Additional CRV Labeling Considerations

- PRC 14561(d) is revised per SB1013 to read “the Department may require that a beverage container intended for sale in this state be printed, embossed, stamped, labeled or other marked with a scan code, a quick response (QR) code, or a universal product code or similar machine-readable indicia.”
- CalRecycle is still reviewing all aspects of SB 1013 and the impact of this provision on all stakeholders.
- To better understand this aspect, we would like to meet with those who currently utilize QR codes or are looking to invest in the technology for their labels.
- This meeting will take place June 14th at 1:00pm. To participate, please email Ericka.Butler@CalRecycle.ca.gov for the invitation.

Additional CRV Labeling Considerations

- PRC 14561(c) prohibits any person or entity from selling a CRV product which has not been properly labeled in accordance with the Act and Regulations. Therefore, after July 1st, 2025, wine and distilled spirits products that are subject to the Program will need to be properly labeled in order to be offered for sale.
