

SOLID WASTE FACILITY PERMIT		Facility Permit Number: 19-AA-1042	PROPOSED Page 1 of 5
1. Name and Street Address of Facility: Grand Central Recycling & Transfer Station 999 Hatcher Avenue City of Industry, CA 91748	2. Name and Mailing Address of Operator: Grand Central Recycling & Transfer, Inc. 17445 East Railroad Street City of Industry, California 91748	3. Name and Mailing Address of Owner: Grand Central Recycling & Transfer, Inc. 17445 East Railroad Street City of Industry, California 91748	
4. Specifications:			
a. Permitted Operations:			
<div><input type="checkbox"/> Solid Waste Disposal Site</div> <div><input checked="" type="checkbox"/> Transfer/Processing Facility (MRF)</div> <div><input type="checkbox"/> Composting Facility /Green Material</div> <div><input type="checkbox"/> Transformation Facility</div> <div><input type="checkbox"/> Other: Construction and Demolition/Inert (CDI) Debris</div>			
b. Permitted Hours of Operation:			
<div>• Receipt / Processing of Non-Hazardous Solid Waste: 24 hours per day/ 7 days a week *</div> <div>• Ancillary Operations/Facility Operating Hours: 24 hours per day/ 7 days per week *</div>			
* Specific hours for waste receipt, ancillary operation and public use are stated in the approved Transfer Processing Report (TPR)			
c. Permitted Maximum Tonnage: Maximum tonnage of 5,000 tons per day (TPD) includes non-hazardous solid waste.			
d. Permitted Traffic Volume: 894 Vehicles per day (VPD)			
e. Key Design Parameters (Detailed parameters are shown on site plans bearing LEA and CalRecycle validations):			
	Total	Transfer/Processing	
Permitted Area	10.26 acres	10.26 acres	
Design capacity	5,000 TPD	5,000 TPD	
Upon a significant change in design or operation from that described herein, this permit is subject to revocation or suspension. The attached findings and conditions are integral parts of this permit and supersede the conditions of any previously issued solid waste facility permit.			
5. Approval:		6. Local Enforcement Agency:	
<div>Approving Officer Signature</div> <div>Dorcas Hanson-Lugo, Chief Solid Waste Management Program</div>		County of Los Angeles Department of Public Health Solid Waste Management Program 5050 Commerce Drive Baldwin Park, California 91706 Telephone: (626) 430-5540	
7. Date Received by CalRecycle: Date		8. CalRecycle Concurrence Date: Date	
9. Permit Issued Date:	10. Permit Review Due Date:		11. Owner/Operator Transfer Date:
Date	September 25, 2024		N/A

SOLID WASTE FACILITY PERMIT PROPOSED	Facility Name: Grand Central Recycling & Transfer Station	
	SWFP No. 19-AA-1042	Page 2 of 5

12. Legal Description of Facility:
 999 Hatcher Avenue, City of Industry, CA 91748.

13. Findings:

- a) This permit is consistent with the Los Angeles County Integrated Waste Management Plan, which was approved by CalRecycle, formerly CIWMB, on June 23, 1999. Pursuant to Public ResourcesCode (PRC) Section 50001(a) this facility is identified in the Non-Disposal Facility Element for the City of Industry.
- b) This permit is consistent with the standards adopted by CalRecycle, pursuant to PRC 44010.
- c) The design and operation of the facility is consistent with the State Minimum Standards for Solid Waste Handling and Disposal as determined by the Local Enforcement Agency (LEA), pursuant to PRC 44009.
- d) The facility is in conformance with applicable fire standards as determined by the Los Angeles County Fire Department, pursuant to PRC Section 44151.
- e) On June 22, 2000, the City of Industry adopted Resolution No. CC-1842 certifying the Environmental Impact Report (EIR). In 2003 the City of Industry approved a modification to the Conditional Use Permit and certified a 2003 Supplemental EIR that allowed for an increase in the maximum daily tonnage from 1,500 TPD to 5,000 TPD.
- f) An addendum to the 2000 Certified EIR was adopted under Resolution No. CC 2022-03 on January 27, 2022 by the City of Industry. The applicant obtained an approval from the City of Industry to expand approximately 38,850 square feet to the existing 108,450 square feet transfer station and material recovery facility building to include an organic waste receiving, processing, and diversion operation as well as other improvements (Drivers truck canopy & restrooms, and storage room).
- g) This permit does not supplant or modify local land use entitlements or local agencies' authority to enforce local entitlements. It is recognized by the LEA that the operator must comply with the provisions of the Integrated Waste Management Act (IWMA), state regulations and the terms and conditions of this permit as well as other regulatory requirements and applicable local land use measures which govern the operator's activities at the site. If the requirements inadvertently overlap, it is expected that the operator will comply with the more stringent requirement to maintain compliance. Non-compliance with another agency requirement may not constitute a violation of this permit, the IWMA, or state regulations.

14. Prohibitions:

- a. The permittee is prohibited from accepting the following wastes: hazardous, radioactive, medical (as defined in Section 117600-118360 of the Health and Safety Code), liquid, designated, or other wastes requiring special treatment or handling, except as identified in the current TPR and as approved by the LEA.
- b. Scavenging is not permitted by customers or employees at the site.

15. The following documents describe and/or restrict the operation of this facility:

Document	Date	Document	Date
Transfer/Processing Report	May 2023 (and any subsequent amendments approved by the LEA)	Addendum to 2000 EIR	December 2021
Environmental Impact Report (EIR) SCH #1999101001 and Supplemental EIR	June 8, 2000 September 25, 2003		

SOLID WASTE FACILITY PERMIT PROPOSED		Facility Name: Grand Central Recycling & Transfer Station	
		SWFP No. 19-AA-1042	Page 3 of 5

16. Self-Monitoring:
 The owner /operator shall submit the results of all self-monitoring programs to the LEA within 15 days of the end of the reporting period.

Program	Reporting Frequency
a. The types and quantities of non-hazardous wastes, including MSW, organics such as food wastes & green waste, CDI, separated or commingled recyclables received each day. The operator shall maintain these records at the facility for a minimum of three years. These records shall be made available to the LEA and CalRecycle upon request.	<div> <u>Monthly</u> (Due within 15 days of the end of each reporting period) </div>
b. The types and quantities of hazardous wastes, medical wastes, or otherwise prohibited wastes found in the waste stream and the disposition of these wastes.	
c. All incidents of unlawful disposal of prohibited materials and the operator's actions taken. Indicate those incidents which occurred as a result of the random load-checking program. Incidents, as used here, mean that the hauler or producer of the prohibited materials is known.	
d. Reports of all special or unusual occurrences and the operator's actions taken to respond to these occurrences. Notification to the LEA is required within 24 hours of the special occurrences. See condition 17.A.4.	
e. The number of vehicles entering the facility per day and per week. The transfer and collection vehicles must be totaled separately.	
f. Copies of all written complaints and records of complaints received by telephone regarding this facility and the operator's actions taken to resolve these complaints. See condition 17.A.5.	
g. Record of receipt of a Notice of Violation from any regulatory agency. Notification to the LEA within 24 hours is required upon receiving a Notice of Violation from any regulatory agency. See condition 17.A.5.	

17. LEA Conditions:**A. Standard Requirements**

1. The operator shall comply with all applicable State Minimum Standards for Solid Waste Handling as specified in Division 7 of Title 14 California Code of Regulations (14 CCR).
2. The facility shall comply with the approved site plan prior to implementing the proposed changes. The operator shall provide to the LEA, within the time specified, any additional information concerning the design and operation of this facility upon request by the LEA.
3. A copy of this permit and current approved TPR, as amended and approved by the LEA, shall be maintained at the facility so as to be available at all times to facility personnel and the LEA.
4. The operator shall maintain a log of special or unusual occurrences. Special occurrences include but are not limited to the following: fires, injury and property damage, accidents, explosions, receipt or rejection of prohibited wastes, lack of sufficient number of personnel pursuant to section 17410.2, flooding, earthquake damage and other unusual occurrences. Each log entry shall be accompanied by a summary of any actions taken to mitigate the occurrences. The operator shall maintain this log at the facility available at all times to the facility personnel and the LEA. The operator shall notify the LEA within 24 hours of any special occurrences. Call the duty officer at County of Los Angeles, Department of Public Health, Solid Waste Management Program at (626) 430-5540.
5. The operator shall notify the LEA within 24 hours of receiving any written or verbal complaint(s) from the public and/or any other parties, and in the case of any Notice of Violation(s) received from any regulatory agency.
6. This permit is subject to review by the LEA and may be temporarily suspended or revoked at any time for sufficient cause, in accordance with Division 30 of the Public Resources Code, Part 4, Chapter 4, Article 2, Section 44305 et. seq., and associated regulations.
7. The LEA reserves the right to suspend or modify solid waste operations when deemed necessary due to an emergency, a potential health hazard, or the creation of a public nuisance.
8. The operator shall notify the LEA, in writing, of any proposed changes in design or operation. In no case shall the operator implement any changes without first submitting a written notice of proposed changes to the LEA at least 180 days before said changes are implemented. **Any significant change as determined by the LEA would require a revision of this permit.**
9. The operator and/or owner shall notify the LEA of any plans to encumber, sell, transfer, or convey the operation or ownership to a new operator and/or owner, at least 45 days prior to the anticipated transfer, by written certification, including information deemed sufficient by CalRecycle and the LEA.
10. The maximum permitted daily tonnage for this facility is 5000 tons per day and shall not receive more than this amount without a revision of this permit.
11. The operator shall provide training to facility personnel in the identification of untreated medical waste as well as the proper action to take if this type of waste is received at the facility.

17. LEA Conditions (continued):**B. Particular Requirements**

1. The following operational controls shall be established to preclude the receipt and disposal of hazardous and prohibited wastes:
 - a. The operator shall install radiation detectors at the scales to detect radioactive materials at all times during the receipt of all incoming solid waste. The radiation detectors shall be properly calibrated and operational. Incidents of receipt of suspected radioactive materials, or warnings from the radiation detector, shall be reported immediately to the County of Los Angeles, Department of Public Health, Radiation Management Program at (213) 351-7897 and the LEA.
 - b. The operator shall comply with the approved Loadcheck program as described in the approved TPR to identify, and separate for proper handling, prohibited waste and materials. Any changes in this program must be approved by the LEA prior to implementation. The following conditions supplement the Loadcheck program:
 - (1) Solid waste vehicle loads are to be randomly inspected. A minimum of one (1) load-check shall be conducted for every 500 tons of material received, or portion thereof, received at the facility during each operating day. The LEA reserves the right to modify the load checking frequency as necessary. The operator shall inspect all waste vehicle loads if there is any reason to believe the loads may contain prohibited wastes.
 - (2) The LEA may increase the required number of load checks if it has reason to believe that the number currently required is inadequate to ensure compliance with the regulations and protect public health and safety or the environment.
 - (3) The records of load checks and the training of personnel in the recognition, proper handling, and disposition of prohibited waste shall be included in the load checking program. A copy of the load checking program and copies of the load checking records for the last year shall be maintained in the operating record and be available for review by the LEA and other appropriate regulatory agencies.
 - (4) The facility shall have an attendant or attendants present during public operating hours. The tipping floor shall be under continual visual inspection by facility personnel, such as spotters, equipment operators, and supervisors. Facility personnel performing duties required by the Loadcheck program shall be trained prior to assignment. Facility personnel are to be retrained on an annual basis and updated as necessary.
 - (5) Incidents of unlawful disposal of prohibited materials shall be reported monthly to the LEA as described in the self-monitoring section of this permit. In addition, the following agencies shall be notified immediately of any incidents of unlawful disposal of prohibited or hazardous materials:
 - (a) Duty officer, Los Angeles County Fire Department, Health Hazardous Materials Division at (323) 890-4045.
 - (b) Environmental Crimes Division, Los Angeles County District Attorney's Office at (213) 580-3273.
 - (c) California Highway Patrol at (800) 835-5247.
 - (d) California Department of Public Health (CDPH) Environmental Management Branch, Medical Waste Program at (916) 449-5671 for any receipt of untreated medical waste.
 - (6) Any prohibited or hazardous materials thus found shall be set aside in a secure area and as describe in the TPR to await proper disposition following notification of the producer (if known) and the appropriate governmental agencies.
 - c. The operator shall conduct all solid waste processing and separation activities only on designated areas as specified on the site plan.
 - d. The LEA reserves the right to require the operator to provide more stringent nuisance control measures if those control measures identified in the current approved TPR prove to be inadequate or ineffective.
 - e. The LEA reserves the right to require the operator to remove waste accepted at the site at higher frequency than 48-hours if the required 48-hour waste removal presents a health hazard or creates public nuisance.
