7.3%
Social Media	4,287	1.6%
Videos	275	0.1%
Events	203	0.1%
Total	264,274	100.00%

Reuse (including Renovation)

Reuse follows source reduction in California's waste management hierarchy. In mattress waste management, reuse includes mattresses sold in used furniture stores and mattress renovation. Used mattress retailers and mattress renovators were active in California before MRC launched the program and remain active today.

Statewide Renovation Trends

When California enacted SB 254, the Legislature stated its intent that the new law "not undermine existing used mattress recycling, resale, refurbishing, and reuse operations that are in compliance with state and federal law." According to CalRecycle data, renovators renovated 263,646 units in 2017; 226,068 in 2018; 214,896 in 2019; 210,355 in 2020 and 201,542 in 2021.

The renovated mattress segment is affected by a number of factors. Renovated units tend to be sold at low retail prices, competing directly against low-priced imported mattresses. In recent years, the U.S. mattress industry as a whole has been significantly hurt by low-priced imports of finished mattresses from numerous countries sold at dumped or subsidized prices. Renovators and manufacturers of new low-priced mattresses are especially hurt by these unfairly traded imports.

According to official U.S. import statistics, imported mattresses accounted for nearly 24.8% of the total mattress units shipped in the United States in 2021, placing competitive pressure on renovators and manufacturers at the lower end of the mattress market.

Despite these competitive conditions, MRC has taken a number of actions consistent with the legislative intent. In 2021, seven renovators contracted with MRC to serve as permanent collection sites that receive mattresses directly from the public and commercial entities. Under this arrangement, the renovator may select discarded units it wants to renovate and place the remainder in MRC-provided trailers for transport at MRC's expense to recyclers for processing. MRC pays a handling fee for the discarded units sent to recyclers.

In addition to the discarded units that renovators may cull from the units they collect, renovators in 2021 also purchased 3,132,321 pounds of units and materials from MRC recyclers for reuse and renovation, a 6.7% increase from their 2020 purchases (which in turn were nearly 40% more than such purchases in 2019).

In 2021, MRC provided recyclers a list of renovators that are complying with applicable California and federal bedding requirements (as required by SB 254) and may purchase whole units and materials from recyclers. MRC will update this list for recyclers in 2022 and will continue to monitor the relationships between recyclers and renovators for future annual reports.

According to CalRecycle data, renovators reported that they renovated 201,542 units in 2021. This is a 4% decrease from the 210,355 units reported as renovated in 2020. The decrease can be attributed to several factors, including business closures due to the COVID-19 pandemic, labor shortages, supply chain disruptions and other issues related to the COVID-19 pandemic. Furthermore, during the COVID-19 pandemic, consumers purchased mattresses in boxed form via the internet in unprecedented numbers. Given the nature of their business, renovators do not offer boxed bedding, and therefore did not participate in this surge in online boxed bedding purchases. Finally, the reported data may not be precise, given that 17.9% of registered renovators based the number of units that they reported as renovated in 2021 on estimates, and not on company records (compared to only 8.3% of renovators who estimated or approximated their data in 2020).

Therefore, far from undermining renovators, the statewide program benefits them. Renovators may both cull units from the discards that they collect and purchase whole units and materials from recyclers for renovation. MRC is informing recyclers about renovators that have complied with California law and are thereby eligible to purchase units and materials from recyclers. Renovators that serve as collection sites pay nothing to have residents drop off units at their facilities and then select which of those units to renovate. Those collectors incur no-cost to transport the rejected units to a recycler or landfill. They simply place the rejects in an MRC-provided trailer and MRC pays to have them taken to a recycler. MRC compensates these collectors for the discarded units transported to a recycler for processing.

MRC Recyclers and Renovation

As discussed in the <u>Recycler Procedures</u> section, some recyclers sell whole mattresses and component materials to renovators. MRC pays recyclers the same to dismantle units, regardless of whether the materials reclaimed from this process are sold to renovators or others in the secondary markets. MRC does not compensate recyclers when they sell whole mattresses directly to renovators. The recycler instead is paid for the unit by the renovator. This financial arrangement benefits both the recycler and renovator, allowing the renovator to buy whole mattresses and components.

Renovators as MRC Permanent Collection Sites

MRC lists California-based renovators that contract to serve as used mattress collection locations on its Bye Bye Mattress Recycling Locator. In 2021, seven renovators served as permanent collection sites for residents, retailers and commercial entities. MRC transports unrenovated units collected at these sites to recyclers for dismantling. In 2021, MRC transported 44,868 units (equivalent to a weight of 2.47 million pounds of material) from these renovators to MRC recyclers. This is an increase of 47% from the 30,502 units MRC transported from renovators to recyclers in 2020.

In 2021, MRC also met with 10 renovators about becoming new permanent collection sites. MRC will continue efforts to identify other renovators that could serve as drop-off points.

Renovators on ByeByeMattress.com

Consistent with California's solid waste management hierarchy and to increase California consumers' access to MRC's collection network, MRC contracts with renovators that comply with applicable California and federal bedding requirements (as required by SB 254) to serve as permanent collection sites. MRC includes these locations on its Bye Bye Mattress Recycling Locator.

Renovators and Program Development

MRC considers the views of renovators and other interested stakeholders when setting program policies. For example, when MRC developed the CIP program, it sought input from the Mattress Advisory Committee (on which the renovator segment is represented) regarding the level of incentive that consumers should receive when dropping off discarded mattresses and foundations at an MRC recycler. After considering different incentive levels, the committee advised MRC that setting the incentive above \$3 per unit could harm renovation. MRC accepted the committee's advice and capped the incentive at \$3 per unit, up to five units per vehicle per day.

In 2021, MRC invited a renovator to observe a mattress collection event to evaluate whether the collected units would be acceptable for renovation. The renovator concluded that servicing collections events would not be economically practical because it would need to incur additional labor and equipment costs without knowing in advance how many acceptable units it would collect.

In 2021, MRC communicated with contracted renovator collectors to minimize the impact of CVP on their supply chain. MRC avoids recruiting CVP participants already serviced by renovators. MRC also provides to CVP entities not eligible for transportation the list of recyclers, collection sites accepting commercial drop-off and renovators that comply with applicable California and federal bedding requirements (as required by SB 254).

Education and Outreach to Renovators

During program development and in subsequent years, MRC has informed all known renovators about their obligations and opportunities under SB 254. Renovators receive the same program updates that MRC sends to retailers and other program participants. Therefore, MRC has implemented the program consistent with both this tier of the waste management hierarchy and the Legislature's intent that the program not undermine used mattress resale, refurbishment and reuse operations.

Recycling

Recycling is the third priority in California's waste management hierarchy. The program is designed to increase the number of discarded mattresses diverted from California's landfills and increase recycling of post-consumer mattress materials. To achieve this result, MRC has established a robust, diverse and geographically accessible mattress collection network that is expanding and continually improving. MRC funds this collection network to improve the recyclability of mattresses and provides enclosed containers to prevent weather damage during storage and transport.

Once a recycler receives a discarded mattress, it dismantles the unit and separates the component materials for sale or use in secondary markets. Materials for which no market exists or that cannot be recycled (because they are contaminated or mixed with other materials) are usually landfilled.

MRC's Plan outlines ten strategies to maximize mattress recycling:

- 1. **SWF Compensation:** MRC compensates SWFs and other collection locations at negotiated rates for handling mattresses that they accept. MRC also pays for storage containers that SWFs may use to transport the collected units to recyclers for dismantling.
- 2. Mattress Retailers (Retailer Take Back Obligation): Mattress retailers must, upon request, pick up a consumer's discarded mattress at no-cost when they deliver a new mattress. This is an important way for California consumers to access the MRC network in a convenient manner. Furthermore, by diverting mattresses from the ordinary solid waste collection system in this manner, fewer mattresses are contaminated when they are collected and mixed with other municipal solid waste and more mattresses can be recycled. MRC works with these retailers to recycle mattresses through the CVP or direct drop-off at an MRC recycler or collection site.

- 3. **No-Cost Retailer Recycling:** Retailers can recycle mattresses they pick up through the retailer take back obligation at no-cost through MRC's program. See <u>Mattress</u> Collection and Retailer Access for more detail.
- 4. **No-Cost Business Recycling (Commercial Entities):** Commercial entities (such as hotels and educational institutions) can recycle their mattresses at no-cost through the program. See the <u>Mattress Collection</u> and <u>Commercial Volume Program</u> sections for more detail.
- 5. **No-Cost Consumer Drop Offs at SWFs:** California residents may drop off mattresses at no-cost at MRC collection locations, which include 153 SWFs statewide as well as 70 other convenient locations. See the <u>Mattress Collection</u> section for more detail.
- 6. **Consumer Incentive:** Eight recycling facilities and one permanent collection site pay an MRC-funded incentive to California residents that deliver discarded mattresses directly to their location. The incentive is \$3 per unit, limited to five units per vehicle per day. See Consumer Incentive Payment for more detail.
- 7. MRC Recyclers' Target: MRC's recyclers are responsible for dismantling discarded mattresses and foundations, selling or otherwise identifying a use for the reclaimed materials in secondary markets, and disposing of the waste or otherwise unrecyclable material. A recycler has financial incentives to recycle as much of a mattress as it can because it keeps the revenue it earns from the sale of those materials and incurs costs when sending waste and unrecyclable materials to landfills. To further incentivize the amount of mattress materials recycled through the program, MRC's recyclers are expected to recycle 75% by weight of the units they process, but some recyclers have encountered difficulty meeting this requirement. See Program Disposition Data for more detail.
- 8. **Mitigate Illegal Dumping:** MRC compensates entities participating in its Illegally Dumped Mattress Collection Initiative for providing data about the number of illegally dumped mattresses they collect in their communities. This information identifies those areas of the state where illegally dumped mattresses are most prevalent and guides MRC's efforts to mitigate illegal dumping activity. See Mitigation of Illegal Mattress Dumping for more detail.
- 9. Prevent Bedbug and Other Contamination: A mattress may not be recyclable if it is wet, heavily soiled or contaminated by bedbugs. Although contamination affects relatively few units, MRC educates recyclers and collection sites on how to prevent and properly manage bedbug and other contamination, and thereby increase the amount of mattress materials that can be recycled annually. See <u>Collection Site</u> Mattress Management and Recycler Procedures for more detail.

10. **Research on Better Markets for Select Materials:** MRC undertakes short-term, high-impact projects that can increase the amount of wood, fiber and pocketed coils that can be recycled, thereby increasing MRC's overall recycling rate. See <u>Research</u> for more detail.

Composting

Composting is a form of recycling and falls at the same level in the waste management hierarchy. Coconut fiber from mattresses can be composted. The composting facility grinds the fiber to reduce its size to between 4 inches and 6 inches in length, and mixes it with green waste to compost for four to six months. The final compost product is used in commercial agricultural and home gardening applications. In 2021, one MRC recycler sent 8,020 pounds of coconut fiber to compost facilities.

Although foundation wood is also theoretically appropriate for composting, MRC's recyclers processed no foundation wood into composting material in 2021.

Biomass

California's solid waste management hierarchy considers biomass to be recycling that is preferred over the transformation of solid waste through WTE facilities or landfill.

In 2021, four MRC recyclers sent 3,499,550 pounds of wood to biomass. They chose this approach either because it was financially more attractive than incurring the cost both to transport the wood to a mulcher and pay the mulching operation's tipping fee or because local mulching companies rejected the material due to metal contamination.

Biomass may not be a viable long-term recycling option for foundation wood. Low energy prices and environmental regulations may cause biomass plants that are currently accessible to MRC's recyclers to close in the coming years. Consequently, in 2022, MRC will continue research to identify alternative markets for post-consumer foundation wood. Details on this effort are found in Research.

Transformation (WTE)

In 2021, five MRC recyclers sent incidental loads of pocketed coils (that is, steel springs encased in polypropylene fabric) to nearby WTE facilities when the only pocketed coil processor in the state reached capacity. The WTE facilities consumed approximately 142,766 pounds of fabric. The metal coils (approximately 1,641,809 pounds), which did not burn, were recycled. Although MRC understands that California considers the transformation of solid waste through WTE facilities to be a form of disposal, diverting material for use in WTE facilities is preferable to landfilling the pocketed coils for two reasons:

- 1. After the WTE burned the pocketed coils, the metal was magnetically extracted and recycled.
- 2. The heat from the burning polypropylene was used to generate electricity.

Both of these benefits would have been irretrievably lost had this material instead been landfilled.

Details on pocketed coil deconstruction can be found in Research.

Only two WTE facilities remain in California. Furthermore, MRC is diligently seeking to identify better ways to dismantle and use some of the hard-to-recycle mattress materials (wood, fiber and pocketed coils). For these reasons, MRC anticipates that post-consumer mattress material sent to WTE facilities will diminish in future years.

Landfill

Under their contracts with MRC, recyclers are expected to recycle 75% by weight of the units they process, although that may not always be feasible. MRC recyclers dispose of non-recyclable materials and residue in environmentally safe landfills. This material may include entire mattresses or foundations and mattress materials that:

- Are severely damaged or twisted;
- Are wet, frozen or heavily soiled;
- Are infested with bedbugs, other living organisms or other biological contaminants that render the unit either unsafe to process or make its constituent materials unmarketable; or
- Currently have no financially viable market.

MRC recyclers do not track landfill disposal data by material type, making it impossible for MRC to provide data regarding the exact quantity of specific materials that they landfilled in 2021. However, given that recyclers landfilled some whole units, as well as separated materials, MRC assumes that they landfilled at least some quantity of every mattress material type (e.g., steel, foam, fiber and wood). MRC recyclers landfilled 20,410,869 pounds of material in 2021, an increase of 6% from 2020. This is consistent with the trend in the overall weight of outbound materials (recycled and disposed), which also increased by 6% between 2020 and 2021.

In 2021, MRC conducted a mattress recycling waste characterization study in 2021 that quantified the most commonly disposed mattress materials and identified strategies for reducing such waste so that more of each mattress can be recycled. Details on the waste characterization study can be found in Research.

Coordination with Existing Infrastructure

MRC must coordinate with existing used mattress collection programs and recycling programs, including nonprofits, and meet the requirement of Cal. Pub. Res. Code § 42987.1. Since 2016, MRC has demonstrated year-over-year growth in the collection network, increasing the number of collection sites, bulky item collection programs, events and CVP activity. See Collection Site Types for more detail.

Existing Used Mattress Collection Programs

Solid Waste Facilities

In 2021, MRC signed contracts with two additional permitted SWFs, bringing the collection network's cumulative total of participating SWFs to 153. To expand participation from this segment of the waste industry, MRC identified potential new locations from the list of SWFs that report landfilled mattresses to CalRecycle. MRC contacted viable SWFs on the list that were not already part of our collection network to explain the benefits of working with MRC. As a result of these and other recruitment efforts, MRC has added two permitted SWFs to the collection network.

Bulky Item Collection Programs

In 2021, MRC used data from a variety of sources to target additional curbside bulky item collection programs that could participate in the program. To further coordinate with existing used mattress collection programs and increase consumer access to no-cost recycling in California, MRC contracts with municipalities and franchise haulers that provide curbside bulky item pickup at no additional cost. By the end of 2021, 21 bulky item programs and 55 SWFs that consolidate mattresses collected at curbside in an MRC-provided container have joined the collection network, an increase of 11 from 2020.

In 2022, MRC will continue efforts to target additional bulky item collection programs that could participate with MRC.

Retailer Take Back

Many mattress retailers collected units from their customers before the program launched. MRC leverages this pre-existing practice by working with retailers to bring these mattresses to MRC's recyclers, either by direct drop-off or through the CVP. This practice benefits both the mattress consumer and retailer and increases the volume of mattresses diverted from landfills.

Retailer take back requirements expanded in 2021 to include mattresses delivered to a consumer by common carrier. MRC works with these retailers to recycle mattresses through the CVP or direct drop-off at an MRC recycler or collection site.

Collecting mattresses directly from retailers also increases the likelihood that the collected mattress will be recyclable, as compared to units obtained from SWFs and bulky item collection programs. When mattresses are mixed with regular trash and other municipal solid waste, they can be crushed and contaminated to the point that few or no parts of the units can be recycled. Discarded units obtained directly from retailers tend to be dry and cleaner, allowing the recycler to reclaim more and better-quality materials that can command higher prices.

Other Relevant Parties

MRC further uses the existing solid waste infrastructure to expand its collection network by:

- Coordinating with municipalities and franchise haulers to hold mattress collection events; and
- Contracting with CRV recycling centers, Local Conservation Corps, Native Nations, nonprofits, retailers and mattress renovators to act as collection locations.

Existing Recycling Programs, Including Nonprofit Mattress Recyclers

In April 2015, MRC requested proposals to provide transportation and recycling services at locations throughout the state. As part of this process, MRC contacted all known mattress recyclers in California (including nonprofit recyclers) and publicized the request by posting it on MRC's website. MRC also visited all active for-profit and nonprofit mattress recyclers in California to assess their capabilities, interest in participating in the program and future plans. Among the companies that responded to our request were three existing nonprofit and 11 for-profit recyclers. After evaluating the proposals based on the price offered to provide the requested recycling services, recycling experience, quality of proposal and facility capabilities, MRC awarded contracts to six recyclers (including four for-profits and two nonprofits). Five were existing mattress recyclers and one was an existing recycler of other products.

Since the program launched in 2015, MRC's recycler network has evolved. Several of the initial recyclers changed or added facility locations, others are no longer under contract with MRC and MRC has added several new recyclers as the program has grown.

In December 2017, MRC requested proposals to better serve the San Francisco Bay Area, Fresno, the city of Los Angeles, Los Angeles County and Orange County. Likewise, in October 2018, MRC requested proposals to serve the city of Fresno or Fresno County, Tulare County, Kings County or Madera County. Each of the recyclers that MRC added in 2017 and 2018 had experience recycling other products, both in California and elsewhere.

In deciding whether to award recycling contracts, MRC has consistently considered the same factors: price, recycling experience, quality of proposal and facility capabilities. As of December 31, 2021, six MRC recyclers operated nine facilities (including three operated by a nonprofit). See Appendix B for a list of MRC's existing recyclers (and their locations). In coming years, MRC intends to request new proposals for all existing contracts in the state.

MRC's Coordination with Existing Mattress Collectors and Recyclers to Efficiently Deliver Services

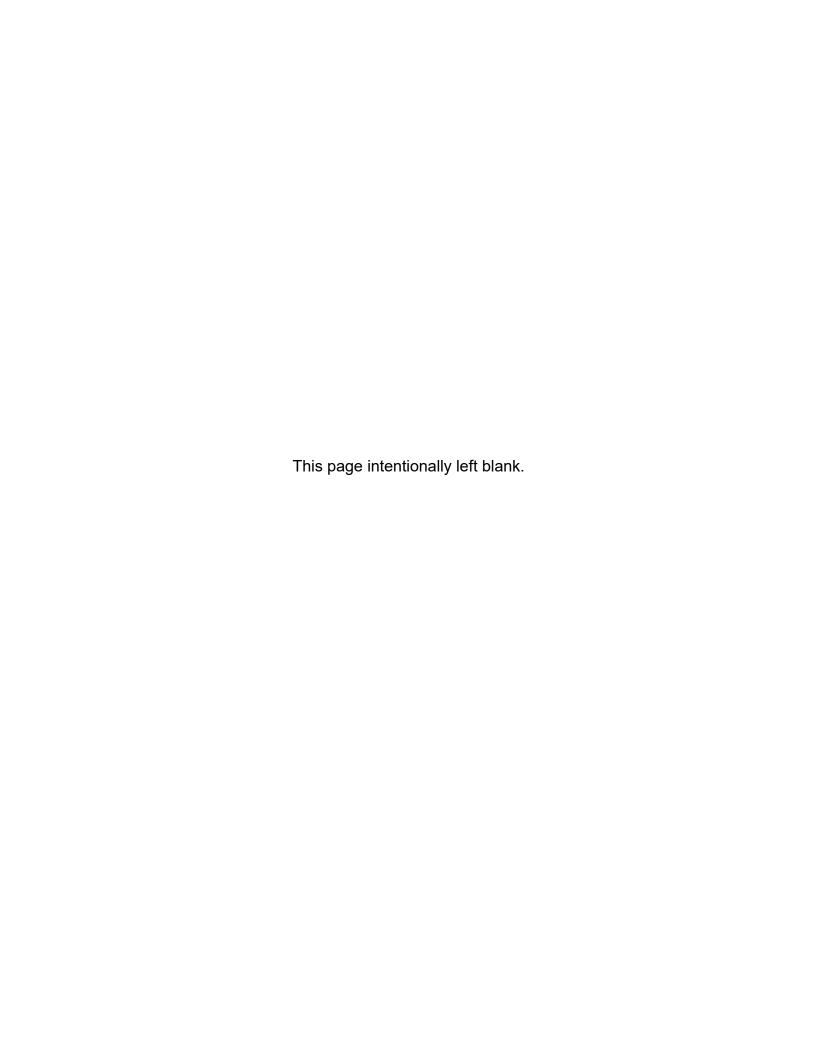

As MRC established and expanded its collection and recycling network, it sought to deliver services efficiently and minimize duplication of effort by applying the following principles:

- To bring large quantities of discarded units into the program efficiently, MRC leverages existing retailer take back practices and contracts with California's existing solid waste collection infrastructure to become convenient no-cost mattress collection sites:
- MRC strategically selects collectors and recyclers to build a network that both provides California residents with statewide access to recycling services and minimizes transportation costs.

Therefore, in building its mattress collection and recycling network, MRC has succeeded in coordinating with existing used mattress collection and recycling entities, including nonprofits, and has supported the broader California recycling community by contracting with existing facilities that collect and recycle mattresses and other products.

Prioritization of In-State Processing Facilities

In 2021, MRC only used in-state processing facilities to recycle program mattresses. See <u>Appendix B</u> for the list of MRC recyclers. In 2022, MRC does not intend to use any out-of-state processing facilities.

Program Objectives and Activities

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18962(a)(2)(B) — Describe how the program will meet the requirements of subdivisions (d), (g), (i), (j), (k), (l), (m), (o), and (p) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(8) — Description of objectives and activities based on the used mattress recovery and recycling plan, per section 18962(a)(2). State objectives from the approved plan and describe progress toward achieving those objectives during the reporting period. Describe any adjustments to objectives stated in the approved plan that may be made for the upcoming reporting period and accompanying rationale for those changes. If any changes are significant or material, as defined, the mattress recycling organization shall amend and resubmit its plan for approval by the department.

14 CCR § 18964(b)(8)(A) — Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.

14 CCR § 18964(b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(13) — Good faith effort. For annual reports submitted on and after July 1, 2019, a demonstration of good faith effort with the state mattress recycling goals established pursuant to section 42987.5 (b) of the Public Resources Code.

- **Cal. Pub. Res. Code § 42987.1(h)** A program performance measurement that shall collect program data for the purpose of the annual report. The information shall include:
- (1) A methodology for estimating the amount of mattresses sold in the state, used mattresses available for collection in the state, and for quantifying the number of used mattresses collected and recycled in the state.
- (2) A methodology for determining mattresses sold in the state by the manufacturers and renovators of the mattress recycling organization.
- Cal. Pub. Res. Code § 42987.1(k) Establishment of a financial incentive to encourage parties to collect for recycling used mattresses discarded or illegally dumped in the state.
- **Cal. Pub. Res. Code § 42987.1(m)** Developing strategies, in consultation with the California Environmental Protection Agency's Environmental Justice Task Force and other relevant parties, for collecting used mattresses for recycling in areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers, and illegal mattress dumping.
- Cal. Pub. Res. Code § 42987.5(a)(1)(B) The state mattress recycling goals.
- **Cal. Pub. Res. Code § 42987.5(a)(1)(C)** On or before July 1, 2020, metrics and goals for increasing consumer convenience for used mattress dropoff, disposal, and recycling in a way that, notwithstanding this subdivision, applies to the entire state regardless of socioeconomic conditions.
- **Cal. Pub. Res. Code § 42987.5(a)(1)(D)** On or before January 1, 2021, convenience goals to be effective January 1, 2022, specific to each of the following:
- (i) (I) Consumer access to the program, including at least one permanent mattress dropoff location in each county. The requirement to have at least one permanent mattress dropoff location in each county shall not apply to a county with a population of less than 2,000 people as long as the organization continues to provide at least two collection events in the county each year. The department may require additional dropoff locations to ensure that consumers have sufficient convenient access to dropoff locations.
- (II) The mattress recycling organization shall provide no-cost freight services to any mattress retailer, health care facility, educational facility, military base, or lodging establishment that has at least 100 used mattresses to pick up at one time.
- (ii) Retailer access to the program.

- **Cal. Pub. Res. Code § 42987.5(b)** Beginning July 1, 2019, and annually thereafter, the annual report required pursuant to Section 42990.1 shall demonstrate the mattress recycling organization's good faith effort to comply with the goals established pursuant to this section.
- **Cal. Pub. Res. Code § 42990.1(b)** The quantity of mattresses disposed of in solid waste landfills.
- **Cal. Pub. Res. Code § 42990.1(c)** The quantity of discarded used mattresses collected for recycling in the program.
- **Cal. Pub. Res. Code § 42990.1(d)** The quantity of used mattresses collected for recycling from different categories of sources.
- Cal. Pub. Res. Code § 42990.1(e) The quantity of each category of materials recycled.
- **Cal. Pub. Res. Code § 42990.1(g)** The quantity of otherwise disposed of materials.
- **Cal. Pub. Res. Code § 42990.1 (j)** The total volume, number, and weight of used mattresses collected recycled, renovated, and reused in this state during the preceding calendar year, including any conversion factor used to determine the number of mattresses recovered.
- **Cal. Pub. Res. Code § 42990.1 (I)** For reports submitted on and after April 1, 2020, a demonstration of good faith effort with the state mattress recycling goals established pursuant to Section 42987.5.
- **Cal. Pub. Res. Code § 42990.1 (m)** For reports submitted on and after July 1, 2021, all of the following:
- (1) A report on activities, which the mattress recycling organization shall undertake, to meet consumer and retailer accessibility goals, and on the progress the organization has made in meeting those goals, and on the organization's planned efforts to meet those goals. Factors to be considered may include, but are not limited to, availability of retailer takeback options, proximity to recyclers and no-cost collection points, availability of no-cost local curbside collections services, and proximity to collection events.
- **Cal. Pub. Res. Code § 42990.1(o)** For reports submitted after January 1, 2020, the progress toward attainment of the goals included in the organization's mattress recycling plan submitted pursuant to Section 42987.1.

Program Objectives and Activities

Convenience

Pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D), CalRecycle requires MRC to meet goals related to consumer convenience, no-cost freight services and retailer convenience. MRC's efforts to achieve the newly established goals are discussed in the Residential Access and Commercial Access sections.

In 2021, MRC contracted with Customer Analytics, a demographic analytics consulting firm, to evaluate the extent to which its collection network is accessible to California residents and retailers. Customer Analytics measured access for all California residents including those living in rural counties and environmental justice communities to MRC's collection network using a 15-mile benchmark. For these purposes, the program's mattress collection network refers to all drop-off locations in MRC's collection network (recyclers, collection sites, collection events) and curbside bulky item programs that send their mattresses to MRC recyclers for dismantling.

In its convenience analysis, Customer Analytics first considered only the permanent collection network (collection sites, recyclers and curbside bulky item collection programs) to measure whether MRC had met the goals CalRecycle has set, and separately included metrics that incorporate events for continuity with past annual reports. For a full description of the methodology used, see <u>Appendix D</u>.

Table 11 shows the percentage of all California residents living within 15 miles of MRC's collection network in 2021 with regard to both MRC's permanent collection network and entire collection network (that is, including collection events). See <u>Residential Access</u> section for further details.

TABLE 11: Percentage of California Residents Living Within 15 Miles of MRC's Collection Network

Population Category	Permanent Collection Network Only	Permanent Collection Network & Collection Events
All Residents	96.5%	99.1%
Residents in Rural Counties	93.4%	95.6%
Residents in Environmental Justice Communities	97.4%	99.7%

Customer Analytics evaluated retailers' access to MRC's permanent collection network by measuring the percent of California's population that lives near elements of the network that accept discarded mattresses collected by retailers.

This metric represents retailers' access to MRC's collection network because retailers often collect discarded units from consumers' residences when they deliver new purchases and need accessible drop-off locations for those discarded units. As shown in Table 12, the analysis used a radius of 20 miles for urban counties and 40 miles for rural counties. See the Commercial Access section for further details.

TABLE 12: Percentage of California Residents Living Within 20 Miles and 40 Miles of MRC's Collection Network for Retailers

Distance from Collection Network for Retailers	Percent of Residents
Urban: All Residents Within 20 Miles	99.1%
Rural: All Residents within 40 Miles	99.4%

Residential Access

CalRecycle's goals established pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D) (i)(I) require that by 2024, the MRC shall increase consumer convenience to 94%. In 2021, MRC exceeded this goal, as 96.5% of California's residents lived within 15 miles of MRC's permanent collection network, which includes recyclers, collection sites and curbside bulky item collection programs. Including collection events statewide access increases to 99.1%.

In addition, CalRecycle's goals require that MRC establish at least one permanent mattress drop-off location in each county in California by January 1, 2022. The requirement does not apply to counties with populations of fewer than 2,000; in those counties, the law requires two collection events annually.

In 2021, MRC's permanent collection network included permanent collection sites in 56 of 58 counties. San Francisco County and Trinity County did not have a permanent collection site. However, in early 2022, MRC established one permanent collection site in both counties. See **Good Faith Effort** for more detail. In 2021, Alpine County was the only county with a population of less than 2,000 people. MRC established its first permanent collection site in that county in 2021 and also held two collection events during the year.

This analysis, however, understates the access that California residents have to no-cost mattress recycling because it does not take into consideration the impact of the retailer take back obligation. As discussed more fully in the <u>Program Collection</u>, <u>Transportation and Processing</u> chapter, a retailer that delivers a mattress to its customer must offer to pick up the customer's discarded mattress at no cost. The retailer take back obligation provides another important alternative for consumers to access the program.

Appendix B contains a list of all locations in MRC's mattress collection network.

Underserved Areas

The 2020 convenience analysis showed that more than 96% of California residents had access to the program's permanent collection options and collection events. As a part of that analysis, MRC decided to explore how to improve access in Contra Costa, Placer and Stanislaus Counties. Table 13 describes MRC's progress towards these goals in 2021.

TABLE 13: 2021 Activities in Selected Counties

County	Progress Made in 2021
	MRC attempted to recruit three solid waste facilities (SWFs) in hopes
Contra Costa	that at least one would become the county's second collection site. In
	addition, MRC supported 10 collection events.
	MRC continued to work with the county's existing collection site and
Placer	attempted to recruit at one county-owned SWF to become a second
	site. In addition, MRC supported three collection events in the county.
Stanislaus	MRC attempted to recruit another SWF to become the county's third
Stariisiaus	collection site.

Next Steps

In 2021, Customer Analytics' analysis showed that more than 99% of California residents have access to the program's permanent collection options and collection events. Based on that analysis, MRC decided to target San Bernardino, San Diego and Tulare Counties to improve access in the future.

Challenges to Expanding the Collection Network

In 2021, the COVID-19 pandemic disrupted MRC's collection network, resulting in suspended collection events and delayed logistics at collection sites. Two of the counties that experienced COVID-19 related disruptions were San Francisco and Trinity counties. See Good Faith Effort for more detail.

An ongoing challenge that MRC faces is that some SWFs refuse to become a no-cost collection site because they make money by charging residents to dispose of their mattresses. Under California law, MRC will recycle mattresses collected by a SWF only if it collects those units without charge to the resident. In exchange, MRC pays a participating SWF a reasonable amount for accepting, collecting, storing, transporting and handling discarded units. MRC's negotiated compensation is intended to cover the SWF's direct costs to provide these services. In addition to being paid to handle units, a participating SWF also avoids the cost of paying to landfill those units or consuming its valuable landfill space to bury units that it sends to MRC recyclers.

Some SWFs, however, currently charge exceedingly high disposal fees for mattresses (up to \$58 and perhaps more per unit). Although MRC is prepared to compensate these SWFs for the reasonable costs they incur in handling mattresses, MRC will not pay

them the same high rates that they currently charge consumers. For this reason, some SWFs choose not to participate in the program.

MRC anticipates that if not all SWFs participate, the program's ability to increase the number of units collected annually will be limited.

In addition to SWFs that are influenced by financial motivations, other SWFs do not participate in the program because:

- They lack internal resources to review and complete the contracting process.
- A franchise hauler that operates a SWF and currently has a multi-year contract with the local municipality it serves may not be able to negotiate to become a permanent collection site while that contract remains in effect.
- They lack the logistical capability to participate in the program (e.g., the facility lacks space for a 53-foot trailer; have insufficient labor to collect, store, transport and handle the units for MRC or lack appropriate loading equipment).
- They receive very few discarded units.

When these obstacles are encountered, MRC has developed innovative solutions by working with alternative collection entities, including:

- California Redemption Value (CRV) locations;
- Nonprofits, including Goodwill, Salvation Army, and Habitat for Humanity;
- Local California Conservation Corps, which provide both permanent collection sites and event staffing for community collection events;
- Mattress retailers that allow the public to drop off discarded units at no cost; and
- Local businesses that allow the public to drop off discarded units at no cost.

MRC is prepared to customize its relationship with a potential collection site to take into account its specific logistical and other constraints to encourage them to join its permanent collection network and expand residential access.

Rural County Access

MRC dedicates significant resources to making the program accessible to rural county residents. MRC meets regularly with the Environmental Services Joint Powers Authority (ESJPA) to provide updates, coordinate with stakeholders and discuss strategies and ideas. In rural areas where recruiting a SWF as a collection site may not be an option, MRC will work with alternative types of collection sites described in the Residential Access section, or by hosting local collection events.

For purposes of this report, MRC has defined a rural county using the definition set forth in Cal. Pub. Res. Code § 40184, which in general defines a rural county as one that disposes of less than 200,000 tons of waste annually. A county may be defined as

rural one year and not the next, which complicates year-over-year comparisons, but the majority of counties defined as rural in 2020 also met that definition in 2021. Based on 2020 waste disposal data collected by CalRecycle (the most recent data available at the time this report was submitted), MRC considers the following 31 counties to be rural for purposes of 2021: Alpine, Amador, Butte, Calaveras, Colusa, Del Norte, El Dorado, Glenn, Humboldt, Imperial, Inyo, Kings, Lake, Lassen, Madera, Mariposa, Mendocino, Modoc, Mono, Napa, Nevada, Plumas, San Benito, Sierra, Siskiyou, Sutter, Tehama, Trinity, Tuolumne, Yolo and Yuba.

In 2021, rural counties covered 46.1% of the state's geographic area but accounted for only 5.8% of its population. MRC's permanent collection network (collection sites, recyclers and curbside bulky item collection programs) served 30 of the 31 rural counties, with Trinity County being the only county not served in this manner. Trinity County hosted one collection event and as a result, all 31 rural counties had at least one no-cost drop-off option for their residents in 2021. Furthermore, in 2022, Trinity County joined the permanent collection network by offering a permanent collection site to its residents.

In 2021, 93.4% of California's rural residents were located within 15 miles of MRC's permanent collection network. When including collection events, rural county accessibility increases to 95.6%.

California residents in rural counties are accustomed to driving longer distances for services, such as hospitals and grocery stores, when compared to urban residents. With this in mind, MRC also analyzed how many rural county residents were within 25 miles of MRC's collection network. That analysis shows that 97.7% of California's rural county population lives within 25 miles of the program's permanent collection network, demonstrating the program's success in providing access to mattress recycling in rural counties. Including collection events, the access increases to 98.6%.

In 2020, MRC used analysis prepared by Customer Analytics to identify rural counties that would benefit from increased network access. Table 14 describes MRC's progress toward that goal in 2021.

TABLE 14: 2021 Activities in Selected Rural Counties

County	Progress Made in 2021
Alpine	MRC established one new collection site and served two collection events.
El Dorado	MRC established one new collection site and served two collection events.
Trinity	MRC served one collection event and attempted to recruit a new collection site. In 2022, MRC established one new collection site.

Based on Customer Analytics' 2021 analysis, MRC will explore how network access can be further improved in Calaveras, Humboldt and Plumas Counties in 2022. MRC will consider stakeholder feedback in evaluating options for increasing access in these areas.

Some stakeholders have also noted that permanent collection sites in some rural counties are not open daily and have urged MRC to persuade those sites to extend their hours of operation. In response, MRC worked with an existing permanent collection site in Del Norte County to expand days of operation from two days per week to seven days per week; however, five days require an appointment for drop-off. MRC will continue to seek to improve accessibility in other rural areas.

Environmental Justice Community Access

Cal Pub. Res. Code § 42987.1(m) requires that MRC develop strategies for collecting used mattresses for recycling from "areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers and illegal mattress dumping." Pursuant to this requirement, MRC has consulted with the California Environmental Protection Agency's (CalEPA) Environmental Justice Task Force (EJ Task Force) and other stakeholders. MRC has identified the relevant communities (which we refer to as "EJ communities") using CalEPA's CalEnviroScreen 4.0 — an environmental mapping program that identifies California communities by census tract that are disproportionately burdened by and vulnerable to multiple sources of pollution, taking into account indicators such as poverty and linguistic isolation. (A census tract is a small geographic area defined for statistical purposes by the U.S. Census Bureau.)

In 2021, 97.4% of Californians who resided in EJ communities lived within 15 miles of MRC's permanent collection network (recyclers, collection sites and curbside bulky item collection). This number increases to 99.7% when collection events are included. These percentages understate actual access since they do not take into account when a retailer that delivers a new mattress to a California consumer offers to take back a consumer's discarded unit at no cost, which is an additional and important way that residents may access the program.

See <u>Appendix D</u> for a more detailed explanation of Customer Analytics' methodology for identifying EJ communities and evaluating their access.

Collection Strategies

MRC collects used mattresses from residents through four channels (retailer take back, permanent collection sites, curbside bulky item collection and collection events). MRC recognizes not every resident has the means to transport a mattress, which may be especially true for residents in EJ communities. Therefore, curbside bulky item collection, in addition to the retailer's obligation to take back discarded mattresses, is an important part of MRC's strategy for collecting discarded mattresses in EJ communities.

MRC maintains a directory on ByeByeMattress.com of communities that offer at least one free pickup per year as part of their curbside bulky item collection services. MRC's consumer education materials and advertising also encourage residents to ask their local government how bulky items are collected in their area. Of the 76 permanent

collection sites accepting units from the curbside bulky item collection programs in 2021, 46 served EJ communities. Of those, 43.5% (20 of 46) served curbside bulky item collection programs that provided no-cost collection to multifamily housing complexes.

MRC actively uses collection events as another collection channel in EJ communities. MRC does this because past analysis suggests that illegal mattress dumping may be less prevalent near collection events. Collection events can also reduce the distance a resident must travel to access the program. In 2021, 73 of MRC's 161 collection events took place in EJ communities, and 141 events were within 15 miles of EJ communities.

Underserved Environmental Justice Communities

In MRC's 2020 Annual Report, we reported that we would seek to improve access to the program for residents living in Imperial, Kings and Santa Clara Counties. Table 15 describes MRC's progress toward that goal in 2021.

TABLE 15: 2021 Activities in Counties Selected for EJ

County	Activity
Imperial County	MRC attempted to recruit two landfills to become collection sites and encouraged the county to participate in the Illegally Dumped Mattress Collection Initiative (Initiative). MRC also supported one collection event in Calipatria.
Kings County	MRC supported three collection events in Kings County and attempted to recruit one public works yard and one solid waste facility to become collection sites. MRC also worked with Kings Waste and Recycling Authority to develop bilingual outreach material in October 2021.
Santa Clara County	MRC provided the County with bilingual outreach materials for an established collection site. MRC also served three collection events and attempted to recruit at four landfills to be collection sites.

Based on our most recent convenience analysis using CalEnviroScreen data, MRC intends to explore where we can improve access in Contra Costa, Los Angeles and Stanislaus Counties in 2022. MRC will provide an update on these efforts in the next annual report.

Illegal Dumping Mitigation in EJ Communities

Since MRC launched the Initiative in 2016, participation has grown significantly, leading to valuable data collection throughout the state. In 2021, Customer Analytics used this data to identify the amount of illegally dumped units collected out of the public right-of-way in EJ communities. As a result, Customer Analytics estimates that 30,977 units or 42.2% of the total amount of mattresses collected in the Initiative in 2021 were reported from EJ communities.

In Spring 2021, MRC funded three projects to address illegal dumping, two of which involved identified EJ communities in the cities of San Jose and Berkeley. The city of Berkeley piloted an education and outreach campaign, as well as a curbside collection program for multifamily housing complexes with nine or fewer units. The city of San Jose tested enforcement mechanisms at four multifamily housing complexes and implemented a resident awareness outreach campaign promoting the city's junk pickup program. See Mitigation of Illegal Mattress Dumping section for further detail on the Initiative and these projects.

EJ-Focused Conferences and Working Groups

In 2021, MRC sponsored or participated in a variety of conferences to gain and share knowledge about illegal dumping as well as the challenges EJ community leaders face with educating their residents about and encouraging them to use available recycling options, including the following:

- Alameda County Statewide Illegal Dumping Conference (April)
- California Resource and Recovery Association (August)
- Central California Environmental Justice Roots of Resistance Conference (October)
- Keep America Beautiful National Conference (November)
- Southern California Waste Management Forum (November)
- Tribal EPA Region 9 Conference (November)
- National Zero Waste Conference (December)

Attending these events also allows MRC to make community leaders and influencers more aware of resources they can access to promote mattress recycling and to gather feedback to improve our education and outreach. The stakeholders MRC meets through these events also help us expand the collection network.

For similar reasons, MRC communicates with working groups, such as task forces and community-based organizations. Engaging with these groups allows MRC to learn about new initiatives aimed at communities burdened by multiple sources of pollution or disproportionately vulnerable to the effects of pollution. In 2021, MRC worked with the following:

- CalRecycle and CalEPA EJ Task Force
- Identifying Violations Affecting Neighborhoods (serving Fresno, Imperial, Kern, Kings and Tulare Counties)
- Central California Environmental Justice Network (CCEJN)

MRC provided each of these groups a video series demonstrating the registration and reporting processes for the Initiative, the MRC white paper "Best Practices in Addressing Illegal Dumping of Durable Waste — A Guide for Policy Makers" and the illegal dumping mitigation lesson plan activities "Don't Dump It, Recycle It." MRC also partnered with

CCEJN and Sequoia Community Conservation Corps to support a collection event in Tulare County. MRC provided CCEJN with resources to promote the event and will continue to collaborate with CCEJN and Local Conservation Corps in the future.

Education and Outreach

The data MRC uses to identify EJ communities also largely influences where MRC concentrates its efforts in contacting local officials and media, as well as where MRC advertises. Specifically in 2021, MRC:

- Provided information to mayors, city council members, county officials and Council of Governments to promote mattress recycling options with their residents.
- Provided permanent collection sites and event hosts with publicity toolkits to educate their residents about mattress recycling.
- Encouraged media to cover mattress recycling and submitted op-eds and letters to the editor.
- Encouraged public service announcement directors to use the "Stop Illegal Dumping" and "Break Up the Right Way with Your Old Mattress" campaign materials.
- Emailed new homeowners and renters about their mattress disposal options (retailer take-back, mattress drop-off sites or their local curbside bulky item collection program).
- Used results of Spanish-speaking household surveys to develop the "Break Up the Right Way With Your Old Mattress" PSA and guide 2022 advertising campaign development and media plan.
- Placed ads with minority-owned media and media with large Black, Latino and Asian-Pacific Islander audiences. MRC translated advertisements to Spanish and various Asian languages as needed.

Additionally, to overcome language barriers, MRC uses multicultural outreach consultants to advise us how to communicate most effectively with residents of EJ communities, as well as identify new opportunities to promote MRC's collection network in EJ communities. See Education and Outreach section for more information.

Commercial Access

No-Cost Freight Services

Pursuant to Cal. Pub. Res. Code § PRC section 42987.5(a)(1)(D)(i)(II), CalRecycle's baseline and goals requires that MRC provide no-cost freight services to retailers, health care facilities, educational facilities, military bases and lodging establishments. To meet this goal, MRC offers pickup services for mattresses from each of these entities when they have at least 100 units to discard at one time through its Commercial Volume Program (CVP). The sites where these entities accumulate their mattresses are not open to the public.

Depending on whether an entity regularly collects the minimum (such as a mattress retailer) or has a less frequent or ad-hoc need for MRC's services (such as a lodging establishment), MRC offers several types of CVP collection and transportation options: CVP sites equipped with an on-site trailer, temporary CVP sites and consolidation locations. The following describes each type of CVP collection type:

- CVP on-site trailer sites are established for entities that collect at least 100 units per month. MRC provides those entities an on-site trailer and transports the collected units to an MRC recycler on a regular basis. In 2021, MRC's CVP collection network included 63 sites with on-site trailers, an increase of two from 2020.
- Temporary CVP sites serve entities that generate 100 mattresses less than once a month. Temporary CVP sites contact MRC to schedule a pickup (called a live load) whenever they reach 100 mattresses. MRC picked up 170 live loads from 62 temporary CVP sites in 2021 sites, an increase from 94 live loads in 2020.
- Consolidation locations are sites that accept units delivered by retailers and other commercial entities only. In 2021 MRC offered eight consolidation locations, a net increase of five from 2020.

The number of each CVP site type that MRC offered in 2021 is shown in Table 16.

Collection Type	Number of Sites	Site Type	Number of Sites
CVP On-Site Trailer Site	63	Retail	62
CVP OII-Site Trailer Site	03	Logistics/Delivery	1
		Education	3
Temporary CVP Site	62	Retail	4
(live loads)		Lodging Establishment	38
		Military	17
Consolidation Location	8	Consolidation Location	8

TABLE 16: 2021 CVP Collection Network

In 2021, MRC continued to recruit eligible retailers, businesses and institutions to participate in its CVP and will report on progress in this regard in the 2022 Annual Report.

Commercial Entities with Small Loads

In addition to the above CVP options, MRC assists lower volume commercial sources to manage discarded mattresses that they collect. Under MRC's CVP, businesses and institutions that generate small loads of discarded mattresses may drop off their units at MRC permanent collection sites that accept commercial volume. These collection sites are not reflected in Table 16's CVP Collection Network but are designated in Appendix B.

In 2021, 140 permanent collection sites offered no cost drop off for small commercial loads, an increase of 34% from 2020. MRC lists these locations on its Bye Bye Mattress Recycling Locator. MRC also provides CVP entities that are not eligible for MRC-provided

transportation (because they do not frequently generate loads of 100 mattresses or more) with a list of renovators that accept discarded mattresses and comply with applicable California and federal bedding requirements (as required by SB 254).

Retailer Access

Pursuant to Cal. Pub. Res. Code § 42992, a retailer that delivers a new mattress to a customer must offer to take back the customer's old mattress at no added cost. In 2021, the retailer take-back requirement expanded to include mattresses delivered to a consumer by a common carrier.

To make this take-back requirement a convenient means for California residents to access no-cost mattress recycling, retailers have the following options for recycling those mattresses through the program at no cost:

- · Drop them off at an MRC recycler;
- Drop them off at a permanent collection site that accepts small commercial loads;
- Request that MRC pick them up from the retailer through the CVP (on-site trailer or live loads); or
- Drop them off at a CVP consolidation location.

For ease of reference, we will refer to these options as the retailer collection network.

Pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D)(ii), CalRecycle's goals for MRC require that by 2024, 95% of consumers in rural areas reside within 40 miles and 80% of consumers in urban areas reside within 20 miles of a permanent collection site that accepts mattresses from retailers and their associated delivery parties.

Customer Analytics calculated the percentage of California's urban and rural population that lives near permanent collection sites that accept discarded mattresses from retailers and other commercial entities (recyclers, permanent collection sites that accept commercial volume and CVP consolidation locations). Customer Analytics' analysis showed that 99.1% of the urban population lived within 20 miles, and 99.4% of the rural population lived within 40 miles, of MRC's retailer collection network. Note that this analysis may understate actual retailer access because it does not account for retailers whose units MRC picks up directly through the CVP on-site trailer service or that request live loads.

Residents' Access to No-Cost Mattress Disposal Options

Some no-cost mattress disposal options in California are not currently part of MRC's collection network. For example, mattresses collected by some retailers are not recycled through the program and some curbside bulky item collection programs do not send units that they collect to the program.

To complete its analysis of how many California residents may access either no-cost mattress recycling or no-cost mattress disposal, MRC mapped its collection network and all curbside bulky item collection programs in the state, regardless of whether they participate in the program.

Based only on MRC's collection network (collection sites, recyclers and collection events) and all curbside bulky collection programs in the state, 99.3% of California residents were either served by curbside bulky item collection or lived within 15 miles of MRC's collection network in 2021.

Retailers that take back discarded mattresses and recycle them through MRC's program provide consumers additional no-cost collection options, although we have not included this collection stream in our residential access analysis. In 2021, the program received 21.5% of its units directly from retailers or MRC's CVP transporters (which transport units received from retailers and other commercial entities). Retailers' share of units recycled through the program is even higher because some retailers also drop off units at permanent collection sites. However, since retailer units obtained from permanent collection sites are comingled with mattresses dropped off by residents and other commercial sources, MRC cannot estimate how many of these were from retailers.

This analysis is useful as MRC considers new strategies for preventing illegal dumping and improving statewide program accessibility. MRC has increased residential accessibility by focusing recruitment efforts on retailers and communities that offer no-cost curbside collection services. See Program Collection, Transportation and Processing for further detail on the collection network

Consumer Incentive Payment

MRC's plan provides that California residents may receive a Consumer Incentive Payment (CIP) when they drop off discarded mattresses at MRC recyclers. The CIP is \$3 per unit for up to five units per vehicle per day delivered during the recycler's regular business hours. The CIP is available only to state residents, and not to businesses or government collectors.

The incentive encourages California consumers to manage discarded mattresses responsibly by taking them directly to a contracted recycler for processing. In 2021, eight of MRC's nine recycling locations offered the CIP, as well as one permanent collection site (Habitat for Humanity ReStore). One recycling facility did not offer the CIP due to permitting restrictions that prohibit public access to the site.

In 2021, the CIPs were provided for 118,931 units. Consumers dropped off an additional 25,559 units that did not qualify for the CIPs because the delivery either exceeded the five unit per day limit or occurred after normal operating hours. The total of 144,490 units that consumers dropped off at the CIP locations represents approximately 9% of all units collected through the program.

Alternate Locations and CIP

CalRecycle has requested that MRC explore offering the CIP at more locations and increasing the amount paid per unit. This, however, is a complex issue. The Mattress Advisory Committee is on record recommending that MRC not increase the CIP because it could result in fewer units being renovated and the Legislature has expressed its intent that MRC's program not undermine renovation.

After carefully considering the potential advantages and disadvantages of increasing the CIP and offering it at more locations, MRC has decided not to do so for the following reasons. First, collection sites face many challenges in offering the CIP in an efficient, fiscally responsible and secure manner. For example, most collection sites lack staff needed to accept the delivered units in compliance with the CIP rules (such as, no more than five units per day per vehicle) and manage the process. Given the nature of their business, few sites have either the cash on hand in small denomination bills needed to disburse CIP when units are dropped off or the security to protect the cash being disbursed. Even if they have the necessary staff and cash on hand, they also lack the internal controls and accounting system needed to track these transactions and document that the CIP was properly disbursed for eligible units received. Finally, the CIP tends to attract many residents. Collection sites generally lack the space to accommodate lines of residents dropping off mattresses and waiting for their CIP.

Second, when MRC developed the CIP program, it sought input from the Mattress Advisory Committee regarding the level of incentive that consumers should receive when dropping off discarded mattresses and foundations at an MRC recycler. After considering different incentive levels, the committee advised MRC that setting the incentive above \$3 per unit could harm renovation. MRC accepted the committee's advice and capped the incentive at \$3 per unit, for up to five units per vehicle per day. For these reasons, MRC has decided not to increase the CIP at this time from \$3 per unit or to offer it at additional locations.

Program Collection and Disposition Data

Program Collection Data

Based on data that MRC recyclers report through the program, MRC collected 1,602,332 program units for recycling in 2021, reflecting an increase of 6% from 2020 to 2021.

TABLE 17: Total Program Units Collected by MRC for 2017 Through 2021

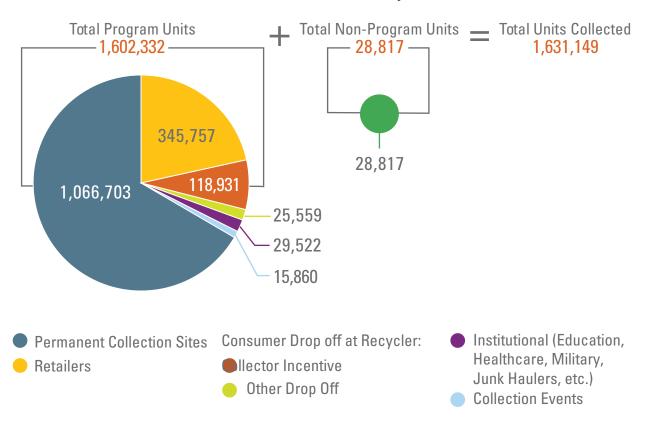

2017	2018	2019	2020	2021
1,286,757	1,430,363	1,448,284	1,511,553	1,602,332

In 2021, MRC recyclers reported that they accepted for recycling a total of 1,631,149 units (that is, both program and non-program units) collected from the sources shown in Table 18 and Figure 2.

TABLE 18: 2021 Units Collected by Source

Source		Units
Permanent Collection Sites		1,066,703
Retailers		345,757
Canalinas Dran Off at Basicalar	Collector Incentive	118,931
Consumer Drop Off at Recycler	Other Drop-Off	25,559
Institutional (Education, Healthcare, Military, Junk Haulers, etc.)		29,522
Collection Events		15,860
Total Program		1,602,332
Total Non-Program		28,817
Total Units Collected		1,631,149

FIGURE 2: Units Collected by Source

MRC recyclers process both program units and non-program units. Non-program units include those that a recycler obtains from franchise haulers and SWFs that do not

participate in the program, as well as mattresses manufactured by the Prison Industry Authority (which are exempt from the recycling charge and therefore are not recycled at MRC's cost) and units not collected from California sources. MRC compensates its recyclers for processing program units only.

Although MRC recyclers separately report program and non-program units received at their facilities, the recyclers comingle the materials recovered through the recycling process from program and non-program sources and report those materials together when sold. The data provided in the Program Disposition Data section reports the totals from both program and non-program materials combined, as reported to MRC by its recyclers.

Program Disposition Data

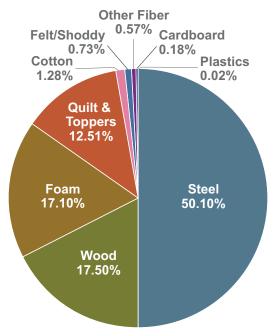

As discussed in the <u>Materials Management/Waste Hierarchy</u> section, MRC recyclers are expected to reuse, recycle or send to biomass as much material as is economically practical and feasible. MRC recyclers have reported to MRC that they recovered the following materials from discarded mattresses in 2021:

TABLE 19: Total Materials Recycled from Program & Non-Program Units

Materials Recycled ⁵ .	Pounds	Percent
Steel	33,446,181	50.11%
Wood	11,678,826	17.50%
Foam	11,412,637	17.10%
Quilt & Toppers	8,350,241	12.51%
Cotton	856,277	1.28%
Felt/Shoddy	485,918	0.73%
Other Fiber	379,077	0.57%
Cardboard	119,494	0.18%
Plastics	16,569	0.02%
Commodities Total	66,745,220	100.00%
Whole Mattresses Reused/Renovated Total	1,71	3,305
Total Recycled	68,45	8,525

⁵ Includes Reuse, Recycling and Biomass

FIGURE 3: Total Commodities Recycled from Program & Non-Program Units

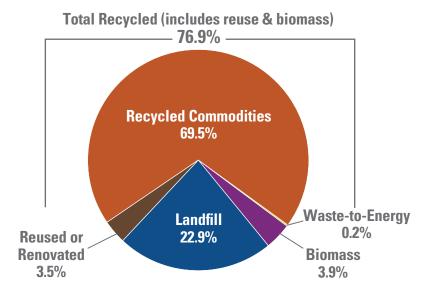

MRC recyclers have reported to MRC that they reused, recycled or sent to biomass 76.9% of all mattress materials in 2021. Table 20 and Figure 4 show the program's 2021 disposition totals and percentages. The data shown for reused or renovated materials includes the whole units reused/renovated shown in Table 19 and other materials that recyclers sold to renovators. The biomass data is included under the recycled wood data in Table 19.

TABLE 20: 2021 Disposition of Materials

Disposition	Pounds	Percent
Total Recycled (includes reuse & biomass)	68,458,525	76.9%
Recycled Commodities	61,826,654	69.5%
Biomass	3,499,550	3.9%
Reused or Renovated	3,132,321	3.5%
Landfill	20,410,869	22.9%
Waste-to-Energy (Transformation)	142,766	0.2%
Total Outbound	89,012,160	100.0%

FIGURE 4: Disposition of Materials

Beginning with the 2021 Annual Report, CalRecycle requires that MRC report on progress towards goals established pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(A)-(B) using newly defined metrics. These new metrics are similar to, but different from, metrics that MRC has used for previous annual reports. In addition to reporting its performance under the new CalRecycle metrics, MRC will also continue to use its established metrics to show continuity over time. MRC previously referred to the percentage of material that MRC recyclers reused, recycled, or sent to biomass as the "recycling rate." To avoid confusion with a new and distinct goal metric from CalRecycle that includes the phrase "recycling rate," MRC will refer to this percentage as the "MRC recovery rate" moving forward.

TABLE 21: MRC's Recovery Rate, £ 2017 Through 2021

2017	2018	2019	2020	2021
59.2%	65.0%	70.5%	77.1%	76.9%

⁶ Includes Reuse, Recycling and Biomass

MRC is committed to supporting MRC recyclers in increasing their efficiency, but future MRC recovery rates may be influenced by factors outside MRC's control because markets for some recycled mattress materials are limited, seasonal or depend on a variety of economic factors. For example, demand for quilt panels at present depends entirely on demand for carpet pads, the current primary end use for these materials. If demand for carpet pads falls, so will demand for quilt panels. Likewise, some mattresses contain small amounts of different types of fiber, but these materials can be difficult to sell because buyers require minimum quantities, and it can take recyclers

substantial time to separate and accumulate the requisite amount. Some recyclers are unable to store this material because they lack space or for other reasons, or have fire safety concerns of storing such material over an extended time period (as is the case for mote cotton fiber, which can be easily ignited).

MRC and its recyclers have taken steps to improve efficiencies in 2021. For example, in prior years, recyclers landfilled large quantities of pocketed coils because scrap metal buyers considered the fabric pockets around the coils to be an unacceptable contaminant and the recyclers lacked the ability to remove the steel from the pockets. In 2021, MRC transported pocketed coils to facilities in Fresno, Stanislaus and Los Angeles Counties that separated the steel springs from the fabric, thereby increasing the amount of metal recycled and raising MRC's recovery rate.

MRC has also taken steps to improve the quality and amount of material that can be recycled, which can increase the market value for the reclaimed materials and reduce the amount of unrecyclable material sent to landfill. For example, MRC continues to fund collection site improvements that protect discarded mattresses from being spoiled for recycling by exposure to weather. See the Research section for more detail.

Similarly, MRC is improving recyclers' operations by providing lean manufacturing training to help them eliminate operational inefficiencies. Finally, MRC funded a waste characterization study in 2021 to analyze which specific types and amounts of materials recyclers landfill and why. This data will help MRC prioritize future work to further reduce waste and increase the efficiency rate. See the Research section for more detail.

Statewide Collection and Disposition Data

MRC is required to report progress towards goals established by CalRecycle pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(A)-(B) using newly defined metrics that measure recycling and renovation across California, regardless of affiliation with MRC's program.

14 CCR § 18965 through § 18967 require that mattress recyclers, SWFs and renovators report to CalRecycle the number of used mattresses they collect, recycle, renovate and landfill in California each year. CalRecycle has provided MRC aggregate data that these entities reported.

CalRecycle notes that it took the following actions regarding its 2021 data collection effort:

- Distributed periodic emails through the Mattress Recovery and Recycling Program Database to remind entities to submit 2021 annual reports prior to May 1, 2022.
- Contacted all entities via phone calls and emails that had not yet reported as of April 28 to remind them to report prior to May 1, 2022.
- Reviewed all data submitted by entities for completeness and reasonableness.
 Followed up with phone calls and emails to clarify and correct information submitted by entities.

- Provided verbal communication, reminder emails and reporting spreadsheets in Spanish when necessary.
- Sent violation notices to all entities that failed to report by May 1, 2022.
- All obligated entities that were open in 2021 were required to report data to CalRecycle for the calendar year.

The number of collected/received units includes those received from in-state and out-of-state sources (shown in Table 22). CalRecycle notes that a significant amount of double counting exists in these numbers. For example, SWFs reported receiving 1,318,677 units in 2021, but many of those were subsequently delivered to mattress recyclers and are counted again in the recyclers' reported data.

TABLE 22: 2021 In-State and Out-of-State Units Collected by California Recyclers, Solid Waste Facilities and Renovators (as reported to CalRecycle)

Entity Type	Entities Providing Data	Units Collected/ Received	Estimated Volume (Cubic Yards)	Estimated Weight (Pounds)
Mattress Recyclers	8	1,631,149	1,614,838	89,713,195
Solid Waste Facility	348	1,318,677	1,305,490	72,527,235
Mattress Renovators	39	265,273	262,620	14,590,015

CalRecycle provided MRC with statewide totals of units recycled, landfilled or renovated/reused in 2021 as shown in Table 23.

TABLE 23: 2021 Units Recycled, Landfilled, Renovated/ Reused in California (as reported to CalRecycle)

		Estimated Volume	Estimated Weight
Mattress Management	Units	(Cubic Yards)	(Pounds)
Recycled (Processed)?	1,608,976	1,592,886	88,493,680
Landfilled at SWFs	381,174	377,362	20,964,570
Renovated/Reused	201,542	199,527	11,084,810
Total	2,191,692	2,169,775	120,543,060

⁷ Includes 5,962 units recycled on-site at solid waste facilities.

The number of units recycled represents whole units that were dismantled for the purpose of recycling. SWFs reported the number of units landfilled and renovators reported the number of units renovated. MRC converted these unit counts into cubic volume and weight using the following conversion factors:

• **Cubic Volume:** Queen size products are the most popular size of mattresses purchased. Based on a study conducted by MRC in 2021, the cubic volume of a

typical queen size unit is approximately 0.99 cubic yards. Therefore, MRC has estimated the cubic volume of the quantities in <u>Tables 22</u> and <u>23</u> by multiplying the number of units by .99 cubic yards. These figures represent the cubic volume of whole uncompressed units. When units are landfilled, however, they are compressed to some degree.

Weight: Based on an MRC weight study, the average weight of mattresses and foundations recycled by MRC recyclers in California, Connecticut and Rhode Island is approximately 55 pounds per unit. Therefore, MRC has estimated the weight of the quantities in Tables 22 and 23 by multiplying the number of units by 55 pounds. Compression of landfilled units has no impact on the weight of a discarded unit.

If one were to assume that the units reported to CalRecycle as recycled and renovated in 2021 were diverted from landfills, these figures show that total quantity of units recycled and renovated in 2021 reduced the landfill space that would have been consumed by discarded mattresses by 82.6% (that is, (1,603,014 plus 201,542) divided by (2,185,730) equals 82.6%).

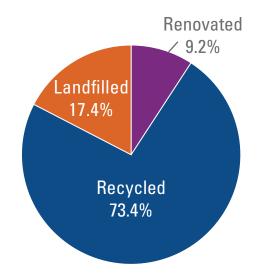

FIGURE 5: 2021 Statewide Mattress Management

Good Faith Effort

Pursuant to Cal. Pub. Res. Code § 42987.5, CalRecycle in consultation with MRC, must establish a state mattress recycling baseline amount and state mattress recycling goals. MRC must demonstrate its good faith effort to meet the state's mattress recycling goals. Cal. Pub. Res. Code § 42986(d) provides that "good faith effort" means "all reasonable and economically practical efforts by a mattress recycling organization to implement the components identified in its approved plan consistent with its annual budget."

CalRecycle established the following goals for the program:

TABLE 24: Statewide Mattress Recycling Goals

Category	Goal
Statewide Recycling Rate	81% ± 5%
Statewide Efficiency Rate	65% ± 5%
Consumer Convenience (number of collection opportunities)	212
Consumer Access to the Program	One permanent mattress drop-off location in each county, or 2 collection events in counties with population <2,000 people
Consumer Access to the Program (Convenience Goal)	94% by 2024
Rural Retailer Access to the Program	95% by 2024
Urban Retailer Access to the Program	80% by 2024
No-Cost Freight Services	Provide no-cost freight services to any mattress retailer, health care facility, educational facility, military base, or lodging establishment that has at least 100 units at one time
Renovation	225,000 units

The program has demonstrated consistent and meaningful improvement since its launch in late 2015. Moreover, MRC has used reasonable and economically practical means to demonstrate its good faith effort to meet these goals.

Statewide Recycling Rate

This metric includes units collected through MRC's program and outside of it, as well as units received from in-state and out-of-state sources. Calculated using data reported to CalRecycle by recyclers, renovators and solid waste facilities, the Statewide Recycling Rate is 82.6%, which meets the 2021 goal set by CalRecycle.

MRC will continue its efforts to increase the percentage of discarded units that are recycled or reused statewide, but recognizes that opportunities to expand collection are limited for the following reasons:

 Some discarded units are not recyclable because they are mixed with putrescible solid waste and are unsafe to recycle. To reduce weather-related and other damage to discarded units, MRC funds improvements to mattress collection facilities to improve the quality of discarded units, increase loading efficiency and protect worker safety. While these efforts should reduce the number of units landfilled and increase the program's collection and recycling performance, they are unlikely to substantially increase volumes collected.

- Some units that are potentially recyclable are landfilled by SWFs that have chosen
 not to participate in the program. MRC has worked diligently since the program's
 inception to recruit these SWFs and will continue to do so. Nevertheless, recruiting
 non-participating SWFs into the program is increasingly difficult, limiting MRC's
 ability to capture additional discarded units.
- In enacting SB 254, the Legislature expressed its intent that mattress recycling not undermine existing resale, refurbishing and reuse operations that are in compliance with state and federal law. Therefore, MRC cannot increase its units collected by encroaching on these activities without violating this legislative intent.

See Residential Access and Program Collection, Transportation and Processing sections of this report for an explanation of the various sources from which MRC collected units and the reasonable steps it has taken to expand the collection network, avoid undermining renovation and better serve state residents and businesses.

Statewide Efficiency Rate

This metric includes units collected through MRC's program and outside of it, as well as units received from in-state and out-of-state sources. Calculated using data reported to CalRecycle by recyclers, renovators and solid waste facilities, the Statewide Efficiency Rate is 63.5%, which meets the 2021 goal set by CalRecycle.

MRC cannot control the landfilling of whole units or component parts by third parties but works to meet this goal by increasing collection and working with recyclers to improve the recovery rate for units they process. MRC continues to invest in research activities targeting low-value and difficult to recycle mattress commodities that have limited or no demand.

Finally, MRC is working with its recyclers to improve their material separation processes. If post-consumer materials are not properly separated, potential buyers may reject them because of contamination. With proper information and training, MRC hopes that recyclers can continue to reduce their disposal rates, increase the amount and quality of mattress materials that can be recycled and increase the revenue they earn from selling the recycled materials, making their businesses more financially sustainable.

The multiple strategies MRC is pursuing to divert materials from disposal are discussed in further detail in the <u>Program Disposition Data</u> and <u>Research</u> sections.

Consumer Convenience (Number of Collection Opportunities)

CalRecycle has defined the metric for convenient collection opportunities to include the number of collection sites in MRC's collection network, disposal facilities that accept mattresses, mattress recycling facilities, curbside bulky item collection programs that

accept mattresses and retailers that take back old mattresses upon delivery of new mattresses. Because MRC does not have a mechanism to count disposal facilities outside the MRC collection network that accept mattresses for no fee, they are not included in the collection opportunities counted in 2021.

In 2021, MRC's permanent collection network included 223 permanent collection sites (including recycling facilities). When including the additional 21 franchise haulers and municipalities that aggregate curbside bulky item collection program units, the number of collection opportunities increases to 244, surpassing CalRecycle's goal by 21.

See <u>Program Collection</u>, <u>Transportation and Processing</u> for an explanation of the various channels from which MRC collected units and the reasonable steps it has taken to expand its collection network.

Consumer Access to the Program

Effective January 1, 2022, MRC must have a permanent collection site in each California county whose population exceeds 2,000 residents, and MRC must provide at least two collection events per year in counties with fewer than 2,000 residents. Since one county falls below the 2,000-resident threshold, this means that MRC must have permanent collection sites in 57 of California's 58 counties by this date. Although this goal does not apply to 2021, the following describes MRC's recruitment efforts in Trinity and San Francisco Counties in 2021.

Trinity County

MRC used good faith efforts to open a permanent collection site in Trinity County in 2021, but those efforts were delayed several months due to fires, transportation delays and container shortages. In 2021, MRC preliminarily negotiated a contract to establish a permanent collection site in Trinity County. Unfortunately, the county needed to delay its final review of the collection site agreement because its resources were diverted to combat fires. As a result, the county signed the collection site agreement in late 2021, but the Trinity County site did not open to the public for mattress collection until January 2022.

Despite these challenges, MRC supported one collection event in Trinity County in 2021.

San Francisco County

Likewise, MRC used good faith efforts to open a permanent collection site in San Francisco County in 2021, but those efforts also did not yield results until 2022. In 2021, MRC actively encouraged four entities in the county to become permanent collection sites, and one of these entities did establish a permanent collection site in the county in January 2022. This action was delayed until 2022 because of administrative challenges. Nevertheless, throughout 2021 and to date in 2022, all county residents had convenient access to a permanent collection site located in Daly City (which is within 15 miles of all residents in the county), as well as access through no-cost retailer take back.

Furthermore, in 2021, MRC worked with the city of San Francisco to plan two collection events with the San Francisco Conservation Corps and Goodwill, but the city cancelled both due to the COVID-19 pandemic.

Consumer Access to the Program (Convenience Goal)

In 2021, MRC exceeded the 2024 goal by over two percentage points, with 96.5% of the population of California living within 15 miles of an MRC permanent collection site or in an area served by a participating curbside bulky item collection program. See Program. Objectives and Activities for more details on the convenience of MRC's collection network.

Retailer Access to the Program

In 2021, MRC's retailer access metric was 99.1% in urban counties and 99.4% in rural counties. These results exceed the 2024 goals of 80% for urban areas and 95% for rural areas.

MRC continues to promote the acceptance of mattresses from commercial entities at existing permanent collection sites while also recruiting new locations and CVP consolidation sites. See Program Objectives and Activities for detail on the convenience of MRC's collection network.

No-Cost Freight Services

Effective January 1, 2022, MRC must provide no-cost freight services to any mattress retailer, healthcare facility, educational facility, military base, or lodging establishment with at least 100 discarded units to recycle. Although this goal does not apply to 2021, MRC provided no-cost freight services to these entities in 2021 and added healthcare facilities to the list of eligible CVP entities. Therefore, although this goal is effective January 1, 2022, MRC met it in 2021. See Program Objectives and Activities for more details on entities served through the CVP.

Renovation

CalRecycle required that 225,000 units be renovated annually in the state in 2021. Based on information renovators reported to CalRecycle, 201,542 units were renovated in 2021.

MRC notes that achieving this goal is not specifically MRC's responsibility. Renovators themselves collect most of the units that they renovate. For that reason, MRC has limited influence on the total number of units these companies renovate.

Nevertheless, MRC demonstrated a good faith effort, using reasonable and economically practical means, to support renovation in 2021. These efforts included

adding renovators to our permanent collection network, providing lists of renovators who are compliant with state and federal law to mattress recyclers who may be interested in selling whole units or component parts to renovators and providing collection site improvement funds to renovators collecting units from the public.

Several factors affected mattress renovation and sales in 2021, and the accuracy of the data reported to CalRecycle. These included business closures, labor shortages, supply chain disruptions and other issues related to the COVID-19 pandemic. Furthermore, during the COVID-19 pandemic, consumers purchased mattresses in boxed form via the internet in unprecedented numbers. Given the nature of their business, renovators do not offer boxed bedding, and therefore did not participate in the surge of online boxed bedding purchases. Finally, the data reported to CalRecycle may not be accurate. In 2021, at least 17.9% of registered renovators estimated the units renovated that they reported to CalRecycle rather than disclose exact numbers based on company records. This compares to only 8.3% of renovators who estimated their unit sales data in 2020. Renovation is discussed further in the Program Collection, Transportation and Processing section of this report.

Mitigation of Illegal Mattress Dumping

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(7) — A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.

14 CCR § 18964(b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (I), and (m) of section 42987.1 of the Public Resources Code.

Cal. Pub. Res. Code § 42987.1(I) — Ensuring, to the maximum extent possible, that urban and rural local governments and participating permitted solid waste facilities and authorized solid waste operations that accept mattresses are provided with a mechanism for the recovery of illegally disposed used mattresses that is funded at no additional cost to the local government, solid waste facility, or solid waste operation.

Cal. Pub. Res. Code § 42990.1(m) — For reports submitted on and after July 1, 2021, all of the following:

- (3) A report on research activities, which the organization shall undertake, to improve used mattress collection, dismantling, recycling operations, source reduction and green product design, and the response to the problem of illegal dumping and a report on the progress made as a result of the research activities.
- (4) A report on pilot programs, which the organization shall undertake, to test new processes, methods, or equipment on a local, regional, or otherwise limited basis, such as those

designed to clean up illegally dumped mattresses, gather data and identify strategies to reduce the number of illegally dumped mattresses, in partnership with the cities and counties identified by the mattress recycling organization as having areas with the highest rate of illegal dumping in the state. Pilot program descriptions shall include a mechanism to measure success, such as establishing a baseline and goals when possible and report on the progress made in undertaking the pilot programs.

(5) If the mattress recycling organization determines during a particular year that any of the activities undertaken to implement paragraph (3) or (4) were unsuccessful, the organization shall identify the problems with the current activities, and report on the new activities undertaken and progress made, in the following year's annual report.

Mitigation of Illegal Mattress Dumping

MRC follows a three-pronged strategy to address illegal mattress dumping:

- 1. Intercept discarded units before they are illegally dumped, by:
 - a. providing no-cost retailer pickup of discarded units when the retailer delivers a new unit to a consumer;
 - b. encouraging consumers to use a network of no-cost drop-off locations throughout California; and
 - c. providing a financial incentive to encourage consumers to deliver discarded units directly to recyclers.
- 2. Financially compensate participating local governments, solid waste facilities or solid waste operations to help offset their cost of managing illegally dumped units.
- 3. Collect data to measure the impact of illegally dumped units on participating communities over time and use the data to guide MRC's pilot projects.

To accomplish the first prong of this strategy, MRC promotes the retailer take back obligation to California retailers and consumers. To intercept more discarded units before they are illegally dumped, MRC encourages consumers to use the no-cost collection network and promotes Consumer Incentive Payment locations (see Consumer Incentive Payment for more detail).

To implement the second and third prongs, MRC launched the Illegally Dumped Mattress Collection Initiative (the Initiative) in 2016. To further reduce illegal mattress dumping, MRC began funding illegal dumping pilot projects in 2020 and is developing supplemental strategies to promote education and prevention and devoting additional resources to help clean up illegally dumped units in communities throughout California.

Illegally Dumped Mattress Collection Initiative

To gather reliable data about the nature and extent of California's illegally dumped mattress problem, MRC developed the Illegally Dumped Mattress Collection Initiative (the Initiative), which offers financial incentives to local governments, solid waste facilities, franchise haulers, nonprofits contracted with municipalities, Joint Powers Authorities, Native Nations and other entities that report data to MRC regarding illegally dumped units they collect from public rights of way (e.g., collection date, number of units collected, disposition of collected units and collection ZIP code). MRC pays these entities a per unit amount for every illegally dumped unit they pick up and report to

offset some of their costs. The amount paid depends on whether the entity operates in an urban (\$15 per unit) or rural county (\$20 per unit), as determined by the rural county definition set forth in Cal. Pub. Res. Code § 40184 (which in general defines a rural county as one that disposes of less than 200,000 tons of waste annually). Table 26 identifies participating counties that are rural. MRC plans to continue the Initiative in 2022 and will report progress in future annual reports.

2021 Results

In 2021, 85 entities participated in the Initiative, an 18% increase from the 70 in 2020. Units reported decreased from 2020 to 2021 by 3%. Given the continuing COVID-19 pandemic disruptions to mattress collections and recycling in 2021, it is difficult to conclude whether this decrease resulted from MRC's efforts to discourage illegal mattress dumping or was caused by other factors. Table 25 shows the results of the Initiative from 2019 through 2021.

TABLE 25: MRC's Illegally Dumped Mattress Collection Initiative 2019-21

Initiative	2019	2020	2021

A blank cell indicates that an entity did not participate in the Initiative that year.

Participant Outreach and Retention

The number of participants in the Initiative grew from 70 to 85 between 2020 and 2021. New participants included members from 11 counties that were not previously represented, eight of which are rural. MRC promoted the Initiative among local governments, Native Nations, franchised haulers and other collectors through conferences and workshops, illegal dumping working groups and task force meetings. We also communicated with our network of contacts via emails and phone calls and used MRC's monthly newsletter and social media to raise awareness of the Initiative's benefits and availability. In 2021, MRC also worked with three new illegal dumping task force groups to connect with stakeholders about illegal dumping in their community, provide information about the Initiative and encourage eligible entities to register.

To keep participants engaged, MRC sent monthly email reminders to registered entities encouraging them to regularly input their collection data into MRC's online database and to contact MRC if needed. In addition, MRC provides participants ongoing support including but not limited to, login assistance, resetting passwords, updating an organization's contact information and navigating the database.

Surveying current and previous participants also helps MRC determine how to improve outreach and support those that are regularly submitting data. For example, based on participant feedback gathered from surveys in previous years, MRC created a two-part training video to demonstrate the registration and reporting processes.

In 2021, MRC also dedicated time to reconnecting with the 33 participants who initially showed interest by completing a registration, but never submitted any data. From this outreach, MRC wanted to learn what prevented these participants from fully engaging in the Initiative. Ultimately, 17 of those participants responded to MRC and stated that their main reasons for not participating were staff turnover and administrative barriers. However, nearly half (eight participants) indicated interest in rejoining. In 2022, MRC will seek to understand participation barriers specifically in rural areas.

Additionally, in 2021, MRC developed a targeted outreach plan focused on recruiting jurisdictions in counties throughout the state that have lacked a participant in the Initiative. As a result of this effort 11 participants from new counties joined the Initiative. MRC will continue efforts to recruit participants from underrepresented counties to join the Initiative in 2022.

Local Conservation Corps Recruitment

Since program inception, MRC has partnered with several Local Conservation Corps (LCCs), which operate as permanent collection sites and provide labor at collection events. Given this success, MRC recruited three LCCs to experiment with how they could participate in the Initiative.

In Spring 2021 until March 2022, MRC worked with the San Jose Conservation Corps (SJCC), the Fresno Economic Opportunities Commission Local Conservation Corps (Fresno EOC) and the Greater Valley Conservation Corps (GVCC). MRC decided that to meet certain legal restrictions that the state imposes on LCC activities, each LCC should participate in the Initiative by partnering with one or more municipalities with which it operates.

Table 27 describes the progress each LCC made during the experimental period.

TABLE 27: Local Conservation Corps Recruitment Progress

LCC	Progress Made During Experimental Period
SJCC Two municipalities partnered with SJCC, resulting in it collecting 52 illegally dumped mattresses.	
GVCC	partner with a municipality despite their efforts.
Fresno	Two municipalities partnered with Fresno EOC, resulting in it collecting
EOC	11 illegally dumped mattresses.

At the time that MRC's work with this test group concluded in March 2022, each LCC expressed interest in continuing to participate in the Initiative.

MRC provided the results from the experimental period to CalRecycle and is awaiting their decision on whether MRC may explore pursuing similar arrangements with the other 11 California LCCs.

Data Analysis

MRC hired Customer Analytics, a demographic data analysis firm, to analyze 2021 illegal dumping data collected through the Initiative. Customer Analytics measured the relationships between illegal dumping and demographic and socio-economic factors in the communities served by the reporting entities. They also tested for associations between rates of illegal dumping and various elements of MRC's collection network.

See Appendix D for a complete description of the methodology used.

Demographic/Socio-economic Trends

ZIP codes with the following attributes experienced higher rates of illegal dumping in 2021:

- Higher percentage of renter households;
- Higher percentage of multifamily dwelling types;
- Higher percentage of persons living below the federal poverty level; and
- Lower proportions of persons age 64+.

MRC intends to target illegal dumping in these areas through its projects discussed in the **Environmental Justice Community Access** section and through its illegal dumping pilot study funding.

Identifying Hotspots

Highest Per Capita Areas Identified using 2021 Initiative Data

As it did in 2020, MRC used 2021 Initiative data and data from the US Census Bureau's American Community Survey to identify the rate of illegal mattress dumping on a per capita basis. The following areas experienced higher rates: Clearlake, Costa Mesa, Oxnard. Richmond and Torrance.

MRC will target outreach and strategically increase its collection network to discourage illegal mattress dumping in these five areas. In addition, MRC will explore correlations between environmental justice communities and highest per capita areas to identify additional opportunities for outreach and expansion.

Efforts to Reduce Illegal Dumping in the Highest Per Capita Areas Identified in 2020

In 2020, MRC identified the five Initiative participants with the highest per capita rates of illegal dumping (Berkeley, Clearlake, El Monte, Richmond and Victorville). In 2021, MRC worked to expand its collection network and conducted education and outreach in these communities. These efforts are summarized as follows:

City of Berkeley

A participant since 2018, the city of Berkeley continued to collect units from the public right-of-way and report units through the Initiative.

In 2021, MRC provided labor and containers at nine collection events in Alameda County and promoted these events at Alameda County Illegal Dumping Task Force meetings. In Spring 2021, we also provided containers at the University of California Berkeley's student move out day, which collected over 500 discarded mattresses. This is important because when students leave at the end of a school term, some mattresses will be illegally dumped.

MRC also awarded the city of Berkeley funding to participate the in 2021 illegal dumping pilot studies. See the Illegal Dumping Pilot Projects section for more information.

City of Clearlake

A participant in the Initiative since 2016, the city continued to collect illegally dumped mattresses from the public right-of-way in 2021. MRC also supported one collection event in the city to expand residential access to no-cost mattress recycling. Residents may also drop off discarded mattresses at a permanent collection site located in the city. Additionally, MRC worked with a nonprofit to develop a residential mailer that promoted the permanent collection site established in Lake County.

City of El Monte

Although the city of El Monte itself did not participate in the Initiative in 2021, Los Angeles County (which includes El Monte) did, and it collected illegally dumped units from El Monte zip codes. Those units are included among the total units reported in Table 26 by the County of Los Angeles Department of Public Works. Residents may also drop off discarded mattresses at a permanent collection site located less than 15 miles away from El Monte.

Additionally, El Monte confirmed that its hauler provides no cost bulky item collection (up to 20 per year), including mattress collection, for residents of both single and multifamily complexes. MRC promotes the city's bulky item collection program through its Bulky Item Directory. MRC also encouraged the city to sign up for the Initiative.

City of Richmond

In 2021, MRC worked with the city to support two mattress collection events. Residents may also drop off discarded mattresses at a permanent collection site located in the city. MRC met with permanent collection site staff to provide resources, training and discuss collection event planning.

City of Victorville

In 2021, MRC supported two mattress collection events in the city. Additionally, residents may continue dropping off discarded mattresses at two permanent collection sites located in the city of Victorville. In 2022, MRC sponsored the Victorville Spring Festival and Egg Hunt where we interacted with nearly 300 residents and answered questions about mattress recycling and retailer take back. MRC also sponsored the city's Public Works Day to reach households enrolled in Victorville elementary schools.

Education and Outreach in These Areas

The Initiative data also influences where MRC concentrates its efforts in contacting local officials and media, as well as where MRC advertises. MRC took the same approach with the cities of Berkeley, Clearlake, El Monte, Richmond and Victorville as it did with EJ communities. See Education and Outreach for more information.

MRC awarded the 2021 Illegally Dumped Mattress Pilot Project funding to the cities of Berkeley, Palmdale and San Jose to support targeted outreach, illegal dumping enforcement and bulky curbside collection at multifamily residences. In 2022, MRC will support education and outreach efforts and collection events for these Initiative participants upon request.

Curbside Bulky Item Collection Programs and Illegal Mattress Dumping

Customer Analytics' analysis of the 2021 Initiative data suggests that areas offering curbside bulky item collection are associated with less illegal dumping. MRC intends to monitor this relationship in future years.

MRC leveraged its Bulky Item Directory as a resource to increase awareness of bulky item collection opportunities. This resource is available to consumers on ByeByeMattress.com and is based on information MRC collected in its 2018 statewide study of curbside collection services. MRC also promotes bulky item curbside collection as an option for responsible mattress collection. Furthermore, MRC identifies participating curbside collection services in the Bye Bye Mattress consumer education materials.

In 2021, MRC also awarded funding for illegal dumping pilot studies that examined how curbside mattress collection affected illegal dumping. See <u>Illegal Dumping Pilot Projects</u> for details.

MRC Collection Network and Illegal Mattress Dumping

Customer Analytics found that communities near permanent collection sites experienced less illegal mattress dumping in 2021, but their analysis of the data did not show a statistically significant decrease in dumping near collection events. Overall, this analysis confirms that MRC's strategy of expanding the permanent collection network is an effective method to reduce illegal dumping.

Projects to Mitigate Illegally Dumped Mattresses

In 2020, MRC solicited applications for funding from communities adversely affected by illegal mattress dumping. The three broad areas considered for funding include:

- Education programs to inform residents about existing mattress collection channels;
- Improved resident awareness or enforcement of illegal dumping laws for mattresses;
 and
- Establishing or improving mattress drop-off programs.

MRC intends to continue soliciting applications for illegal dumping pilot study funding in future years.

2021 Illegal Dumping Pilot Projects to Prevent Illegal Mattress Dumping

In July 2020, MRC invited the 21 Initiative participants with the highest per capita rates of illegal mattress dumping in 2019 and that had participated in the Initiative for at least two years to apply for pilot study funding. Five participants submitted proposals and MRC awarded funds to the cities of Berkeley, Palmdale and San Jose totaling \$232,677.

As of this report, the cities of Berkeley and San Jose projects are complete. The city of Palmdale expects to complete its project in 2022.

MRC intends to develop case studies based on the results of each project and will post them on our website, as well as promote them through various stakeholder groups and social media outlets.

City of Berkeley

The city of Berkeley piloted a curbside mattress collection program that offered two curbside pickup appointments to single-family homes and multifamily housing complexes with nine or fewer units. The city also conducted an education and outreach campaign to raise awareness about the pilot curbside mattress collection program and promote other existing recycling options. Prior to this pilot program, the city offered one free curbside bulky item collection opportunity per year for residents living in properties with one to four units.

Berkeley's curbside collection began in March 2021 for a 12-month period (March 10, 2020 – March 9, 2021) during which the city collected 1,334 mattresses. This is 432 fewer illegally dumped mattresses collected when compared to the same time period for the previous year, March 10, 2019 – March 9, 2020. Additionally, during this 12-month period during which the curbside collection was occurring, the city reported that CalTrans collected 64 fewer illegally dumped mattresses in Berkeley when compared to the same time period for the previous year, March 10, 2019 – March 9, 2020. (CalTrans does not participate in the Initiative.)

City of San Jose

The city of San Jose piloted a targeted outreach campaign to increase resident awareness about the city's junk pickup services and MRC's collection sites. In addition, MRC funded the procurement of surveillance cameras for the city to install at select multifamily housing sites that had a history of illegal mattress dumping. The city applied a different approach at each multifamily housing site to monitor the efficacy of outreach and cameras. The following treatments were applied to the different multifamily housing sites:

- Site 1: No camera and no outreach
- Site 2: No camera and outreach only
- Site 3: One camera and no outreach
- Site 4: One camera, outreach

Camera monitoring began in November 2021 and was completed in April 2022. The preliminary results of the pilot showed that Sites 2, 3 and 4 had less illegal dumping within 150 feet of the site. Overall, the targeted outreach and the presence of cameras appear to have been effective in reducing the number of illegal dumping incidents.

City of Palmdale

The city of Palmdale worked with community based social marketing consultant, Action Research, to identify barriers experienced by multifamily residents when disposing of bulky items, such as mattresses. The city also launched an outreach campaign, Junk Away the Right Way, which included vehicle wraps, a new website landing page and additional outreach material. This project was extended until August 2022. MRC will provide the results of this project in the next annual report.

2022 Funding Support for Projects to Proactively Address Illegal Mattress Dumping

In November 2021, MRC invited Initiative participants and all California municipalities, nonprofits and SWFs that have at least one year of baseline data for illegally dumped mattresses from an internal reporting system or under the Initiative from 2020 or later to apply for funding of projects to reduce the illegal mattress dumping in California communities.

MRC received three proposals, but one applicant withdrew its application. MRC awarded funds to the two projects totaling \$84,973.

Those projects will conduct education and outreach, test and evaluate alternative collection efforts to prevent illegal dumping. Once these projects are completed at the end of 2022, MRC will evaluate what impact they had on illegal dumping in the next annual report.

Table 28 summarizes the ongoing projects:

TABLE 28: Awardees of Pilot Study Funding

Participant	Amount Awarded
City of San Rafael	\$23,373
County of Ventura	\$61,600

Next Steps

Although not all California communities participate in the Initiative, MRC is encouraged that from 2020 to 2021, participation increased, participant retention was strong and the quality of the reported data has improved. MRC will continue to collect data on illegal mattress dumping and compensate participating entities.

We will work with our multicultural outreach consultant and explore opportunities to provide target communities with information about the benefits of joining the Initiative. MRC also will continue to work with CalRecycle, the Mattress Advisory Committee, CCEJN, IVAN, ESJPA and IDTAC and other interested entities to promote the Initiative.

The Initiative is only one element of MRC's overall strategy for combating illegal mattress dumping. Program elements that intercept discarded mattresses before they can be illegally dumped and encourage consumers and businesses to recycle are important tools for preventing illegal dumping. Therefore, MRC will continue to publicize the retailer take back obligation, encourage residents to use MRC's collection network, which includes recyclers, collection sites, curbside bulky item collection programs and collection events. MRC also promotes the consumer drop-off incentive.

Supplemental Strategies

Working Groups and Conferences

To develop internal expertise, leverage resources and offer support to others working to reduce and mitigate illegal dumping, MRC regularly attends working groups, task force meetings, conferences and presentations focused on illegal dumping.

Events and working groups MRC attended or participated in during 2021 include:

- Oakland Illegal Dumping Task Force meetings hosted monthly by Alameda County Board of Supervisors District 4 Nate Miley
- CalRecycle Illegal Dumping Technical Advisory Committee meetings
- Communities United to Remove Blight
- Monterey County Litter Dumping and Abatement Task Force
- Antelope Valley Illegal Dumping Task Force
- California League of Cities Conference
- California State Association of Counties Conference
- Identifying Violations Affecting Neighborhoods monthly meetings Tulare, Fresno, Imperial, Kern and Kings County
- California Resource Recovery Association Annual Conference
- Tribal EPA Region 9 Conference
- Southern California Waste Management Forum Annual Conference
- Riverside County Recycles Community Summit
- National Zero Waste Conference
- Keep America Beautiful National Conference

Information Sharing

MRC works with Customer Analytics to better understand the causes of illegal dumping. By analyzing illegal dumping data reported through the Initiative, MRC can develop resources that support local efforts of Initiative participants. See Illegally Dumped Mattress Collection Initiative section for details on data reported in 2021.

In 2021, Customer Analytics used Initiative data to create heat maps that identified areas with higher rates of illegal dumping and MRC provided these maps to all Initiative participants to further support local efforts. MRC will continue to provide heat maps to Initiative participants in 2022.

In addition, to promote existing no-cost mattress recycling options, MRC publishes a curbside bulky item directory on ByeByeMattress.com advertising services that offer at least one free bulky item pick up per year.

Lesson Plan: Don't Dump it, Recycle it

In 2021, MRC published an illegal dumping lesson plan on ByeByeMattress.com. Consisting of five activities aligned with Next Generation Science Standards, the plan guides students through the journey of waste, the impact of waste on the natural environment and how to mitigate illegal dumping. The last lesson offers facts and statistics about mattress recycling and how mattress components can be broken down into useful materials.

MRC promoted the lesson plan to teachers, afterschool programs, youth-based organizations and at conferences and illegal dumping working groups. To date, several dozen organizations counties, cities, solid waste companies and nonprofit organizations have downloaded the material for use in their communities' schools.

In 2022, the California Environmental Literacy Initiative included the lesson plan in its online resources hub, which is used by nine county offices of education and a broad range of community-based partners across the state working in support of environmental literacy. Additionally, the Marine Sciences Institute, which nearly 50,000 students from across the Bay Area visit annually, provided the lesson plan to their program managers and included a link to the plan in the teacher resources area of their website. During Earth Day, MRC also met a variety of student-led organizations, Girl Scout troops and environmental groups interested in using the lesson plan in their schools or summer camps.

In 2022, MRC will continue to provide the lesson plan and promote the availability of the activities to teachers, school districts, school boards, afterschool programs, student-led clubs, youth-based organizations and environmental literacy stakeholders.

White Paper

MRC collaborated with an interdisciplinary team of experts to develop a white paper "Best Practices in Addressing Illegal Dumping of Durable Waste — A Guide for Policy Makers," reporting on strategies and best practices that have been found effective in mitigating illegal dumping in the United States and other regions around the world. The report is available on MRC's website.

In 2021, Dr. Calvin Lakhan, Faculty of Environmental Studies, York University, Ontario presented the findings of the white paper during a panel discussion at the National Zero Waste Conference. He discussed the white paper findings and strategies to prevent and deter illegal dumping. MRC also promoted the white paper to illegal dumping task force groups, environmental justice organizations, through MRC and CalRecycle's social media and at other conferences and events.

MRC will continue promoting the white paper in 2022.

Research

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR §18964 (b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

Cal. Pub. Res. Code §42987.1(g) — Conducting research, as needed, related to improving used mattress collection, dismantling, and recycling operations, including pilot programs to test new processes, methods, or equipment on a local, regional, or otherwise limited basis.

Cal. Pub. Res. Code §42990.1(m) — For reports submitted on and after July 1, 2021, all the following:

Cal. Pub. Res. Code §42990.1(m)(3) — A report on research activities, which the organization shall undertake, to improve used mattress collection, dismantling, recycling operations, source reduction and green product design, and the response to the problem of illegal dumping and a report on the progress made as a result of the research activities.

Cal. Pub. Res. Code §42990.1(m)(5) — If the mattress recycling organization determines during a particular year that any of the activities undertaken to implement paragraph (3) or (4) were unsuccessful, the organization shall identify the problems with the current activities, and report on the new activities undertaken and progress made, in the following year's annual report.

Cal. Pub. Res. Code §42990.1(m)(6) — A hard copy of, or an electronic reference to, each research study and report completed by the organization during the period covered by the annual report and

a brief explanation of how the organization anticipates the research may benefit the program. The organization shall make these studies and reports publicly available free of charge. If the study or report contains trade secret or confidential information protected by law, the organization shall only be required to provide a description of the research and its relevance to the program that omits any of the trade secret or confidential information.

RESEARCH

MRC seeks to improve the sustainability of mattress recycling by:8

- Advancing the efficient collection and transport of discarded mattresses
- Identifying and promoting best practices for mattress dismantling and recycling
- Identifying new and better uses for the recycled components
- Fostering innovation, cooperation and communication between suppliers, manufacturers, collectors, dismantlers and end-market commodity buyers to increase mattress recycling rates

To assist in developing and managing its research efforts, MRC staff works with an experienced team of research and innovation subcontractors. MRC's goal is to identify projects that have the potential to achieve both short-term, high-impact results, as well as longer-term projects with multi-year horizons. A summary of projects that were active or completed in 2021 and longer-range areas of interest are discussed in this section. When projects span multiple calendar years, they will be discussed in several reporting cycles. From a portfolio management perspective, MRC works to establish and manage a diverse family of projects which explores both incremental and disruptive technology development. This includes, but is not limited to mechanical recycling technologies used in adjacent industries, process automation innovations and newly emerging advanced recycling process development.

MRC is encouraged by its initial efforts, but is realistic, recognizing that by their nature, research outcomes are unpredictable with some projects producing useful results and others failing. Moreover, many factors influence market acceptance of new technologies. Therefore, research is necessary to improve long-term industry performance, but should not be focused exclusively on short-term results.

With these cautions in mind, MRC evaluates research proposals and defines the intended objective of each research project awarded. This process considers whether the proposer is qualified to undertake the project and the value proposition. Awarded

⁸ In addition to MRC's research efforts to improve the sustainability of mattress recycling, Cal. Pub. Res. Code § 42990.1(m)(3) also requires that MRC report on research activities undertaken concerning "source reduction and green product design, and the response to the problem of illegal dumping." These topics are discussed in the Sleep Products Sustainability Program and Illegal Dumping sections of this report.

projects are funded contingent on established, structured, milestone-driven contracts with the selected organization. MRC research program metrics are structured to:

- Reward learning
- Encourage taking and managing risks
- Encourage collaboration
- Meet project milestones
- Produce results

Research projects may be accelerated or extended (or stopped entirely) if it appears the work is likely to produce valuable (or inconclusive) results.

Completed Projects

Mattress Collection Facilities Improvement Funding

For the third year, MRC funded improvements at mattress collection sites to increase the number of mattresses diverted from landfills, improve the recyclability of discarded units, improve worker safety and decrease transportation costs by increasing the number of units shipped per container. Since late 2018, MRC has offered up to \$10,000 per site per funding cycle to eligible residential and commercial collection sites in California. Recipients must agree to serve as permanent collection sites for at least one year following receipt of funds.

In 2021, MRC provided \$83,005 to fund 13 approved projects that were completed that year. These projects included improvements to mattress collection areas that increase the recyclability of units (for example, by keeping units dry), purchasing equipment for safer and more efficient loading of units and erecting fencing to secure sites from vandalism and fire. In total, these 13 sites anticipate that the funded improvements will allow them to collect an additional 45,000 units annually for recycling. In addition, four of the fund recipients became new permanent collection sites in 2021 (see table 29 below).

MRC awarded five other projects in 2021 that will be funded in 2022 once the projects are completed. A report on those projects will appear in the next annual report. MRC continues to accept applications from eligible sites throughout the year.

MRC has evaluated annual changes in units collected and landfilled for recycling by sites that received funding to understand whether the funded projects improved landfill diversion. For most locations, it is difficult to draw strong conclusions because COVID-19 significantly disrupted the number of new mattresses sold and old mattresses discarded in California in 2020 and 2021. Furthermore, some collection sites did not accept discarded mattresses during the pandemic while others chose to landfill units rather than expose solid waste workers to potentially contaminated units. Some MRC

projects did not have a landfill diversion objective. Examples included projects that improved worker safety or provided barriers to vandalism.

TABLE 29: Collection Projects Completed in 2021

	Company	Location	Project	Amount Paid
1	Billy Wright Landfill	Los Banos, CA	Improve unit quality by adding crushed rock to help drain receiving area and funding new forklift attachments to improve worker safety and loading efficiency.	\$3,165
2	East Bay Silicon Valley Habitat for Humanity	Milpitas, CA	Improve worker safety and loading efficiency by partially funding new forklift.	\$10,000
3	Eastern Regional Landfill, Inc.	Tahoe City, CA	Improve worker safety and loading efficiency by funding portable loading ramp. This will also keep units off the ground and reduce weather exposure to discarded units.	\$10,000
4	Frank R. Bowerman Landfill*	Irvine, CA	Improve worker safety and loading efficiency by funding telehandler forklift to improve worker safety and loading efficiency.	\$10,000
5	Highway 59 Landfill	Merced, CA	Improve unit quality by adding crushed rock to help drain receiving area and funding new forklift attachments to improve worker safety loading efficiency.	\$5,504
6	Impact Junk Removal	El Cajon, CA	Discourage vandalism, theft and unit quality at collection site by funding fencing, cameras, signage and weather cover.	\$5,012
7	Jacumba Boulevard Revitalization Alliance	Jacumba, CA	Improve worker safety and unit quality by funding canopy system to protect workers from heat and units from weather exposure.	\$754
8	Kings Waste and Recycling Authority	Hanford, CA	Improve unit quality by funding weather structure sides to protect them from weather exposure.	\$1,517

	Company	Location	Project	Amount Paid
9	Lake County, Eastlake Landfill*	Clearlake, CA	Improve unit quality by funding new canopy shelter to keep units clean and dry.	\$9,005
10	Olinda Landfill*	Brea, CA	Improve worker safety and loading efficiency by funding telehandler forklift to improve worker safety and loading efficiency.	\$2,128
11	Prima Deshecha Landfill*	San Juan Capistrano, CA	Improve worker safety and loading efficiency by funding telehandler forklift to improve worker safety and loading efficiency.	\$5,920
12	City of Redding	Redding, CA	Improve worker safety and loading efficiency by funding forklift dedicated to handling mattresses to improve worker safety and loading efficiency.	\$10,000
13	Turlock Transfer Station	Turlock, CA	Improve worker safety and loading efficiency by funding portable loading ramp. This will also keep units off the ground and reduce weather exposure to discarded units.	\$10,000
	TOTAL			

^{*} New MRC collection sites in 2021.

Transportation Efficiency Project

MRC's collection network consists of drop-off locations, collection events and Commercial Volume Program service sites. Annually, these locations generate over 15,000 loads of discarded mattresses that are moved by MRC transporters using various types of collection containers. Because discarded mattress are light but bulky and have relatively low residual value, transporting them over long distances is inefficient, resulting in high fuel consumption and increased costs. MRC is seeking to improve the efficiency of our transportation network to decrease costs and reduce our environmental footprint.

MRC's 2019 annual report discussed recommendations made by Group 50 (a logistics consultant) to improve transportation logistics and minimize program disruptions. Actions MRC has taken in response to those recommendations are as follows:

- 1. MRC hired a supply chain manager who is responsible for planning, implementing and monitoring our overall supply chain strategy, with a goal of maximizing the efficiency and productivity of MRC transporters and recyclers. The position is responsible for executing enhancements to processes and systems to improve the overall supply chain function. This addition to the California team also allows MRC program coordinators to focus their time on managing and strategically developing the collection network.
- 2. In November 2021, MRC requested proposals to provide transportation services for the collection network. In 2022, MRC contracted with selected transporters based on their qualifications, experience and competitive pricing.
- 3. MRC requires that each transporter comply with specific service level metrics. MRC tracks the performance metrics and costs of each shipping lane and, if necessary, will requote or reassign a lane to reduce service failures, lower costs or increase the number of units per haul.
- 4. To improve its data collection and analytics, MRC links transporter and collector accounts across internal data platforms, which allows us to better track transportation costs and travel distances. MRC also uses this data to highlight underperforming collection sites and transporters, which helps us avoid network imbalances and bottlenecks.
- 5. MRC wants all recyclers to operate efficiently throughout the year, despite seasonal variations in the number of discarded mattresses that enter the network. As part of this effort, MRC aims to avoid the need to divert loads from one recycler to another because the first recycler is overwhelmed with units. Diversions are especially a problem during the busiest months of the year in late summer and early fall. To accomplish this goal, MRC developed capacity and volume forecasting models for each recycler. These predictive models help MRC efficiently manage and allocate mattress deliveries to the recyclers, and in turn help the recyclers better allocate their labor and equipment resources to plan for seasonal volume surges and reduce wasteful diversions.
- 6. To increase delivery consistency and reduce bottlenecks and offloading delays, MRC is tracking whether transporters meet scheduled dock times. Transporter compensation is tied to whether they meet these expectations. This improves recycler efficiency and reduces costly demurrage charges that are incurred when trucks must wait to unload their goods.
- 7. As the program grows and matures, MRC has begun the process of documenting internal and external workflows to identify standard operating procedures.

- 8. To better manage the 15,000 annual shipments to MRC recyclers, MRC and our transporters assign unique order identification numbers to each shipment so that they can be digitally tracked from the point of collection to the recycler.
- 9. MRC plans to convert recycler contracts from average in-bound unit weights to actual weights to help MRC better evaluate and track material arriving and leaving each mattress recycler. In the meantime, MRC assumes that mattresses and foundations arriving at each recycling facility on average weighs 55 pounds each, based on a 2019 study. MRC validates this result annually and will update the average unit weight figure if it changes in the future.

Future annual reports will discuss significant MRC research projects or process enhancements that could further improve transportation efficiency.

Pocketed Coil Separation Project

Pocketed coils are mattress springs that are individually wrapped in a fabric sleeve or pocket (typically made with polypropylene fiber) and then assembled into rectangular units using ultrasonic welding, stitching or adhesives. MRC estimates that approximately 20% of mattresses discarded today in California contain pocketed coils and that this percentage will gradually increase, given the growing popularity of this component over the past 20 years.

When recyclers dismantle a mattress, the whole rectangular pocketed coil unit is easily separated from other layers of material. Under current market conditions, however, most metal scrap dealers will not buy whole unopened pocketed coil units because they consider the fabric to be a contaminant. Both the steel and the polypropylene fiber are recyclable, provided the recycler can separate the individual coils from the fabric pocket. Since most MRC recyclers currently cannot separate the steel from the fabric, most pocketed coils were landfilled before 2020.

MRC addressed the pocketed coil problem as a two-part effort in 2021. First, as a temporary measure, MRC recyclers shipped pocketed coils to centrally located facilities that extracted and recycled the steel from the pocket fabric. The additional steel that was recycled as a result of this shredding process added about two percentage points to MRC's statewide recycler efficiency rate, which is currently 77%.

As noted in previous annual reports, MRC completed a sponsored research project with Wisconsin-based Knoble Design LLC to explore a novel approach for recycling pocketed coils, resulting in the successful construction of a small-scale prototype machine demonstrating the approach. Knoble Design has since sold the design and patents to Atlanta Attachment Company (ACC), a major supplier of sewing equipment to the mattress industry, which plans to sell a full-scale version of the machine to recyclers. AAC showed a prototype of the machine at the ISPA EXPO 2022 trade show in Orlando, Florida in March 2022.

MRC notes that other companies are developing shredders and other separation technology that can improve mattress recycling by dismantling pocketed coils.

Foundation Wood Recycling Follow-up Study

In September 2016, California enacted SB 1383, which requires the state to reduce the amount of organic waste sent to landfills by 50% in 2020 compared to 2014 levels, and by 75% in 2025. Although California expects to increase its organics processing capacity to meet this need by 2025, supply could overwhelm demand, according to CalRecycle's "Analysis of the Progress Toward SB 1383 Organic Waste Reduction Goals" (August 2020). Unless new options for recycling foundation wood emerge, MRC's recyclers may be unable in the future to recycle 75% of the weight of mattresses processed.

MRC conducted a wood market study in 2019 to identify new potential uses and customers for our recyclers' foundation wood. MRC published an updated analysis of California wood markets in January 2022, which concluded that with the exception of particle board, new markets for post-consumer foundation wood remain limited. MRC tested whether shredded foundation wood could be used to make particle board but concluded that our material was too contaminated with metal staples and nails for that application. If MRC recyclers can provide a cleaner foundation wood feedstock, MRC will rerun the test in 2022.

The 2022 study also explored using foundation wood to make medium density fiberboard, wood pellets, fire logs, pallets, animal bedding and oriented strand board. The study suggested that California recyclers might find new markets for their wood and reduce transportation costs if they were to invest in shredders.

Polyurethanes in Zeolite Cements

In May 2020, MRC contracted with the University of California Los Angeles (UCLA) to explore whether lightweight cements could be made using mixtures of zeolites and chemically recycled polyurethane foam. Zeolites are naturally occurring microporous, aluminosilicate minerals commonly used as commercial adsorbents and catalysts. The project builds on a previous research project funded by the U.S. Department of Energy's Advanced Research Projects Agency-Energy (ARPA-E) exploring zeolite-based cements.

The UCLA research team, led by Dr. Samanvaya Srivastava, found that a simple three component mixture of zeolites, upcycled polyurethane foam and an interfacial bonding agent yielded strong, ductile cements with properties similar to ordinary Portland cement. An interesting key finding was that the upcycled polyurethanes actually outperformed virgin polyurethane materials. The researchers filed a provisional patent application (63/250,881) in September 2021. The UCLA team presented their findings

at the October 2021 Polyurethanes Technical Conference in Denver, CO and their final report is posted on the MRC web site. MRC and UCLA are working jointly to establish collaborative programs with industry participants to further the research and explore the feasibility of commercializing the technology.

Upcycled Foam in Aqueous Polyurethane Dispersions

In the initial stages of the UCLA zeolite cement investigation, the researchers undertook a related project to convert upcycled polyurethanes to aqueous dispersions, or a water-based material. The concept was that aqueous dispersions could be used with many cement formulating processes. UCLA successfully developed stable dispersions, but the physical properties of the resulting cements were inferior to the three component mixtures described above. Although this technology may have future value in other applications (such as in coatings or sealants), this subject was outside the original scope of the zeolites cement project. As a result, MRC decided for now to discontinue further research into converting upcycled polyurethanes to aqueous dispersions, publish the findings and pursue the more promising cement formulations. The final report is posted on MRC's website.

Size and Type Counting Project

MRC completed a study in 2021 to count the sizes and types of mattresses and foundations collected for recycling in California. We intend to repeat this study periodically. The data will help MRC better understand the mix of discarded products and materials that the program recycles and changes in this mix over time. It also provides baseline data for the life cycle analysis (LCA) that MRC is undertaking to understand the major contributors to environmental impacts arising from end-of-life management of discarded mattresses.

To conduct the study, a mattress recycler counted and categorized over 3,200 units as they entered its facility. For each load that was evaluated, the recycler recorded the source (retailer, solid waste facility, etc.), the size (king, queen, full, twin) and mattress type (inner-spring, all foam, foundation, futon) of each unit. Data from this project is posted on MRC's website.

Composition Analysis Report

MRC studied the composition of each type and size of mattress and foundation in the recycling stream measured in terms of the percentage by weight of each component. The data will help recyclers anticipate future changes in commodity streams extracted from discarded mattresses and foundations. It also provides baseline data for MRC's LCA. Data from this project is posted on MRC's website.

Waste Characterization Study

To achieve a higher program wide recycling rate, MRC must understand how much, and which post-consumer mattress materials are being landfilled and why. With this information, MRC can prioritize research projects that focus on reducing quantities of waste materials. MRC selected MSW Consultants, LLC to perform a waste characterization study at two California recycling facilities. The study found that the top three most prevalent waste categories as a percentage of total waste were shoddy felt pad (22.0%), mixed non-woven fibers (19.8%) and quilt panels (17.3%). Recyclers dispose of these materials either because no market exists for them, or the materials are too contaminated for existing end markets. Data from this study is posted on MRC's website.

Active Research Projects

Lean Manufacturing Assessment of MRC California Recyclers

Lean manufacturing (lean) is an improvement and problem-solving methodology that strives to reduce or eliminate activities that do not add value to an organization. It is based on principles designed to not only quantify and eliminate waste, but also help organizations improve the way they do business. MRC contracted with MWS and Associates (MWS) in 2019 to perform baseline lean assessments of facilities operated by interested MRC mattress recyclers. Each participating facility received a confidential report detailing the results of the analysis and recommendations for improving efficiency. The assessment showed that most recyclers have the potential to increase their productivity by an average of 30% by reducing non-value-added activities, like excessive forklift movements and double handling of materials.

In November 2020, MRC again contracted with MWS to perform targeted training (known as "kaizen" events, based on a Japanese word that translates to "change for the good") for recyclers interested in realizing their potential to improve operational efficiency. The process involves gathering facility managers and operations teams to map targeted areas in the existing process, solicit ideas that will address inefficiencies, implement those changes and measure impacts. MRC offered these kaizen events to all California recyclers in 2021. Kaizen events were conducted at four of the nine facilities under contract at that time to developing targeted process efficiency improvements. MRC will provide another training opportunity for those recyclers that could not participate.

In November 2021, MRC established an evergreen lean manufacturing program. MWS will facilitate the program. The objective is to provide supporting resources on an ongoing basis to MRC recyclers and staff. Our goal is to assist recyclers in moving beyond waste elimination and introduce new lean concepts, such as continuous improvement, loss analysis, mistake-proofing and total quality management. Each

recycler will be profiled based on their current state of lean readiness and tailored development plans will be jointly established in consultation with each recycler. Program reviews will be conducted at least semi-annually to monitor progress across the recycling network.

Enzymatic Digestion of Blended Textiles and Fibers

In August 2021, MRC contracted with Dr. Richard Gross of Rensselaer Polytechnic Institute (RPI) to explore enzymatic digestion of cotton-polyester blended textiles with an initial focus on shoddy felt pads. The research project also includes collaboration with several textile industry participants.

Mattress textiles are seldom recycled because they are made using a wide variety of blended fibers. Most often landfilled, they represent a large percentage of total mattress recycling waste. Enzymatic digestion of synthetic and natural fibers may be a promising, versatile approach to generate valuable materials, thereby creating greater circularity for mattress textiles.

Dr. Gross devised a cascading concept which uses commercially available enzymes to convert PET fiber into ethylene terephthalate and ethylene glycol. Following PET conversion, the remaining cotton is enzymatically reduced to glucose, again using commercially available enzymes. If the research is successful, all blended fibers could be converted to useful building block chemicals with established markets using a relatively low energy-intensive process. The project is expected to conclude in late 2022. Thus far, initial results are encouraging. RPI also intends to submit a proposal for a much larger award to The National Science Foundation. This more comprehensive project may include NC State University, interested textile companies and MRC as collaborators. Dr. Gross indicates that the results from the recycled mattress materials project would be an important component of the larger future research proposal.

Vitrimerization of Polyurethane Foam

In May 2021, MRC contracted with Edge Geoscience Inc. (EGI) to explore whether mattress foam can be converted into valuable reformable polymers. The main objective of the project is to assess the feasibility of creating new components for various consumer and industrial products like shoe soles, conveyor belts, tool grips and other applications.

The ongoing project leverages previous work conducted by leading university material science laboratories which demonstrated that polyurethane foams can be thermochemically converted into covalent dynamic networks (vitrimers). Vitrimers are meltable pellets that can be reshaped and more easily recycled into useful products. EGI was successful in its attempt to scale this technology using post-consumer mattress foam. Initial studies focused on MDI (methylene diphenyl diisocyanate) based memory

foams where the chemistry was expected to be most favorable. EGI conducted follow up studies on conventional TDI (toluene diisocyanate) based foams with similar results. Physical properties were comparable to virgin thermoplastic polyurethane. EGI filed a provisional patent in August 2021. Further work is underway to optimize process conditions and product formulations. The project is expected to conclude in mid-2022 and a final report will be posted on MRC's website.

Manufacturing Battery Electrodes from Recycled Mattress Materials

In February 2020, MRC contracted with Pittsburg State University's Kansas Polymer Research Center (KPRC) to explore whether recycled mattress materials could be chemically modified to produce battery and supercapacitor components. Under the direction of Professor Ram Gupta, the Research Center completed a phase 1 study which successfully produced and evaluated electrodes made from a variety of recycled mattress materials including polyurethane foam, polyester, cotton and coconut fiber.

The results were very encouraging. Preliminary data indicated that several materials had significant performance advantages over common electrode materials, such as carbon, graphene and carbon nanotubes. As a result, MRC sponsored a follow up research project to construct and test actual batteries using the developed components and evaluate their performance. The follow up study was completed in January 2022. When used in lithium-ion test batteries, recycled mattress materials had very high storage capacity and good power density. They retained over 90% performance over 10,000 charge-discharge cycles (roughly equivalent to a 10+ year service life).

Since non-woven textiles were not included in the original studies, MRC requested a follow up study to determine whether they could be suitable battery electrode feedstock materials. This final study would provide a complete assessment of the performance of all non-metallic mattress components. Dr. Gupta also proposed additional performance testing in next-generation lithium-sulfide batteries. Work on these two tasks will continue through 2022.

A provisional patent application is being prepared and will be filed at the conclusion of the non-woven textile lab studies. Once filed, MRC and KPRC will contact industry suppliers to explore commercialization of this technology. The final report will be posted on MRC's website.

Cotton Fibers in 3D Printed Composites

In recent years, the cost, versatility and quality of 3D printing machinery has dramatically improved. With improved technology and low capital investment requirements, many small businesses with 3D printing capability have been established. An unmet need in this industry is access to and the development of locally produced, suitable and

sustainable feedstocks for these printers. In particular, demand for 3D printed fiber reinforced composites for prototyping applications is growing rapidly. MRC is interested in exploring whether recycled mattress fibers could be adapted to meet this need.

MRC contracted with West Virginia University to explore the use of recycled mattress cotton in 3D printed composites. The project, under the direction of Dr. Sunidhi Mehta, will develop and test extruded filament feedstocks using cotton and a biodegradable binding resin such as polylactic acid. Once the researchers develop formulations, they will manufacture and test the composites in several applications to displace single use plastics such as personal protective equipment, straws and disposable cutlery. They will also evaluate the biodegradability of the filaments and printed articles. The project is ongoing and will conclude in 2023.

Life Cycle Assessment

In 2020, MRC contracted with Scope 3 Consulting to conduct a Life Cycle Analysis (LCA) of our California recycling operations. This project will systematically determine the environmental impacts of our program from point of collection to recycling end markets or landfill and will conclude in 2022. While environmental impacts are typically measured in terms of environmental indicators such as CO2 emissions, energy use and landfill avoidance, MRC's objective is to evaluate the baseline performance of current recycling operations using these and other environmental performance metrics. We expect the LCA will provide tools that can be used to evaluate the relative impacts of our current program, guide future decisions for improving our processes and inform policy development.

Future Areas of Interest

Textile Recycling

As noted above, MRC conducted a <u>waste characterization study</u> in 2021 to determine the types and quantities of materials sent to landfill and the reasons why they were landfilled. A key finding was that textiles, particularly nonwoven materials such as mote cotton, spun bond polypropylene and shoddy felt, represent nearly 60% of all waste products from the mattress recycling process. The predominant reason for disposal was a lack of viable end markets for these materials. In April 2022, MRC requested proposals to explore and develop new applications for post-consumer mattress textiles.

Oleo Sponge

Recyclers' foam output volume is growing steadily. Three main factors contribute to this growth: newer mattresses tend to contain increasing amounts of foam as all foam mattresses become more popular, recyclers are improving how much foam they can recycle through their processes and the number of units recycled each year is growing.

To sustain foam recycling rates in the future, our recyclers must have economically viable markets where they can sell this material.

A 2017 report published by Barry, Mane, Elam and Darling of the Argonne National Laboratory described the development of a reusable oil absorbing foam technology called **Oleo Sponge**. These researchers successfully used a pilot scale sequential infiltration synthesis process to modify the surface chemistry of common polyurethane foams. These modifications optimized the oil and water absorption properties of foam in oil clean-up applications.

In discussion with industry experts, MRC learned that although oil absorbing polyurethane foam pads can be used in some applications, raw materials cost has limited the commercial adoption of the product. To learn if the economics could be improved by using post-consumer mattress foam to make a wide spectrum of high-performance oil absorbing products, MRC requested research proposals in January 2022 for this purpose.

Techniques to modify the surface physics of post-consumer mattress foam could open markets for this material beyond oil clean-up applications. MRC believes that the high surface area and porous nature of mattress foam products are advantageous for this form of upcycling. Air filtration, water filtration, moisture retention, gas absorption and oil absorption products are just a few of the potential end uses.

Mattress Age Study

In 2019, an MRC study estimated the average age of a unit arriving at mattress recycling facilities. MRC is interested in replicating this study in 2022 with some adjustments to the methodology to improve the accuracy of the data. The results from this study will inform the industry about the age at which consumers discard mattresses and inform recyclers about the types and quantities of mattresses to expect in future years.

NSF-Funded Foam Circularity Research

MRC serves on the Stakeholder Committee for a new project launched by the National Science Foundation (NSF) called the Emerging Frontiers in Research & Innovation Circularity of Cross-linked Polyurethane Foams. This research is being conducted by scientific teams from Arizona State University and Virginia Tech. The goal of the Stakeholder Committee is to provide insights from essential stakeholders in the U.S. polyurethane foam value-chain that will inform and guide the research team's efforts, decisions and resource allocations. The Stakeholder Committee will convene on a regular basis to establish a conduit and communication channel between industry members and the research team for the duration of the five-year \$1.9 million NSF-funded project.

Circular Economy for the Mattress Industry

As MRC manages its own efforts to improve mattress recycling and find new and better markets for reclaimed mattress materials, we regularly communicate with other mattress recycling organizations around the world and stay abreast of broader efforts bring pursued to work toward a more circular economy for mattresses.

Global interest in creating greater circularity in the mattress industry continues to accelerate. Stakeholders across the value chain cite the need for interdisciplinary collaboration to build infrastructure that can implement full and partial closed loop product use cycles. Industry leaders around the world are working with public authorities to develop legislation to establish circularity requirements and incentives specifically for mattresses.

Due to regional preferences, business model differences, a mattress' long useful life and regulatory priorities, building a homogeneous global circular economy for mattresses will take considerable time. Developing better mattresses designs is a common thread in discussions among manufacturers interested in sharing best practices. However, end-of-life management priorities and strategies diverge significantly from region to region. Rather than invest in conventional recycling infrastructure, which is mostly downcycling, some countries are interested in moving directly to technologies that would upcycle polymeric materials (such as the foam and some fibers) through chemical recycling and pyrolysis. We anticipate further debate regarding the best ways to incentivize global development of advanced recycling technologies and investment in commercial scale facilities.

Predominantly in Europe but also in other regions, several advanced recycling pilot facilities were established in recent years. With increased experience and a better understanding of the technical risks and business case, public-private sector entities and industry led consortia are exploring means to expand the most promising technologies globally. Decisions regarding the size and placement of these future facilities will have significant environmental and economic impacts. MRC has been actively engaged with these organizations to provide volume and feedstock quality data to help inform these decisions.

In the United States, MRC continues its focus first on developing better and new markets for our recycled materials. Although this approach does not create completely closed loop circularity, we believe this approach will be an important part of the overall circularity strategy because it typically has the most favorable environmental impact according to LCA studies in other industries, compared to more energy-intensive approaches like thermo-chemical recycling. Second, MRC thinks that building operational efficiency from post-consumer disposal through recycling processes is equally important. In these two areas, MRC is taking a leading role and sharing findings with other regions.

Finally, among stakeholders, consensus is building that circularity is an idea that will take considerable time and investment to attain. Moving forward, several industry trade organizations in Europe, the United States, Asia and Australia have committed to playing a lead role to encourage investment and to facilitate communication and collaboration in pursuit of this goal. Global collaborative networks have already formed to explore and address capability gaps systematically with the following initial priorities:

- 1. Develop better designs
- 2. Develop the means to increase recycled content in raw materials
- 3. Build a sustainable logistics and recycling infrastructure
- 4. Establish a science-based, peer-reviewed forum to advance meaningful innovation
- 5. Establish a more informative material labeling system
- 6. Develop an effective, easy-to-understand communication plan for consumers

New Materials Recycling Committee

In support of the circular economy initiatives discussed above, MRC organized a New Materials Recycling Committee in 2021. Members of the committee represent foam, textile and spring manufacturers as well as MRC board members. During its initial meeting, the committee confirmed that its objectives are to identify end-of-life challenges posed by current products and materials available to consumers, advise MRC on anticipated long-term changes in product mix and raise industry awareness about how design and marketing decisions can affect recycling. The committee's work will inform MRC's research team and assist recyclers in preparing for these challenges as well as forecast future types and quantities of mattress materials available for secondary markets. The committee will meet with MRC annually.

Global Mattress Recycling Coalition

In May 2021, MRC coordinated another Global Mattress Recycling Coalition meeting which was held virtually to accommodate attendees from various time zones. Attendees included recyclers, stewardship organizations and industry associations from France, Netherlands, Belgium, United Kingdom, Australia, India, Canada and the United States. The first part of the meeting focused on sharing global research efforts to improve mattress collection and transportation infrastructure, recycling efficiencies and new uses for recycled materials. The second part of the meeting discussed data and metrics and how each organization measures operational and financial performance.

Gasification and Pyrolysis

Previous annual reports have provided an overview of technology, financial viability, environmental impacts and market drivers pertaining to pyrolysis and gasification of mixed product waste. This industry is making progress but still faces formidable

economic headwinds in becoming economically viable, however, higher oil prices and stronger demand for some of the outputs have improved the short-term outlook.

In the past year, technological development in this area has continued to advance. In particular, small-scale pyrolysis liquification, where the post-reactor products are condensed to chemicals and fuels, was demonstrated on an industrial scale for mixed plastics and rubber. New facilities were designed to meet European emission standards and generate products such as basic chemicals, jet fuel and fuel oil. Small scale production facilities, with capacities as low as six tons per day, may help address reverse logistics costs and challenges of supplying a central pyrolysis facility with material provided by multiple small volume recyclers.

In other developments, parties are considering whether to integrate pyrolysis and gasification processes into existing power generating facilities. In these cases, mixed plastic and rubber materials displace coal or natural gas utilization and take advantage of existing infrastructure for emissions management. Large material volumes, however, are needed to generate power economically and reliably so this approach may be limited to more densely populated regions. We note that several standalone large-scale pyrolysis and gasification facilities were established in the United States, Europe and Australia in 2020 and 2021. Therefore, a deeper understanding of economics, environmental impacts and community acceptance is forthcoming.

Financing Mechanism

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR §18964 (b)(9) — Financing Mechanism. Include the mattress recycling organization's total expenses and revenues associated with the implementation of the used mattress recycling program. Changes to the mattresses recycling charge shall be reflected in the annual program budget for approval by the department. If a mattress recycling organization conducts activities that are separate from the implementation and management of the California used mattress recycling program, then the annual report shall include documentation on how the collection and use of funds from the California mattress recycling charge were kept separate from other activities of the mattress recycling organization, including the methodology for distribution of shared costs. Consistent with subdivision (a) of section 42990.1 of the Public Resources Code, the annual report shall include the following:

- (A) Mattress recycling charge per mattress size
- (B) Capital costs
- (C) Education/Outreach costs
- (D) End-of-life used mattress management costs with line items, if applicable, for collection, transportation, recycling, renovating, reuse, and proper disposal
- (E) Program administration costs including, but not limited to, the department's costs pursuant to subdivision (a) of section 42988.2 of the Public Resources Code, and third party legal costs. Surplus funds, if any, and detailed rationale for the specified level of surplus.

Financing Mechanism

Mattress Recycling Council Inc. (MRC Inc.) operates similar mattress recycling programs in three states: California, Connecticut and Rhode Island. In 2017, MRC Inc. established separate limited liability companies (LLCs) for each state program. The LLC operating the California program is Mattress Recycling Council California, LLC (MRC).

Each state program's LLC maintains its own financial records to reflect the receipt of the appropriate recycling charge and the direct expenses that it incurs (e.g., collection, recycling, transportation, communications, etc.). MRC Inc. allocates shared expenses (e.g., administration costs, overheads, etc.) among the three state program LLCs based on the relative population of each state. Each LLC also has a separate reserve for that state program.

Using the format specified in CalRecycle's regulations, we discuss MRC's total 2021 expenses and revenues associated with the California program with tables comparing its actual expenses and revenues incurred in 2021, to 2020 actual and those projected for 2022 and budgeted for 2023, subject to CalRecycle's approval, as follows:

Revenue from the Mattress Recycling Charge

Cal. Pub. Res. Code § 42989(b)(2) authorizes MRC to either (1) set a single recycling charge that applies to all sizes and types of mattresses and foundations, or (2) set two different charges "to accommodate mattress size differentials." MRC maintained a single charge for 2021 and in its 2022 budget (as approved by CalRecycle). Factors MRC considered that supported this decision included avoiding confusion among retailers and consumers, ease of consumer messaging and simplified charge collection and reporting obligations for retailers when they collect the charge from consumers and then remit those charges to MRC.

MRC has a single recycling charge for mattresses and foundations sold in Connecticut and Rhode Island, the other two states in which it administers similar mattress recycling programs, and, like California, that arrangement has worked well in those states. Having

⁹ For these purposes, all 2020 and 2021 revenue and expenses are based on MRC's audited financials. Projections for 2022 are based on unaudited 1st quarter 2022 actuals and forecasted revenue and expenses for the remainder of the year. Proposed 2023 revenue and expense amounts cited in this annual report have been approved by the MRC Board of Directors and have been submitted separately to CalRecycle in MRC's 2023 Budget.

a single recycling charge, regardless of mattress size, that is consistent across state programs avoids confusion among multi-state and online retailers.

MRC collected this recycling charge on all sales of mattresses and foundations to California residents or end users (e.g., hotels, educational institutions, etc.), regardless of size. In 2021, registered retailers and other sellers reported California sales of 4,386,172 units, including 1,235 prior years' (2016 – 2017) units at the \$11 fee. As a result, MRC collected recycling charge revenue totaling \$46,055,423 (4,384,937 units multiplied by \$10.50 plus 1,235 units multiplied by \$11) in 2021. This represents a 3.6% increase over 2020.

In 2021, the California program also earned \$53,522 in late fees on recycling charge remittance from retailers to MRC, for a total revenue of \$46,108,945.

Table 30 shows MRC's 2020 and 2021 actual revenue from the recycling charge and late fee revenue, MRC's 2022 projected revenue and its proposed 2023 revenue.

2023 **Proposed** 2022 Category 2020 Actual 2021 Actual **Projections Budget** \$44,461,242 Recycling Charge Revenue \$46,055,423 \$43,752,062 \$44,627,100 Late Fee Revenue \$30,000 \$37,631 \$53,522 \$30,000 **Total Revenue** \$44,498,873 \$46,108,945 \$43,782,062 \$44,657,100

TABLE 30: Program Revenue

Capital Costs

Other than modest expenditures on computers and office equipment, MRC incurred no capital costs in 2021 related to the California program.

Education and Outreach Costs

Costs for education and outreach activities in 2021 totaled \$2,796,515, 17.8% below 2020 levels. Nevertheless, MRC continued to meet its communication objectives, and this level of spending supported robust industry- and consumer-targeted outreach strategies that resulted in increased awareness levels as explained in the Education and Outreach section of this report.

MRC reduced its expenditures by renegotiating communications and marketing vendor contracts in 2021, resulting in nearly 20% savings for fees paid to third-party PR agencies, including expenses incurred to produce the annual report. MRC also took advantage of effective but less expensive advertising channels (digital and online advertising versus television) and focused on targeting specific markets versus

advertising to a wider general audience. MRC continued to promote the program in multiple languages and prioritized informing communities of color and those experiencing high per capita rates of illegal mattress dumping. Also due to COVID-19's lingering effect on in-person events, MRC did not incur budgeted costs for collection event advertising, exhibiting at industry conferences, sponsoring community events or related travel.

Table 31 shows MRC's 2020 and 2021 actual education and outreach costs, its projected 2022 costs and its proposed 2023 expenses.

TABLE 31: Education and Outreach Costs

Category	2020 Actual	2021 Actual	2022 Projections	2023 Proposed Budget
Advertising and Consumer Education	\$2,104,399	\$1,818,724	\$1,972,922	\$1,927,359
3rd Party PR Agency	\$704,341	\$589,234	\$586,590	\$586,590
Industry and Stakeholder Outreach	\$274,240	\$118,255	\$176,624	\$185,258
Conferences & Events	\$13,081	\$36,604	\$80,700	\$74,950
Annual Report Expenses	\$44,481	\$34,789	\$25,000	\$25,750
Subtotal ¹⁰	\$3,140,542	\$2,597,606	\$2,841,836	\$2,799,907
Travel	\$7,435	\$4,318	\$23,000	\$32,690
Staff Expenses	\$255,406	\$194,591	\$216,000	\$207,536
Total Education and Outreach Costs	\$3,403,383	\$2,796,515	\$3,080,836	\$3,040,133

¹⁰ The 2020 Education and Outreach costs presented in the audited financial statements include communications' staff expenses. The communications' staff expenses in the 2021 audited financial statements are included in Administration.

End-of-Life Used Mattress Management Costs

MRC classifies as Operational Costs expenses incurred for mattress collection (including Illegally Dumped Mattress Collection Initiative), transportation and recycling. MRC's 2021 Operational Costs for end-of-life management were \$37,059,601, a decrease of 2.8% from 2020 levels. Total units collected and recycled in 2021 were 1,594,292, a 5.5% increase over 2020 units.

The following provides additional details for this expense category:

Collection Costs

- Solid Waste Handling Fees: MRC paid \$3,676,255 (14.2% over 2020) to collection sites throughout the state to compensate them for consolidating discarded mattresses and preparing them for transport to an MRC recycling facility. MRC experienced an increase in both the number of units handled by these no-cost collection sites in 2021 and the handling fees that MRC paid.
- Collection Containers and Storage: MRC incurred \$1,660,855 in 2021 (5.9% less than 2020) to lease storage space, trailers and roll-off containers used to hold and transport collected mattresses. The 2020 expenses in this category included \$325,432 to store units abandoned by a former MRC recycler at several facilities throughout California. This decrease was slightly offset by additional containers necessary for the additional units that MRC processed in 2021.
- Consumer Incentive: In 2021, MRC recyclers paid a total of \$359,781 (39.4% less than 2020) in consumer incentives to encourage residents to deliver discarded mattresses directly to MRC recycling facilities and one external consumer incentive location in Oakland. Before the COVID-19 pandemic, most consumer incentive units originated in Southern California. In 2021, mattress supply shortages and the increased value of post-consumer foam increased demand from renovators and exporters for whole post-consumer mattresses renovated in California and discarded units exported to Mexico. These external factors reduced units received through the consumer incentive program. In setting the per unit incentive amount, MRC took into account Cal. Pub. Res. Code § 42985(b), which states the legislature's intent that MRC's statewide program not undermine existing used mattress recycling, resale, refurbishing and reuse operations that are in compliance with state and federal law. The Mattress Advisory Committee recommended that the incentive not exceed \$3 per unit because a higher amount might harm renovators. MRC accepted that recommendation and has not changed the amount since.
- Collection Site Signage/Guidelines: MRC incurred \$5,049 in 2021 (80.8% less than 2020) to provide new collection site signage and updated written guidelines to collection sites. MRC only produces the signs when a new site joins the program or MRC must replace damaged signage.
- Illegally Dumped Mattress Collection Initiative: MRC spent \$1,281,784 in 2021 (6.4% over 2020) to address illegally dumped mattresses in California. Most of these costs (\$1,112,760) were payments to entities, including local governments, solid waste facilities, franchise haulers, nonprofits contracted with municipalities, Joint Powers Authorities and Native nations, to count and pick up mattresses that were illegally dumped in their communities. The amount of the compensation varied based on whether the entity was in an urban (\$15 per unit) or rural county (\$20 per unit). MRC used the rural county definition in Cal. Pub. Res. Code § 40184 to determine a county's classification. The entities in rural counties reported 2,484 units resulting in payments of \$49,680, and all other entities reported 70,872 units resulting in payments of \$1,063,080. In addition, MRC incurred costs to analyze aggregated

illegal dumping data, encourage participants to join or remain in the Initiative, implement targeted illegal dumping prevention marketing and developed a training video for Initiative members. Using the data collected through the Initiative, MRC provided to Initiative participants heat maps showing where mattresses are being illegally dumped in each participating entity's jurisdiction. In 2021, MRC awarded funds to three illegal dumping pilot studies and paid \$114,260. Additional pilot studies are planned for future years.

See Mitigation of Illegal Mattress Dumping for more information.

Table 32 shows MRC's 2020 and 2021 actual collection costs, its projected 2022 costs and its proposed 2023 expenses.

TABLE 32: Collection Costs

Category	2020 Actual	2021 Actual	2022 Projections	2023 Proposed Budget
Collection and Container Costs				
Solid Waste Handling Fees	\$3,219,965	\$3,676,255	\$3,853,863	\$4,011,659
Collection Containers and Storage	\$1,765,858	\$1,660,855	\$1,512,408	\$1,491,624
Consumer Incentive	\$593,432	\$359,781	\$354,453	\$412,344
Collection Site Signage/ Guidelines	\$26,361	\$5,049	\$23,399	\$23,175
Total Collection and Container Costs	\$5,605,616	\$5,701,940	\$5,744,123	\$5,938,802
Illegally Dumped Mattress Collection Initiative				
Initiative Entity Compensation	\$1,141,215	\$1,112,760	\$1,109,145	\$1,131,335
Marketing/Advertising/Events	\$5,898	\$2,550	\$18,400	\$18,502
Consulting Services	\$23,506	\$24,304	\$18,921	\$17,619
Pilot Studies	\$0	\$114,260	\$199,417	\$100,000
Staff Expenses	\$33,899	\$27,910	\$30,000	\$31,500
Total Illegally Dumped Mattress Collection Initiative ¹¹	\$1,204,518	\$1,281,784	\$1,375,883	\$1,298,956
Total Collection Costs	\$6,810,134	\$6,983,724	\$7,120,006	\$7,237,758

¹¹ The 2020 Illegally Dumped Mattress Collection Initiative costs presented in the audited financial statements include staff expenses. The staff expenses in the 2021 audited financial statements are included in Administration.

Transportation

MRC paid \$10,118,840 in 2021 (10.9% over 2020) to transport collected units to MRC recyclers. This increase reflects more units transported, higher transport rates due to driver labor shortages and increased fuel costs, new collection routes added to the network and more long-distance routes to service rural areas. It also includes transporting pocketed coils accumulated by individual recyclers to centralized processing facilities.

Recycling

MRC contracts with recyclers to dismantle and recycle units in California. In 2021, MRC paid six contracted recyclers (operating nine facilities) \$19,957,037 (10.1% less than 2020) for these services. The 2020 expenses included \$2.8 million to process units abandoned by a former recycler. This decrease was slightly offset by increases in rates and units processed by the program in 2021.

Table 33 shows MRC's 2020 and 2021 actual end-of-life management costs, its projected 2022 costs and its proposed 2023 expenses.

TABLE 33: End-of-life	Used Mattress	Management	Costs (Operational	Costs)
-----------------------	----------------------	------------	---------	--------------------	--------

Category	2020 Actual	2021 Actual	2022 Projections	2023 Proposed Budget
Collection and Container Costs	\$5,605,616	\$5,701,940	\$5,744,123	\$5,938,802
Illegally Dumped Mattress Collection Initiative	\$1,204,518	\$1,281,784	\$1,375,883	\$1,298,956
Transportation	\$9,124,866	\$10,118,840	\$9,971,853	\$9,416,431
Recycling	\$22,190,864	\$19,957,037	\$20,193,807	\$21,217,385
Total Operational Costs	\$38,125,864	\$37,059,601	\$37,285,666	\$37,871,574

Research and Development

MRC seeks to enhance the sustainability of California's mattress recycling program by improving the efficiency and effectiveness of the mattress collection network, promoting best practices in mattress recycling and identifying and developing new and better end uses for recovered materials. In addition, MRC operates the Sleep Products Sustainability Program (SP2) which is designed to help individual mattress manufacturers reduce the generation of waste materials, water and energy.

Research Projects

In 2021, MRC incurred expenses of \$715,478 (7.4% below 2020 expenses) for research activities including:

- The program funded improvements to MRC collection sites to increase the number of mattresses diverted from landfills, improve the recyclability of discarded units, improve worker safety and decrease transportation costs by increasing the number of units shipped per container. MRC will continue to fund similar activities in future years.
- MRC published a second study exploring new uses for clean foundation wood to assist recyclers' efforts to sell this material to customers.
- MRC completed two UCLA projects related to post-consumer polyurethane foam.
 The first explored the feasibility of making cements using mixtures of zeolites and chemically recycled polyurethane foam. The second project converted upcycled polyurethanes to aqueous dispersions which may have future value in applications such as coatings or sealants.
- MRC commissioned a project to quantify the frequency of common mattress and foundation sizes and unit types received by the California mattress recycling program. The data from this project serves MRC's goals of better understanding and tracking changes over time in the recycling materials stream.
- MRC commissioned a study to measure the materials composition of each type
 and size of mattress and foundation in the recycling stream. The data from this
 study will serve the organization's goals of preparing recyclers for changes in
 construction methods and the commodity streams that can be extracted from future
 discarded mattresses and foundations. It will also provide baseline data for the
 ongoing life cycle assessment (LCA) study MRC is undertaking to understand the
 major contributors to environmental impacts arising from end-of-life management of
 discarded mattresses.
- MRC performed a study of non-recyclable waste generated by MRC-contracted mattress recyclers. This data will help MRC understand how much and which postconsumer mattress materials are going to landfill and will inform and guide future research projects.
- MRC funded lean manufacturing training at mattress recycling facilities in 2021.
 Each recycler received recommendations to improve its overall operational efficiency, the quality and quantity of materials recycled and remove logistical bottlenecks.
- MRC began several research studies in 2021 that will explore options for hard-torecycle mattress components. These projects will continue in 2022 and beyond.

See <u>Research</u> for a more detailed explanation of completed, active and future research activities.

Sleep Products Sustainability Program (SP2)

In 2021, MRC incurred \$104,848 to operate the SP2 program, similar to the expenses in 2020. SP2 develops methods that manufacturers can use to analyze and reduce their environmental impact. MRC works with California manufacturers to help them reduce the generation of waste materials, water, and energy in their manufacturing facilities.

Program expenses included consulting fees for SP2 oversight and development of program resources to assist participants as they prepare for certification. In 2021, three facilities completed SP2 training. One facility was certified, and the remaining two facilities are scheduled for certification verification in 2022. Two additional facilities registered for SP2 in 2021 and were trained in early 2022. In addition, MRC incurred expenses to promote SP2 to California-based mattress manufacturers through digital and print advertising, social media messaging and informational webinars.

Program expenses also included the startup and facilitation of committees focused on product circularity and new materials in mattresses and the global mattress recycling coalition meeting held in March 2022.

See the <u>Materials Management/Waste Hierarchy</u> and <u>Research</u> sections of this report for more information.

Table 34 shows MRC's 2020 and 2021 actual research and development costs, its projected 2022 costs and its proposed 2023 expenses.

TABLE 34: Research and Development Costs

¹² The audited financial statements show Mattress Collection Facility Improvement Funding, labeled as Grants, separately from Research and Development.

¹³ In 2020, SP2 costs are included in Administration in the audited financial statements. Effective 2021, SP2 costs are included in Research and Development.

¹⁴ The 2020 research costs presented in the audited financial statements include staff expenses. The staff expenses in the 2021 audited financial statements are included in Administration.

Program Administration, Legal and CalRecycle Costs

In 2021, MRC incurred \$6,698,316 (9.7% less than 2020) in program administration costs, including legal and CalRecycle Oversight. Of this amount, \$3,000,322 is for 22.27 FTE (full time equivalent) staff that perform administrative and operational program oversight. This represents 90% of MRC's total staff expense of \$3,346,939, which pays salaries for a total of 25.22 FTEs. Staff expense for the additional 2.95 FTEs, who work on education and outreach, the illegally dumped mattress initiative, and research, are included under those activity costs in the tables above.

MRC also hires consultants and outside contractors to provide additional services and expertise used to manage program registrants, recycling data, retailer participation and financials. Program administration expenses include \$311,288 in computer and database expenses for the organization's finance and CRM systems, including a one-time cost for the implementation of a new accounting system. Other administrative and overhead costs include office space, telephone, utilities, insurance, bad debt and depreciation. MRC also works with California-based entities to provide industry and government relations support, specifically to assist MRC in responding to questions from legislators, informing elected officials and other stakeholders about the program and monitoring other California legislative and regulatory developments that may affect the program. MRC incurred \$19,923 to conduct compliance audits of its recyclers. In addition, MRC incurred \$79,828 to conduct reviews of retailer participation compliance, bringing total compliance expenses to \$99,751.

Program administrative expenses also include costs to prepare annual tax filings and conduct the annual financial audit, including MRC's SOC1 audit (conducted by PwC, a global audit and accounting firm), which CalRecycle's regulation 14 CCR§ 18964(b) (11) requires MRC to perform as a necessary component of the annual audit. Travel expenses were 9.5% higher in 2021 compared to 2020 as travel restrictions eased. In addition, CalRecycle invoiced MRC \$683,784 for oversight expenses in 2021, a reduction of 11.2% from 2020.

In 2021, MRC incurred third party legal and litigation support expenses totaling \$1,010,068, a 57.8% reduction from 2020. Approximately 97% of legal costs in 2021 were associated with defending MRC's interests against substantial monetary claims asserted in a complex arbitration proceeding involving a former MRC recycler and the recycler's principal. The litigation-related costs included attorneys' fees, expert witness fees, transcript costs, arbitration panel costs and other out-of-pocket expenses. That arbitration concluded in May 2021. Among other things, the arbitrators found that MRC had established valid grounds for terminating the recycler, that the recycler was liable for significant costs MRC incurred to store, transport and process units that the recycler had abandoned after termination and that the recycler had overcharged MRC on certain invoices in 2018 and ruled against the recycler and its principal on each of the claims

that they had asserted against MRC for substantial monetary damages. The remaining legal costs are for handling routine program operations and MRC's contracts with hundreds of vendors.

Table 35 shows MRC's 2020 and 2021 actual administration, legal and CalRecycle oversight costs, its projected 2022 costs and its proposed 2023 expenses.

TABLE 35: Program Administration, Legal and CalRecycle Oversight Costs

Total Program Costs	\$49,915,070	\$47,522,524	\$48,055,258	\$48,730,256

Reserves and Surplus Funds

Cal. Pub. Res. Code § 42988 requires that MRC maintain a reserve that is sufficient to fund the program's operations over a multi-year period in a fiscally prudent and responsible manner. Section 42988.3 further provides:

Commencing January 1, 2027, the mattress recycling organization shall not maintain total reserves exceeding 60 percent of its annual operating expenses, consistent with the requirements of the Financial Accounting Standards Board's Accounting Standards Update 2016-14, Not-for-Profit Entities (Topic 958), and any future updates to that standard.

In addition, CalRecycle's regulations require that MRC's annual report include a discussion of its "[s]urplus funds, if any, and detailed rationale for the specified level of surplus." 14 CCR § 18964(b)(9)(E).

For nonprofit entities like MRC, the concepts of "surplus funds" and "reserves" are distinct. For nonprofits, generally accepted accounting principles (GAAP) define the annual "increase (or decrease) in net assets" to mean the mathematical difference between total revenue and total expenses for that year. A nonprofit's increase (or decrease) in net assets is functionally comparable to net income (or net loss) earned by a for-profit company. For this reason, we interpret the term "surplus funds" used in 14 CCR § 18964(b)(9)(E) as referring to an increase in net assets that MRC records at the end of each annual year. (A decrease in net assets at year-end would be a deficit.)

GAAP (as set forth in FASB Accounting Standards Update 2016-14, referenced in Section 42988.3) defines a nonprofit's reserves as that amount of the unrestricted accumulated net assets that the organization's board of directors has designated as reserves. MRC has no restricted net assets. MRC's 2021 audited financial statement (Statement of Financial Position) identifies MRC's reserve fund as "Board Designated Financial Reserves."

An organization's Board designated financial reserves can serve many purposes, including providing continuity of operations in times of economic downturn and funds to address unforeseen events or other financial hardships. In MRC's case, MRC has set aside funds to be prepared for unforeseen circumstances that could have a substantial impact on revenues and expenses, such as accidents, disasters or failures of MRC's operational or financial systems, recyclers, retailers and other sellers that collect the charges that fund the program or other significant unforeseen circumstances like the COVID-19 pandemic.

Significant or sudden changes in market dynamics that affect recyclers' costs or revenue (e.g., fuel needed to transport units or lower prices for recycled components) or political uncertainties also could require MRC to use financial reserves to continue funding the program.

The reserve also protects the long-term viability of the program by setting aside money that can fund unusual budget deficits without necessitating frequent adjustments in the recycling charge. Given the amount of time required to request and obtain approval to change the recycling charge, and the fact that the Act requires MRC to notify the public at least 180 days in advance of implementing an approved change, a reserve sufficient to allow MRC to operate the program smoothly without financial disruption during such a transition is imperative.

The reserves, however, are less than the total accumulated net assets. The part of the total net assets that are not designated by the board as reserves includes the nonprofit's financial assets which are set aside to meet the organization's short-term financial needs. These are comprised of liquid assets (such as cash), as well as non-liquid assets. Non-liquid assets, among other items, include accounts receivable (representing 9.6% of net assets), property and equipment and prepaid expenses.

Sufficient undesignated net assets are important to provide an organization working capital. MRC's network of recyclers and transporters rely on rapid payment for services rendered. To keep the program functioning, and its vendors paid and operating, it is critical that MRC hold sufficient working capital to cover cash flow shortfalls. MRC must rely on its reserves to address various financial risks it may encounter. Therefore, having less than approximately three months of operating assets on hand would be fiscally irresponsible.

As of December 31, 2021, MRC's net assets were \$44,216,036, as reported on the Statement of Financial Position section of MRC's 2021 audited financial statements. This reflects the total sum of all annual increases in net assets from inception through 2021. On the financial statement, the Net Assets are divided into two segments:

- \$32,335,405 in Board designated financial reserves (equivalent to approximately 68% of 2021 Total Expenses) and
- \$11,880,631 in undesignated net assets (which equals 25% of 2021 Total Expenses and the difference between total net assets and Board designated financial reserves). This is set aside to meet MRC's short-term financial needs.

MRC's net investment return for 2021 was \$888,285, and included interest and dividends, as well as realized and unrealized gains on MRC's short and long-term investments, less brokerage fees.

In addition, two extraordinary items were recorded in 2021 which had a positive impact on the net assets. In 2020, MRC borrowed money via the Paycheck Protection Program under the CARES Act. The loan, totaling \$351,842 for MRC, was forgiven by the Small Business Administration in 2021, and was recorded as a gain on the extinguishment of debt. Also in 2021, MRC recognized \$836,422 as a gain on the extinguishment of liabilities related to the legal matter with a former recycler mentioned above.

In 2021, MRC experienced a decrease in operating net assets of \$1,413,579. After adding the net investment return and the gains on extinguishment of debt and liabilities, which total \$2,076,549, MRC ended the year with an increase in net assets of \$662,970.

As Table 37 shows, as of December 31, 2021, the Net Assets at End of Year was \$44,216,036. Even with this year's modest increase in Net Assets, MRC appears to be on track to reach the 60% reserve target outlined in Section 42988.3 by January 1, 2027.

TABLE 37: Net Assets

Category	2020 Actual	2021 Actual	2022 Projections	2023 Proposed Budget
Total Revenue	\$44,498,873	\$46,108,945	\$43,782,062	\$44,657,100
Total Program Costs	\$49,915,070	\$47,522,524	\$48,055,258	\$48,730,256
Change in Operating Net Assets	(\$5,416,197)	(\$1,413,579)	(\$4,273,196)	(\$4,073,156)
Net Investment Return	\$2,012,605	\$888,285	\$884,321	\$1,347,296
Gain on the Extinguishment of Debt	\$0	\$351,842	\$0	\$0
Gain on the Extinguishment of Liabilities	\$0	\$836,422	\$0	\$0
Change in Net Assets	(\$3,403,592)	\$662,970	(\$3,388,875)	(\$2,725,860)
Net Assets Beginning of the Year	\$46,956,658	\$43,553,066	\$44,216,036	\$40,827,161
Net Assets at the End of the Year	\$43,553,066	\$44,216,036	\$40,827,161	\$38,101,301

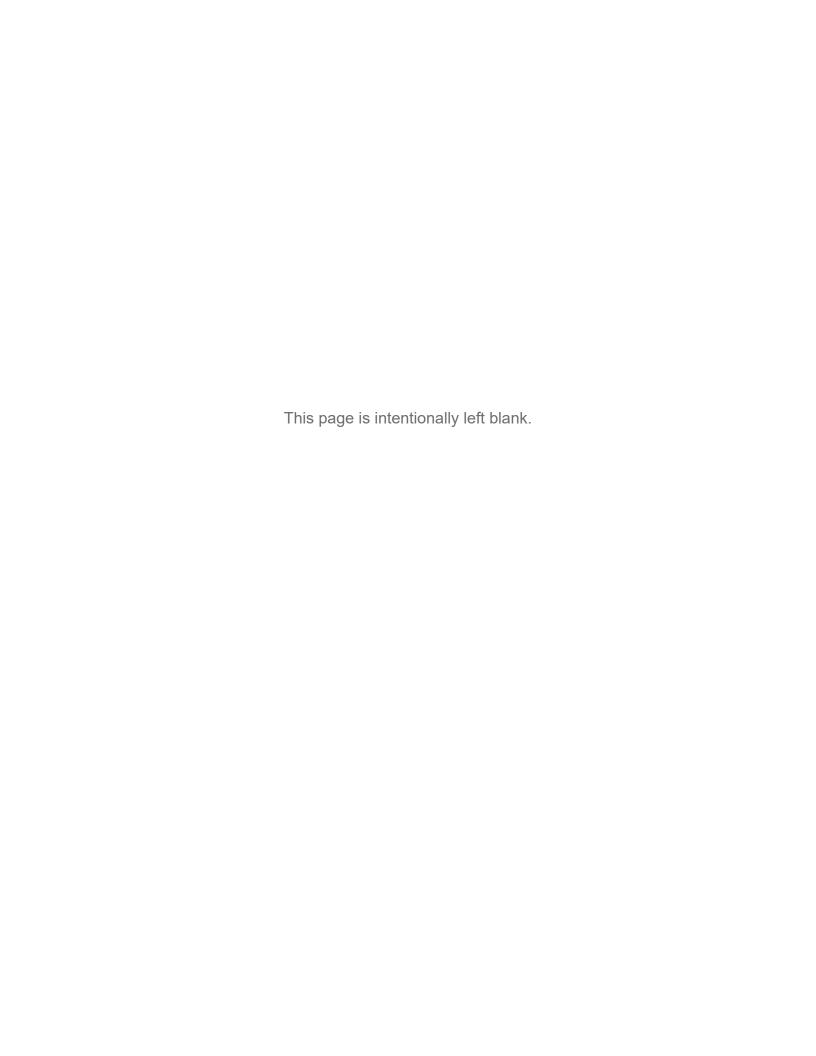

MRC anticipates a decrease in net assets in 2022 and 2023, as indicated in Table 37 above, due to a combination of factors including recessionary economic indicators prompted by rising inflation, labor and fuel costs. Fortunately, the reserves that MRC

had prudently set aside in the early years of the program will help us continue to support the program in California despite these economic challenges.

At year-end 2021, MRC's Board designated financial reserves and undesignated net assets (working capital) were as follows.

TABLE 38: MRC's Board Designated Financial Reserves and Undesignated Net Assets (Working Capital)

Net Assets as of 12/31/2021	\$44,216,036	2021 Total Expenses: \$47,522,524
Board Designated	\$32,335,405	68% (approximately 8.2 months of 2021 expenses)
Financial Reserves	, , ,	of 2021 expenses)
Undesignated Net Assets	\$11,880,631	25% (3 months of 2021 expenses)

Education and Outreach

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(10) — Education and Outreach. Provide a description of educational materials that were provided, including electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. Describe any changes to those materials that are planned for subsequent years, if applicable.

EDUCATION & OUTREACH

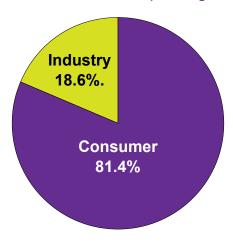

MRC's education and outreach efforts inform consumers, retailers, the mattress industry and other stakeholders about mattress recycling in California by explaining:

- How MRC operates, and its accomplishment and impact in California;
- · How and where to recycle discarded mattresses and why recycling is beneficial;
- What the charge funds; and
- The mattress industry's legal obligations.

MRC reaches these audiences using an array of communications and marketing methods, including targeted direct mail, printed collateral, advertising, media relations, websites and social media. MRC also participates in community and industry events and visits retailers, recyclers and other collection locations to learn how to collaborate on residential outreach.

Figure 6 shows the percentage of MRC's education and outreach costs directed to consumer and industry audiences.

FIGURE 6: 2021 Education and Outreach Spending Industry Versus Consumer

Consumer Education

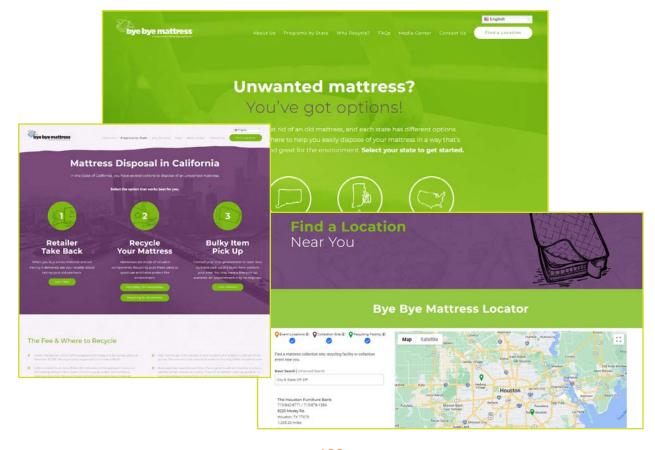

MRC communicates with consumers using the "Bye Bye Mattress" brand, which is supported by a multichannel strategy consisting of ByeByeMattress.com, point-of-sale materials, public service announcements, traditional and online advertising, community events, media relations and social media.

ByeByeMattress.com

ByeByeMattress.com provides easy-to-use information about retailer take back, participating drop-off locations and municipalities that offer at least one free curbside pick up each year. Businesses and organizations can also find Commercial Volume Program details and the options available to them.

The site also educates the public about the mattress recycling process and its environmental benefits. Other website content answers common questions about the recycling charge, lists eligible and ineligible products and provides information about deterring and reporting illegal dumping.

This overall strategy succeeded. Most of the referral traffic to ByeByeMattress.com came through media outlets MRC used for its advertisements. The number of visitors who accessed the recycler locator from a mobile device increased, likely because we expanded our digital and social media advertising. Total website traffic decreased slightly in 2021, but that was to be expected since consumers used the internet and social media more heavily during at the pandemic's outset in 2020.

In 2022, we will rebuild ByeByeMattress.com to create a user experience that is better tailored to consumers versus businesses. To date, the website primarily uses a visitor's location to determine what information to provide. Moving forward, the website will capture additional user details to decide whether to provide content that is more relevant to consumer or business users. Consumers will enjoy a seamless, singlescreen experience that presents information about drop off locations, available curbside programs and retail take back information. This should be more efficient than the current silo experience, which requires consumers to click away from the recycler locator to find curbside or retail take back information. The improved website will also make it easier for visitors to find information about mattress care and how MRC is discouraging illegal mattress dumping. Likewise, the improved website will provide a less-cluttered experience to business visitors.

Consumer Education Materials for Retailers

MRC provides retailers with no-cost point of sale materials to help them explain mattress recycling and the charge to their customers. Those materials include:

Bilingual Information Card: This card can

accompany the consumer's invoice or receipt. In its standard format, English is on one side and Spanish on the other. Chinese, Korean, Tagalog and Vietnamese versions are available on request.

- **In-Store Posters:** MRC offers posters in two sizes to provide flexibility in how and where retailers display them in-store. Spanish, Chinese, Korean, Tagalog and Vietnamese versions are available on request.
- Consumer FAQs: Consumer FAQs are provided in English and Spanish to assist retailers with sales associate training. Chinese, Korean,

request.

In 2021, MRC provided approximately 170,000 information cards and 350 posters to California retailers. Retailers also may download the artwork from MRC's website and print it on-demand themselves.

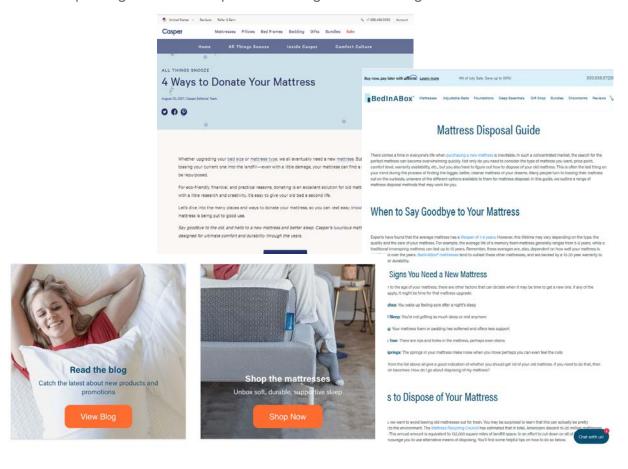

MRC uses a e-newsletters, email notifications, industry publications and events to regularly inform retailers that these materials are available from MRC and reorders are free. It also sends starter kits to newly registered retailers or those opening new stores in the state. The kit includes a postage-paid response card that retailers may use to request automatic refills of materials

In April 2021, MRC introduced a digital badge retailers may display on their websites or in customer communications to make information about the program and fee easier to find. The digital badge image links directly to ByeByeMattress.com. During the year, 12 retailers used the badge.

WE 🤁 MATTRESSES!

MRC also accepted retailers' invitations to contribute mattress recycling information to their customer newsletters or consumer blogs. Notable examples include BedInABox's mattress disposal guide and Casper's All Things Snooze blog.

Public Service Announcements

At the end of 2021, MRC retired the "Stop Illegal Dumping" campaign, which generated over 8,000 airings across California and Connecticut from 2018 to 2021, totaling more than 15 million impressions worth approximately \$1.3 million in advertising value equivalent. The Spanish version accounted for 58% of the airings. Leading media markets that ran the PSA included Sacramento-Stockton, Los Angeles, Santa Barbara-Santa Maria, Monterey, Yuma-El Centro, San Francisco-Oakland-San Jose, and Eureka.

MRC launched a new PSA campaign titled, "Break Up The Right Way With Your Old Mattress," to coincide with America Recycles Day on November 15, 2021. MRC developed the new PSA material using feedback collected from Illegally Dumped Mattress Collection Initiative participants, participants in MRC-sponsored illegal dumping mitigation projects, a representative from the Mattress Advisory Committee and stakeholders from the environmental justice community. MRC also used insight gained from the 2019 and 2020 illegal dumping workshop reports, the 2021 survey of Spanish-speaking households and the recommendations presented in the commissioned white paper to formulate the PSA's messaging and tone.

The new campaign consists of 15-second and 30-second video and radio spots. MRC also created Spanish and Mandarin translations. By end of 2021, the PSA had 182 airings in California.

In 2022, MRC will attempt to increase PSA airings by persuading stations to run them during the lead up to Earth Day and America Recycles Day. MRC will also encourage additional viewership by asking city leaders and community-based organizations to share the PSA on their social media and other communication channels.

Paid Advertising Campaigns

MRC supplements its other media efforts with paid advertising. We run a general awareness campaign in major markets statewide typically in the spring or fall to coincide with holiday weekends when retailers sell large volumes of mattresses. Targeted local campaigns are used in areas to address specific needs. For example, to raise program awareness in areas with high per capita illegal dumping activity, promote an upcoming collection event or announce a new collection site. MRC uses a mix of television, radio, digital, outdoor and print as it designs the advertising plan and incorporates outlets to reach minority groups and residents that non-English speakers. Examples of the advertisements used are in Appendix E.

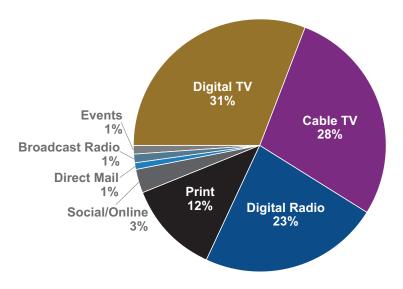

Figure 7 shows the percentage of the consumer advertising spending used for television, radio, print, digital and social in 2021.

In 2021, MRC ran a major market campaign during March and April. Later in the year, we concentrated only on local markets.

Major Market Campaigns

During March and April 2021, MRC used the "Three Ways to

FIGURE 7: 2021 Consumer Advertising Spending By Media Type

Recycle" campaign in major markets to increase general awareness of the program following Presidents Day weekend when mattress sales are traditionally high and to stay top of mind with consumers during spring cleaning and Earth Day. The ad summarized the three primary ways a consumer can place a mattress in the recycling stream: retailer take back, consumer drop off and municipal bulky item pickup.

MRC targeted mattress purchasers and likely mattress disposers, based on demographic and behavioral data collected in previous years.

MRC ran the campaign in markets with a recycling facility: Sacramento, Santa Barbara-San Luis Obispo, Fresno, San Bernardino and portions of Los Angeles counties.

MRC monitored consumer awareness at the end of the advertising campaign and found increased levels of awareness. These results are discussed in detail in the Surveys section of this chapter.

Local Market Campaigns

In 2021, MRC determined 10 counties could benefit from increased advertising because they had high per capita rates of illegal dumping or they fit MRC's definition of an environmental justice community (areas of the state that are disproportionately burdened by and vulnerable to multiple sources of pollution). These counties were: Alameda, Contra Costa, Fresno, Kern, Kings, Los Angeles, San Bernardino, San Joaquin, Stanislaus and Tulare.

MRC used information gathered from previous surveys and the recommendations in the white paper to further define the type of consumer MRC would target in these counties. MRC used the demographics that indicated less awareness of the program or demonstrated higher likelihood to illegally dump a mattress.

In these counties, MRC used "Three Ways to Recycle" advertisements in English- and Spanish-language media and sent a bilingual email to county residents. To amplify the campaign's messaging, MRC asked city mayors, council members and boards of supervisors in these areas to share this information with residents via their newsletters or social media. Impressions totaled 25.2 million.

Online and Digital Advertising

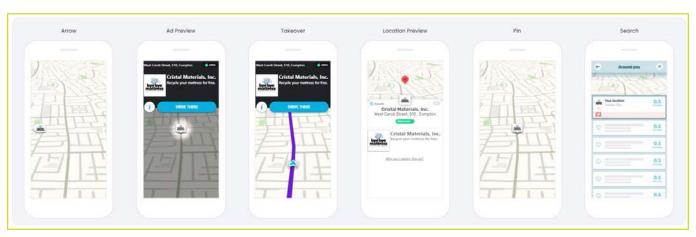

In 2021, MRC continued to use the Google's AdWords Grant program, keyword search ads and display ads, as well as the Waze navigation app.

MRC's Google ads, which are prompted when a user searches the internet for "mattress recycling," "disposal" or "junk removal," directs users to ByeByeMattress.com. In 2021, the Google

AdWords Grant provided text-only ads for keywords that cost \$1.03 per click or less. MRC's paid Google advertising included keywords that were not accessible through the grant program. The display ads give MRC the ability to add images and reach a larger audience (the ad runs not only on Google's search results pages but on other websites that display Google ads). Together the grant program and paid ads generated 8 million impressions and averaged a 6.15% click-through-rate.

MRC uses Waze to promote all locations that offer the CIP. Ads are pushed to the app's users as they drive near these areas. Locations are also marked on the map. During 2021, Waze ads garnered over 635,000 impressions and resulted in 796 navigations (clicks on a location address to map driving directions, indicating the user drove to the site).

MRC will continue using online advertising to generate leads to ByeByeMattress.com and regularly monitor analytics to find the marketing mix that Californians respond to best.

Community Events

In 2021, the rise in COVID-19 variants continued to keep many regular community events from taking place in person, especially in larger cities. However, MRC identified several virtual Earth Day celebrations and a few in-person opportunities. These included:

- Green Oceanside Earth Month (a 30-day virtual challenge)
- Marine Science Institute's Earth Day on the Bay (hybrid)
- Santa Barbara Earth Day (virtual)
- California State University
 Dominquez Hills Earth Day Festival
 (a livestreamed event)
- City of Avenal Old Timer's Day
- City of Lodi's Fall Street Faire

By participating in the virtual Earth Day events, MRC received recognition on event websites, in social media posts, in event ads, in pre- and post-event emails to the organization's contacts and event attendees and during livestreamed content. The largest of these was Santa Barbara Earth Day. The event page received 31,000 views, more than 10,000 people tuned in to the livestream content and 12,000 visited the virtual exhibit hall. Of these attendees, 150 people dropped in on MRC's virtual booth to learn about Bye Bye Mattress. Meanwhile, the in-person events held in smaller communities allowed MRC to directly engage with over 2,400 residents.

MRC anticipates more in person events in 2022 and is currently evaluating opportunities.

Media Relations

In 2021, news media covered Bye Bye Mattress as a result of MRC's proactive efforts and our responses to media inquiries. We also encouraged recyclers, collection site operators and event hosts to use our media toolkits to generate local news interest on their own. MRC's media coverage generated over 518 million impressions worth approximately \$5.5 million in advertising value equivalent. Major activities included:

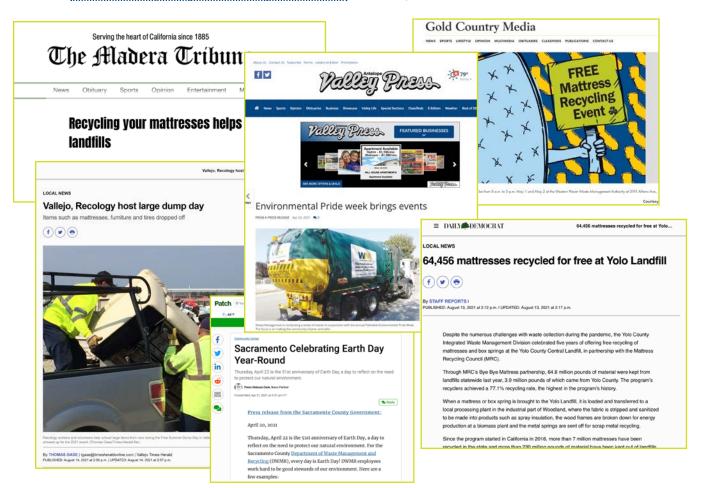

- Fresno YES! student-led collection event: Coverage aired on KSEE-TV and sister station KGPE-TV. Radio Bilingue's La Hora Mixteca, a Spanish-language/Mixteco (Indigenous language) public radio broadcast, also helped promote the event.
- **2020 Annual Report:** MRC used the release of the 2020 Annual Report to draw attention to the program's five years of growth and distributed a press release statewide that was published in media outlets such as the *San Diego Union Tribune*, *Long Beach Press-Telegram*, *Presidio Sentinel*, *Press Banner* and My Mother Lode.
- **Op-eds and letters to the editor:** MRC collaborated with local elected officials to co-author op-eds or letters to the editor. These were published in media outlets such as Berkeleyside.org, Del Norte Triplicate, Escalon Times, Hanford Sentinel and Gilroy Dispatch.
- America Recycles Day: MRC co-authored a recycling tips article with PaintCare, Call2Recycle and CARE that was distributed statewide to news outlets in English and Spanish. It received 50 placements across California totaling over 105 million impressions. Notable placements included the LA Times, San Francisco Gate, Sacramento Bee and Vida-Nueva.

Collection Site and Event Toolkits

MRC provides recyclers, collection sites and event hosts with a media toolkit containing a template news release, flyer, signage and suggested content they can use to publicize their participation in the program through online and social media outlets, city/organization websites and newsletters. The toolkit also allows the host to customize some messaging (hours of operation, residency restrictions, etc.). Here are some notable examples of how these items were used:

- The city of Madera generated local news coverage to promote their collection event.
- The city of Sacramento used Earth Day to draw attention to the many types of recycling programs available to residents and their value.
- The city of San Miguel contributed an article to their local newspaper and highlighted their work to recycle mattresses and address illegal dumping.
- Yolo County announced the total amount of mattresses saved from the landfill at their sites and generated several local news stories.
- Read the Collection Event Toolkit.
- Read the Collection Site Toolkit.

Visit mattressrecyclingcouncil.org/resources for complete toolkits.

Social Media

MRC created Twitter and Facebook profiles for Bye Bye Mattress to connect with consumers. Having a daily news feed of engaging, relevant information is important for maintaining a presence on these social media platforms. MRC has found Bye Bye Mattress' social media most useful in announcing community collection events, promoting new collection sites and pointing visitors to ByeByeMattress.com for additional information. To maintain a regular rhythm of publishing content, Bye Bye Mattress likes and shares stories related to recycling, other household items and interests its followers share.

The collective audience of these social channels totaled 1,731 in 2021, an 18.6% increase from 2020, driven by MRC's continued strategy to advertise on Facebook and boost posts. During 2021 the Bye Bye Mattress social content earned more than 2.7 million impressions.

In 2022, MRC plans to expand the Bye Bye Mattress social media strategy to include Instagram.

Industry Communications

MRC regularly encourages industry participation in recycling and informs mattress retailers, manufacturers, distributors, renovators and other stakeholders in California about their obligations under the law. To accomplish this, MRC works with CalRecycle and uses direct mail, phone calls, websites (MattressRecyclingCouncil.org and MRCreporting.org), industry events, media relations and social media.

Compliance Outreach

MRC's database of potential retailers, manufacturers, distributors and renovators is compiled from information sources including California's Bureau of Household Goods and Services, ReferenceUSA, Dun & Bradstreet, industry publication subscriber lists, industry event attendee lists, Yellow Pages, Chambers of Commerce, the Better Business Bureau and online searches. It also receives leads for potential registrants from CalRecycle's enforcement staff and MRC program coordinators as they travel the state.

MRC continues to monitor these sources for new entrants into the mattress segment, as well as non-compliant parties. When MRC identifies a party that may need to register and participate in the program, MRC mails a notice via certified mail to the party informing it of its potential obligations and follows up with a phone call or email. If there is no response within 30 days, MRC mails a second certified letter and the party is given 30 more days to respond. If the party remains unresponsive, MRC refers the party to CalRecycle for action.

MRC also monitors whether retailers and other mattress sellers are submitting monthly reports and are remitting collected recycling charges on-time. MRC uses the following protocol to alert parties that have missed deadlines for reports and payments. Those more than 90 days delinquent are notified of late fees and associated interest. Each month, MRC notifies CalRecycle of all parties that reach level seven.

TABLE 39: Notification Protocol for Late Reporters and Charge Remitters

Delinquency Stage	Late Reporter	Late Remitter
Lovol 1	Late notice email generated by	Late notice email generated by
Level 1	MRCreporting.org	MRCreporting.org
	Phone call made to verify	Phone call made regarding
Level 2	continued program participation	outstanding payment and
Level Z	and provide a verbal reporting	warning of potential interest
	reminder	charges
Lovol 2	Written notice mailed	Written notice mailed and
Level 3	vviitteri notice malled	interest invoice issued

Delinquency Stage	Late Reporter	Late Remitter
Level 4	Second phone call made to provide verbal warning of potential penalties	Second written notice sent by certified mail and interest invoice issued
Level 5	Written notice sent by certified mail and penalty invoice issued	Second phone call made warning of accruing interest
Level 6	Second written notice sent by certified mail and penalty invoice issued	Third call made warning of referral to collections agency and interest invoice issued
Level 7	Penalty invoice issued; CalRecycle notified of delinquent account	Delinquent account sent to collections agency and interest invoice issued; CalRecycle notified of delinquent account
Continued action	Penalty invoices issued monthly until account no longer delinquent	Interest invoices issued monthly until account is no longer delinquent

Meanwhile, CalRecycle's enforcement unit randomly selects mattress retailers, manufacturers and renovators to evaluate compliance with SB 254 through virtual and on-site inspections.

At retailer inspections, CalRecycle confirms whether the business is registered with MRC, visibly displays the correct charge on the sales transaction documents, is collecting the recycling charge from customers, properly remits those charges to MRC and complies with the no-cost retailer take back obligation. Inspectors also verify whether the mattresses and foundations offered for sale are produced by manufacturers that have registered with MRC.

At renovator inspections, CalRecycle confirms whether the business is registered with MRC and evaluates documentation practices used to report annual mattress collection and disposition data (due to CalRecycle May 1 of each year).

When CalRecycle determines it will levy penalties against a non-compliant party, it publishes the enforcement order on the Department's website (https://www2.calrecycle.ca.gov/Docs/EnforcementOrder/). In 2021, CalRecycle issued five enforcement orders.

Websites

MattressRecyclingCouncil.org

Designed for use by the mattress industry, regulators and non-consumer stakeholders, this website contains program information, copies of recent MRC notices, a robust resource library and links to ByeByeMattress.com (MRC's consumer-facing website) and to MRC's registration and remittance portal (MRCreporting.org). In 2021, the site attracted 90,232 visitors, up slightly from 89,869 in 2020. The top viewed pages included California's program page, how to recycle in California, the resources library, retailer take back information, open RFPs and the Sleep Products Sustainability Program.

MRCreporting.org

Parties use this online portal to register with MRC and to report and remit recycling charges to MRC. To encourage participants to remit their charges on time, the portal emails automatic reminders regarding upcoming and missed deadlines. MRC also pushes important announcements to participants and cross-posts relevant notices and information that appears on MattressRecyclingCouncil.org.

In 2021, MRC used the portal to remind California participants about the take back requirement expanding to all retailers who deliver, guidance from CalRecycle on the retailer take back requirement, availability of the Bye Bye Mattress digital badge for customer education, availability of customer education materials and reminder to update account information.

Mattress Recycling Council

MattressRecyclingCouncil.org

MRCreporting.org

Video Series

MRC wants participants and potential participants to understand the program and the mechanics of registering with MRC, submitting monthly reports and remitting charges. To inform target audiences about the program, MRC encourages participants to view the following short videos, which are accessible on MattressRecyclingCouncil.org and on MRC's YouTube channel:

- "About the Mattress Recycling Council": Provides an overview of state recycling laws, explains the mattress recycling charge and what it pays for, and encourages stakeholders to recycle with MRC.
- "How to Register on MRCreporting.org": Provides a step-by-step guide to help
 manufacturers, distributors, renovators, retailers and others determine if they must
 register with MRC, and if so, how to complete that process.
- "Reporting & Remitting Your Recycling Charges": Explains how mattress
 manufacturers and retailers can use the online portal to report and remit collected
 recycling charges.

MRC also uses these videos, which it updates annually, in presentations to industry groups or in its trade show booths.

Industry Events

In 2021, MRC participated in industry events to increase awareness of legal obligations, present research findings, further sustainability and circularity conversations and build interest in the Sleep Products Sustainability Program (SP2). These events included:

 Las Vegas Market: Usually held twice each year, this event is the largest bedding show in the United States. It attracts retailers, distributors and manufacturers from not only California but all 50 states and over 80 countries. In 2021, due to COVID-19 precautions only the Summer Market was held in August. MRC exhibited in the Home Furnishing Association's Retailer Resource Center and answered visitors' questions about registration, reporting, remittance and recycling. MRC staff also visited showrooms to discuss the program with companies debuting or displaying eligible products.

- American Home Furnishings
 Alliance: MRC was invited
 to speak at the organization's
 Sustainability & Regulatory Summit.
 We co-presented about SP2
 alongside one of the manufacturers
 participating in the program.
- Interzum@home: This event is
 the world's leading tradeshow for
 furniture production and interior
 design. Held virtually in 2021, MRC
 participated in two panel discussions
 highlighting its research activities,
 one of which was dedicated to
 demonstrating the pocketed-coil
 recycling machine.

MRC continues to research additional events to reach the bedding industry, online retailers and companies that deliver or pick up used units.

E-Newsletters

In 2021, MRC continued to distribute MRC Highlights monthly and introduced a quarterly e-newsletter for retailers called Retailer Spotlight. During the year, MRC's total mailing list grew from 3,600 contacts to more than 5,700.

MRC Highlights is distributed to all registered retailers, renovators, manufacturers, collection site hosts, recyclers and other stakeholders. MRC uses this e-newsletter to share announcements and highlight state program

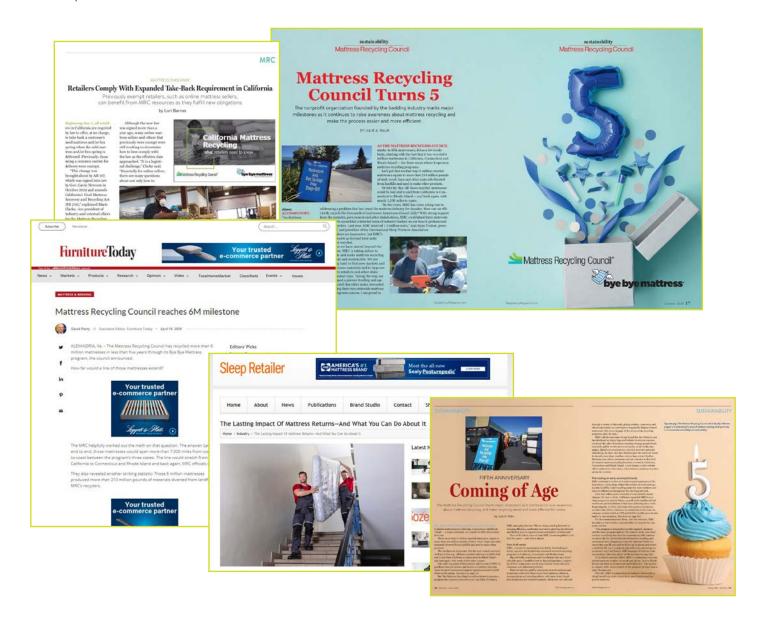

progress, new resources, our research accomplishments and our work to address illegal dumping. The open rate for this newsletter averaged 20%.

In April 2021, MRC launched Retailer Spotlight. All registered retailers receive this quarterly e-newsletter which provides tips for using MRCreporting.org, answers frequently asked questions about the state laws and obligations and reminds retailers how to work with MRC to recycle discarded mattresses and receive customer education materials. The open rate for this newsletter averaged 34%.

Media Relations

MRC keeps the furniture and bedding industries, as well as the solid waste and recycling sector aware of its latest accomplishments and program developments. During 2021, MRC garnered attention in trade media for the positive impact made in California during five years of operations, the implementation of the expanded take back requirement, our research activities and SP2.

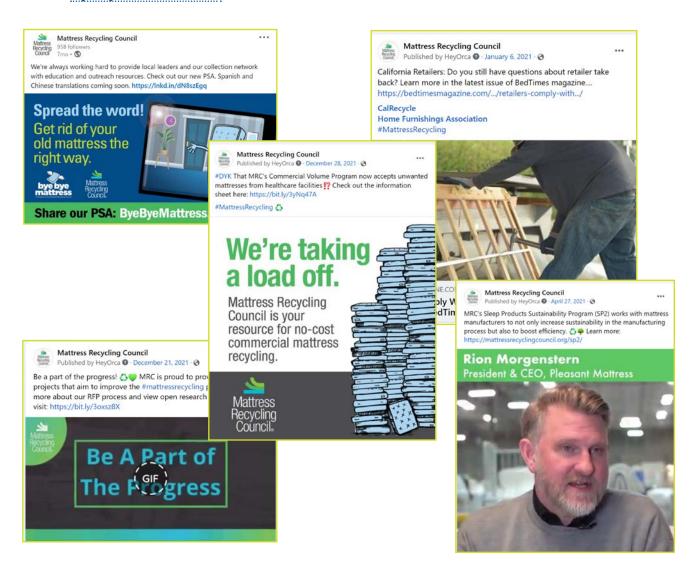

Social Media

MRC uses Twitter, Facebook, LinkedIn and YouTube. Across these social platforms, MRC has more than 2,000 followers, comprised of a mix of individuals, civic/environmental groups, retailers, local and state governments, waste haulers and recyclers. In 2021, MRC's Facebook, LinkedIn and Twitter content received more than 300,000 impressions.

In addition to sharing Bye Bye Mattress content, MRC uses its social media accounts to announce program developments, promote MRC's presence at industry events, share research announcements, distribute resources, generate interest in using the Commercial Volume Program, recruit SP2 participants and increase e-newsletter subscribers.

MRC will continue to use social media and will evaluate its effectiveness in generating brand awareness and driving traffic to MRCreporting.org, MattressRecyclingCouncil.org and ByeByeMattress.com.

Retailer Take Back Publicity

In 2021, MRC continued to inform consumer and industry audiences about retailer's legal obligations to take back discarded units when they deliver a new mattress. So that consumers know to ask about retailer take back during the mattress purchase or delivery process, we focused on raising consumers' awareness of the retailer's obligation. Similarly, we focused on informing retailers about their obligations, including changes to those obligations enacted by AB 187 in 2019 that became effective January 1, 2021.

Consumer

As noted in the Consumer Education section, MRC repeated the "Three Ways to Recycle" advertising campaign in its major target markets in spring 2021 and to select markets with high per capita rates of illegal dumping or that MRC identified as an environmental justice community in fall 2021. This campaign explained the three ways a consumer may recycle a mattress. The ad encouraged consumers to ask about retailer take back first (if their discard is timed with the delivery of a new mattress). If retailer take back is not possible, then consumers should consider finding a participating Bye Bye Mattress drop-off location or asking their local solid waste services provider about bulky item curbside collection options.

Throughout the year, Google search ads and social media posts continued to reinforce retailer take back messaging with consumers. MRC also provided various city councilmembers, mayors and boards of supervisors with Bye Bye Mattress information for use in social media, websites and newsletters. These materials were based on the "Three Ways to Recycle" campaign and therefore included retailer take back information. Retailer take back was also a key message point that MRC mentioned during media interviews, incorporated into letters to the editor and op-eds and discussed with residents during community events.

Lastly, the customer education materials provided to retailers also make the consumer aware of the retailer's obligation to offer take back the consumer's discarded unit during delivery of their purchased item. MRC encourages consumers to contact MRC if they believe a retailer is not following the law.

In 2022, MRC is piloting the use of geofenced advertising, a type of location-based advertising that targets smartphone users. This involves choosing a specific area, such as a perimeter around a retailer's storefront, and delivering ads to a consumer's smartphone that is in the designated area. After exiting the area, the consumer will continue to receive ads for the next 30 days as they use apps or browse the internet from their smartphone. As of this report, MRC is in the process of selecting the target area and plans to reuse elements of the "Retailer Take Back" campaign developed in a previous year, but updated to reflect the removal of the common carrier exemption.

Industry

In 2021, MRC continued to provide the mattress industry information regarding a retailer's obligation to offer to take back an old mattress during the delivery of a new one. As discussed in the <u>Surveys</u> section of this chapter, throughout the year, MRC contacted retailers via phone calls and email to measure their awareness of this obligation and determine if further support or information was needed.

MRC refers retailers to MattressRecyclingCouncil.org/retailer-take-back for information about the law, a list of third-party contractors and transporters that retailers can consider using to perform the take back service, and a recorded webinar of MRC staff presenting information about the law and providing answers to frequently asked questions. During the year, this page received over 7,000 views, ranking as one of the most visited pages on the website.

In 2022, as part of our annual retailer survey effort, MRC is gathering information from retailers on how they are making the customer aware of their option to have their old mattress taken back during delivery. The law and regulations do not prescribe how a retailer should inform their customer or make the offer, so MRC plans to use this information to understand the variety of solutions that retailers have developed and share this information with stakeholders or retailers seeking assistance.

Surveys

MRC tracks consumer awareness annually and conducts periodic research to understand and improve consumer outreach and education. We also gauge industry awareness and satisfaction on an ongoing basis by contacting all registered participants at least once each year. See Appendix E for complete survey results.

Consumer Behavior and Awareness

MRC surveyed consumers statewide in April 2021 at the conclusion of its spring advertising campaign. MRC contracted with KB Insights, a 30-year marketing consultant and experienced analyst, to create and implement the survey (N=1,016). This survey was constructed to obtain feedback from adult residents throughout California, matching the demographic breakdown reported in Census data (age, gender, ethnicity, income, etc.). All responses were collected online.

The survey measured consumer awareness of mattress recycling, retailer take back, how to dispose of a mattress so it can be recycled and the program's name (these are among our five Key Performance Indices or KPIs listed in table 40). We compared these results to the responses collected in December 2020 and found increases in all KPI categories. Those with a statistically significant change included knowing a mattress can be recycled (increased from 47% to 52%), awareness that mattress recycling is free (increased from 46% to 54%) and knowing how to dispose of a mattress so it can be recycled (increased from 55% to 60%).

MRC is encouraged by this improvement in awareness and knowledge, which has steadily increased over the last three years as shown in Table 40.

TABLE 40: MRC's Consumer Awareness Key Performance Indices 2019-2021

Key Performance Indicator	2019	2020	2021
Knowledge of retailer take back	33%	35%	37%
Knowledge that a mattress can be recycled	48%	47%	52%
Knowledge that recycling is free	43%	46%	54%
Knowledge of how to dispose of a mattress so it can be recycled	40%	55%	60%
Recall of Bye Bye Mattress program name	10%	18%	23%

Among the respondents that could recall Bye Bye Mattress by name (N=230), they reported learning about the program through the following sources (MRC asked respondents to select all that apply): friend or relative (54%), news (35%), local recycling center (33%), social media (31%), landlord or property manager (31%), mailed information (30%), mattress retailer (28%), city or local government (23%), online search (15%), Waze (13%). Each of these categories saw increases from the 2020 survey. The largest increase was in the friend or relative category (up from 33%). Other statistically significant increases included local recycling centers (up from 21%), mailed information (up from 20%), mattress retailers (up from 20%), city or local government (up from 15%) and Waze (up from 3%). MRC will continue to use these sources to build awareness of Bye Bye Mattress and continue to work with local leaders, city staff, mattress retailers, landlords and property managers to promote the program.

Additionally, 19% of the survey respondents recalled hearing or seeing an advertisement (N=192). Of these more than two-thirds recalled a television spot (67%) and more than half remembered a social media post (59%). Printed ads ranked third (33%), followed by other online ads (29%), in-store signage or materials (26%), outdoor/billboard (25%) and radio (24%). Compared to all of MRC's previous consumer surveys, this is the highest percentage of respondents that recalled an advertisement, so this gives us confidence that our messaging and content is resonating.

The survey also provides MRC the opportunity to monitor mattress purchasing and disposal behavior. In 2021, MRC saw more responses indicating an incentive payment as a motivator for recycling. "Receiving a small payment for each mattress you recycle" rose to 39% from 23% - ranking as the third most popular choice. "Convenience – it's easy to do" still topped the chart at 54% (up from 47%) and "Protecting the environment" remained second at 42%. Perceived barriers to recycling are unchanged from the previous survey – lack of knowledge, not having a vehicle and perceived cost. MRC's ad content and campaigns will continue to address the motivating factors and perceived barriers.

Responses also indicated mattress purchase and disposal behavior increasing. The percent of respondents that had bought in the past year, and those that had disposed in the past year each reflected levels more consistent with MRC's surveys conducted prior to COVID-19. Also, of those that are storing an unused mattress (N=277), a fifth of them are not intending to dispose of it until COVID-19 concerns have subsided.

MRC's survey strategy in 2022 will include a comprehensive, statewide behavioral/ awareness study to gauge success against the April 2021 survey. Smaller surveys may be conducted to monitor the effectiveness of campaigns targeted at the areas with high per capita illegal mattress dumping and the market where MRC will pilot its geotargeting tactic and its Spanish-language campaign.

Survey of Spanish-Speaking Households

MRC's statewide behavioral/awareness survey results continue to show that residents identifying as Hispanic/Latino are less aware of mattress recycling and the program. Although MRC has provided Spanish-language materials about the program to retailers, Spanish-language media have embraced MRC's public service announcements, Spanish-language media outlets have covered the program and community leaders and organizations in Spanish-speaking communities have worked with MRC to promote the program, MRC has decided to create a new public service announcement and develop a consumer outreach campaign specifically for Spanish-speaking households. As part of this process,

MRC surveyed Spanish speakers at least 21 years of age in the Central Valley, San Diego and San Jose, areas where MRC plans to pilot the Spanish-language outreach campaign. All responses were collected online.

Of the 330 residents contacted, 301 completed the survey. MRC collected the following demographic data: respondents' age, gender, household income and whether they rent, own or are in temporary housing. MRC also collected information about mattress buying, disposal and storage behaviors and information about the respondent's recycling intentions, motivators and obstacles. Another section of the survey gauged receptiveness to possible advertising themes, asking respondents to rank their favorite to least favorite concepts. The final section of the survey collected KPI data and information about media habits and news consumption.

As MRC analyzed the responses, it found two statistically significant differences between responses from the Spanish-speaking households and the general population in the statewide behavior and awareness survey. First, Spanish-speaking households are far more likely to give away a mattress to someone they know - 24% versus 7% statewide. Second, Spanish-speaking households are less aware of retailer take back than the general population – 28% were aware compared to 37% statewide.

The data collected about mattress buying, disposal and storage behaviors and recycling intentions revealed two distinctive target audiences that MRC needs to consider when designing the campaign: those displaying behaviors indicating a likelihood to illegally dump a mattress and those indicating a strong intention to recycle. Therefore, before finalizing a media plan, MRC should determine if the goal of the outreach is to reduce illegal dumping or maximize recycling from among those most likely to do so. The demographics MRC would need to target would differ based on the goal it wants to achieve.

The data collected about media habits and news consumption suggests MRC should prioritize social media and digital TV when reaching Spanish-speaking households. Also, most respondents reported they consume both Spanish- and English-language media, so MRC will consider complimenting the Spanish-language outreach with ads and information in English sources.

MRC plans to launch the Spanish-language outreach campaign in 2022 and is referring to these results as it designs the components of the outreach campaign and the media plan.

Retailer Relations

To strengthen our communications with retailers, MRC contacted every registered California retailer between December 2020 and September 2021. This process included a phone call and multiple emails, one of which included an online survey. MRC used the survey results to update retailer contact information, to determine whether retailers were satisfied with the resources and level of assistance MRC provided and to measure retailers' awareness of their obligations.

Of the 1,237 participants surveyed, 14% (175) responded. A majority of the respondents (66%) were satisfied or highly satisfied with the program. MRC also confirmed a high amount of awareness of obligations. 98% understood the take-back requirement and 97% understood the portal and the payment and reporting responsibilities. However, only 58% were aware of CalRecycle and what to expect if CalRecycle were to conduct an inspection. MRC sees this as an opportunity to improve industry awareness of CalRecycle and their role and improve retailers' understanding of CalRecycle's enforcement process.

MRC will repeat this process in 2022 and has refined the questionnaire to learn more about how retailers are informing their customers about the option to have the retailer take back their old mattress and how often retailers are using MRC-provided customer education materials.

Appendices

Appendix A: Registered Manufacturers, Renovators, Retailers, Distributors and Brands

14 CCR § 18964(b)(4)

Registered Manufacturers, December 31, 2021

"Manufacturer" means any of the following:

- (A) The person who manufactures a mattress and who sells, offers for sale, or distributes a mattress in the state.
- (B) If there is no person who is a manufacturer of a mattress for purposes of subparagraph (A), the manufacturer is the person who imports the mattress into the state for sale or distribution.

Legend: In the Address field, the following abbreviations are used: Ave is avenue, Blvd is boulevard, Dr is drive, E is east, Fl is Floor, Hwy is highway, L is lane, N is north, Pkwy is parkway, Pl is place, Rd is road, S is south, St is street, Ste is suite, W is west.

Retailers, December 31, 2021

"Retailer" means a person who sells mattresses in the state or offers to a consumer a mattress in the state through any means, including, but not limited to, by remote offering, including sales outlets or catalogs, electronically through the internet, by telephone, or through the mail.

"Sale" or "sell" means the transfer of title of a mattress for consideration, including by a manufacturer, a distributor, or a retailer for eventual consumption to a consumer in the state, including remote sales conducted through sales outlets, catalogs, or the internet or any other similar electronic means. For purposes of this chapter, a long-term lease of not less than 12 months is the same as a sale.

Appendix C: Program Operations Materials

CALIFORNIA MATTRESS RECYCLING STANDARDS

The Mattress Recycling Standards (Standards) define the minimum requirements to be an approved Recycler for the Mattress Recycling Council (MRC). Under these Standards, mattresses must be managed and processed in a manner that adequately safeguards the environment, industry employees and consumers. The Standard also includes data tracking and reporting requirements.

The MRC reserves the right at its discretion to review and revise these Standards.

For purposes of these Standards, the term "mattress" should be interpreted to include both mattresses and foundations (or box-springs).

Background

The MRC is a non-profit organization formed by the International Sleep Products Association (ISPA) to develop and implement mattress recycling programs in states with laws requiring recycling of discarded mattresses.

Recyclers must comply with these Standards, contract terms and conditions and all legislative and regulatory requirements. Recyclers must have transparent operations, clear and documented recycling procedures and accurate tracking of all mattresses and components (including non-recyclable waste). All Recyclers will be audited under these Standards.

Disclaimer

The MRC does not intend for these Standards to constitute or provide legal guidance of any kind. The Recycler must be aware of and abide by all local, state, or federal laws and regulations applicable to the management of post-consumer mattresses or the business operation of the Recycler. In the event that these Standards are inconsistent with any such laws or regulations, the laws or regulations take precedence, and the Recycler must inform the MRC of such inconsistency.

1. General Requirements

Each Recycler shall:

- 1.3. Possess a current and valid business license and meet all applicable local, state and federal requirements for providing the type of recycling services required by the MRC.
- 1.4. Possess valid state approved permits, plans, and approvals, as applicable.

- 1.5. Comply, and be in good-standing, with all applicable federal, state, and local regulations including but not limited to:
 - Department of Transportation (DOT) if providing any transportation services
 - Occupational Safety and Health Administration (OSHA) and applicable local and state health and safety regulations
 - Local and state fire department regulations, fire and building codes and other applicable building and occupancy safety requirements
- 1.6. Possess Commercial General Liability Insurance, including coverage for bodily injury, property damage, complete operations and contractual liability with combined single limits of not less than \$1 million per occurrence and \$2 million aggregate. Recycler's policy must be endorsed to name MRC, its directors, officers, employees, agents, assigns, as Additional Insureds. Recycler must carry its own Business Auto and Workers Compensation policies. Recycler shall require all third parties that it uses to provide any services under its contract with MRC to comply with the same insurance requirements specified in these Standards.
- 1.7. List the MRC as an additional insured party.
- 1.8. Possess and maintain in good standing workers compensation and unemployment insurance coverage through a state program or through private insurance policy or sufficient self-insurance coverage.
- 1.9. Maintain all records for a minimum of 4 years, including but not limited to shipping documents (both for goods received and shipped), processing, material disposal and sales records.
- 1.10. Develop and keep current a written plan that assures:
 - 1.8.1. proper closure of the Recycler's facility or site in the event of sale, closure, abandonment, bankruptcy, any form of dissolution of the Recycler, or for any other reason;
 - 1.8.2. against abandonment of any mattresses, mattress materials, or other products or materials processed by the Recycler in the event of closure; and
 - 1.8.3. proper remediation of any contamination to the Recycler's facility or site in accordance with all applicable local, state and federal laws and regulations.

As part of that plan, the Recycler must obtain a bond or other financial instrument sufficient to pay for the closure activities described in the plan in the event that the Recycler itself is financially unable to perform all or some of such activities. The Recycler shall make such plan and bond or other financial instrument available for inspection by the MRC upon request.

1.11. Maintain a process to provide written notice of closure to the MRC with a minimum of 90-days advance notice.

- 1.12. Maintain a process to provide written notice to the MRC of any incidents that required the assistance of first responders within 24 hours of the occurrence. Provide written notice of any corresponding regulatory orders, fines or other governmental or administrative actions taken within 48 hours of receiving such orders or fines.
- 1.13. Maintain a documented process to record and track accidents, injuries or violations and any corresponding corrective and/or preventive actions taken.
- 1.14. Maintain a documented process to identify and communicate physical, mechanical, biological or pathogenic hazards and severity of such hazard to employees, and any corresponding corrective and/or preventive actions taken.
- 1.15. Maintain a documented process to identify and communicate potential fire hazards and severity of such hazards to employees, and any corresponding corrective and/ or preventive actions taken.

2. Material Processing

Each Recycler shall implement and maintain a documented plan for deconstructing mattresses, which shall at a minimum require the Recycler to:

- 2.1. Fully disassemble the mattresses.
- 2.2. Recycle at least 75% by weight of the mattresses it processes by selling such material in appropriate markets for use in making new materials or products.
- 2.3. Minimize the quantity of material disposed of through landfills, incineration, or other non-recycling avenues.
- 2.4. Maintain a written policy describing how each mattress type and material (including pocket coils) will be processed.
- 2.5. Process all mattresses within 30 days of receipt at facility.
- 2.6. List criteria applied in determining when a given mattress cannot be processed.

3. Material Tracking

Each Recycler shall implement and maintain a documented plan to track and control mattresses entering their processing facilities and the flow of recyclable and non-recyclable materials generated through mattress deconstruction. The plan shall at minimum require the following:

- 3.1. Weigh all in-bound mattresses.
- 3.2. Maintain in-house or use third party annually calibrated and certified scale to weigh all in-bound and outbound materials on-site or document all out-bound shipments using third party calibrated and certified scales.
- 3.3. Maintain daily records of all receipts of used mattresses, mattress processing, sales or other dispositions of recycled or non-recyclable materials, and inventories.

- 3.4. Provide the MRC records for all parties providing discarded mattresses to Recycler in exchange for a collector incentive, including quantities received from and incentives paid to each party, and link such information to the inventory records required in 3.3.
- 3.5. Provide the MRC a list of all purchasers of recycled materials, and notify the MRC of any changes to that list at least 10 business days in advance (the MRC will treat this information as confidential). Recycler must obtain written approval from MRC for new facilities.
- 3.6. Train employees on how to prepare and maintain all necessary records and other documentation related to the receipt, processing, inventory and disposition of mattress and mattress materials.
- 3.7. Provide certificates of recycling for all material received and processed.

4. Downstream Due Diligence

Each Recycler shall have processes in place to identify, audit and approve all purchasers of recycled materials. The processes shall at a minimum require:

4.1. Annual desk audits to verify each purchaser's compliance with all applicable local, state and federal environmental and other requirements, and review of each purchaser's operating permits, environmental compliance permits, business licenses, insurance and certifications.

5. Bed Bug Management

Each Recycler shall implement and maintain a documented plan to identify and mitigate bed bug infestation in the facility and among employees. Components of the plan shall, at minimum, address the following provisions:

- 5.1. Document that all employees attended bed-bug identification and mitigation training.
- 5.2. Post bed bug identification posters in prominent work place location to encourage proactive identification and isolation of contaminated mattresses.
- 5.3. Clearly identify how infested mattresses will be isolated and either decontaminated or disposed.
- 5.4. Track the number and if possible, source of contaminated units.

About the Guidelines

Staff at all participating collection sites must be knowledgeable regarding these guidelines before accepting mattresses. For simplicity, these guidelines will refer to mattresses and box springs as mattresses. These guidelines describe the program and what is required to participate. MRC reserves the right to update, change, modify, amend, add or remove terms or otherwise alter these guidelines at any time with or without prior notice.

About the Mattress Recycling Council

In 2013, California enacted Senate Bill 254 as amended which requires mattress manufacturers to create a recycling program for mattresses discarded in the state. The bedding industry established the Mattress Recycling Council (MRC) to develop and operate the mattress recycling program known as Bye Bye Mattress.

What MRC Provides

MRC provides the following to participating collection sites:

- A collection container to store mattresses that is appropriate for the number of mattresses that the collection site expects to generate and the site's available space
- Transportation from the collection site to a contracted recycler
- No-cost mattress recycling services

INCLUDED PRODUCTS

Mattresses: Defined as any sleep surface covered with ticking or fabric that contains resilient material such as steel innersprings, foam, fiber or other filling or upholstery materials, used alone or in combination, regardless of size or shape. This definition includes foam mattresses.

Futons: See mattress definition above. Futon mattresses must be detachable from the frame or base to be accepted. (Futon mattresses that do not detach from the frame or base are not included.)

Box springs (also commonly called foundations): A ticking or fabric-covered structure used to support a mattress or sleep surface and may be comprised of a frame, foam, springs or other structure, or other materials, used alone or in combination, regardless of whether the product is stationary or adjustable.

All items accepted for recycling by MRC must have been used and discarded in the state of California.

A participating collection site may not charge for mattresses that are dropped off by individuals at its site and recycled through the program.

EXCLUDED PRODUCTS

- Adjustable bases not covered in ticking or fabric
- Air mattresses that contain no upholstery material (such as camping beds)
- Car beds
- Collapsible roll-away beds
- Fold-out sofa beds
- Futon frames or bases
- Juvenile products including, carriages, baskets, dressing tables, strollers, playpens, infant carriers, lounge pad, crib bumpers
- Loose bedding, blankets or sheets
- Mattresses infested with bed bugs or other living organisms
- Mattress pads and toppers
- Metal bed frames
- Out-of-state mattresses
- Pillows and cushions
- Severely damaged, twisted, wet, frozen or soiled mattresses
- Sleeping bags
- Water beds

MATTRESS INSPECTION AND EXAMINATION

Collection site staff should screen incoming mattresses to determine whether they are suitable for recycling and should remove mattresses that are:

- Excessively wet or frozen
- Severely twisted, punctured or crushed
- Infested with bed bugs or other living organisms
- Exceptionally soiled or moldy

Mattresses not suitable for recycling should be disposed of through your existing solid waste stream.

Bed Bug Identification

Mattresses and box springs infested with bed bugs are unacceptable for recycling and should be disposed of through your existing solid waste stream. Staff at collection sites should evaluate program materials for evidence of bed bug infestation. A bed bug training webinar is available on the Mattress Recycling Council's website. The webinar focuses on dispelling health-related myths, bed bug identification and best practices for protecting facility staff. It can be found at mattressrecyclingcouncil.org/resources.

Bed bugs are tan to brown in color, but may appear redder if they have fed.

Adult Bed Bugs are dorsally flat insects, broadly oval and the size of an apple or melon seed (one-quarter of an inch).

Nymphs look like adults in shape but are smaller.

Eggs are white and barrel-shaped.

Signs of bed bug activity may be more obvious than the insects themselves. Look for clusters of dark spots or smudges on mattresses (fecal spots), especially along seams. Eggs, shed skins and all life stages of bed bugs may also be present in these 'soiled' areas.

For more information on bed bugs, please refer to the resources made possible by the Connecticut Coalition Against Bed Bugs.

MATERIALS COLLECTION & HANDLING

Each collection site will have unique operational considerations. Participating sites must make their own decisions about how to best manage their operations in the safest manner possible in accordance with applicable laws. At a minimum, each participating site must meet these requirements:

MINIMUM PROGRAM REQUIREMENTS

SITE

Each collection site must be secure with adequate space and staffing to handle and store acceptable mattresses.

PERMITS

Each collection site must have knowledge of and comply with all applicable federal, state and local laws. These may include, but are not limited to, zoning requirements, state permit requirements and OSHA or other workplace requirements. Please contact your Local Enforcement Agency (LEA) to confirm whether your site is in compliance with all applicable notifications or requirements for accepting mattresses for recycling at your site. In many cases, this will be your county or local Public Health Department.

INSURANCE

Each collection site must maintain general liability insurance of at least \$1,000,000 per occurrence.

TRAINING

Staff at each collection site must be trained and knowledgeable regarding these guidelines before accepting mattresses for recycling.

STORING & LOADING MATTRESSES

Collection sites must keep mattresses dry by storing in weatherproof containers or under cover to maximize their recyclability. In addition, all collection sites must:

See page 7 for photos and guidelines

- Make every effort to place mattresses in MRC-designated storage containers immediately upon acceptance
- Keep mattresses intact and not intentionally crush or puncture them
- Efficiently stack mattresses to maximize the number of units loaded in each storage container
- Provide oversight to keep unacceptable items out of MRCdesignated storage containers
- Remove any non-program materials from MRC-designated storage containers before transport to MRC recyclers
- Practice good housekeeping standards and keep storage containers and program materials in a neat and orderly condition

SITE ACCESS

Collection sites must allow MRC access to confirm compliance with these guidelines.

MATERIALS COLLECTION & HANDLING

LOADING MATTRESSES IN STORAGE CONTAINERS

Expected number of mattresses that should fit in various container sizes:

Container Type	Number of Mattresses
20-foot sea container	30 to 45
28-foot trailer	60 to 95
40-foot sea container	75 to 95
40-yard roll-off container	35 to 50
48-foot trailer	110 to 180
53-foot trailer	125 to 190

Mattresses and box springs must be packed as efficiently as possible to maximize the number of units in each container.

TRANSPORTATION & PROCESSING

TRANSPORTERS

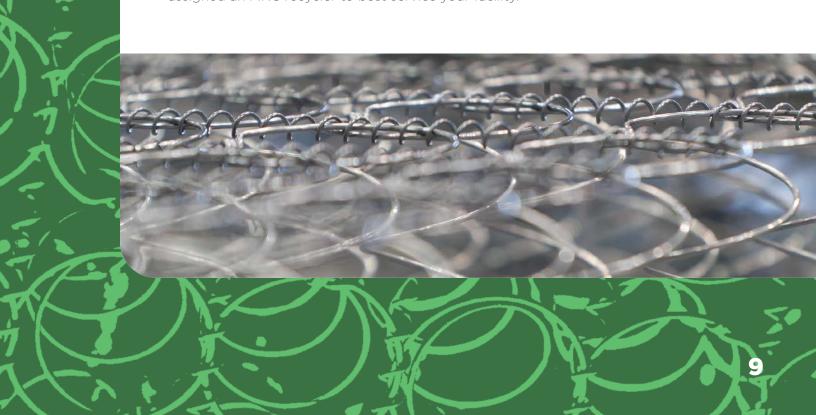

MRC will assign each collection site a transporter to provide a storage container and transport services.

- MRC-contracted transporters will provide participating locations with evidence of automobile insurance coverage of at least \$1,000,000 per occurrence
- Each collection site must notify transporter at least two business days before a storage container is full of mattresses
- The assigned transporter will pick up full containers and drop off an empty container at the same time
- On the scheduled pick up day, the collection site must make the collection container readily accessible to the transporter
- At the time of pick-up, collection site staff must be present to sign a three-part Bill of Lading (BOL) supplied by the transporter that details the quantity of mattresses in the container and must provide appropriate copies of the BOL to the transporter

A collection site may choose to provide its own storage containers and transportation at its own cost. These locations must contact the recycler directly to arrange for a convenient drop-off time.

RECYCLERS

Recyclers under contract with MRC will meet established recycling standards and accurately account for all mattresses received, the mattress components recycled (e.g., foam, steel, wood, fiber, etc.) and any residual disposal. Collection sites will be assigned an MRC recycler to best service your facility.

RECORDKEEPING

Bill of Lading:

A Bill of Lading (BOL) will be provided by the transporter. Before a full container leaves the site, the BOL must be completed and signed by facility staff.

PROGRAM WITHDRAWAL & TERMINATION

A collection site's participation in the Bye Bye Mattress program in California is voluntary. Either party may withdraw from participation in accordance with the terms in your contract. Written notice to the other party is required. MRC reserves the right to remove any collection site not in compliance with these guidelines from further participation in the program.

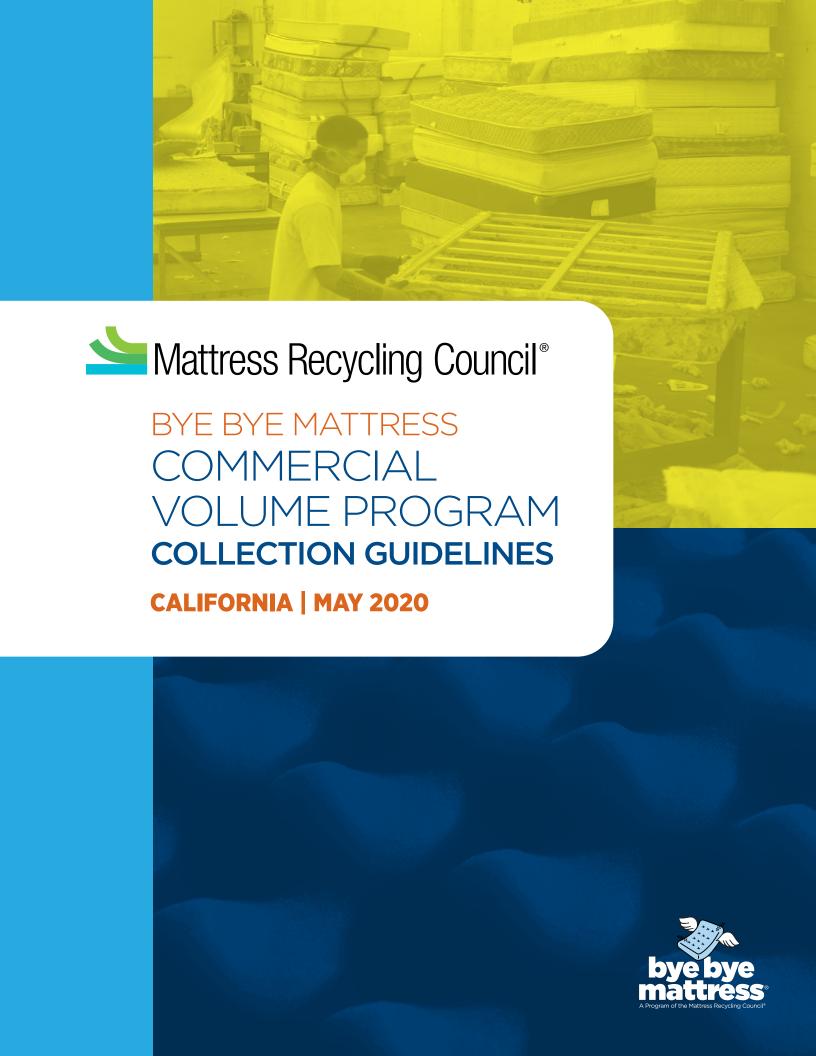

TABLE OF CONTENTS

About the Program (original report p. 3)

Program Withdrawal & Termination (original report p. 13)

These guidelines describe the program and what your facility (collection site) needs to do to participate. For simplicity, these guidelines will refer to mattresses and box springs as mattresses. MRC reserves the right to update, change, modify,amend, add or remove terms or otherwise alter these guidelines at any time with or without prior notice.

ABOUT THE PROGRAM

Mattress Recycling Council

The Mattress Recycling Council (MRC) is a nonprofit organization formed by the bedding industry to operate the Bye Bye Mattress recycling program in states that have enacted mattress recycling laws – California, Connecticut and Rhode Island.

In each of these states households and businesses now have no-cost options to recycle mattresses. Businesses may recycle through the Commercial Volume Program by dropping off units directly at a participating location or eligible entities can arrange transportation with MRC. Households may directly recycle through a local collection site or event or indirectly through a residential bulky item curbside collection program or retailer that takes back old units when delivering new ones.

Bye Bye Mattress is made possible when consumers purchase a mattress or box spring. Fees vary by state and each state fee funds that state's program. The fee is primarily used to establish collection sites and events, transport mattresses from those locations to recyclers and cover the cost to disassemble the mattresses. Portions of the fee are also used for combatting illegal dumping, researching improvements to the recycling process and identifying new uses for materials, as well as conducting public education and outreach.

Commercial Volume Program

MRC provides California businesses and organizations the following opportunities to recycle mattresses at no-cost.

- Any business or organization may drop off any number of units at a participating recycler. Contact the desired location to make arrangements. View the current listing.
- Any business or organization may drop off units at a site that is accepting commercial volume at no-cost. Unit limits may apply or an appointment may be required. View the current listing.
- Eligible entities (ie: retailers, hotels, and educational institutions) with at least 100 units to recycle can request transportation services. 14 days advance notice required. Contact MRC for details.

Contact:

Joy Broussard, 707-307-3052 jbroussard@mattressrecyclingcouncil.org

PICKUP ELIGIBILITY AND PARTICIPATION REQUIREMENTS

MRC provides no-cost transportation and recycling of mattresses to eligible entities (ie: retailers, hotels, and educational institutions) with at least 100 units to discard. All units must have been used and discarded in California and MRC requires 14 days notice to secure transportation.

Eligibility

RETAILERS

- Must be registered with MRC, remitting the recycling fees and compliant with all provisions of California's Used Mattress Recovery and Recycling Act.
- Must have accumulated a minimum of 100 units. Partnering with other local businesses, organizations or allowing public drop-off to reach the minimum is permitted.
- Those collecting at least 100 units monthly may request a permanent trailer.

HOTELS

• Must have accumulated a minimum of 100 units. Partnering with other local businesses, organizations or allowing public drop-off to reach the minimum is permitted.

EDUCATIONAL INSTITUTIONS

 Must have accumulated a minimum of 100 units. Partnering with other local businesses, organizations or allowing public drop-off to reach the minimum is permitted.

Participation

To receive MRC's assistance with transporting and recycling mattresses, the eligible entity must:

- Complete a registration form and return it no later than 14 days in advance of the desired pickup date.
- Agree to follow these guidelines.
- Provide a collection area that is capable of allowing access to a 53-foot trailer.
- Provide a minimum of two staff members to assist with loading units into the provided trailer.

INCLUDED PRODUCTS

Mattresses: Defined as any sleep surface covered with ticking or fabric that contains resilient material such as steel innersprings, foam, fiber or other filling or upholstery materials, used alone or in combination, regardless of size or shape. This definition includes foam mattresses.

Futons: See mattress definition above. Futon mattresses must be detachable from the frame or base to be accepted. (Futon mattresses that do not detach from the frame or base are not included.)

Box springs (also commonly called foundations): A ticking or fabric-covered structure used to support a mattress or sleep surface and may be comprised of a frame, foam, springs or other structure, or other materials, used alone or in combination, regardless of whether the product is stationary or adjustable.

All items accepted for recycling by MRC must have been used and discarded in the state of California.

A participating collection site may not charge for mattresses that are dropped off by individuals at its site and recycled through the program.

EXCLUDED PRODUCTS

- Adjustable bases not covered in ticking or fabric
- Air mattresses that contain no upholstery material (such as camping beds)
- Car beds
- Collapsible roll-away beds
- Fold-out sofa beds
- Futon frames or bases
- Juvenile products including, carriages, baskets, dressing tables, strollers, playpens, infant carriers, lounge pad, crib bumpers
- Loose bedding, blankets or sheets
- Mattresses infested with bed bugs or other living organisms
- Mattress pads and toppers
- Metal bed frames
- Out-of-state mattresses
- Pillows and cushions
- Severely damaged, twisted, wet,frozen or soiled mattresses
- Sleeping bags
- Water beds

MATTRESS INSPECTION AND EXAMINATION

Facility staff should screen incoming mattresses to determine whether they are suitable for recycling and should remove mattresses that are:

- Excessively wet or frozen
- Severely twisted, punctured or crushed
- Infested with bed bugs or other living organisms
- Exceptionally soiled or moldy

Mattresses not suitable for recycling should be disposed of through your existing solid waste stream.

Bed Bug Identification

Mattresses and box springs infested with bed bugs are unacceptable for recycling and should be disposed of through your existing solid waste stream. Facility staff should evaluate program materials for evidence of bed bug infestation. A bed bug training webinar is available on the Mattress Recycling Council's website. The webinar focuses on dispelling health-related myths, bed bug identification and best practices for protecting facility staff. It can be found at mattressrecyclingcouncil.org/resources.

Bed bugs are tan to brown in color, but may appear redder if they have fed.

Adult Bed Bugs are dorsally flat insects, broadly oval and the size of an apple or melon seed (1/4").

Nymphs look like adults in shape but are smaller.

Eggs are white and barrel-shaped.

Signs of bed bug activity may be more obvious than the insects themselves. Look for clusters of dark spots or smudges on mattresses (fecal spots), especially along seams. Eggs, shed skins and all life stages of bed bugs may also be present in these 'soiled' areas.

For more information on bed bugs, please refer to the resources made possible by the Connecticut Coalition Against Bed Bugs.

QUALITY STANDARDS

Acceptable Quality _____

IMPORTANT: Only units used and discarded in California are accepted by the program.

Shown here are examples of acceptable units.

Unacceptable Quality

Shown here are examples to illustrate severe damage, heavy soiling and infestation.

Other Conditions:

- Out-of-state mattresses
- Severely damaged or soiled mattresses
- Mattress that have been stripped of padding components.
- Pillows and cushions
- Fold-out sofa beds and futon frames or bases
- Loose mattress pads, toppers
- Loose bedding, blankets, or sheets
- Water beds
- Fire damaged units

MATERIALS COLLECTION & HANDLING

Each facility's collection site will have unique operational considerations. Participating facilities must make their own decisions about how to best manage their operations in the safest manner possible in accordance with applicable laws. At a minimum, each facility's collection site must meet these requirements:

MINIMUM PROGRAM REQUIREMENTS

SITE

Each collection site must be secure with adequate space and staffing to handle and store acceptable mattresses.

PERMITS

Each collection site must have knowledge of and comply with all applicable federal, state and local laws. These may include, but are not limited to, zoning requirements, state permit requirements and OSHA or other workplace requirements. Please contact your Local Enforcement Agency (LEA) to confirm whether your site is in compliance with all applicable notifications or requirements for accepting mattresses for recycling at your site. In many cases, this will be your county or local Public Health Department.

INSURANCE

Each collection site must maintain general liability insurance of at least \$1,000,000 per occurrence.

TRAINING

Staff at each collection site must be trained and knowledgeable regarding these guidelines before accepting mattresses for recycling.

STORING & LOADING MATTRESSES Collection sites must keep mattresses dry by storing in weatherproof containers or under cover to maximize their recyclability. In addition, all collection sites must:

See page 10 for photos and guidelines

- Make every effort to place mattresses in MRC-designated storage containers immediately upon acceptance
- Keep mattresses intact and not intentionally crush or puncture them
- Efficiently stack mattresses to maximize the number of units loaded in each storage container
- Provide oversight to keep unacceptable items out of MRCdesignated storage containers
- Remove any non-program materials from MRC-designated storage containers before transport to MRC recyclers
- Practice good housekeeping standards and keep storage containers and program materials in a neat and orderly condition

SITE ACCESS

Collection sites must allow MRC access to confirm compliance with these guidelines.

LOADING INFORMATION

LOADING MATTRESSES IN STORAGE CONTAINERS

Expected number of mattresses that should fit in various container sizes:

Container Type	Number of Mattresses	
20-foot sea container	30 to 45	
28-foot trailer	60 to 95	
40-foot sea container	75 to 95	
40-yard roll-off container	35 to 50	
48-foot trailer	110 to 180	
53-foot trailer	125 to 190	

Acceptable Loading

- 1. Begin each stack with a queen or full size box spring.

 This acts as a base pallet to create a secure stack and makes unloading of mattresses quick and efficient.
- **2. Mattresses should be stacked horizontally** to the top of the trailer to maximize space.
- **3.** In small quantities, king size mattresses can be placed vertically next to a stack of horizontal mattresses.
- 4. If there are more than 10 king size units, stack horizontally.

Unacceptable Loading

IMPORTANT: Do not load units vertically or in an unsafe manner.

Please contact your Program Coordinator to learn more about acceptable/non-acceptable units as safe stacking and efficient loading techniques.

TRANSPORTATION & PROCESSING

TRANSPORTERS

MRC will assign each collection site a transporter to provide a storage container and transport services.

- MRC-contracted transporters will provide participating facilities with evidence of automobile insurance coverage of at least \$1,000,000 per occurrence.
- Each facility should notify transporter at least two business days before a storage container is full of mattresses if a permanent container is on site.
- The assigned transporter will pick up full containers within two business days of notification and drop off an empty container at the same time.
- On the scheduled pick up day, the facility must make the collection container readily accessible to the transporter.
- At the time of pick-up, facility staff must be present to sign a three-part Bill of Lading (BOL) supplied by the transporter that details the quantity of mattresses in the container and must provide appropriate copies of the BOL to the transporter.

A facility may choose to provide its own storage containers and transportation at its own cost. View a current list of locations that accept commercial volume.

RECYCLERS

Recyclers under contract with MRC will meet established recycling standards and accurately account for all mattresses received, the mattress components recycled (e.g., foam, steel, wood, fiber, etc.) and any residual disposal. MRC will assign a recycler to best service your facility.

RECORDKEEPING

Bill of Lading:

A Bill of Lading (BOL) will be provided by the transporter. Before a full container leaves the site, the BOL must be completed and signed by facility staff.

PROGRAM WITHDRAWAL & TERMINATION

A facility's participation in the Bye Bye Mattress Commercial Volume Program is voluntary. Either party may withdraw from participation with 10 days written notice to the other party. MRC reserves the right to remove any facility not in compliance with these guidelines from further participation in the program.

Appendix D: GIS Methodology

Customer Analytics: MRC Convenience Analysis — Spring 2022 Technical Details

Summary

The Mattress Recycling Council (MRC) requested that Customer Analytics determine how many and what percent of California consumers have convenient access to the 2021 Collection Network. Customer Analytics performed a combination of standard and spatial analyses to determine convenience rates by geographic and consumer attributes.

MRC also requested a related analysis on the convenience for retailers to recycle used mattress, which shares many similarities to the consumer analysis. Customer Analytics used inputs from the consumer work to calculate a metric for retailers using consumer convenience to sites that accept units from retailers as a proxy for actual retailer convenience.

Details

To perform the analysis, MRC and Customer Analytics defined:

- · Level of geographic detail the data can support;
- What population data would be analyzed: Total, In Environmental Justice Communities, Rural;
- Eligible collection network entities and
- Convenience

Geography

The working geography for this analysis was set at the 2010 Census Block Group level. While Census 2020 data were used in this analysis, the working geographies for the CES, Zip Code Tabulation Areas (from the Census), and internal allocation files were based on 2010 geographies, requiring Customer Analytics to use 2010 Census Block Group definitions. The 2010 and 2020 Census Block Groups overlap for 98.3% of the population, where only 1.7% of the population from the 2020 Census Block Groups spill over into two or more 2010 Block Groups. Apart from blocks, this is the smallest level of geographic detail for which data from government sources are available. This is also the smallest unit of geography which information on dwelling type is available, a necessary component to the analysis of certain types of collection programs.

The state of California has just over 23,000 Census Block groups, which have an average population of 1,600 people. Census Block Groups are subdivisions of Census Tracts, which are subdivisions of Counties. In other words, Block Groups roll up to Tracts which roll up to Counties. Each Census Block Group has a unique, 12-character ID. The first 11 digits of that ID are the Census Tract the Block Group falls inside.

The first 5 characters of the ID are the County. This allows us to transfer attributes of Counties or Tracts on to Census Block Groups directly.

Population

Customer Analytics obtained small area population data from the U.S. Census Bureau's American Community Survey (ACS). Customer Analytics downloaded block group and census tract level data for BR25033: Total Population in Occupied Housing Units by Tenure by Units in Structure from the 2019 to 2020 5-year ACS via the Census Bureau's FTP site. These data were summarized into the population living in single-family dwellings and multifamily dwellings. The population living in households with less than 5 units is considered single-family, 5 or more units is multifamily. This was required to support bulky item collection programs that only service single-family dwellings described later

Environmental Justice

One of the populations that MRC asked Customer Analytics to analyze separately is the population in Environmental Justice Communities ("EJ"). Customer Analytics used California's EnviroScreen 4.0 (October 2021 release) data to determine how many people in a Census Block Group are in EJ Communities. EJ Communities are those Census Tracts CalEnviroScreen defines as Disadvantaged Communities. Disadvantaged Communities are "the top 25% scoring areas from CalEnviroScreen along with other areas with high amounts of pollution and low populations." Once applied, an estimate for the population in EJ Communities for both single and multifamily populations were created.

The table below displays the total population and population by EJ Community status.

TABLE 1: California Population by EJ Community Status (2020 Census Counts and 2021 Enviroscreen Score)

Population	Number
Total Population	39.5 Million
Population in EJ Communities	9.8 Million
Population in Non-EJ Communities	29.8 Million

Estimates based on 2020 Census Block Populations Allocated to 2010 Tracts; Environmental Justice Communities from 2021 Enviroscreen.

Rural

Part of the requested convenience analysis is to analyze convenience for the rural population of California. MRC requested that Customer Analytics define a rural county to be consistent with Cal. Pub. Res. Code § 40184, which in general defines a rural county as one that disposes of less than 200,000 tons of waste. See the Rural County. List located in this appendix for the list of counties considered rural for the purposes of this analysis. The county's status as being Urban or Rural is then applied to the Census Block Groups within it, allowing various reports to be summarized by this status.

Retailers

Retailer convenience is determined by the same process used to measure consumer convenience, using consumer convenience as a proxy for retailer convenience.

There are two changes applicable only to the retailer convenience analysis:

- Only those collection network facilities that accept units from commercial entities are included.
- The population in rural areas are considered to have convenient access if the distance to a site is less than 40 miles, while in urban areas it must be within 20 miles.

Collection Network Entities

MRC provided Customer Analytics data describing the collection network in California. This network is composed of permanent collection sites to which consumers transport mattresses as well as bulky item programs where the mattress is picked up directly from the consumer's home.

The sites include permanent collection sites, recyclers and events. In all cases, the sites were marked as servicing consumers, commercial customers, or both. For residential convenience analysis, only those collection sites that service consumers or both consumers and commercial customers are considered.

The bulky item programs are classified in two different ways. The first type are those programs that participate with MRC's recycling program. The other type are other bulky item pick-up programs MRC is aware of that operate outside of MRC's program. For the standard convenience analysis, Customer Analytics included only those that participate with MRC's recycling program.

In addition to segmenting between "participating" or "not participating" programs, bulky item programs are also classified by the consumers they service. All bulky item programs service single-family dwellings, but some do not service multifamily dwellings. Both types are included in the convenience analysis, but the multifamily population is excluded if the area is only serviced by a bulky item program that exclusively services single family dwellings and is not covered by a collection site.

Exclusively for the retailer convenience analysis, MRC provided Commercial Volume Program (CVP) consolidation locations to Customer Analytics. These are fixed locations that are used to centralize collection for numerous retail chains in the State of California. Any retailer convenience analysis included these sites in addition to the permanent sites and recyclers that service commercial customers.

Collection Network Spatial Coverage

The various types of collection network entities require different approaches to determine the areas that they service.

Sites and Events

MRC requested that Customer Analytics consider a collection sites and events as servicing a consumer if the consumer is within a 15-mile straight line distance of the site. As individual consumer to site data are not available, Customer Analytics used the proximity of the Census Block Group to determine if the population within a Block Group is considered serviced or not using the population centroid of each Block Group. Customer Analytics uses the Haversine distance formula when calculating the distance between two points.

The population centroid is superior to the geographic centroid as it is more representative of the population living in that Block Group. This is particularly important in Block Groups with uninhabitable area such as bodies of water, forests and deserts.

For a limited number of Collection Sites, residency requirements limit who is eligible to recycle a mattress to residents of a city or one or more counties. A consumer must reside in those eligible geographies and meet the distance criteria to be considered to have convenient access.

Bulky Item

The bulky item programs service a consumer if they live within the area serviced by the bulky item collection program. Each bulky item program's service area is defined by ZIP code, municipal boundary, unincorporated areas within a county or a description of their service area. Customer Analytics coded each Census Block Group in California as being in or outside of the service area of one or more bulky item programs. Census Block Groups were identified using a ZIP Code to Census Block Group crosswalk developed by Customer Analytics. Through spatial joins in ArcMap, Customer Analytics identified Census Block Groups as being in a place or in the unincorporated areas of a county, when applicable, mapped to bulky item programs covering those areas. Customer Analytics converted description-based service areas to boundary files, which were used to spatially select the Census Block Groups that fall within the area.

Customer Analytics: MRC Illegal Mattress Dumping Analysis — Spring 2022 Technical Details

Summary

MRC requested that Customer Analytics use multivariate statistical analyses to determine the following from the 2021 illegal dumping data:

- How preventative measures/opportunities for no-cost management of discarded mattresses affect illegal dumping.
- How demographic/socio-economic characteristics affect illegal dumping within a ZIP code

The data suggest that communities near select collection sites (i.e. Retailers; Non-Profit, SWF, and "Other" within 15 miles and Renovators within its host zip code) and recyclers are associated with less dumping. Communities with bulky item programs are associated with less dumping. For 2021, collection events had an ambiguous statistical relationship with dumping; significant under select models while non-significant in most models. While we were unable to statistically determine a relationship between dumping and collection events, it is possible that events do have an impact on dumping but that the 2021 data are not able to pick up this relationship.

ZIP codes with high concentrations of poverty, renters and multifamily dwelling types (e.g., apartment complexes) are associated with higher dumping rates. Zip codes with higher concentrations of elderly persons are associated with less dumping. We should be careful to note that it is possible that persons outside of these areas may have dumped mattress into these areas.

Data Source Details

Illegal Dumping

MRC provided data from the Illegally Dumped Mattress Collection Initiative (IDMCI) describing illegally dumped mattresses collected in 2021.

As the finest geography available with mattress dumping was the ZIP code, Customer Analytics narrowed the data compiled to perform this analysis down to the ZIP code level (by month). Data provided by differing types of boundaries (i.e., "places" and "tracts") were allocated to ZIP codes based on overlapping shares of populations within these boundaries.

Demographic and Socio-Economic Characteristics

Customer Analytics used CalEnviroScreen ("CES") 4.0 (October 2021) data as the source of Environmental Justice ("EJ") Communities. Pollution, Poverty, Total Population and % Elderly (Aged 65+) figures. CES's Pollution Burden Score was derived from their collection of numerous pollution exposure scores (such as ozone, pesticides, hazardous waste, etc.). CES defines poverty as anyone living in a household with a household income that is up to two times the federal poverty level. CES's poverty data are sourced from the 2015 to 2019 ACS. Customer Analytics drew Total Population as well as % Elderly from CES's spreadsheet, which also draws from the 2015 to 2019 ACS. As these data are provided at the tract level, Customer Analytics produced a weighted average of these scores by the ZIP code where each tract's contribution to the average is weighted by the population within the tract.

Customer Analytics derived additional demographic characteristics, namely percentage of renting households or percentage of households in multifamily units, from its internal estimates, which are derived from 2015 to 2019 ACS data.

See the <u>Rural County List</u> included in this appendix for the list of counties that are considered rural for the purposes of this analysis. The county's status as being Urban or Rural is then applied to ZIP codes within the county.

Collection Network Entities

MRC provided Customer Analytics data describing the collection network in California. This network is composed of collection sites (permanent collection sites, recyclers, and events) to which consumers transport mattresses as well as bulky item programs where the mattress is picked up directly from the consumer's home.

Model Details

Customer Analytics used an Ordinary Least Squares ("OLS") model to determine which factors were related to higher per capita dumping. To preserve reasonable distributions, we performed a natural log of dumps per capita as the dependent variable for the main analyses but also included a non-logged set of regressions for relationships that are linear (i.e. Bulky Item). The Pollution Burden Score, % EJ, Poverty Score, % Elderly, % Renter, Rural ZIP Code (yes/no) and % Multifamily Units are included as independent variables that capture some of the ZIP code's defining environmental and demographic characteristics. Customer Analytics also included the presence of events, collection sites, recyclers and bulky item programs accessible to a given ZIP code as independent dummy (yes/no) variables to determine which of these programs affect dumping behavior. Month variables were included to account for seasonality. Finally, a factor

¹ "Environmental Justice" Communities, referred to as Disadvantaged Communities in the CES data

² See the OEHH Pollution Indicators page as well as the CalEnviroScreen 4.0 Report.

variable grouping the number of months for which a ZIP code reported dumps {1, 2 through 8, 9 through 11, 12} was included to take into consideration differential reporting rates by the level of cooperation of the ZIP code. Customer Analytics ran separate nested models to group different combinations of independent variables to determine overall dynamics (e.g. "Any Event/Entity") vs. individualized dynamics (e.g. parsing Events, Collection Site Type, Recycler, Bulky Item, etc.) separate nested models to group different combinations of independent variables to determine overall dynamics (e.g. "Any Event/Entity") vs. individualized dynamics (e.g. parsing Events, Collection Site Type, Recycler, Bulky Item, etc.).

Customer Questions about the Mattress Recycling Fee

This list of frequently asked questions (FAQs) is here to help. Please share with your staff.

1. Why do I have to pay the recycling fee and what is it for?

State law requires retailers to collect a recycling fee on each mattress and box spring that is sold. The fee funds the state's mattress recycling program and provides for collection, transportation and recycling of old mattresses and box springs. The amount of the fee is the same statewide and is not controlled by individual retailers. More than 75 percent of a mattress can be recycled into new consumer and industrial products. The recycling program diverts valuable materials from landfill and helps keep bulky waste like mattresses and box springs out of the waste stream.

2. Who is the Mattress Recycling Council?

The Mattress Recycling Council (MRC) is a nonprofit organization that operates recycling programs known as Bye Bye Mattress in states that have passed mattress recycling laws. MRC was founded by the bedding industry and recycles more than 1.7 million mattresses each year. For more information about MRC, go to www.MattressRecyclingCouncil.org. To learn how to recycle your mattress or to find a collection location or event near you, visit www.ByeByeMattress.com.

3. If I don't plan to discard a mattress now, why do I have to pay this fee?

Even if you aren't discarding a mattress right now, mattresses don't last forever and will eventually be discarded. State law requires retailers to collect this fee on any mattress or box spring sale to fund the state's mattress recycling program. This program provides a network of participating cities, towns, retailers, recyclers and other organizations where old mattresses are collected for recycling at no additional cost to you. The fee also supports efforts to combat illegal dumping of mattresses and help keep our community clean.

4. If I decide to take my old mattress to a recycler myself, do I still pay the fee?

Yes, state law requires retailers to collect this fee on any mattress and box spring sale at the time of purchase to fund the mattress recycling program. You may receive a modest financial incentive if you drop off your used mattress or box spring at a designated recycling location. Visit www.ByeByeMattress.com to find the location nearest you.

5. I didn't pay this fee when I bought my old mattress, so will it be accepted for recycling?

Yes, the Bye Bye Mattress program will accept your old mattress no matter when it was originally purchased. To be recycled, units must be clean and dry. Normal wear and tear is expected. Units infested with bed bugs or that are heavily soiled or damaged cannot be recycled.

6. My old mattress was "unacceptable" for recycling. Can you refund my recycling fee?

No, state law requires retailers to collect this fee on any mattress and box spring sale to fund the mattress recycling program. The law does not force retailers to accept every mattress for recycling out of concern for employee health and safety. Store policy, in addition to the guidelines of the recycling program, determine what we will and won't accept. If your mattress is unacceptable for recycling, contact your city or town to learn what disposal options are available.

7. What are the benefits of mattress recycling?

Mattress recycling programs offer many benefits for the community, state and environment, including:

- Less reliance on incinerators and landfills by diverting mattresses from the waste stream
- Reduces the number of illegally dumped mattresses
- Conserves resources by making used steel, foam and other materials available for use in new products
- Creates recycling jobs

8. What happens to my old mattress or box spring when it gets recycled?

Recycled mattresses are cut open and the layers are separated and organized by type. Wood is recycled and used as a fuel source or shredded to produce landscaping mulch. Foam, fiber and other soft commodities are compressed and turned into carpet underlayment or animal bed padding. Metal and box springs are extracted, sent to recyclers and used to make new appliances and building materials.

9. Will the Mattress Recycling Council or Bye Bye Mattress program pick up my old mattress from my home?

If your store takes back old mattresses:

No, but our store offers this service at time of delivery of your new mattress. (If your store recycles with the program, please let the customer know. Otherwise direct them to drop off their mattress at one of our free collection points listed on www.ByeByeMattress.com.)

If your store does not take back old mattresses, your response should be:

Mattresses are collected from a vast network of free collection sites throughout the state. These are typically public works yards or transfer stations. Your city/ town may also collect bulky items at curbside as part of your trash service. Visit www.ByeByeMattress.com to see what options are available. The Mattress Recycling Council or the Bye Bye Mattress program does not pick up mattresses from customer's homes.

California Retailer Take Back Requirement

In California, mattress retailers are required by law to offer to take back old mattresses at no extra cost when delivering new ones. This applies to any method of delivery (in-house, third-party and even common carriers like USPS, UPS, FedEx). Your customer may be aware of this or mention having heard or seen this in an ad.

Please make information available on your website, in the purchasing process or in your shipping/delivery communications about how the pickup of an old mattress will work. Also consider sharing this information with those providing customer service.

RETAILERS CAN RECYCLE WITH US TOO: Learn more about the <u>Bye Bye Mattress</u> Commercial Volume Program.

30-Second Video Script Example

English

Voiceover: Hi there, your Sandman here. I know a few things about getting a good night's sleep, and I've seen you tossing and turning about how to get rid of that lumpy, old mattress

But dumping it in an ally or parking lot — what a nightmare! It's awful to look at — and illegal too. (loud whisper)

But hey! You can recycle it for FREE and start sleeping soundly again, I'll even throw in a few sweet dreams!

Visit ByeByeMattress.com to find your nearest drop-off location.

Spanish

Voiceover: Hola, soy el Arenero. Sé un par de cosas acerca de dormir bien y te he visto dando vueltas en la cama pensando en cómo deshacerte de ese viejo y pesado colchón.

Pero tirarlo en un callejón o estacionamiento... ¡Qué pesadilla! Queda horrible y, además, es ilegal.

Pero, escucha: puedes reciclarlo gratis y volver a dormir bien. Y hasta te regalaré unos cuantos dulces sueños.

Visita ByeByeMattress.com para encontrar el punto de entrega más cercano.

Break Up The Right Way

30-Second Video and Radio Script Examples

English

Voiceover: Hey, I'm your mattress.

We've been together for a while now, but let's be honest. I think we are both ready for a fresh start.

Just don't toss me out without thinking of where I'll end up or how I'll even get there. I'm ready to be more than a mattress after all these years.

I want to be recycled into new things. There's still a lot of good parts here to use. Check out ByeByeMattress.com.

Learn more about recycling and the easy ways to get rid of an old mattress, like me, for free!

Spanish

Voiceover: Hola, soy tu colchón.

Hace mucho que estamos juntos, pero a decir verdad, creo que ambos estamos listos para un nuevo comienzo.

No me saques sin pensar en dónde terminaré ni cómo llegaré allí. Estoy listo para ser más que un colchón después de todos estos años.

Quiero que me reciclen y convertirme en algo nuevo. Partes de mí se pueden volver a usar. Visita <u>ByeByeMattress.com</u> para más información sobre reciclaje y formas fáciles jy gratis! de deshacerte de un colchón viejo como yo.

Chinese

Voiceover: 嗨,我是您的床垫

我们已经朝夕相处了一段日子,但是坦白说 我认为我们都准备好迎接新生活了

请不要把我随意丢弃,不考虑我的去处,甚至也不在乎我怎样前往 因为多年以后,我可能不只是一张床垫

我想要在回收利用后焕发新生 我还有很多完好的零件可供使用 访问 ByeByeMattress.com 了解更多关于回收利用的信息,以及免费处理像我这样的旧床垫的简单方法!

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of the **Mattress Recycling Council** Alexandria, Virginia

Opinion

We have audited the accompanying financial statements of the Mattress Recycling Council -California LLC (a wholly owned subsidiary of the Mattress Recycling Council, Inc.), which comprise the statements of financial position as of December 31, 2020 and 2021, and the related statements of activities, functional expenses, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Mattress Recycling Council – California LLC as of December 31, 2020 and 2021, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Mattress Recycling Council - California LLC, and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Mattress Recycling Council - California LLC's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

INDEPENDENT AUDITOR'S REPORT (continued)

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due
 to fraud or error, and design and perform audit procedures responsive to those risks. Such
 procedures include examining, on a test basis, evidence regarding the amounts and disclosures
 in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the Mattress Recycling Council California LLC's internal
 control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant
 accounting estimates made by management, as well as evaluate the overall presentation of the
 financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Mattress Recycling Council California LLC's ability to continue as a going concern for a reasonable period of time.

INDEPENDENT AUDITOR'S REPORT (continued)

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also used our report dated June 21, 2022, on our consideration of Mattress Recycling Council – California LLC's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and other matters. The purpose of that report is to solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Mattress Recycling Council – California, LLC's internal control over financial reporting or on compliance. That report (located on pages 27-28) is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Mattress Recycling Council – California LLC's internal control over financial reporting and compliance.

Additional Report on the Audited Financial Statements of Mattress Recycling Council

We have also audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of the Mattress Recycling Council (MRC), as of and for the years ended December 31, 2020 and 2021, and our report thereon dates June 21, 2022, expressed as an unmodified opinion on those financial statements. See NOTE A for Mattress Recycling Council – California, LLC's (MRC – CA) subsidiary relationship.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies of the Mattress Recycling Council – California LLC ("MRC – CA") is presented to assist in understanding MRC – CA's financial statements. The financial statements and notes are representations of MRC – CA's management who is responsible for their integrity and objectivity. These accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

Purpose of the California Recycling Operations:

The California (CA) Used Mattress Recovery and Recycling Act, as amended ("the Act") requires manufacturers of mattresses sold in CA to develop, finance, and implement a convenient and cost-effective program to recover and recycle used mattresses generated in CA. The Act is administered by MRC – CA. MRC – CA funds its operations through a \$10.50 per unit recycling fee collected from consumers when they purchase a mattress or box spring. MRC – CA is required to perform a financial statement audit under accounting principles generally accepted in the United States of America and the generally accepted Government Auditing Standards issued by the Comptroller General of the United States of America to satisfy the state of California's certified audited financial statement requirement in accordance with the State of California Section 42990 of the Public Resources Code.

MRC – CA is one of three operating wholly owned subsidiaries of the Mattress Recycling Council, Inc. ("MRC"). MRC also operates recycling programs in the states of Connecticut and Rhode Island. MRC is a not-for-profit corporation incorporated on November 14, 2013 under the laws of the State of Delaware and organized and operated for purposes consistent with recognition of exempt status under Internal Revenue Code Section 501(c)(3), including, without limitation, to work to establish an environmentally sound and cost-effective program for recycling of sleep products. MRC is a subsidiary (under current accounting standards) of the International Sleep Products Association ("ISPA") due to common control.

MRC – CA's significant accounting policies are as follows:

Basis of Accounting and Separately Stated Financial Statements of MRC - CA:

The financial statements of MRC – CA have been prepared on the accrual basis of accounting and, accordingly, reflect all significant receivables, advances, prepaid expenses, payables, accruals and other liabilities.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

On an annual basis, MRC – CA's financial statements are included in the consolidated group financial statements of MRC. These financial statements of MRC – CA have been issued as a subsidiary of MRC for the years ended December 31, 2020 and 2021. MRC – CA's December 31, 2020 and 2021 separately stated financial statements are prepared due to the request of the Board of Directors of MRC and the State of California. See **NOTE J** for related party transaction disclosures.

Basis of Presentation:

As a wholly owned subsidiary of MRC, a 501(c)(3) not-for-profit organization, the financial statements of MRC – CA have been prepared on the accrual basis of accounting. MRC – CA reports information regarding its financial position and activities according to two classes of net assets: net assets without restriction and net assets with restriction.

<u>Net Assets Without Restriction</u> - Net assets that are not subject to or are no longer subject to third party-imposed stipulations. The board designated reserves are included in net assets without restrictions.

<u>Net Assets With Restriction</u> - Net assets whose use is limited by third party-imposed time and/or purpose restrictions.

Revenues are reported as increases in net assets without restriction unless use of the related assets is limited by third party-imposed restrictions. Expenses are reported as decreases in net assets without restriction. Gains and losses on investments and other assets or liabilities are reported as increases or decreases in net assets without restrictions unless their use is restricted by explicit third-party stipulation or by law. Expirations of restrictions on the net assets (i.e., the third party stipulated purpose has been fulfilled and/or the stipulated time period has elapsed) are reported as reclassifications between the applicable classes of net assets. MRC – CA has adopted a policy to classify restricted revenues as without restrictions to the extent that restrictions were met in the year the revenue was received.

MRC – CA established a financial reserve policy to provide for minimum and maximum short-and long-term reserves. It is the policy of MRC – CA to include in its short-term reserves, net assets which equal approximately three months of its annual budgeted operating expenses. MRC – CA's long-term reserves target is approximately nine months of its annual budgeted operating expenses, not to exceed 15 months. In total, MRC – CA seeks to maintain its reserves at 100% of its annual budgeted operating expenses.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Income Tax Status:

MRC is exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code. However, income from activities not directly related to MRC's tax-exempt purpose is subject to taxation as unrelated business income. MRC – CA is considered a disregarded entity for federal income tax purposes. MRC – CA's activity and mission are consistent with those of its Parent company, MRC. The subsidiary's financial operations are reported on a consolidated basis with MRC's tax-exempt Federal Form 990 filing. MRC – CA is subject to franchise tax in the state of California. No taxes were owed as of December 31, 2021.

MRC has adopted the authoritative guidance relating to uncertainty in income taxes included in ASC Topic *Income Taxes*. These provisions provide consistent guidance for the accounting for uncertainty in income taxes recognized in an entity's financial statements and prescribe a threshold of "more likely than not" for recognition and de-recognition of tax positions taken or expected to be taken in a tax return. MRC performed an evaluation of uncertain tax positions for the year period ended December 31, 2021, and determined that there were no material matters that would require recognition in the financial statements or that may have an effect on its tax-exempt status. As of December 31, 2021, the statute of limitations for MRC's income tax return for the years ended December 31, 2018, 2019, and 2020 remain open with the Federal, state, and local authorities. It is MRC's policy to recognize interest and/or penalties related to uncertain tax positions, if any, in income tax expense.

Cash and Cash Equivalents:

For purposes of the statement of cash flows, MRC-CA considers all unrestricted highly liquid investments with an initial maturity of three months or less to be cash equivalents.

Accounts Receivable:

Accounts receivable are stated at the amount management expects to collect from outstanding balances. Management provides for probable uncollectible amounts through a charge to earnings and a credit to valuation allowance based on its assessment of the current status of individual accounts. Balances which are still outstanding after management has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable. For the years ended December 31, 2020 and 2021, the balance of the allowance for doubtful accounts was \$206,393 and \$155,972 respectively.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue Recognition:

Revenue from recycling fees is recognized at the point of sale in the period in which the recycling fee is collected at retail.

Property, Equipment, Depreciation and Amortization:

MRC – CA capitalizes all expenditures for property and equipment in excess of \$1,000. Purchased property and equipment are carried at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investments:

MRC – CA has adopted Accounting Standards Codification (ASC) 958 Not-for-Profit Entities (formerly Statement of Financial Accounting Standards (SFAS) No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*). Under FASB ASC 958-320, investments in marketable equity securities with readily determinable fair values and all investments in marketable debt securities are valued at their fair values in the statements of financial position. Realized and unrealized gains and losses are included in the change in net assets.

Functional Allocation of Expenses:

The costs of providing the various programs and other activities have been summarized on a functional basis in the statement of activities and in the statements of functional expenses. Accordingly, certain shared costs have been allocated among the three state programs (CA, CT, and RI) based on supporting services benefiting each program.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Functional Allocation of Expenses (continued)

Shared general and administrative expenses include those expenses that are not directly identifiable with any other specific function but that provide for the overall support of MRC, including expenses related to contracts with third-party vendors. Total shared costs are allocated to the respective states on a monthly basis. For the years ended December 31, 2020 and 2021, approximately 90% of the shared expenses outlined above were allocated to MRC – CA, which is based on relative state population of CA as it relates to CT and RI.

Reclassifications:

Certain accounts in the prior year's financial statements have been reclassified for comparative purposes to conform with the presentation of the current year financial statements.

NOTE B - CASH AND CASH EQUIVALENTS - (UNRESTRICTED)

Cash and cash equivalents at December 31, 2020 and 2021, consisted of the following:

<u>Unrestricted:</u>	-	2020	2021
Demand deposits Money market funds	\$	2,858,297 4,411,632	\$ 6,305,154 2,818,861
Total unrestricted cash and cash equivalents	\$	7,269,929	\$ 9,124,015

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE C - INVESTMENTS

At both December 31, 2020, and 2021 MRC – CA investments consisted of approximately 84% conservative fixed income products, and the remaining 16% are invested in U.S. and International ETF's and mutual funds. All investments are exposed to various risks, such as market and credit. Due to the level of risk associated with investments and level of uncertainty related to changes in the value of investments, there is always a possibility that changes in risks in the near term could materially affect investment balances and the amounts reported in the financial statements. MRC – CA has an investment policy statement that is reviewed by the MRC Board annually which addresses these risks. The portfolios are reviewed on a quarterly basis and changes are made as needed, within the scope of the policy.

Investments at December 31, 2020 consisted of the following:

	Cost	Fair Value
Unrestricted	\$ 5,815,794	\$ 6,187,873
Board Designated - financial reserve	29,205,790	31,074,299
	\$ 35,021,584	\$ 37,262,172

As of December 31, 2020, \$31,074,299 has been recorded as board designated investments (see **NOTE E**).

Investments are composed of the following:

	Cost	_	Fair Value
U.S. ETF Fixed Income Securities	\$ 19,499,556	\$	20,297,173
International ETF and Equity Securities	1,435,907		1,596,083
REITs	622,871		663,247

	\$	298,515	\$	23,148	\$	229,304	\$	69,211	

NOTE E - NET ASSETS

As of December 31, 2020, and 2021, total net assets without restrictions available for general operations of MRC – CA amounted to \$43,553,066 and \$44,216,036, respectively. MRC – CA's Board has a reserve policy to establish a board designated financial reserve to operate CA's recycling program over a multi-year period. As of December 31, 2020, and 2021, the Board has designated \$31,074,299 and \$32,335,405 of its \$43,553,066 and \$44,216,036 total net assets, respectively, as a financial reserve which is consistent with the requirements under the (CA) Used Mattress Recovery and Recycling Act.

The remaining net assets in the amount of \$12,478,767 and \$11,880,631 are undesignated as of December 31, 2020 and 2021, respectively. Undesignated net assets represent approximately three months of annual budgeted expenses.

As of December 31, 2020, and 2021, MRC – CA did not have any net assets with third-party restrictions.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE E - NET ASSETS (continued)

NOTE F - SUPPLEMENTAL CASH FLOW STATEMENT DISCLOSURES

Supplemental disclosure of cash flows information:

Cash paid during the year ended for:	2020	 2021	

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE G - COMMITMENTS AND CONTINGENCIES

Blue Marble Materials Litigation:

MRC – CA terminated its relationship under a contract entered into in 2018 with a recycler named Eco-Mobility, LLC d/b/a Blue Marble Materials ("BMM") in September 2018. Subsequently, MRC - CA, BMM, BMM's principal and AeroFund Financial (AeroFund) (BMM's factor) asserted various claims against each other in an arbitration proceeding. In October 2019, MRC - CA entered into a settlement agreement with AeroFund in which it agreed to withdraw its claims against MRC-CA, which comprised of a claim regarding three invoices BMM issued to MRC - CA in exchange for \$1,300,000. During 2020 and through 2021, the Organization incurred legal and litigation expenses defending MRC - CA's interest against substantial monetary claims asserted in a complex arbitration proceeding involving BMM and the recycler's principal and other legal matters related to handling routine program operations and MRC – CA's contracts with hundreds of vendors. The litigation-related costs included attorney's fees, expert witness fees, transcript costs, arbitration panel costs and other out-of-pocket expenses. The arbitration proceedings concluded in May 2021. Among other things, the arbitrators found that MRC – CA had established valid grounds for terminating BMM, that BMM was liable for significant costs that MRC – CA incurred to store, transport and process units that BMM had abandoned after termination of its contract with MRC - CA and that BMM had overbilled MRC – CA under the 2018 contract. In addition, the arbitrators ruled against BMM and its principal on each of the claims that they had asserted against MRC - CA for substantial monetary damages. Also, during 2021 in connection with the arbitrators ruling, MRC - CA wrote off \$836,422 in invoices, that were being contested as part of the arbitration, which were accrued on the Statement of Financial Position in prior years related to this litigation. The \$836,422 is included in the Statements of Activities as an "gain on extinguishment of liabilities" for 2021. A court has now confirmed the arbitrator's award. MRC – CA considers the collection of any award to be unlikely, therefore has not recorded any amount in these financial statements.

Product Care Association Consulting Fees:

MRC has outsourced its registration, billing and collection functions to Product Care Association (PCA), a third-party vendor which operates out of Canada. PCA manages the seller registrations, collects and reviews the monthly sales reports from various mattress retailers/sellers, invoices these sellers and collects the fee income on behalf of MRC. During the years ended December 31, 2020 and 2021, the total expenses incurred related to PCA consulting fees were \$296,553 and \$261,699 respectively, and MRC – CA's proportionate allocation of those expenses was \$266,455 and \$234,553, respectively, which is included in administration expense (management and staffing) on the statement of activities.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE G - COMMITMENTS AND CONTINGENCIES (continued)

Concentration of Service Provider:

For the years ended December 31, 2020 and 2021, five and four recyclers accounted for approximately 80% and 83% of MRC – CA's total recycling costs, respectively, and 75% and 77% of the units recycled, respectively.

Note Payable - line of credit:

On July 19, 2018, MRC entered into a line of credit agreement with PNC Bank. The principal amount of the line was \$1,000,000 and called for an interest rate which is equal to the daily LIBOR rate plus 2.0%. All unpaid principal and interest is payable at its maturity date on July 31, 2022. Until the maturity date, MRC is required to make monthly accrued interest payments, which are due each month. The line of credit is secured by collateral of the assets of MRC. There were no draws on the line of credit in 2020 or 2021, therefore the interest expense related to the line of credit for the years ended December 31, 2020 and 2021 is \$0.

NOTE H - CONCENTRATION OF CREDIT RISK

MRC – CA maintains its cash and cash equivalents balances in three U.S. financial institutions. The balances are insured by the Federal Deposit Insurance Corporation (FDIC) and the Securities Investor Protection Corporation (SIPC). The FDIC insures up to \$250,000 and the SIPC insures up to \$500,000 (including up to \$250,000 for cash) as of December 31, 2021. MRC – CA's investment firm also maintains additional insurance coverage through an outside insurer which provides excess protection of up to \$400 million per account. At December 31, 2021, MRC – CA's uninsured cash balance was \$1,945,473 and uninsured investment balance was \$0.

NOTE I - FAIR VALUE OF FINANCIAL INSTRUMENTS

Generally accepted accounting principles define fair value, establish a framework for measuring fair value, and establish a fair value hierarchy that prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach are used to measure fair value.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE I - FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

<u>Level 1</u> – These inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that MRC - CA has the ability to access.

<u>Level 2</u> – These are inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, default rates and other similar data.

<u>Level 3</u> – These are unobservable inputs for the asset or liability and rely on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability. The unobservable inputs should be developed based on the best information available in the circumstances and may include MRC – CA's own data.

MRC – CA estimates that the fair value of all financial instruments at December 31, 2020 and 2021 does not differ materially from the aggregate carrying values of its financial instruments recorded in the accompanying statement of financial position.

Fair Value Measurements on a Recurring Basis As of December 31, 2020

	Level 1	Level 2	Level 3	Total
Investments	\$ 6,187,873	0	0	\$ 6,187,873
Investments - financial reserve	31,074,299	0	0	31,074,299
Total	\$ 37,262,172	\$ 0	\$ 0	\$ 37,262,172

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE I - FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

Fair Value Measurements on a Recurring Basis As of December 31, 2021

	Level 1	Level 2	Level 3	Total
Investments	\$ 1,914,984	0	0	\$ 1,914,984
Investments - financial reserve	32,335,405	0	0	32,335,405
Total	\$ 34,250,389	\$ 0	\$ 0	\$ 34,250,389

NOTE J - RELATED PARTY TRANSACTIONS (MRC)

MRC – CA is one of three operating wholly owned subsidiaries of the Mattress Recycling Council, Inc. ("MRC" or "MRC Holdings"). MRC also operates recycling programs in the states of Connecticut and Rhode Island. MRC is a not-for-profit organization incorporated on November 14, 2013 under the laws of the State of Delaware and organized and operated for purposes consistent with recognition of exempt status under Internal Revenue Code Section 501(c)(3), including, without limitation, to work to establish an environmentally sound and cost-effective program for recycling of sleep products. MRC is a subsidiary (under current accounting standards) of the International Sleep Products Association ("ISPA") due to common control.

These financial statements include the intra-entity accounts and transactions between MRC-CA and MRC. Due from MRC includes participant funds for the recycling program collected by MRC on behalf of MRC-CA. The following transactions below are included in these separately stated financial statements, but are eliminated in the consolidated MRC financial statements:

	2020		2021	
Due from MRC – (Page 3)	\$	1,366,515	\$	1,803,148
Administrative and management fee expense - MRC	\$	2,884,537	\$	3,575,304

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE J – RELATED PARTY TRANSACTIONS (MRC) (continued)

Operating Agreement with MRC:

MRC – CA is required to pay a monthly service fee in the amount of \$307,417, which represents the anticipated costs incurred by MRC for administrative, financial and operational support services to the LLC. At the end of each quarter a reconciliation is prepared for a "true up" of actual costs MRC – CA incurred versus the monthly fee charged, and any surplus or deficits are reimbursed by the respective party.

For the years ended December 31, 2020 and 2021, MRC – CA incurred expenses of \$2,884,537 and \$3,575,304 related to this agreement for administrative and management fee expense, and MRC recorded the associated management fee revenue in the same amount. The administrative and management fee expense charged by MRC has not been eliminated in these financial statements as of December 31, 2020 and 2021.

Gain from Extinguishment of Debt:

During 2020, MRC entered into an agreement with a bank to borrow \$442,800. The loan was pursuant to the Paycheck Protection Program under the CARES Act. MRC applied for forgiveness of the loan with the Small Business Administration (SBA) during the year ending December 31, 2021 and received approval for debt forgiveness for the full balance on March 10, 2021. MRC allocated \$351,842 of the debt forgiveness to MRC – CA based upon the actual allocation of covered salary expense to MRC – CA. This amount is recorded on the Statements of Activities as a "gain from extinguishment of debt" for the year ended December 31, 2021.

NOTE K – LIQUIDITY AND AVAILABILITY OF FINANCIAL ASSETS

MRC – CA has financial assets as of December 31, 2021, consisting of cash and cash equivalents of \$9,124,015, undesignated investments of \$1,914,984, net accounts receivable of \$4,237,842, due from MRC Holdings of \$1,803,148, and investments for financial reserve of \$32,335,405, which total \$49,415,394. Included in these financial assets is the board designated investments in the amount of \$32,335,405, set aside for the financial reserve in order to comply with state regulations in CA. These board designated financial assets are not available for general use.

NOTES TO FINANCIAL STATEMENTS December 31, 2020 and 2021

NOTE K – LIQUIDITY AND AVAILABILITY OF FINANCIAL ASSETS (continued)

The following reflected MRC – CA's financial assets available for general use as of the Statement of Financial Position date.

Financial assets, at year end \$ 49,415,394

Less those unavailable for general expenditure within one year, due to:

Board designation

Amount set aside for the financial reserve (32,335,405)

Financial assets available to meet cash need for general expenditures within one year \$\frac{17,079,989}{2}\$

MRC – CA considers all expenditures related to its ongoing recycling programs, as well as the services undertaken to support these programs to be general expenditures. As part of MRC – CA's liquidity management, it has a policy to structure its financial assets to be available as its general expenditures, liabilities and other obligations come due. In addition, MRC – CA invests cash in excess of daily requirements in investments which include conservative fixed income products, U.S. and International ETF's and mutual funds.

In addition to financial assets available to meet general expenditures over the next 12 months, MRC – CA has a financial reserve to assist with operational liquidity if needed.

NOTE L - SUBSEQUENT EVENTS

In preparing the financial statements, MRC - CA has evaluated events and transactions for potential recognition or disclosure through June 21, 2022, the date the audit report was available to be issued.

COVID-19 Uncertainty:

The extent to which COVID-19 may impact MRC – CA's financial condition or results of operations is uncertain. At this stage, the impact of COVID-19 on MRC – CA's business and results of operation has not been significant.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors of the Mattress Recycling Council Alexandria, Virginia

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the **Mattress Recycling Council - California LLC** ("MRC – CA"), a subsidiary of the Mattress Recycling Council, Inc. (a nonprofit organization), which comprise the statement of financial position as of December 31, 2021, and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated June 21, 2022.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered MRC – CA's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of MRC – CA's internal control. Accordingly, we do not express an opinion on the effectiveness of MRC – CA's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS (continued)

Compliance and Other Matters

As part of obtaining reasonable assurance about whether MRC – CA's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

Lydon Fratnoff couplen, P.A.

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of MRC – CA's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the organization's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Rockville, MD June 21, 2022

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH THE FINANCIAL ASPECTS OF THE PUBLIC RESOURCES CODE SECTION 42990, AND CHAPTER 21, PART 3, DIVISION 30 OF THE PUBLIC RESOURCES CODE, AND TITLE 14, DIVISION 7, CHAPTER 11, ARTICLE 3 OF THE CALIFORNIA CODE OF REGULATIONS

To the Board of Directors of the Mattress Recycling Council Alexandria, Virginia

We have examined the Mattress Recycling Council – California LLC's ("MRC – CA") Used Mattress Recovery and Recycling Act's ("the Act") compliance with the financial aspects of the Sections 42990 and 42990.1 of the California Public Resources Code, and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations for the year ended December 31, 2021. Management is responsible for MRC – CA's compliance with those requirements. Our responsibility is to express an opinion on MRC – CA's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether MRC – CA complied, in all material respects, with the specified requirements of the Act. An examination involves performing procedures to obtain evidence about whether MRC – CA complied with the specific requirements of the Act. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material noncompliance, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion. Our examination does not provide a legal determination on MRC – CA's compliance with specified requirements of the Act.

In our opinion, MRC – CA complied, in all material respects, with the financial requirements of the Public Resources Code Section 42990, Part 3, Division 30 of the Public Resources Code, and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations, for the year ended December 31, 2021.

This report is intended solely for the information and use of MRC's Board of Directors, management, and the California Department of Resources, Recycling and Recovery, and is not intended to be and should not be used by anyone other than these specified parties.

Executive Summary

In accordance with Section 42990.1.(k) of the Public Resources Code, the Mattress Recycling Organization Advisory Committee (Committee) presents this document reporting on the fifth year of the California Used Mattress Recycling Program (Program). This report is submitted by the Committee and includes information discussed and voted on by the Committee in accordance with the Bagley-Keene Open Meeting Act. The Committee is currently made up of ten representatives from local government, the environmental community, the solid waste industry, private sector collectors/processors/recyclers, and interested parties with names and organizations listed above.

The Committee was formed in accordance with Section 42987(a)(3) of the Public Resources Code to maintain an advisory role to the mattress recycling organization, currently being fulfilled by the Mattress Recycling Council (MRC), throughout Program operation. Interested parties can join the <u>CalRecycle Listserve</u> to stay up-to-date on CalRecycle announcements on the Program. The Committee met 4 times in 2021.

The information contained within this report includes a summary of the consultative process between the Committee and the MRC relating to the ongoing implementation of the Used Mattress Recovery and Recycling Plan (Plan), as well as any other information deemed pertinent by the Committee to maximizing the recovery and recycling of used mattresses in the state. This letter was approved by the Committee by E-vote on 5/25/21.

The Committee looks forward to continuing its consultative role to the MRC as the Program continues throughout California.

Respectfully,

Joanne Brasch, Chair

2021 Mattress Recycling Advisory Committee Report

Purpose:

The purpose of this report is to provide a summary of the consultative process between the Committee and the MRC regarding the MRC's administration of the Program during the 2021 calendar year, and to provide any other information the Committee deems pertinent to maximizing the recovery and recycling of used mattresses in the state.

Activities and Changes:

Comment letters by the Committee, Committee meeting agendas, meeting notes, and other materials utilized by the Committee during 2021 were shared on the Committee's listserv, hosted by CalRecycle. https://calrecycle.ca.gov/mattresses/stewardorg/advisorycomm/

Changes to Committee membership since the 2020 Annual Report include:

Environmental Community-

Baani Behniwal left the Committee in April 2021.

Jordan Wells joined the Committee June 29, 2021

Local Government-

No updates during this reporting period.

Solid Waste Industry-

No updates during this reporting period.

Interested Parties-

No updates during this reporting period.

Private Sector-

No updates during this reporting period.

Subcommittees:

Each sub-committee chair works with MRC on specific issues allowing the smaller group to get into details. The sub-committees and their respective chairs have provided the following updates during the 2021 meetings:

- 1. Diversion and commodity markets
- 2. Illegal dumping
- 3. Outreach and program marketing

Additional Committee Comments:

At this time, the Committee would like to add the following additional comments and encourage the MRC to address the following in the 2021 Annual Report and work to be completed in 2022:

Compliments:

The AC appreciated:

- 1. Responsiveness to Advisory Committee questions during the meetings.
- Hearing the updates in the meetings and email and MRC attending the AC meetings.
- 3. Efforts with rural areas and EJ communities.
- 4. Efforts to address illegal dumping.
- 5. Working with the sub-committees, in particular with the Market Development Sub-Comm on product types of wood, foam, and textiles.
- 6. Outreach to implement the two new mandates for futon retailers and common carrier requirement, such as targeted ads in industry news outlets.
- 7. Facilitating recyclers to sell products to renovators.

Challenges:

- 1. The Annual Report is very long and could be trimmed down for ease of reading.
- 2. Annual Report tables should have multiple years for comparison.
- 3. Illegal dumping is still an issue and needs ongoing attention.
- 4. Ongoing challenges with finding markets for all materials, specifically textiles.
- 5. Retailers using common carrier are circumventing or convoluting the requirement to offer free mattress collection.
- 6. Outreach to the public on options or actions to take if the mattress retailer is not clearly offering free pick-up when using common carrier.
- 7. The supply of used beds is still challenging as recyclers and renovators are having issues accessing enough materials.

Future ideas for the next year's consultative process:

- 1. Addressing consequences of MRC haulers not meeting the time requirements for picking up trailers.
- 2. Addressing how fuel pricing and electric vehicle mandates will impact the program costs.
- 3. In the Annual Reports, MRC should specify the amount of funds spent on each research partner.
- 4. Report on shortcomings on compliance for retailers using common carrier.
- 5. More research and funds dedicated to launching new products using materials from the program.
- 6. Strong emphasis and resources dedicated to the circularity committee with robust reporting on specific results.
- 7. Work with or contract with renovators to increase reuse.

Appendix H: References for the Outline Prescribed by 14 CCR § 18964

For ease of review, the following is the annual report outline prescribed in CalRecycle Regulations, followed by a reference indicating where the requirement is discussed in the 2021 Annual Report.

- (b) The annual report shall follow the outline below and contain the following:
 - (1) Contact information. Identify the corporate officer of the mattress recycling organization responsible for annual report submittal.
 - 1. Contact Information
 - (2) Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the mattress recycling organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the mattress recycling organization's used mattress recovery efforts during the calendar year pursuant to section 18962.
 - 2. Executive Summary
 - (3) A description of the methods used to collect, transport, and process used mattresses in California.
 - 3. Program Collection, Transportation, and Processing
 - (4) Include an updated list of participating manufacturers, renovators, and retailers and any updates to their respective contact information per section 18961(a)(2) and an updated list of brands covered under the plan per section 18961(a)(3).
 - Appendix A: Registered Manufacturers, Renovators, Retailers and Brands
 - (5) Description of how consumers of mattresses in California had an opportunity to recycle and properly manage their used mattresses, including the number, location, and type of collection points in the program.
 - Program Collection, Transportation, and Processing Mattress Collection
 Collection Site Types
 - (6) May include a description of activities to ensure proper collection and management of used mattresses.
 - 3. Program Collection, Transportation, and Processing Mattress Collection— Collection Site Mattress Management

- (7) A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.
 - 3. Program Collection, Transportation, and Processing Coordination with Existing Infrastructure
 - 5. Mitigation of Illegal Mattress Dumping
- (8) Description of objectives and activities based on the used mattress recovery and recycling plan, per section 18962(a)(2). State objectives from the approved plan and describe progress toward achieving those objectives during the reporting period. Describe any adjustments to objectives stated in the approved plan that may be made for the upcoming reporting period and accompanying rationale for those changes. If any changes are significant or material, as defined, the mattress recycling organization shall amend and resubmit its plan for approval by the department. The annual report shall include:

4. Program Objectives and Activities

- (A) Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.
 - (b) The quantity of mattresses disposed of in solid waste landfills.
 - 4. Program Objectives and Activities Statewide Collection and Disposition Data
 - (c) The quantity of discarded used mattresses collected for recycling in the program
 - Program Objectives and Activities Program Collection and Disposition Data — Program Collection Data
 - (d) The quantity of used mattresses collected for recycling from different categories of sources.
 - 4. Program Objectives and Activities Program Collection and Disposition Data Program Collection Data
 - (e) The quantity of each category of materials recycled
 - 4. Program Objectives and Activities Program Collection and Disposition Data Program Collection Data
 - (f) The uses for the recycled materials.
 - 3. Program Collection, Transportation, and Processing Mattress Processing/Recycling Uses for Recycled Materials

- (g) The quantity of otherwise disposed of materials.
 - Program Objectives and Activities Program Collection and Disposition Data — Program Disposition Data
- (j) The total volume, number, and weight of used mattresses collected recycled, renovated, and reused in this state during the preceding calendar year, including any conversion factor used to determine the number of mattresses recovered.
 - 4. Program Objectives and Activities Statewide Collection and Disposition Data
- (B) Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.
 - (g) Conducting research, as needed, related to improving used mattress collection, dismantling, and recycling operations, including pilot programs to test new processes, methods, or equipment on a local, regional, or otherwise limited basis.

6. Research

- (I) Ensuring, to the maximum extent possible, that urban and rural local governments and participating permitted solid waste facilities and authorized solid waste operations that accept mattresses are provided with a mechanism for the recovery of illegally disposed used mattresses that is funded at no additional cost to the local government, solid waste facility, or solid waste operation.
 - 5. Mitigation of Illegal Mattress Dumping
- (m) Developing strategies, in consultation with the California Environmental Protection Agency's Environmental Justice Task Force and other relevant parties, for collecting used mattresses for recycling in areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers, and illegal mattress dumping.
 - Program Objectives and Activities Convenience Environmental Justice Community Access
 - 5. Mitigation of Illegal Mattress Dumping
- (9) Financing Mechanism. Include the mattress recycling organization's total expenses and revenues associated with the implementation of the used mattress recycling program. Changes to the mattresses recycling charge shall be reflected in the annual program budget for approval by the department. If a mattress recycling organization changes the amount of the mattress recycling

charge in the first 12 months during which the mattress recycling charge is being collected per subsection (1) of subdivision (c) of section 42989 of the Public Resources Code, the mattress recycling organization shall provide the department no less than 90 days' notice before the change in the amount of the mattress recycling charge takes place. If a mattress recycling organization conducts activities that are separate from the implementation and management of the California used mattress recycling program, then the annual report shall include documentation on how the collection and use of funds from the California mattress recycling charge were kept separate from other activities of the mattress recycling organization, including the methodology for distribution of shared costs. Consistent with subdivision (a) of section 42990.1 of the Public Resources Code, the annual report shall include the following:

7. Finance

- (A) Mattress recycling charge per mattress size
 - 7. Finance Revenue from the Mattress Recycling Charge
- (B) Capital costs
 - 7. Finance Capital Costs
- (C) Education/Outreach costs
 - 7. Finance Education and Outreach Costs
- (D) End-of-life used mattress management costs with line items, if applicable, for collection, transportation, recycling, renovating, reuse, and proper disposal
 - 7. Finance End-of-Life Used Mattress Management Costs
- (E) Program administration costs including, but not limited to, the department's costs pursuant to subdivision (a) of section 42988.2 of the Public Resources Code, and third party legal costs. Surplus funds, if any, and detailed rationale for the specified level of surplus.
 - 7. Finance Program Administration Costs and Total Program Costs
- (F) For the first 12 months during which the mattress recycling charge was collected, include a description of any changes to the amount of the mattress recycling charge, and how implementation of the change complied with subsection (1) or (2) of subdivision (c) of section 42989 of the Public Resources Code, if applicable. The mattress recycling organization may also include a description of why the change was made.
 - 7. Finance Revenue from the Mattress Recycling Charge

(10) Education and Outreach. Provide a description of educational materials that were provided, including electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. Describe any changes to those materials that are planned for subsequent years, if applicable.

8. Education and Outreach and Appendix E: Education and Outreach Examples

- (11) Audits. The annual report shall include an independent financial audit of the used mattress recovery and recycling program funded from the mattress recycling charge. The audit shall be conducted in accordance with auditing standards generally accepted in the United States of America, and standards set forth in Government Auditing Standards issued by the Controller General of the United States. The financial audit submitted to the department shall be prepared by an Independent Certified Public Accountant (CPA). The CPA shall not perform non-audit services for the mattress recycling organization that would impair independence as defined in the Government Auditing Standards issued by the Controller General of the United States (e.g., accounting services, development of internal controls, management decisions). The independent financial audit shall include:
 - (A) Mattress recycling program financial statements, as required by GAAP.
 - (B) An opinion on the mattress recycling organization's compliance with the financial aspects of Chapter 21 (commencing with section 42985), Part 3, Division 30 of the Public Resources Code and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations.
 - (C) Findings and recommendations as they relate to the financial aspects of the program.
 - (D) Management Letter, if issued, by the mattress recycling organization's CPA.

 Appendix F: Financial Audit
- (12) Advisory Committee Report. The annual report shall include the report of the advisory committee required by subdivision (k) of section 42990.1 of the Public Resources Code. The mattress recycling organization's annual report may include a description of how it addressed the points or recommendations raised in the advisory committee report.

Appendix G: Advisory Committee Letter

- (13) Good faith effort. For annual reports submitted on and after July 1, 2019, a demonstration of good faith effort with the state mattress recycling goals established pursuant to section 42987.5 (b) of the Public Resources Code.
 - 4. Program Objectives and Activities Program Collection and Disposition Data Good Faith Effort
