## Rates paid for Containers Per Pound at Recycling

## Centers

Recycling centers may issue the CRV refund by weight when consumers redeem more than 50 containers of a material type.

CalRecycle calculates the number of containers per pound to ensure refund value by weight equals the value by container ( 5 or 10 cents).

The per pound rate fluctuates with changes in the amount of material manufacturers use in each container.

## Flow of Funds to Support Program Operation

Beverage Container Recycling Program funds pay to run the program, subsidize recycling businesses, and expand redemption and demand for recycled materials.

## Processing Payments and Fees

Beverage manufacturers' processing fees help pay processors for the cost to recycle materials whose scrap value doesn't cover costs.

The processing payments CalRecycle makes to processors fluctuate with the market value of materials.

## 2021 Processing Payments

How Processing Fees and Payments Are Calculated (Jan. 1, 2022)

Processing payments and fees are paid for materials that cost more to recycle than scrap value is worth.

Processing payments equal the difference between scrap value per ton and cost per ton.

A formula in the law dictates processing fees.

| Material Type | Scrap <br> Value per Ton | Cost per Ton •• | PP per Ton | PF per Container |
| :---: | :---: | :---: | :---: | :---: |
